The service manual for the (Trio)Kenwood R-1000 has a lot on it.
Internal block diagram and pinout. I got the pdf from the mods.dk
site.

Somebody posted the schematic here in the newsgroup a few months back.
Interestingly simple set. It's got a tuned dual FET cascode RF amplifier.
So a preselector or pre-amp won't benefit it too much. Then a single
conversion to a ceramic IF filter (probably at 455 kHz). So it's
performance is probably similar to a Grundig FR-200 or S350.

It's probably got more sensitivity than is really good for reception if
there are any transmitters nearby. At least it's got an RF Gain control.
Looking closer, part of the RF Gain control is a 2k ohm potentiometer
right across the antenna terminals. Which go to an anti-parallel pair
of diode to act as a protection device. Ugh.

Conclusion, you want to use as little antenna on this as you need to
get the signals you want. Feed too much signal into this and, unless
you turn down the RF Gain, you'll get mixtures of strong signals and
images all over the dial.

The antenna terminals are set up so that it can use either an unbalanced
(coax) or balanced antenna. For an unbalanced antenna (a directly
connneted random wire, or coax), you hook the antenna connection to A1
(and the coax ground, to the ground terminal) and leave the jumper
between A2 and ground).

For a balanced antenna, remove the jumper and hook the two antenna lines
to A1 and A2. One such antenna is a folded dipole made of TV flatlead.
But you'd need a lot of room and it would probably only get the best
performance on one frequency band.

One antenna to try would be a small loop. Just a rectangle or circle
of wire, 3-5 feet on a side, perhaps taped to a window, and the leadin
formed by a twisted pair of the same wire, and hooked up as a balanced
antenna to terminals A1 and A2.

Damn, and I wrote this before I'd even read RHF's posting. I should
always remember to read the entire thread before replying.

You might want to consider buying a TimeWave ANC-4 unit (see URL:
http://www.timewave.com/)

These are great for electrical intference, computer interference and
many many types. I too at times run indoor ants for receiving and the
ANC units will kill most interference.

I also on the Ham Bands use a Yaesu FT-847 for HF and at times my 52"
RCA bigscreen will cause a few s-units of noise, again the ANC-4 will
take 100% of it out.

Al, your medulla is sticking out again. "Goy" means nation.

5. Who Is On 119955 kHz?

Newsgroup: rec.radio.shortwave
Date: 2005-01-06 00:24:58 UTC
From: JimmyT <jthorn@adelphia.net>
Message-ID: <voKdnaT0WonoGEHcRVn-pw@adelphia.com>
Source record: 4003

Does anyone know thru actual listening what shortwave station(s) is using the frequency of 11955 kHz besides Deutsche Welle? I have a current issue of the WRTH and know what stations are listed as saying that they are going to use that frequency.

6. Ham Operator Sets New Miles-Per-Watt World Record

Newsgroup: rec.radio.shortwave
Date: 2005-01-06 00:28:30 UTC
From: Stinger <contact@newsserveronly.com>
Message-ID: <Cy%Cd.32593$Gj2.28592@bignews1.bellsouth.net>
Source record: 4004

This story is posted on Slashdot today:

"A ham radio operator in New London, North Carolina correctly copied an 80 meter CW beacon in Wappingers Falls, New York, a distance of 546.8 miles. The kicker is, the beacon station, an Elecraft K1, was putting out 40.6 uW (40.6 millionths of a Watt) -- which works out to 13,467,980 miles per watt!"

The story and comments thread is here:

Damned earthlink - no html posts.
Anyway, thanks for the info GeorgeF.
Have had some decent reception today - most of the time not so good. I have been trying to hear RAI on 11.800 and there used to be some brazilians 11.9xx - have you run across any such ?
Thanks for the reply.

Hi GeorgeF,
Thanks for the info. Today has been fairly decent for reception, unlike recently. I have been hunting for RAI Rome Italy without much success, and R. Educacion Mexico City as well. Also, there used to be some brazilian stations in 25 meters around 11.9xx - have you come across any such signals where you are (where are you <s>) ? I live in the Puget Sound region (Seattle). TNX

No doubt. But the story isn't simply distance, it's that the transmitter
was putting out only 40.6 millionths of a Watt and it was copied correctly
by a HAM over 540 miles away.

Relax -- I'm still trying to hear Diego Garcia, and I very much appreciate
your alerting me when they're broadcasting. Sooner or later, I'm going to
bag 'em.

Usage dictates meaning.

http://judaism.about.com/od/sabbathdayshabb2/f/shabbesgoy.htm

http://www.thornwalker.com/ditch/olson_goy.htm

Then, there is the distressing outlook of Jewish religious texts:

ï¿½Just the Jews are humans, the Non-Jews are no humans, but cattle.ï¿½ (goyim ï¿½ human cattle) ï¿½ (Kerithuth 6b page 78, Jebhammoth 61a)

ï¿½The Non-Jews have been created to serve the Jews as slaves.ï¿½ - (Midrasch Talpioth 225)

ï¿½The Non-Jews have to be avoided, even more than sick pigs.ï¿½ - (Orach Chaiim 57, 6a)

ï¿½Sexual intercourse with Non-Jews is like sexual intercourse with animalsï¿½ ï¿½ (Kethuboth 3b)

ï¿½The birth-rate of the Non-Jews has to be suppressed massivelyï¿½ - (Zohar II, 4b)

ï¿½As you replace lost cows and donkeys, so you shall replace dead Non-Jews.ï¿½ ï¿½ (Iore Dea 337,1)

ï¿½To box an Israeli on the ear, is like to box on the ear of god.ï¿½ ï¿½ (Sanhedrin 58b)

"God (Jahveh) is never angry about the Jews, just about the Non-Jewsï¿½ ï¿½ (Talmud IV/8/4a)

ï¿½The human (Jew) has to pray every day three times, because Jahveh didnï¿½t make him a goyim, not a female and not an ignorant.ï¿½ ï¿½ (Talmud V/2/43b + 44a)

ï¿½Everywhere they (the Jews) come, they will be the princes of the lordsï¿½ ï¿½ (Sanhedrin 104a)

ï¿½I (Jahveh) make you (the Jewry) the ancestor of the peoples, I make you the selected one amongst the peoples, I make you the king over the peoples, I make you the loved one amongst the peoples, I make you the best one amongst the peoples, I make you the trsuted one amongst the peoplesï¿½ ï¿½ (Schabbat 105a)

ï¿½Towards a Non-Jew the Jew doesnï¿½t cause an adulteryï¿½ Punishable for the Jew, is just the adultery towards his next, that means the wife of a Jew. The wife of the Non-Jew is excludedï¿½ ï¿½ (Talmud IV/4/52b)

There is no wife for the goyim, they really arenï¿½t their wivesï¿½ - (Talmud IV/4/81 + 82ab)

ï¿½You (the Jews) have made me, Jahveh, the only true lord in the world, so I will make you the only ruler in the worldï¿½

ï¿½Who wants to be smart shall occupy himself with money matters, because there are no corner pillars in the Thora that are more important, because they are like a sparkling fountainï¿½ ï¿½ (Talmud IV/3/173b)

ï¿½Jews always have to try to deceive Non-Jewsï¿½ ï¿½ (Zohar I, 168a)

ï¿½Carry on trade with Non-Jews, if they have to pay money for itï¿½ - (Abhodah Zarah 2a T)

ï¿½Non-Jewish property belongs to the Jew who uses it firstï¿½ - (Babba Bathra 54b)

ï¿½If two Jews have deceived a Non-Jew, they have to split the profitï¿½ - (Choschen Ham 183,7)

ï¿½Every Jew is allowed to use lies and perjury to bring a Non-Jew to ruinï¿½ - (Babha Kama 113a)

ï¿½The possessions of the goyim are like an ownerless desert, and everybody (every Jew) who seizes it, has acquired itï¿½ - (Talmud IV/3/54b)

ï¿½The Jew is allowed to exploit the mistake of a Non-Jew and to deceive himï¿½ - (Talmud IV/1/113b)

ï¿½The Jew is allowed to practice usury on the Non-Jewï¿½ - (Talmud IV/2/70b)

ï¿½When the Messiah comes, all will be slaves of the Jewsï¿½ - (Erubin 43b)

I doubt if this may help (it never did for me) but FWIW, try a high pass
filter
or two on the coax input to the TV(s).

Dear Michael,

You bet! Play great music, don't they?

It's been coming in loud-and-clear the past few days.

Believe it or not, I discovered it by accident while playing with my Lafayette HE-10(!) receiver (which I like to use every couple of months or so just to rekindle memories).

Of course I had my Wellbrook ALA 330S hooked up to the Lafayette (so it wasn't "really" like "old times," but what the heck ...

As soon as I identified the station (they announce "Radio Nacional do Brasilia"), I hooked the antenna back to my AOR AR7030 Plus which gave far better reception and then ran the sound through my stereo system.

I'm listening to the station as I write (no music just now; male and female announcers in Portuguese).

It's really fun and "magic," isn't it?

Best,

Joe

P.S. See my next "post" about the Wellbrook ALA 330S Active Loop Antenna.

28. Victor Goonetilleke says amateur radio saved lives in Sri Lanka

Newsgroup: rec.radio.shortwave
Date: 2005-01-06 02:23:03 UTC

Media Network correspondent Victor Goonetilleke, 4S7VK, who is president of the Radio Society of Sri Lanka, believes that "uncomplicated shortwave" radio saved lives. "Ham radio played an important part and will continue to do so," he said in an e-mail. Until 28 December the Radio Society of Sri Lanka operated a shortwave radio link between Hambantota and the Prime Minister's disaster management office, and government offices in the stricken area. "We closed the link after the police got a communications link up in Hambantota," Victor said. "We went in because the District Secretary's office only had a satellite phone and communications were difficult." The Hambantota station was operated by Asantha Illesinghe (4S7AK), Dimuthu Wickremesinghe (4S7DZ) and Kusal Epa (4S7KE). However, there was one major problem: batteries were running out, and there were no generators to recharge them.

Wednesday, January 05, 2005

The special one-day Dutch radio station Radio 555, which operates tomorrow to raise money for the Tsunami disaster fund, has its own Website at www.radio555.nl with programming information and details of how to donate money. A live audio stream will be available. For listeners in Europe, North Africa and the US, Radio 555 will also be broadcasting on shortwave on the 6 MHz band. For the exact schedule see the station's Website. The site, which is in Dutch, also mentions that the studio will be shown live on the Nederland 2 television network from 0500-1600 UTC, and a video stream will operate via the Website.

Today, radio stations in the Netherlands observed a 1 minute silence at 1100 UTC. On TV and in most public places, a 3 minute silence was observed. Most countries in the EU also observed silence for 3 minutes, with the exception of Denmark which already held its own silent period on Sunday.

For those interested, there's a picture of this little radio at
<http://www.geekzone.co.nz/content.asp?contentid=3856>.

It's a great concept. An MP3 player for when you don't have wi-fi, and
Internet radio for when you do, all in one box. A lot of my "radio"
listening these days is done via MP3 file timeshifting, so this would be
right up my alley.

Wed, Jan 05, 2005

By Nick Higgins

An around-the-clock transmission capacity would not have helped Radio Australia warn people of the tsunami, the broadcasters head said yesterday.

Mr Jean-Gabriel Manguy, who divides his time between homes in Melbourne and Bethanga, said there had been no warnings to broadcast.

"It took everybody by surprise ... although I understand that in some reports people in India were aware of the tremor and expected a tsunami," Mr Manguy said from Bethanga yesterday.

Mr Manguy is anxiously waiting for contact from his older brother, Jacques, who was in southern India when the tsunami struck.

Until severe budget cuts in 1997, Radio Australia had a 24-hour shortwave broadcast to Indonesia and other parts of Asia.

The shortwave service was partly restored in 2000 and there are now daily nine-hour shortwave broadcasts throughout Indonesia.

Mr Manguy said the shortwave broadcasts were supplemented by Radio Australia being available through 155 Asian FM stations,|which broadcast in English, Thai, Indonesian, Cantonese, Japanese, Vietnamese and French.

Thirty of those stations are in Indonesia and reach an estimated seven million listeners.

Mr Manguy said the disaster had shown 24-hour transmission would have been valuable in the aftermath and during rescue and relief operations.

"Natural disasters and political violence are difficult to predict or forewarn but as soon as they happen people need to know what is going on and local coverage is often censored," he said.

Just hours after the tsunami Radio Australia journalists spoke to the Indonesian Vice-President, Mr Jusuf Kalla.

Budget cuts in the late 1990s resulted in a halving of Radio Australias staff, which now number 76.

Radio Australias annual budget is $13.5 million but in 1997 it was twice that amount.

A transmitter near Shepparton broadcasts to eastern parts of Indonesia and Pacific Ocean countries while a transmitter at Darwin broadcasts to Indian

Ocean regions.

Eric, if you look in the latest 2005 Passport you will see that the IP3 @ 5 Khz rating for the RX-340 is poor - this means that if you are DXing in MW or Tropical Bands with a strong station near your weaker target station, then the RX-340 can't resolve it, whereas various other radio's that have a much more respectable IP3 @ 5 Khz performance, like the AOR 7030, Drake R8B and Icom 75 will be able to resolve the weak signal whereas the RX-340 will not be able to do so.

Close in DXing with nearby strong signals is a feature of trying to get weak stations that are 5 Khz or nearer to other more powerful signals.
Several DXer's have indicated that Passports numbers/statistics are correct and that the RX-340 cannot render audible signals that are close by to more powerful stations.

The Icom 756 PRO III is superb in this respect as I have indicated in my comparison review

33. Wellbrook ALA 330S on MW

Newsgroup: rec.radio.shortwave
Date: 2005-01-06 02:38:50 UTC
From: Joe Analssandrini <analssandrinij@yahoo.com>

Source record: 4031

Hello All,

Many people (including myself) have questioned the performance of the Wellbrook ALA 330S Active Loop Antenna on MW.

I purchased mine last March based on good reviews in PASSPORT TO WORLD BAND RADIO 2004 (I was quite desperate at the time, due to local restrictions on outdoor SW antennas [none allowed] and EXTREME local electrical noise). Frankly, as I rarely DX on the MW band, I was concerned only with SW performance.

I have my antenna mounted in my attic atop a Radio Shack rotator.

According to the 2005 PASSPORT, the MW performance has been improved on the latest production units.

This must have included mine.

It was good enough to pick up the Ukraine on 1431 kHz last night (coming in clearly as WSNW, 5 kW, Newark, NJ, about 100 miles from my location, faded out. The fades would last about one or two minutes, enough to clearly hear the Russian language broadcast which, according to the WRTH 2005, runs 1200[!] kW).

I was also able to hear various Canadian and Cuban stations loud-and-clear.

I only spent about an hour and a half listening to the MW (0330 - 0500 UTC) but it was quite interesting. This was the first time, since I have owned it, that I have tried MW DXing with it (my receiver is an AOR AR7030 Plus).

In any event, it shows me that the Wellbrook ALA 330S is an adequate antenna for those who wish to do some casual (or maybe more) MW DXing.
Best,

Joe

Hiya, Joe...

Thanx for the confirmation. I heard them ID, but I wasn't 100 % sure of what I heard. I was using my R-75 and "Frankenstein" 200' roof wire antenna. The audio was clear and the strength was about S-7 to S-9. There was some moderate QRN at times and it had constant fast fade in/out that was bordering on being able to be described as "flutter". I checked out the Passport blue pages and it shows as Radio Nacional, Brazil, so I figured I had my ID correct They were indeed playing some great music. I'll be returning to it regularly now as long as the signal holds up :-)

Thanx again !!!

Michael

Dear ShortwaveMan,

I don't know what your apartment is like or what you are prepared to do, but I had a similar problem. As a matter of fact, last year I was quite desperate. I live in a small townhouse and the community is a source of EXTREME local electrical noise, what with Christmas lights, computers, often-defective LP Sodium and Mercury Arc-vapor street lights, and high-tension lines not a quarter mile away. You can imagine what all of the above did to my SW listening. I won't go into the various "fixes" I tried over the years (they have been "posted" on this site and elsewhere), but I FINALLY found the one! It is the Wellbrook ALA 330S Active Loop Antenna.

You can investigate it here:

http://www.wellbrook.uk.com/

Note it is quite expensive (probably around $400 now, due to the poor dollar-to-pound ratio), somewhat convoluted to buy (I bought mine from THE SHORTWAVE SHOP in the UK, the only dealer which sells it. They accept credit cards. You can buy from the factory, but only with a check), and it's BIG - the loop is about 3-feet in diameter. I have mine mounted in my attic, but mounting is not critical. It COULD be mounted in your room (near a window) if your significant other is broad-minded, outside mounted on a deck, if you have one, or some other "creative" place,

This antenna is positively FANTASTIC. It dramatically lowers both atmospheric AND local electrical noise. In other words, it greatly increases the signal-to-noise ratio of the signal you are trying to hear.

An example: I live on the East Coast of the US, yet I have been able to regularly hear Radio Australia's 2200 - 2400 UTC broadcast on 21740 kHz. The signal comes in at only S4 - S7, but is perfectly clear and fully listenable.

At the very least, look it up on the web. I completely sympathize with your problem and I hope you are able to come up with a satisfactory solution.

Best,

Joe

Radio Nacional and Radio Nacional do Amazonia both come from Brasilia in the heart of Brazil. They have an extensive network of less powerful stations that operate the way our "am" stations do here, in providing coverage for their people. Those stations' signals don't die at the border <s> and if you like hunting for stations, they provide a good challenge.

Hi Eric,

I took your advice and put the comparison files on my web site. I made about a dozen more comparison recordings originally, but kept these as the main examples. Note that the recording level on the R-75 clips are somewhat low; bump up the volume on your MP3 player to hear the audio better.

All recordings were done with the receivers' mode (USB), bandwidth (3.3 or 4 kHz), and AGC (fast) matched as closely as possible.

1) All India Radio, Bangalore 9425 kHz, just past fade-in.

http://www.guyatkins.com/files/r75_9425khz.mp3 audio's there, but poor.

http://www.guyatkins.com/files/RX340_9425khz.mp3 mostly noise.

2) SABC Meyerton, 3320 kHz, during a poor propagation evening, an hour or so past Meyerton SR.

http://www.guyatkins.com/files/r75_3320khz.mp3 weak signal audio.

http://www.guyatkins.com/files/ra6790gm_3320khz.mp3 also weak, but slightly better on the Racal.

http://www.guyatkins.com/files/RX340_3320khz.mp3 mostly noise.

3) Example of Carl Moreschi N4PY's RX-340 front end modification. Mod is switched in and out on a weaker MW station that's 10 kHz away from a powerful
local (I forget the call letters of the weak station, but it was in Nampa, Idaho). The poorer/weaker portions of audio are the RX-340 "barefoot" without the
mod, presumably indicating desensing/RF blocking occurring.

http://www.guyatkins.com/files/RX340_Mod.mp3

Mike, this sounds as good as the "Fifty-foot Extension Cord" which actually allows ANY AC-powered radio (not only short wave receivers) to be moved ANYWHERE in a fifty-foot radius! (Watch out for walls or open windows.)

Anybody want to bid on one of those? My price is cheap but wait until you see my shipping charges!

Best,

Joe

I lokked at that and am amazed that a balun can give 5dB gain! What I would expect is that it could help in reducing the noise floor and thus sound like you have gain; or provide a better impedence match (at some frequency(ies) to allow more signal to pass - perhaps. But gain, nope - I just don't see it unless I have totally missed out on some part of my radio education.

On the DX-160 there is an RF amplifier after the antenna input. Its a small field effect transistor and is easy to overload with pre-amplified input.

If I remember correctly the antenna connection is also complicated by a switch which selects a ferrite rod for medium wave.

Actually, it's been almost 10 years and the d--- thing ought to be
postponed AGAIN as it's obsolete even before it's introduced!

Huh? If I'm mistaken, which could be, at least give me a hint why I'm
wrong and I will follow up on it. I know this isn't rocket science
as I work with rocket scientists and many know little about radio.
Until shown otherwise I stand by my statement that the balun will not
add gain to the antenna - though it has other characteristics that
will improve the received signal.

Have a good one DX,
Howard
ps - I don't use a portable as my primary receiver 8-}

> Huh? If I'm mistaken, which could be, at least give me a hint why I'm
> wrong and I will follow up on it.

Oh, ignore our professional idiot.

You did miss something, however. The impedence mismatch makes the energy transfer from the antenna to the receiver to be inefficient. 5 dB is just about right for any 9:1 matching transformer (from an end-fed wire to a 50 ohm load).

I'm not going to attempt to explain the theory behind it since I will certainly leave something out and the peanut gallery will come to life again, but think about SWR and reflected power and how bad the mismatch can be without the transformer vs. how bad it would be with the transformer.

For a practiacal demonstration try (BRIEFLY) to feed a speaker from a tube amp without using a matching transformer. (You'll want a blocking capacitor, though.)

> I know this isn't rocket science
> as I work with rocket scientists and many know little about radio.

:-)

> Until shown otherwise I stand by my statement that the balun will not
> add gain to the antenna - though it has other characteristics that

No, no *gain* added to the antenna, but better power transfer to the radio from the antenna. 5 dB is what I've measured as well. I use ICE prepackaged transformers and Mini-Circuits transformers.

Sweden and Norway observed the silence at noon CET, so I'd imagine
local noons were in effect everywhere.

I think Bernt has the same feelings as I do. Meaning most SPAM comes from Hotmail, Yahoo etc addresses. And this means that mail coming from these addresses are by that reason often regarded as SPAM even if they are not. I am also staying away from them.

What I wrote was meant to indicate that this thread was about AFRTS
carrying the NPR news feed. AFRTS is a part of the Defense Department,
and if NPR's news coverage is considered reasonable
and obviously even desirable, by the Defense Department, maybe
the "slant" that RHF and you see in it is a product of your own
extremist beliefs. Armed Forces Radio's audience is probably above
average in education level, but it isn't an academic elite, and I
don't think military personnel are particularly more liberal than
the country at large.

Of course maybe it's one of them there secret plots. How's the
hunt for the secret communist backers of Air America going?

There was a thread on tubes a month or two
back. Just do a web search on "vacuum tubes"
and you'll get a coupla dozen on-line vendors. I've
bought from 3 or 4 that show up on the first page
of the Yahoo search and they were all fine.
Radio Daze at www.radiodaze.com and AES at
www.tubesandmore.com pop to mind,
but they're all ok. Check prices, they can vary
a lot from vendor to vendor.

$500, huh? I don't know....$500 puts you within striking distance of quite a number of receivers, both portable and tabletop--many of which weren't made in China. I certainly wouldn't want an E1 from the first production run! Better to wait until they get the kinks worked out, say in 2008.

Yes, that reporter's question was typical of NPR correspondents, however,
that's not a political matter, it doesn't indicate "left" or "right", it
indicates an effort to evoke some emotion from the person being interviewed.
And, I really don't mean to start an argument with you, jd, honest, but your
implication that the "political right" does not also prefer symbolism over
substance is pretty doggone funny.

Again, your comment is relevant if your "lower power, please read" is equal to or less than 40.6 millionths of a Watt.

I'm certainly no expert on HIFER beacons, but I think it's safe to say they broadcast at a significantly higher power than 40.6 MILLIONTHS of a Watt.

The test of MW performance is daytime reception; at night you might hear anything with even so-so sensitivity. All signals are locals, almost, when they're faded in. The problem is getting rid of them, at night, mostly.

I find my ALA1530's are less sensitive in S/N than the McKay Dymek DA100E whips, more or less uniformly; but if you have an electrical noise problem, that can be otherwise. My location is pretty quiet.

The built-in nulls in the loops though comes in very handy. You can permanently get rid of the most annoying local station, leaving phasing to deal other problems.

Here you go...

''For each of the three misperceptions, the study found enormous differences between the viewers of Fox, who held the most misperceptions, and NPR/PBS, who held the fewest by far. Eighty percent of Fox viewers were found to hold at least one misperception, compared to 23 percent of NPR/PBS consumers. All the other media fell in between.

CBS ranked right behind Fox with a 71 percent score, while CNN and NBC tied as the best-performing commercial broadcast audience at 55 percent. Forty-seven percent of print media readers held at least one misperception.

As to the number of misconceptions held by their audiences, Fox far outscored all of its rivals. A whopping 45 percent of its viewers believed all three misperceptions, while the other commercial networks scored between 12 percent and 16 percent. Only nine percent of readers believed all three, while only four percent of the NPR/PBS audience did. ''

''Trust but verify''
-Ronald Reagan

''Dear Mr. President, Speaker Hastert, Senator Frist, Senator Reid,
Ms. Pelosi, Mr. Delay:

We write because we believe there were numerous, serious election
irregularities in the recent presidential election, which resulted in
a significant disenfranchisement of voters. In particular, the massive
and unprecedented extent of irregularities in Ohio raise grave doubts
regarding whether it can be said the electors selected on December 13,
2004, were chosen in a manner that conforms to Ohio law, let alone
federal requirements and constitutional standards. In this regard, we
are attaching for your review and consideration an important and
comprehensive Report regarding election law irregularities in Ohio
prepared by the House Judiciary Committee Minority Staff.

As a result of these massive irregularities, we believe three
important steps must be
taken:

First, consistent with the requirements of the United States
Constitution concerning the counting of electoral votes by Congress
and Federal law implementing these requirements, some of us plan to
challenge the presidential electors from the State of Ohio when
Congress meets in joint session on January 6 at 1:OO P.M.

Second, Congress should engage in further hearings into the widespread
irregularities
reported in the recent presidential election. It is clear to us that
the problems are serious enough to warrant the appointment of a joint
Committee of the House of Representatives and the Senate to
investigate and report back to the Members.

Third, Congress needs to enact further voting and election reforms to
restore our peopleï¿½s
trust in our democracy and to make sure that these wide spread
irregularities do not happen again.

There is no more important right in our democracy than the right to
vote. We look
forward to working with you on a bipartisan basis to strengthen and
protect this right.

Sincerely,

Here's the point...

That's as stupid as reports I've seen over the years from some folks claiming to be the 'first' to hear a particular station...

That of course is absurd... how did they know that no one else heard it?

Perhaps the 'first' to report hearing it to whomever they reported it to, but not necessarily the 'first' to hear it.

The same logic applies to this case.

Hi Jim,
My copy of Passport is out of date I think, but I see Sri Lanka BC in that vacinity but Passport does not show a transmission then. I also see R. Deutsche Welle in an unspecified language about then. Sri Lanka has a generally good signal out here on the West Coast int he mornings. Keep listening for a few days and see if an ID comes through for you .

I've changed outgoing text wrap on this machine to 80 characters, just for you.

Hopefully this won't screw up people who have mail programs that wrap text to fit their screen.

The fact the lever style voting machines have been around for a long time doesn't make them ineffective. We use lots of old machine designs because we haven't found anything that does what they do better.

> Nobody puts important mail outside like that. You drop it off at the
> Post Office.
>

It would be interesting to see a survey on that, I doubt most people go to the post office for much of anything besides buying stamps or mailing packages. Around here, many grocery stores sell stamps as a convenience because folks just don't like going to the post office.

Would a stamp be considered a Poll tax?

Seriously, I think the system you're promoting is more expensive, less accurate, and much easier to tamper with than the one I've suggested.

Name a community where they've had "suspicious" election results, and I think you'll find the questions come from votes cast on some form of paper ballot, or an electronic voting machine.

Here's a story about how King county in Washington State had 3500 more votes than voters, casting doubt on the results of the Governors race.

Had exceptionally fine reception of African stations on 49m and 60m here in California, US on the morning of January 6, 2005.

Notably, Accra, Ghana on 4915 at about 0630z was extremely strong (s9+20) and easily heard in English, with the OM listing lottery numbers, IDs at 0631 and nifty music. Best reception in recent memory.

Also, R. Burkina on 5030 at 0640z easily overpowered University Network, with strong S9 and clear signal in FF, interview with many mentions of Ouagadougou and discussion of radio presentations. Never heard this well before. This station lists as 50kW, but did they get a new transmitter or antenna? This signal just kept getting better past 0700, with tres cool African music.

Other Africans on 4777, 5995 and 7125 also had good signals, somewhat better than commonly heard. Did not try R. Bangui, Central African Republic on 31m but I'll bet pocket change that they were well heard too.

An ocean away, Arnie Coro at RHC reports on January 5 that R. Rebelde, Cuba, has a new 50kW transmitter on 5025 - how old? Their signal seems newly potent...Arnie himself welcomes reception reports on R. Rebelde for QSLs. Sure would like to hear R. Quillabamba again though...

So you trust the future of our country in computers running Windows?

''Blue screen of death crashes Gates at CES
Opening keynote does not go entirely to plan
Iain Thomson, vnunet.com 06 Jan 2005

Bill Gates's legendary luck failed him during his keynote presentation at the 2005 Consumer Electronics Show in Las Vegas.

His demonstration of Microsoft Media Center crashed during the presentation on integrating digital photography, and later a Microsoft product manager failed to access the internet with a Tablet PC.

A new game, Forza Motor Sport, also triggered the dreaded Windows blue screen of death.

The presentation started on a jokey theme, with late-night TV host Conan O'Brien presenting a mock version of his own show and a video diary of his and Bill's 'lost weekend' in Las Vegas.

"I got too drunk, I woke up with a hooker," O'Brien said. "Bill got too drunk, he woke up with an Apple computer."

O'Brien said that he was unable to criticise Microsoft because it had implanted a Pentium in his brain, and suggested that Gates should be played by Milhouse from The Simpsons.

But his banter was less welcome when things started to go wrong. "OK, and right now nine people are being fired," O'Brien said as they waited for a slide show to appear.

Gates traditionally has a reputation for being lucky at showing off software to its best effect.

A major slip occurred at a Windows 98 demo at Comdex in 1998 that went into blue screen mode, but Gates returned the next year to successfully show off the progress that had been made.

That would depend upon whether one had the satellite phone or not, and whether it was working. If not, I'm certain that the individual would call any which way they could.

Do you ever think at all, 'tard boy? Or are you permanently stuck on stupid and locked on dumb?

Now go tote it.

133. Who Is On 11955 kHz?

Newsgroup: rec.radio.shortwave
Date: 2005-01-06 19:19:58 UTC
From: JimmyT <jthorn@adelphia.net>
Message-ID: <btednfxab6n6EkDcRVn-sg@adelphia.com>
Source record: 4133

I'm reposting this message as I accidentally mistyped the frequency in the Subject line of the original message and added more info regarding the broadcast times.

+ +

Does anyone know thru actual listening what shortwave station(s) is using the frequency of 11955 kHz besides Deutsche Welle? I have a current issue of the WRTH and know what stations are listed as saying that they are going to use that frequency. There seems to be a 24-hour station on this frequency - at least from 1300 to 2400 GMT.

Why retube? I think retubing is wasteful, unless you are using tubes still in production and somebody else is paying for them.

In my expirence, most old tubes in old radios are good. Paper capacitors are the biggest problem by far, although I don't think your Drake has paper caps. I've seen a higher percentage of drifted carbon compisition resistors than the percentage of weak tubes.

Trouble shooting by tube substitution is a valid procedure, but there's no need to have more than one of each tube number, and good used tubes work just fine for that purpose.

>

> where r good sources for new tubes in USA?
>
> tx

I've had good results from

Triode Electronics (mostly audio tubes)

Brent Jessee Recording (audio and radio)

Fair Radio Sales

ESRC

Hamfests

Ebay vendors

I've had generally good, but not perfect, results from Antique Electronics Supply. AES has a very large inventory of tubes and an inclusive catalog. The other vendors seem to try to beat the AES price.

Take a look at Universal's prices on the Icom R75, Yaesu FRG-100B, Palstar R30 and Satellit 800. All of these tabletops are available for $600 or less. As far as portables are concerned, the humble yet dependable Sangean ATS-909 is available for a mere $240. I don't know what Universal is selling the Sony ICF-SW07 for, but I'm sure it's less than $500 and the 07 will probably eat the E1 for breakfast on the SW bands. There are other alternatives as well, both new and used.

This thing reminds me of the guy who came up with
the tiny-tenna a few years ago and made a couple
thou$sand$ selling them to shortwave radio listening
PAY-triots and other like-minded suckers.

Isn't it just amazing how you can make big bucks from
useless crap if you market the same to morons?

Bwaaa hahahahaha! I hope this guy sells 500 of em to the
goofballs that listen to Alex Jones and Coast to Coast
AM! I mean, why should C. Crane be the only guy
on the block who sells chinzy Chinese made radios
at a 2000% markup to geeks, dopes and PAY-triots...?

<<<<SNIP>>>>

This is too damn funny!

If you read the article, every one of the "misperceptions" they mention is simply a liberal talking-point not taken at face value. OF COURSE they're going to agree with NPR!!! Thank you for illustrating the point we were making, David.

For those of you too jaded to bother with David's propaganda, the points they take as fact are:

(1) That US troops DID NOT find evidence of close pre-war links between Iraq and the al-Qaeda terrorist group (they have, and it has been extensively documented).
(2) More carping about whether or not we found WMD's -- Some would argue that even the small quantities of sarin or other agents we have found would meet the "wmd" requirement.
(3) World public opinion did not favor Washington's going to war with Iraq. This is a non-issue, since our allies DID. Screw "world opinion" -- I want what's best for the USA. ("FranceGermanyRussia" and the usual US-haters (China, Syria, et. al) didn't.)

The funniest thing about this whole deal is that David will be too intellectually challenged to understand this.

Who cares what garbage sites you bring up. I never see them on TV or
reported. But I have seen a *coverup by the church *higher ups to allows
catholic priests to be moved to different locations so they can suck young
boys cocks and fuck them in the rectum like good boys of G-D.

Here's the cover up of 13 faggot catholic "men of G-d" who sucked young boys
cocks and/or placed their dicks in innoccent boys asses. Isn't it nice for a
young lad to come to a church for guidance and direction and get molested
and their penises sucked by these catholic men of G-d?
http://www.buzzle.com/editorials/10-16-2002-28359.asp

More cock sucking coverups by the Vatican :)

http://www.ianpaisley.org/article.asp?ArtKey=silent

Here's a whole BIG list of catholic homosexual faggot priests who like to suck young childrens cocks. Funny they don't like girls at all.....

Are these "goy cocksuckers"?

http://www.mako.org.au/holyhellc1.html

I betcha more of your "men of G-d" have swallowed more young boys cum per capita then any other race of rats on earth??

Lucky

I was wrong. It seems there are killers among these life ruiners. They like to molest little children {boys} and suck the innocents out of them killing them for life. What a bunch of good guys. They make life on earth warm and safe for the little ones.You must be proud of your religion and men of G-d....

If he thought that he set me straight, he was mistaken. You did not indicate that you heard an ID, and for him to state that you did is just plain crazy, how would he know, based upon your post?

Y'all get back to me.

Your second post never arrived here...

But if you did indeed hear them ID, then why did you ask in the first place?

That's a simple question only you will be able to answer.

Try reading the line from the second post again that I have in quotes above... I do not speak the language and was unsure of what I heard. Why bother having a sw news group if legitimate on topic questions and answers are going to be mocked and invalidated by others ???

I'm not mocking or invalidating anything. Perhaps YOU need to go back and read
MY original post.

Bottom line, had you indeed ID'd it, you would not have had to ask the original
question.

Pretty simple, in my view.

Yes.... Exactly... If I was sure of what I heard I'd have wrapped up my ID. I was not 100 % sure as you now know, and I decided to post the question in hopes that I would get further confirmation of what I thought I was hearing from other ng posters.... Your antagonistic post stated that I should "actually try listening". Your response would suggest to me that you think I did not or would not try listening to ID it myself. I did indeed try listening and I did indeed hear them ID, but I was unsure of what they said. I also checked the Passport blue pages too, which gave me further indication that it was Radio Nacional Da Amazonia. What is wrong with posting my question to help confirm the log and why do you assume I did not try listening ???

Michael

Maybe I'm just a pessimist, but I have a bad feeling about the E1's first production run. So, I wouldn't want to 'take the plunge' too early in the game. On the other hand, unless lots of people start buying this radio after its release, there won't be a second production run.

In the photos I've seen, the radio looks fairly big and fairly heavy. It's body appears to be all (or almost all) plastic, with lots of knobs sticking out and a really large LCD screen--just waiting to get scratched up.

Let's face it: A Grundig it AIN'T.

I'm not a big fan of the Satellit 800, but I bet it's still in production long after the E1 has bitten the dust.

Might want to scan 15 meter ham band every so often for VQ9LA on Diego Garcia. I heard he was on 80 meters in December but that would be a tough catch. I talked to him on 20 meters a few years ago but propagation was much better then....

Where I work they installed tv's in the cafeteria at some point and
they carried CNN for a couple of years, then suddenly switched to
Fox about 6 months ago. Then about a month ago they switched back
to CNN. Maybe Nickelodeon is next.

I don't think price is the issue. The two NPR news programs are pretty
expensive (at least that's what the local affiliate
tells you when it's fundraising time). Also I don't know what kind of
budget constraints AFRTS operates under. Your point that NPR provides
one of the only national-scale radio news feed is certainly well-taken
though.

Nonetheless, I think if NPR really were as biased as some on this group
think, some stink would have been raised in the Pentagon. They don't
have to offer four hours of news a day. Fox has a radio feed, on
satellite, maybe they can switch to that. Probably make some of the
posters on this thread happier.

185. "D" Layer in the Ionosphere

Heard someone on WBCQ saying there were problems with the "D" layer in the ionosphere...
- which is probably why they (WBCQ) dissappear at around 7:00 P.M. EST..

Anyone have a clue as to Why WBCQ , broadcast from Maine,has been skippings over the Northeast for the last 3 or so months....?

Problems in the "D" layer ??? Hmmm.... The "D" layer is the lowest part of the ionosphere and it exists only in the day time. When the sun is above the horizon is charges up the ionosphere and the "D" layer is created. The "D" layer attenuates lower frequencies. Thats why most everything below a given frequency can't be heard during the day time while stuff higher up on the bands is tight enough to squirt through.

Is the signal going long at night ??? That happens whey the signal travels higher up in the ionosphere on its first trip up and is reflected back at an angle that skips right over the close areas. Maybe that is what is going on.

Michael

OK. I guess I don't really disagree
with what you're saying. While NPR may
be more or less a liberal outlet, or at
least have a liberal sensibility, its news
reporting is more complete than mostly
anything else in broadcast, and they do make
an effort to represent both sides of issues
which are controversial. Back when my company
was piping Fox news into our cafeteria, most
of their "news" coverage during the election
run-up seemed to be of the "John Kerry, threat or menace?"
variety.

By the way, even though RHF likes your logic
and reasoning (kiss of death right there),
your rooster analogy was
totally inapt. The rooster argument is a classic
"post hoc ergo procter hoc" while mine might
be judged a "non sequitur."

193. some disappointing problem found on DEGEN DE1103.

Newsgroup: rec.radio.shortwave
Date: 2005-01-07 03:46:20 UTC
From: bclman2002@yahoo.com
Message-ID: <af4b6242.0501061946.67b7e80b@posting.google.com>
Source record: 4243

I live in Korea and bought my DE1103 from liypn.
My radio was manufactured by degen on 7, 17, 2004.

My local power house mediumwave stations are on 1323 and 1224 kHz.
1323kHz transmitter is located near my house.

1st weak point : 1323kHz HLKH is heard over overall shortwave
spectrum with rod antenna fully extended or wire antenna connected.
It's annoying me. This makes my 1103 useless.
My 7600gr radio doesn't show this strange phenomenon.

2nd weak point : two signals are heard on 1422 kHz with 1103's
internal ferrite bar in day time.
I think it is 3rd order product. (1323*2)-(1224)=1422.
But with my 7600gr, the ghost is barely audible on 1422 kHz.

3rd weak point : SSB sound is always distorted with very strong
signal. I thought my 1103 was defective, but I found this 3rd weak
point wes seen in Passport2005 review. maybe it is common problem on
all de1103 radios.

Passport review says 1103's dynamic range is superior, but why does
2nd weak point occur?

Is there anyone who experiences the 1st weak point or explains me
why this annoying phenomenon happen? The annoying problem is not
included in Passport review2005.
I bought a defective unit from liypn?????

I'm satisfied with my 1103, but experiencing the three annoying
points on my 1103, I can't trust Chinese products.

194. "Coax-Seal" Sealant & "Stuf" for your Antenna's RF Connections [Weather Proofing]

Newsgroup: rec.radio.shortwave
Date: 2005-01-07 03:50:03 UTC
From: RHF <rhf-newsgroups@pacbell.net>

"Coax-Seal" Sealant & "Stuf" for your Shortwave Listener
(SWL) Antenna's RF Connections [Weather Proofing]

MIKE,

It is Not good to use because it contains Chemicals that
can cause the 'mechanical' Electrical Connections to
"Corrode" {form an oxide} that will 'inhibit' the Electrical
Conductivity of the mechanical Electrical Connection.

However, If Silicon Sealer is 'all-you-got':

1. First wrap the 'mechanical' Electrical Connections
with Black Electrical Tape.

2. Second use a Brush to Paint-Smear the Silicon Sealer
all over the Electrical Tape and an Inch or two beyond.

THE BETTER IDEA IS TO USE "COAX-SEAL" SEALANT
The-Better-Way is to use "Coax Seal" as others have
recommended here.

COAX-SEAL => http://www.coaxseal.com/
<http://www.radioshack.com/images/ProductCatalog/ProductImage/278/l278-1645.jpg>

How to use Coax-Seal Sealant for Outdoor RF Connections
HOW-TO-USE => http://www.naval.com/coax-seal/
<http://www.coaxseal.com/How%20to%20Use%20Coax-Seal.htm>

WHERE-TO-BUY: Coax-Seal Sealant for Outdoor RF Connections
UR => http://www.universal-radio.com/catalog/cable/1194.html
RADIOSHACK => http://tinyurl.com/64jvl
RadioShack Catalog # 278-1645
RADIO-BOOKS => http://www.radiobooks.com/products/cseal.htm
AES-HAM => http://tinyurl.com/3r7ue
HRO => http://www.hamradio.com/cgi-bin/uncgi/ase?MAN=Universal

TAKING THE EXTRA-STEP IS "STUF" {In-a-Tube}
STUF Dielectric "Water Proofing Filler" for Coax Connectors
STUF => http://tinyurl.com/5gktb
<http://www.mjsales.net/items.asp?FamilyID=503&this_Cat1ID=266&Cat2ID=34&Cat3ID=27>

STUF => http://www.wavehunter.com/stuf.htm
STUF-IMAGE => http://www.wavehunter.com/stuf1.htm
STUF => http://www.aesham.com/pdf/p125-133.pdf
STUF-TUBE => http://www.crossdevices.com/

- Stuf contains Teflon.
- Just fill the coax connector with STUF and tighten.
- STUF closely simulates this material used in Coax
Cable's Dielectric Properties, minimizing the initial
insertion signal losses while maintaining signal level
over time with the aging of the connection.

Unlike Larry you at least acknowledge the leftward slant but I perceive
that it is a little more than slight.

The hosts and the people they interview are liberal elitists whether
they know what they are talking about or not.

> Right wing talk radio dominates most AM outlets--at least here in the
> South--and presents many hours a day of radio "showmen" presenting
> their unsupported opinions in the most extreme and confrontive language
> they can possibly manage.

The right wing radio I listen to is Sean Hannity because he has people
in the white house on his show speaking on current events unlike the
continuous drone of failed or unproven liberal ideas the elitists like
babble on about.

> Yep, it sure is unfair that those libs on NPR get to do what they do.

Yeah it's unfair my tax dollars go to broadcasting ignorant thought.

There is nothing extremist about my thinking. I'm very middle of the
road and conservative in my thinking. The liberal crap generally
propagated on NPR are a collection of failed or unproven ideas that
don't work. Conservative ideas are sneered at by most on NPR most of
the time.

The fact that the NPR is on AFRTS is just an example of bureaucratic
incompetence not that NPR news coverage is reasonable or desirable. You
drew a wrong conclusion.

The only secret plot around here is you playing a Troll. You are not
stupid so what is your point arguing NPR does not have a leftist slant?

> Of course maybe it's one of them there secret plots. How's the hunt
> for the secret communist backers of Air America going?

Going pretty good. I was listening to those air america jackass's the
other day sporting german accents portraying the current administration.
Very un-funny stuff.

> I think it is 3rd order product. (1323*2)-(1224)=1422.
> But with my 7600gr, the ghost is barely audible on 1422 kHz.

The first two problems are most likely occuring because the radio is a single conversion type (450~460 KHz IF only). Single conversion receivers are easily overloaded by any strong signal, and this can cause multiple images of the overloading station on all bands. It also will cause third order IM like you are describing.

The third is not uncommon with any radio which uses only an injected BFO signal instead of a true product detector.

The Degen, Kaito, and that sort are good for what they are, a bargain basement radio capable under most conditions of receiving the powerhouse shortwave stations. I have the little Jwin pocket radio which does fairly well in my area. Fortunately, I live in an area where only three strong MW signals are present, and I don't have overload problems with any of them (603, 972, and 1440 KHz, with 972 being by far the strongest).

207. Re: Tsunami Made Me Think

Hi,

Well, as usual, I have another question for the experts.

When the Tsunami hit last week, I grabbed my shortwave and tried to find 'live' info as fast as I could. Understanding that power might not be available in the region, I just tried some of the larger outlets and didn't hear anything I couldn't hear on CNN or CBC. In fact, even during the 'shock and awe' campaign - I was not really hearing up-to-date info from a foreign country. So, I gotta' ask:

What's the secret? I'm pretty new to shortwave and really might be expecting too much, but I assume using SW for local / regional updates on serious news is part of the fun. I understand the time differences and programing schedules, but I've never heard "Up to the Minute" disasters, assasinations, etc. I mean God forbid this stuff happens, in fact I hope there won't be earthquakes or tornados - but they certainly do happen and I bought my radio *exactly* to hear these broadcasts.

Would anyone please provide me with some instruction, a weblink or some plain common sense in trying to listen to radio ' Live as it Happens'.

I constantly read posts on folks hearing the USS YorkTown on XXX USB, but when I try to tune in, I've never heard the ship. (I *do* understand how to enable these modes on my radio.) Do I need a mega antenna - I only use the coil-out wire or whip. However, if I can receive Radio Japan clearly, surely I should be able to hear anything inbetween that location. (T.X.Wattage / time of year / weather all being equal - not that they are either.)

Can anyone help me advance to the next level of this hobby? Yes, VOA and Radio Canada are great, but I know there's more and I wanna' hear it. And, I'm willing to put the effort in - it's a great hobby.

I live on the east coast of Canada and use a Sony ICF GR7600GF with syncro-lock when DX'ing.

Thanks, any help would be great.
Mike T.

Why do you think the first RF circuit in the DX-160 precludes using a
passive preselector?

Well, she and a few others certainly 'stepped in it' yesterday, that's for sure.

Rush certainly had a lot to say about it on his program, and most of it made
sense to me.

I'd certainly like to see some Democrats bring up the issue of the manufactured votes in the gubenatorial race in Washington State. But we all know that's not going to happen.

Bottom line in all of this is that had John Fraud Kerry won the election, none of this would have been brought up.

Thank you.

Some of us have been concerned for years that the Federal Govt was building a national propaganda network using our tax dollars (direct and indirect).

More recently, "public" stations, have been carrying out-and-out commercial ads (which are FCC-prohibited) in competition with profit-making broadcasters. All of this in the "educational band 88-92 MHz)".

How much education have you heard on radio the last 10 years? Five minutes?

If "Public Radio" were happening in Russia, we'd laugh at it as a government propaganda machine.

Here in the US, NPR/CPB decide to emphasize "talk & news" and 800 stations drop music and follow?

It stinks. And the LPFM initiative is being crushed.

An interesting aspect of FCC rules supporting the incumbents is that FM "Class D" channels, which cover a small community, give preference to out-of-area existing broadcasters, because they can have multiple translators on multiple channels running 250 watts each, while LPFM applicants are limited to a single 100 watt channel and they are required to originate ONLY local programming, while the translators are prohibited from originating local programs.

> coil-out wire or whip.

When all other things are equal, the antenna will make the difference between hearing a faint signal and not hearing it. As far as the "mega" part goes, if you mean an large antenna on a 200' tower or a huge beam-- well, to be sure, those would make a huge difference, but since few of us seem to have that sort of room available (not to mention time and money) even a longish wire placed somewhere outdoors will probably help quite a bit.

Jackie

Given that CNN, Fox, and the other big networks have reporters,
and stringers, all over ther world, they often have better news
resources then local broadcasters.
To get the "low" power regional SW outlets you will need to move to
an area with very low noise. But even this will not give you world
wide
access. The big boys, NSA etc, have monitoring sites at MANY locations
because no one location, no mater how good the equipment, can receive
everywhere in the world.
About the best most of us can do, is to put up a 70~150' "long" wire
antenna, away from noise sources in your home, coupled with a 9:1
tranformer, using good coax to your receiver. I use the double
shielded
coax with braid and foil, more to keep noise out then to stop any loss.
I think John Doty has the "best" single solution:
http://www.anarc.org/naswa/badx/antennas/low-noise_antenna.html
And his 9:1 transformer is a very usefull additon:
http://www.anarc.org/naswa/badx/antennas/SWL_longwire.html

Yes, the H800 is a good antenna, especially below 5000 khz. I have one and use it from time to time. Unlike some other active whips, the H800 is astoundingly quiet when properly situated. It's very short and will be as quiet as its location. Very handy!

At the same time, when all other things are equal, the receiver will (can) make the difference between hearing a faint signal and not hearing it...

And, at the same time, when all other things are equal, the listeners location and noise level will (can) make the difference between hearing a faint signal and not hearing it...

It's all in the variables.

We go through the WBCQ (7415 and perhaps other frequencies) not being heard 'close in' complaints every year around this time. It's fairly normal propagation.

What are your circumstances? Do you live in a relatively quiet area? In a house or a condo? Do you have a large yard? Knowing some of these details would help.

The Sony 7600GR is a great radio, but it's not intended to be a DX machine. In order to get the most of out of it, see how long a length of wire you can attach to it before you have problems with overload. You might also considering getting the AN-LP1 active loop, which works well with the 7600GR.

Eventually, I predict you'll want a more robust receiver, since this will both expand your listening capabilities and at the same time increase the number of antenna options open to you. If you're patient, you can find something nice on ebay for a reasonable price. (Do you homework though, as it's also possible to get ripped off this way.)

Source record: 4186

Note: This January 7, 2005 BuzzFlash Editorial marks the seventh in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

I think it's safe to say, from stitching together news accounts, that the Bush twins don't practice sexual abstinence, aren't teetotalers, and have indulged from time to time in marijuana use -- and that's just what we know.

Dear me, does that make them victims of the liberal press? Or does it just prove that if George and Laura can't get their own daughters to practice their calculated hypocritical political "values" that it is the Bush rhetoric that is out of sync with society?

We ask this rather obvious question because it leads into an important point, one that the right wing has been tossing out like red meat to culturally populist fundamentalist Christian carnivores for years. You know, the guys who read Playboy, watch raunchy FOX television programming, swear in front of their kids, go to Hooters -- and then nod when the preacher discusses how depraved American society has become.

The American press isn't liberal. It is merely secular and modern, which does indeed make it "liberal" to the right wing amen chorus that sings in the GOP gospel pundit and think tank choir. If it's not pre-enlightenment and creationist in its outlook, it's "liberal."

In short, a liberal press to the right wing really means a secular, contemporary media that reflects the America of 2005 and not the Puritanical excesses of the Salem Witch trials.

To show you just how medieval the perspective of the Bushevik GOP is, we found this footnote in a book that we have recently been referencing called "Pols: Great Writers on American Politicians":

"Like every other man of intelligence and education, I do believe in organic evolution," Woodrow Wilson said in 1912. "It surprises me that at this late date such questions should be raised." Campaigning for president in 2000, George W. Bush said, "[O]n the issue of evolution, the verdict is still out."

Ah, yes, a liberal press must be one that reports on scientific advancements that bolster the theory of evolution, rather than balancing every story with a "creationist" perspective that was already outdated in the days of Woodrow Wilson.

Or a liberal press must be one that accepts "hot chick" ads from companies that contribute heavily to Republicans and sell their products to men using suggestive poses and language.

Or a liberal press must be one that reports about the poor needing housing, Veterans needing medical care, and cutbacks in school funding.

Or a liberal press must be one that acknowledges the accomplishments of women as independent thinkers and achievers.

Or a liberal press must be one that reports about gender discrimination in the workplace.

Or a liberal press must be filled with models with a come-hither look striking poses between ads for all sorts of beauty products that help make the American economy hum.

The reason that there will always be a so-called "liberal" press in America, is due, in large part, to the fact that America is a consumer society -- and a media that merely reflects radically fundamentalist self-proclaimed Christian values would lead to an economy that would be dead in the water. You can only sell so many plastic dashboard Jesuses.

The American economy is created on two basic premises: 1) Most consumer items you buy are disposable, so you need to buy more of them at some point; and, 2) Advertising convinces you to buy things that you don't really need, but come to want as a result of a "created need or desire." That's the role of Madison Avenue.

And Madison Avenue isn't going to have a very successful time selling abstinence books, shutting down the Sunday football libidinous beer ads, and cutting down on sexy ads for clothes and perfume. Just ask the Bush twins. They know what we're talking about. Because they are listening to Madison Avenue, not to Mom and Dad.

So the so-called "liberal" media is consumer driven, and that rings the cash registers. After all, it's advertising that pays the bills and pumps the profits for newspaper, television and radio -- and if it doesn't sell, it's not going to become an advertisement. And then there's no profit to put into campaign contributions to the Republican Party. Just ask Clear Channel or Rupert Murdoch.

The whole right wing rant about the liberal media, as author Thomas Frank has pointed out, is just an effort to exploit a sense of alienation felt by middle and working class Americans. Sex sells and the Republican hacks don't plan on getting in the way of a politically supportive media getting a bang for its buck.

Besides, who do you think is watching the "hot" soap operas and FOX television programming anyway? How about polling the Republican voters on that one. We don't know anyone who watches that junk.

Besides which, while the media generally reflects a secular, contemporary society that brings in profits that often end up in Republican coffers, it is -- ironically -- simultaneously generally pro-Bush and pro-Republican in its political reporting. That is because the media is now largely a corporate profit center that benefits from Bush's pro-corporate and pro-wealthy tax policy.

Although Kerry received the lion's share of top newspaper editorial endorsements, it's the news sections that follow the White House spin on Iraq -- and have given Bush the biggest break in the world on his chronic lying, deceptions, tortured lexicon, dumb statements, and scripted news conferences. And television "news" is even worse, basically giving Bush and the Pentagon carte blanche to pass off propaganda as news in staged Hollywood set types of interviews and photo-ops.

Editorial pages don't influence mass America much anymore anyway. That is why you can have a newspaper like the New York Times with a traditionally liberal editorial page that does a series on the need for voting reform, while you have a news section that, for the most part, has virtually ignored the voting irregularities of the 2004 election or treated such reports with skepticism and derision.

The so-called "liberal press" is really in the pocket of the GOP when it comes to electoral politics. And unless America formally becomes the Christian nation that Antonin Scalia, John Ashcroft and Bush desire it to officially be, it is likely to remain a curious hybrid of secular social reporting -- larded with a heaping dollop of sex --- and partisan White House political cheerleading.

Of course, if you need your fix of Christian news, just turn on Pat Robertson, "Praise Jesus," and get out your B.S. meter.

As for the Bush twins, we don't think that they will be running around the tequila party circuit anytime soon singing, "Abstinence Makes the Heart Grow Fonder."

But they will be good consumers, which is what the media is all about nowadays, along with reflecting the White House party line of the day.

And coughing up millions to the GOP come campaign time.

Today, A Prairie Home Companion is heard by over 4 million listeners
each week on over 558 public radio stations, and is heard abroad on
America One and the Armed Forces Networks In Europe and the Far East.
Keillor remembers, "When the show started, it was something funny to
do with my friends, and then it became an achievement that I hoped
would be successful, and now it's a good way of life."

A Prairie Home Companion is produced by Prairie Home Productions, and
distributed nationwide by American Public Media. The program is
underwritten by Lands' End Direct Merchants and Select Comfort.

Michael - dxAce does sometimes come across as terse and mocking, whether intended or not. His online persona *appears* to be slightly impatient. After awhile, you can learn to get used to it, accept it, and extract from it whatever good information there is - and there is often quite a bit. Once you get beyond the affectation, it all settles into place.

Rest assured that, for most of us, your post made sense.

Brasilia has been a powerhouse on 11780 now for awhile. After some years' absence, when I first restarted the radio hobby back in 2001, I was surprised by the potency of its signal compared to the mini-Brazilians I had heard in the past. Too bad RAE Bueno Aires on 11710 cannot do as well - it's signal, formerly a good one, is tough these days.

Not only that, but I have noticed that especially when the solar storm levels become high and polar propagation is subdued, the tropical and trans-equatorial routes seem to be enhanced. Then, Brazil comes through even better, and the itty bitty stations from CA and SA (and Africa too) become more listenable. YMMV depending on latitude and location.

>Why do you think the first RF circuit in the DX-160 precludes using a
>passive preselector?

Because there are two tuned circuits, each using a segment of the
main capacitor gang, (the input transformer, and the output of the
amplifier). Both are feeding the gates of FET amplifiers, so are (or
have the possiblity of being) high impedance and therefore high Q.

The fact that there's an "antenna trim" control, (which really usually
compensates for mistracking of the two tuned circuits) indicates that
they're pretty sharp, at least for an LC tuned circuit. Likewise, the
bandspread capacitor is two sections, one in parallel with the main
oscillator tuning, the other in parallel with the RF amp output tuning
cap. So the Q must make the bandwidth narrower than the 1/2 MHz or so
that, (as I remember), the bandspread covers.

I think this was kind of a special case. It was on Boxing Day, and the
broadcaster that I'd expect to be the best to cover it, Radio Australia,
seemed to be completely shut down for the holidays. Even now they're
on a half-assed schedule.

Keep listening. I've heard, live, the second plane hit on 9/11
and the Tienamen Square Massacre had some hair curling coverage.
" 'Li Peng shall have no peace', that one was writtten in blood."
(A BBC reporter reading the grafitti at the scene).

Once upon a time long long ago in the year of '83 Sony introduced the first of several successful compact digital sw receivers. Long out of production it is venerated by many swl's as an early and possibly first example of how miniaturized electronics and thoughtful design could result in a high performing and pocketable shortwave radio. It occupies such a warm place in the heart of at least two swl's that one has bandied about the idea of restoring a 7600D.

Darren,

I suspect it was a planned diversion. You know the old saying, "If you don't like the message kill the messenger!"

Looking back at the subject you realize this thread was about what "Jews" call non-Jews. As I understand it, there's quite a controversy about who is a real Jew. Thirty years ago few people would have given a second thought to saying they were gay or had a gay old time. Now, almost everyone thinks several times about saying it whether they are queer or straight. That part of the language has been commandeered. Such is the case with the word Jew.

Al

263. Sony 2010 for decoding digital signals

Newsgroup: rec.radio.shortwave
Date: 2005-01-08 02:13:08 UTC
From: Frank Bals <fjb@worldnet.att.net>

I really like my Sony 2010, even for SSB utilities. The 100 Hz resolution seems to work well for about 98% of the SSB voice signals, but I wonder if anyone has had any luck copying CW, RTTY, FAX, NAVTEX with a decoder?

Frank

So how do you measure 40.6 millionths of a watt?

I watched the last hour of a 5-day auction for a Sony ICF-2010. The opening bid was set at $150. No one placed a bid until the last ten seconds of the auction. And the winner got the radio for $150 plus $13 shipping. The seller has a 99.7% rating and he even offers a 7 day money back guarantee. The radio was listed in the right category. Yet it sold for just $150. Strange indeed.

Oh, here's the link:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5741621180

Maybe a lower opening bid would have been more successful.

I use a Kenwood R2000 with 50Hz tuning resolution.
Worked great for RTTY, both baudot and ASCII, and
for HF AX25. I have used severl different home brew
RTTY demods and a MFJ1278. I had very good results
on HF FA, mainly weather, with the JV?FAX program.
The only thing that might bite you is narrow, <200Hz,
shift. A lot of hams run 170HZ and that was a little
dicey in bad band conditions.
More important then super fine, 10Hz or better tunning,
is that the reciever not drift. Drift will get you chasing
your tail real fast.
CW, unless machine sent, is hard to get above ~70%
decode accuracy. Too many hams have lousy "fists" that
make machine decoding, or even ear decdoing, and interesting
proposition. Perhaps the decoders have improved.
Good luck.

The email address is NOT valid, that is, I no longer
check it due to the intense spam and hate mail I have
received. It apears that some people have a serious
disagreement with the concept of a 9:1 matching
transfomer improving reception.

What this means, of course, is that the same neoconservative God-fearing Republicans who pontificate on how moral and righteous they are secretly live it up in their private lives. This seems to be news to David, which is surprising. It is nothing new-novels written in the 1920s exposed this pervasive American moral hypocrisy. The poor have always believed that they should be moral and righteous, because that's what their preachers told them. And while they were trying to live up to their leaders' impossible moral standards, the leaders-rich people whose wallets were made fat off the labor of the poor, and preachers whose wallets were made fat off the Sunday donations of the poor-broke every moral rule that those leaders had written down, lived it up on the righteous man's dime, and then got the righteous poor to give more of their hard earned money for "good causes" that included the finest women and booze money could buy. The poor, of course, were not invited to the party-no, they had to "stay moral", abstain from smoking and liquor and drugs and sex and good food while the rich had all of those in abundance. This not only continues to this day, but has been the norm all throughout history-in Aztec Mexico, the king had 400 wives while a peasant would be killed for trying to marry wife number two. At least in today's Western Civilization, the peasants have decided to get in on the act, even though their food and drugs and women are of lower quality than those of the rich. The sad thing is that there are still preachers out there (not necessarily in a church) who proclaim morals while living immorally, and flocks who still bust their butts trying to live by the nonexistent morals of the preachers. The flocks numbers have lessened, but they're still there.

I understand that the cold heat soldering iron "is not recommended for electronics." So, go ahead and solder a terminating resistor, but don't go and solder next to an IC--for one, this iron is not grounded.

THIS is exactly the type of radio listening I'm hoping to hear!

So far, some great help and links and I appreciate that. What are the 'Military Nets'...can I just Google and find some info? I also have a 'communications receiver' (A fancy way of saying a 150 khz to 1.2 GHZ radio.) Also, I live in a big city - so the local RF noise floor is pretty brutal. I run with a long wire - supplied with the Sony GR - but it's only used indoors. Would it be worthwhile stringing up some generic wire and appropriate coax just for the hell of it? Actually, I'm gonna' try this first - it's cheap and easy! Opinions. My feeling is the antenna is *almost* more important that the radio itself - gotta' try that long wire this weekend.

You help is really appreciated - please get back to me on the Military Net. I'm very curious what type of listening I might expect. (If I'm able.) If I'm considering a different radio, we're talking about the really expensive stuff right? I realise those radios are not priced because they have 'rack ears' of look cool - perhaps this will be my 2nd course of action. Interesting stuff shortwave.

Warm regards,
Mike T

> has been extensively documented).

Where? All I've seen is evidence to the contrary. Besides, that
was not the question asked in the PIPA study.

The question asked was "How likely is it that Saddam Hussein was
personally involved in the September 11th Terrorist attacks?"

That's a very different question from the one you assert. And Fox
News viewers consistently got the answer wrong(67%), while NPR
listeners consistently got it right(84%).

> (2) More carping about whether or not we found WMD's -- Some
> would argue that even the small quantities of sarin or other
> agents we have found would meet the "wmd" requirement.

"Some" would argue incorrectly, if they were to make that
argument. The simple and indisputable fact is that the Bush
administration's dire claims about Iraqi stockpiles of weapons of
mass destruction have decisively been proven false by the CIA's
post-invasion Duelfer investigation.[1]

> (3) World public opinion did not favor Washington's going to
> war with Iraq. This is a non-issue, since our allies DID. Screw
> "world opinion" -- I want what's best for the USA.

Whether or not it matters to you, it remains a clear fact that
majority world opinion opposed the Iraq invasion and continues to
oppose the occupation.

The PIPA report[2] you are lying about was not "propaganda", but a
studied and well-documented look at the real world. That you are
uncomfortable enough with the reality it reveals to insist upon
lying about it publicly, when your lie is easily disproven by
simply reading the readily-available report, says much more about
you than it says about the study.

[1] From <http://edition.cnn.com/2004/WORLD/meast/10/06/iraq.wmd.report/>:

WASHINGTON (CNN) -- Saddam Hussein did not possess stockpiles
of illicit weapons at the time of the U.S. invasion in March
2003 and had not begun any program to produce them, a CIA
report concludes.

In fact, the long-awaited report, authored by Charles
Duelfer, who advises the director of central intelligence on
Iraqi weapons, says Iraq's WMD program was essentially
destroyed in 1991 and Saddam ended Iraq's nuclear program
after the 1991 Gulf War.

[2] Read it at <http://pipa.org/OnlineReports/Iraq/Media_10_02_03_Report.pdf>;

Picked some up a while back at Menard's (local home-depot kind of store).
Gardner-Bender Silicone Fusion Tape, part # HTP-1010. Thinner than you
specify, though, but works a treat.

GA,

"propane-powered soldering torch with
a catalytic element soldering tip"
.
Something like the one of these two ?
.
WELLER "Pyropen Junior"
https://webvia.techni-tool.com/VIA5/viaImagePageDisplay.jsp?arg1=0
Self-igniting butane gas-powered soldering iron and hot air tool.
Has temperature control from 15 to 60 watts.
Features: Self-ignition finger switch; protective cap to keep hot tip
from contact with surfaces. Specs: heat-up time: 30 seconds;
Fuel tank capacity: approximately 1 hour. 8.25" OAL
.
ULYRATORCH - Butane Heat Tool STD UT-100SI.
https://webvia.techni-tool.com/VIA5/viaImagePageDisplay.jsp?arg1=48
Cordless Ultratorch is a self-igniting, combination portable
soldering iron and flameless heat tool. Perfect for in-field
services and maintenance for production areas where
accessibility may be limited. Piezoelectric push button
system - no matches or lighters necessary. Completely
cordless - no E.M.I. Lightweight for fatigue-free use.
Variable temperature control. Streamlined design -
allows easy accessibility in restricted work areas.
Comes complete with a soldering and heat tip, spanner
wrench, open-end wrench, heat shrink attachment and
protective cap. Heating temperatures: 200-500 degrees C
(392-932 degrees F) when soldering, 700 degrees C
(1292 degrees F) when shrinking. DOES NOT OPERATE
IN TORCH MODE! (Butane Not Included)
.

I'm having the same problem here in south-west Missouri- 7415 goes away
during the early to mid-evening. Thats something like 1200 miles. So I
thought the problem was more likely with the station.

I know that feeling. Last time I cut thin but long pieces of paper and stuck them in as I wound. The wire will pinch the paper to the form. After it's all wound and done, pull out the paper strips. Write down the # turns on the strips at each tap as you go.

Hello,

Scandinavian Weekend Radio has it's transmission this weekend starting 22 hours UTC 7th January. All bands are in use, 25 mb (11690/11720 kHz), 48 mb (5980/5990/6170 kHz. and now official start of MW 187 meters 1602 kHz. more info: http://www.swradio.net

Programme schedule (Time UTC+2hours):
00-01 All Women Hour with TrickyTrev. A selection of Romantic song from the ladies.
01-02 TrickyTrev plays the blues a selection of songs from Gary Moore.
02-05 SWR Crew
05-08 H�k�Show Nightowl by dj H�k�
08-09 "Mukavaa, mutta silti Hauskaa". Levyjen lomassa el�imellist� menoa ja tieteellisi� pl�j�yksi�.
09-10 SWR Crew
10-11 Janne @ Sound
11-13 Lauantailuotain: Ohjelmassa k�sitell��n lentoliikennett�, lent�j�n ty�skentely� sek� esitell��n MD-83 liikennelentokonetta. Asiantuntijana lentokapteeni Arto Pellinen Finnairilta. Kesto 2tuntia.
13-14 Janne @ Sound
14-15 H�k�Show OnTheRoad. Matkailuohjelma osa III Lontoo
15-16 Kantoaaltoa ja teknisi� tiedotuksia Suomirokilla h�ystettyn� by Esa
16-17 Tricky Trev's trip down memory lane with the Flower Power hour.
17-18 Party time with TrickyTrev, music to get you in the party mood.
18-19 Progressive rock and other strange things by Esa
19-20 Air Guitar Hour. TrickyTrev the master of the air guitar will play music by which you can practice all those movements.
20-21 SWR Crew
21-22 Saunan l�mmitess� dj H�k�
22-23 SWR Crew
23-24 Closing ceremony by dj H�k�

That's pretty certain. I worked at a eBay consignment store, and that
was what we told all our customers.
I had an item I personally sold once that I wanted $75 for. I put the
opening bid at $69.99 (people like the .99). No bids. Then relisted it
at $9.99. Sold for over $100.

Amateur satellites 'Ralphie' and 'Sparkie' were launched on 21 December but unfortunately US Air Force officials have now acknowledged that an "anomaly" occurred and the two nanosats were lost after not reaching orbit. The satellites' mission was to conduct a technical investigation to demonstrate packet radio for inter-satellite links using a frequency of 437.5MHz.

Congratulations to the American CQ Amateur Radio magazine, which celebrates its 60th anniversary this month. Amateurs who have had an association with CQ, as a staff member, contributing editor or author may sign "/60" after his or her callsign in those countries where it is permitted, during the first 60 days of 2005. Certificates will be available for certain numbers of contacts made with these stations. The CQ club station WW2CQ will also be activated from various parts of the United States during the special event period. Complete rules for the 'CQ Gang' 60th anniversary activity are in the December issue of CQ magazine and on the magazine's website.

SB PROP ARL ARLP001
ARLP001 Propagation de K7RA

Happy New Year! Not much to say about solar numbers or propagation this week compared to last, except that Thursday, January 6 had wonderfully quiet geomagnetic numbers. Both mid-latitude and the planetary A index were 4, and for most of the three-hour periods the K index was 0 or 1.

Of course, sunspot numbers will continue their decline for the next couple of years, but at least we can count on better conditions for the near term as the hours of daylight lengthen.

Because the year is now 2005, we can tally up numbers for the previous year and compare them with the past to try to get a feeling for Cycle 23's decline. These quarterly and yearly averages are made from the daily sunspot and solar flux data reported at the end of each bulletin.

>From the third quarter of 2003 through the fourth quarter of 2004, average daily sunspot numbers were 110.2, 99.2, 72.9, 71.3, 69.3, and 61. The average daily solar flux for the same period was 120.8, 137.4, 111.1, 99.5, 111 and 104.8.

Both the quarterly sunspot numbers and flux values have declined steadily, although there are some variations, such as solar flux in the fourth quarter of 2004 being higher than it was in the second quarter.

Average daily sunspot numbers for the years 2000 through 2004 were 173, 170.3, 176.6, 109.2 and 68.6. Average daily solar flux for the same five years was 179.6, 181.6, 179.5, 129.2 and 106.6. We can see the steady decline with each calendar year, and this should continue through the end of next year, 2006.

Now for conditions over the short term, a week ago it looked like solar flux should stay above 100 over the following 10-12 days. Now the last of sunspot 715 is disappearing around the edge of the sun, and it looks like solar flux should stay around 85 with sunspot numbers below 40 over the next week.

Saturday, January 8 could see some unsettled to active geomagnetic conditions, and January 13 could see unsettled conditions as well. Quiet days are expected January 10-11.

Alan Beck, VY2WU from Prince Edward Island wrote in response to last week's mention of 60 meters. He said in Northern Canada 60 meters is

used for "bush radio," and he told a story about Inuit hunters in Nunavut using 5.2 MHz SSB at 10 watts to call home from the ice.

Barry Roseman, W0LHK of Stilwell, Kansas wrote to say he was on 60 meters the first day it opened for U.S. hams. Barry says only four stations have worked all states on 60 meters: K7NN, N1UU, K4AVC, and himself, W0LHK. His best DX was G0HNW in Yorkshire. Barry has used various dipole antennas and a quarter-wave vertical, and says he often works mobile stations.

If you would like to comment or have a tip, email the author at, k7ra@arrl.net.

For more information concerning propagation and an explanation of the numbers used in this bulletin see the ARRL Technical Information Service propagation page at, http://www.arrl.org/tis/info/propagation.html .

Sunspot numbers for December 30 through January 5 were 34, 60, 51, 52, 43, 30 and 15 with a mean of 40.7. 10.7 cm flux was 100, 98.5, 98.9, 100, 94.2, 88 and 88, with a mean of 95.4. Estimated planetary A indices were 15, 8, 15, 33, 22, 23 and 21 with a mean of 19.6. Estimated mid-latitude A indices were 12, 5, 10, 20, 14, 16 and 11, with a mean of 12.6.

I didn't hear them at all on 11710. I did hear a single broadcast on both 9325 and 13760, but it was not in English (or I don't think it was, though the QRN was pretty intense and it could have been someone with a thick accent).

On the other hand, between 1200 and 1300 I heard BBC and Radio Australia relays on 5020 khz. I wanted to catch a station ID, but the signal eventually washed out. I wonder if this was the Solomon Islands.

VOR is on 7340. LP is on 7337 which is obscured (at least on my RX) in the
LSB of VOR in wideband AM mode, until you tune to 7337 and put the BFO on.

The pyropen junior and the ultratorch are very good and stand up well in daily use.

For somewhat lighter usage though, the radio shack 64-2188 [sold under several other names as well] works surprisingly well for its price -- and is quite compact. There are even hot air and hot knife tips available for this model, but not from radio shack [last I saw them was in Maplins in the UK].

If ninety percent of the 'neocons' were Palestinian, would Iraq have been invaded?

These people seem to think not:

==========
12). Robert Zoellick-----U.S. Trade Representative, a cabinet-level position. He is also one of the more hawkish pro-Israel Jews in the Bush (Jr) Administration who advocated invading Iraq and occupying a portion of the country in order to set up setting up a Vichy-style puppet government. He consistently advocates bombing Iraq.

Yes, you are right. It doesn't need to hide anywhere as it doesn't exist ;-)
I just thought it was interesting to show that those SWLers listening to old
Joe probably were not aware that a spy TX was "hiding" in its skirts.

New batteries solve a lot of problems,now don't they? I have an attatchment that attatches to a hand held propane tank and there is copper tip (or whatever it is made of) that fits inside the attatchment for soldering.I like to collect old things and I own quite a few old electric soldering guns and non electric soldering irons.I don't want one of those As Seen On Tv soldering guns though.

327. 50,000 radios to be sent to tsunami-hit areas

Newsgroup: rec.radio.shortwave
Date: 2005-01-08 18:16:48 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <crp82gmec1@xuxa.iecc.com>
Source record: 4328
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

(Various articles on this)

Date: 07-January-2005

Commercial Radio Australia is spearheading a mission to restore broadcast operations in tsunami-hit countries, contributing some 50,000 AM/FM radio sets to affected areas.

This initiative, which is being coordinated by the ABU, calls for the donation of radio sets and broadcasting equipment to survivors and broadcasters affected by the disaster, which has claimed almost 150,000 lives and left millions homeless.

Joan Warner, CRA's chief executive officer, said the first batch of 5,000 radio sets would be shipped to Indonesia in a week's time, with the rest to be despatched to affected areas over the next four to five weeks.

"We also have up to six transmitters that we can donate," she said.
Ms Warner also said CRA would send at least 12 engineers to rebuild broadcasting facilities in disaster zones. The engineers will be sent in groups of four for a few weeks at a time.

CRA is an industry body representing Australia's commercial radio broadcasters.

France's Eutelsat SA, an ABU affiliate member, will allow free usage of its fixed satellite services (FSS) in affected areas.
A representative, Jan Grondrup-Vivanco, said this would enable Internet access and Voice over Internet Protocol telephony be set up in these places.
Meanwhile, Singapore's MediaCorp has promised to look into the needs of Radio Television Maldives (RTVM) which lost much of its equipment when the tsunami struck.

(07-January-2005)

ABU appeal to aid disaster-hit broadcasters draws North American offers

Date: 07-January-2005
Offers of assistance to provide battery-operated radio sets and restore broadcast operations in countries hit by the December 26 earthquake and tsunami, in response to an appeal by the ABU, are coming from as far away as North America.

The owner of a network of radio stations in Canada's Yukon Territory is pledging broadcast equipment and expertise for affected broadcasters.

A representative of Burr and Burton Academy, a secondary school in Vermont, USA, has said its staff will begin collecting AM/FM radio sets for survivors of the disaster.

Meanwhile, a radio engineer from California, USA, said he is willing to travel to affected areas at his own expense in order to help build and maintain radio stations there.
(07-January-2005)

Relief operations continue in Sri Lanka

Date: 07-January-2005

Sri Lankan Sinhala and Tamil TV and radio channels, Sirasa TV/FM and Shakthi TV/FM, launched Sirasa-Shakthi Sahana Yaathra on 28 December, to enable the public to aid victims of the tsunami disaster.

Sirasa-Shakthi Sahana Yaathra sent a convoy packed with relief items to affected areas in the south, north and east of Sri Lanka. Volunteer doctors, nurses, school children and foreigners also joined the effort.

Another operation began in Colombo on 30 December to provide medical assistance to survivors in southern and eastern Sri Lanka.

Sirasa TV/FM said contributions and support were continuing to pour in to the main collection centre in Colombo and other regional offices around the island.

(07-January-2005)

Radio Netherlands to set up radio stations in Aceh

Date: 06-January-2005

Radio Netherlands is starting a programme to set up a number of emergency radio stations in Banda Aceh, capital of Indonesia's tsunami-hit Aceh province.

The station will appeal to its 6,000 partner stations around the world to collect money and equipment for the programme.

Radio Netherlands Media Network reported that the emergency radio stations will in due course be built up into permanent stations.

One of the stations that was destroyed by the tsunami on 26 December is Radio Nikoya FM, that used to broadcast news in Indonesian from Radio Netherlands on a daily basis.

The head of the Indonesian department of Radio Netherlands, Indra Titus, said: "We want to help to get the radio stations back on the air, because radio is a very important means of communication in the stricken areas.

"As help is beginning to flow, communications must be restored to help the search for family members and make information accessible. Even under normal circumstances, radio in Indonesia is a vital means of communication that people cannot be without."

34 staff of TVRI and RRI-Indonesia missing

Date: 04-January-2005

Indonesia's public broadcasters, Televisi Republik Indonesia and Radio Republik Indonesia, say 34 members of their staff are missing in Aceh province, devastated by the tsunami on 26 December.

A senior official of RRI said 24 staff were missing, while TVRI reported 10 staff missing and feared dead.

Aceh province was the area worst hit in Asia's tsunami disaster, with more than 90,000 people killed.

About 100 TVRI families lost their homes or were badly affected, and both TVRI and RRI reported severe damage to transmitters and other equipment. About 2,000 people who lost their homes have taken refuge in a park in the TVRI complex in the provincial capital, Banda Aceh, where TVRI staff are helping care for them.

Meanwhile, India's public broadcaster, Doordarshan, has reported no casualties among its staff but severe damage to several TV transmitters on Car Nicobar, the northernmost of the Nicobar Islands in the Bay of Bengal. Twelve of the 15 villages on the island were reported to have been flattened.

SLRC-Sri Lanka mounts big relief operation

Date: 04-January-2005

Sri Lanka's public broadcaster, SLRC, has mounted a major relief operation for victims of the tsunami that struck the island on 26 December, killing more than 30,000 people.

After on-air appeals brought in big donations, SLRC sent more than 200 lorry loads of food, clothing and medicine to badly hit areas in the island's north, east and south in less than 72 hours. It also sent medical teams to many affected areas.

"A large number of volunteers from all walks of life worked round the clock with the staff of the SLRC to make this possible," its Director-General, Nishanta Ranatunga, said.

Among those who died was an SLRC member of staff who was among more than 1,000 people killed when the tsunami struck a train near the southern city

of Galle.

An SLRC outside broadcast crew in the nearby town of Matara were luckier. Covering an unrelated story, they were trapped in their hotel when the tsunami struck but were later rescued and were able to cover the tragedy.

Miss Withers obviously was not qualified to write this article. Or perhaps she didn't know what she didn't know and this failed to ask the proper questions. When you read a sentence that says, "...members have built radio towers that help them pick up _clearer_ frequencies.," you know you're going in for a rough ride. And it's difficult to understand some of the stuff she's written. In one sentence, it's unclear whether she means to say that the ham radio hobby is passed down from generation to generation or that the radio gear itself goes from generation to generation. It might, in fact, be both but she's such a poor writer than you just can't tell what the heck she means. But I nonetheless appreciate the report on the challenges faced by this dying, indeed close-to-death hobby in its struggle to maintain some signs of life.

Cheers,

<SNIP>

I called it propane-powered, but I meant to say Butane. Mine is the
TechTorch by Ronson:
http://www.ronsoncorp.com/techtorch.cfm

It was just $20 or so at Walmart. The soldering iron tip has a small chunk
of catalytic material in it. You light the torch, let it run for a few
seconds, and then blow out the flame. The catalytic material continues to
generate heat without a flame. It's great for all-around soldering, although
I prefer a direct flame when soldering to ground rods and other heavy-duty
jobs.

This may be of interest:

** ZAMBIA. 4500, ZNBC: I spoke with their Director of Engineering this
morning. He says that they have just rehabilitated one of their two
100 kW transmitters and are testing it. Hence, the strong signals that
we have been receiving (Hans Johnson, Cumbredx mailing list Jan 5 via
Mike Terry, BDXC-UK via DXLD)

5th Jan they were already back on their normal 6165 kHz. Sign-on with
fish eagle IS from 0245, from 0251 NA and 4910 divided to the other
network. 73, (Mauno Ritola, Finland, ibid.)

I'm not sure whether they are using 4500 on a regular basis now or simply
testing, but, the fish eagle interval signal is something to hear for sure.

I like Clint Eastwood. They filmed The Unforgiven here in Alberta. It could have been better, though.

John Wayne was quite the character. He had a lung taken out because of cancer and kept right on smoking. True Grit or Real Stupidity?

Now, did I ignore FIVE dxHaze posts or was it SIX? Come on Brian, MAKE MY DAY...

The outlet which has been recently reported to be from Bangui on 31 meters is thought to be either via Gabon or France itself per some recent reports.

Leonard,

The debate was whether NPR had a left-leaning antenna (which you thoughtfully acknowledge).

The "unfairness" (since you brought it up) is that NPR is taxpayer funded. How would you feel if they taxed you to subsidize the "talk radio" you despise?

Regards,

Stinger

Under these circumstances getting the 7600GR (and selling / giving the 7600D to someone who can fix it) seems like the better option. The 7600D was good in its day, but the current model is better in a number of aspects.

David,

The reason you cannot argue with a "rightie" is because your supposed
"arguments" are nothing but whining and name-calling.

For evidence of this, please re-read your own post.

345. Radio Netherlands news commentary today

Newsgroup: rec.radio.shortwave
Date: 2005-01-08 20:24:06 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-621105.12240608012005@newssvr14-ext.news.prodigy.com>
Source record: 4343

Radio Netherlands weekends 19 to 21 hrs UTC
17810
17725
15315

I just listened to a news commentary by Robert Green on Radio Netherlands and concluded that he is a complete idiot. He complains that the huge response in of money to the tsunami destruction in Asia is due to western national guilt and not a response to the magnitude of the destruction and death to that event. He furthers this line of thoughtlessness by postulating that this act will be leveraged to offset any future contributions for aid to future disasters.

This is just another demonstration of the liberal mindset at work with its distortion of facts of an event, the motivations of entities in response to it and of course how everyone should behave instead.

It also demonstrates how one stupid assumption is magnified as one continues to use it as a foundation for further conjecture.

Robert Green should forget broadcasting, go skiing with Kofi Annan instead, and let the world take care of itself.

Speaking of gills. Isn't Icke a disease only fish get? Back atcha Stephen.

P.S. By the way,Glynn is a tropical fish also, and it inhabits the reefs off the Madagascar coast.

I read about it this morning at Drudge Report.I don't know much about Submarines but about seven years ago a guy who was a Submariner said on a late night radio talk show I was listening to said Submarines are never suppose to sit on the bottom.Something about sand and other things can get into the Submarine's water intake grills and foul things up.

Well the hell with you as it is all SW related so my comments are reinserted. Go start your own thread if you don't like it bozo. I don't care whether you agree with me or not but you are not clipping my comments. I have replied to their commentary before on their web site and they don't post it there so it goes here in a public SW forum they don't control. The days of information flowing one way are gone for good.

If you want to see some human garbage look in the mirror.

Oh yeah and you are a real Trolling jackass for setting the follow up to another news group. Everyone should put you in their kill file.

Radio Netherlands weekends 19 to 21 hrs UTC
17810
17725
15315

I just listened to a news commentary by Robert Green on Radio Netherlands and concluded that he is a complete idiot. He complains that the huge response in of money to the tsunami destruction in Asia is due to western national guilt and not a response to the magnitude of the destruction and death to that event. He furthers this line of thoughtlessness by postulating that this act will be leveraged to offset any future contributions for aid to future disasters.

This is just another demonstration of the liberal mindset at work with its distortion of facts of an event, the motivations of entities in response to it and of course how everyone should behave instead.

It also demonstrates how one stupid assumption is magnified as one continues to use it as a foundation for further conjecture.

Robert Green should forget broadcasting, go skiing with Kofi Annan instead, and let the world take care of itself.

> Any user thoughts gents?

Id say the better way to go as far as a "value for dollar" solution is to get the new 7600gr. I have a 7600gr and I absolutely love it. The ssb selectable am sync makes it my favorite of all my portables for program listening. The audio quality is good, the sensitivity is very good an the selectivity is very good. I also like it a lit for medium wave listening. The 7600gr with all its features is a nice step up from the 7600d that you have. If you spend money to have an older radio fixed, you'll still have a radio with a lot of miles on it and far less features and capabilities of the 7600gr.

353. Antiquities of the Jews

Newsgroup: rec.radio.shortwave
Date: 2005-01-08 21:55:29 UTC
From: Al Patrick <arp@_NOSPAM_inet4u.com>
Message-ID: <10u0lme7hut0t44@corp.supernews.com>
Source record: 4402

Keeping this ON TOPIC: I heard a shortwave minister mention the doctrine of Balaam in connection with the works of Flavius Josephus. I'll make that one or more separate posts.

The Antiquities of the Jews was written by a Jewish historian named Flavius Josephus. It is NOT considered to be inspired by God but does fill in some of the blanks left by the Bible. Yes, The Bible has blanks in it. The Gospel according to Saint John, KJV, tells us in chapter 21, verse 25 that, "...there are also many other things which Jesus did, the which, if they should be written every one, I suppose that even the world itself could not contain the books that should be written. Amen." They didn't have computers, file compression software, and/or microfiche in those days. :-) They didn't even have printing presses. All books were written out by hand -- one copy at the time!

Too many doctrines are founded upon one or two scriptures which are taken out of context. It has been said that the Bible itself is its own best commentary. Therefore, doctrines must be examined in the light of the entire Bible. One may then use historical texts to fill in some of the gaps which seem to be present in the scriptures.

OK. OK. I'm getting to the point! :-) The Antiquities of the Jews, being hundreds of years old has gone into the public domain and can be legally downloaded off the net from various sites. I'll not try to direct you to any one site. Just use Google, or any other search engine, and look for "Antiquities of the Jews" and download a copy or use it online. I prefer downloading a copy so I can search it without tying up the phone line. It contains some very interesting information. There is at least one copy which is a zip file and becomes an exe file when opened. While it is good for doing the searching, etc., the gentleman implants his own contact information in the program AND PROHIBITS / DISABLES YOUR ABILITY TO DO A CUT AND PASTE from within the built in browser, by not allowing you to do a copy of marked or highlighted information. Yes, it presents the information in HTML format. While you *may* want to download, and use, this program you'll also want to do a cut and paste from time to time so I'd recommend also getting it from a site that just lets you download the html, text, or doc version of it.

I DO NOT imply that there's not some leaven of the pharisees contained therein, but it also supports the scriptures in a number of places. Jesus warned His disciples in Luke 12:1, KJV, "... Beware ye of the leaven of the Pharisees, which is hypocrisy."

I'll refer to the Antiquities of the Jews in another post or two, but I'll make them separate posts. Any who wish to know some of the secular

history of the days of Christ will appreciate the works of Flavius Josephus.

It's interesting to note that Primetime Shortwave gives the frequencies for N. Korea at 1300 utc as follows:

1300-1400 NA, Eu North Korea V. of Korea 4405, 9325, 11710, 13760, 15245

While the schedule available at http://www.eibi.de.vu/ provides the following frequencies:

1300 1400 KRE Voice of Korea E Eu 4405 7570 12015
NAm 9335 11710
1300 1400 KRE Voice of Korea-PBS K Eu 6285 9325

Some slight discrepancies between the two, but big enough to throw someone off. If (as eibi indicates) 9325 is used for a Korean broadcast to Europe, that would explain what I heard this morning. On the other hand, Primetime Shortwave doesn't even mention 9335, which appears to be an active frequency for English language broadcasts from N. Korea. I wonder if incomplete or inaccurate data on Primetime Shortwave at least partially accounts for my failure to receive N. Korea.

I guess you'd better try then for the 9335 and 11710 which are indicated on EiBi for English to N. America at 1300.

That would make sense to me.

As I've stated, time and time again, they are audible here on an almost daily basis when I've taken the time to check for them.

I try to be as helpful as I possibly can, however if no one wishes to listen, it's not my fault!

Interesting how when the conservatives in this NG (followups reset to correct group) post commentary, it's OK, but when liberals do it, it's "tardism". The BBC is liberal trash for reporting the rotten underside of the Iraq war, but Pete Peters and other far right wing SW Konspiracy Kookz speak the gospel truth. Neocons are the biggest hypocrites in the world, proclaiming love for the Constitution and the rights of people everywhere to freedom while trashing the Constitution at home and installing a puppet govt in Iraq to enable them to steal its oil. Liberal "tards" may be a little strange, but neocons are downright poisonous.

366. The Doctrine of Balaam

Newsgroup: rec.radio.shortwave
Date: 2005-01-08 23:24:56 UTC
From: Al Patrick <arp@_NOSPAM_inet4u.com>
Message-ID: <10u0qu21belib50@corp.supernews.com>
Source record: 4416

If one does a search of the King James Bible for the word Balaam he'll get about fifty nine instances of the use of the word. A vast majority of those instances will be found in three chapters of the Old Testament, Numbers 22-24. This portion of the Christian Bible also happens to be a part of the Pentateuch (first five books of the Bible) and is accepted by some Jews. It is also part of the Jewish Torah. Therefore, Christians and Jews should be familiar with this subject.

In Numbers 22-24 we learn that the Moabites feared the Children of Israel and attempted to HIRE Balaam, a prophet of God, to CURSE the COI Children of Israel. (Remember the Patriarchs? The fathers who ruled their families. Abraham, Isaac and Jacob are perhaps the best known of the patriarchs; but Jacob's twelve sons were also patriarchs. So where does the name "Children of Israel" come in? In Genesis 32:28, Jacob's name was changed to Israel! Therefore, he is sometimes referred to as Jacob/Israel and therefrom comes the phrase "Children of Israel" instead of "Children of Jacob". So any time you hear the term Children of Israel you are hearing about the descendants of the patriarchs Abraham, Isaac and Jacob/Israel.

People often FEAR the things they don't understand. People often CURSE the things they fear. They also FEAR some of the things they DO understand.

Balak sought to BRIBE Balaam into CURSING the children of Israel, about 1,000,000 plus strong. These are the same people who went down to Egypt as about 70 people, the kin of Joseph, who was sold into Egypt as a SLAVE. The scriptures tell us, in Numbers 22:15-18, "And Balak sent yet again princes, more, and more honourable than they. And they came to Balaam, and said to him, Thus saith Balak the son of Zippor, Let nothing, I pray thee, hinder thee from coming unto me: For I will promote thee unto very great honour, and I will do whatsoever thou sayest unto me: come therefore, I pray thee, curse me this people. And Balaam answered and said unto the servants of Balak, If Balak would give me his house full of silver and gold, I cannot go beyond the word of the LORD my God, to do less or more."

Notice. This king Balak promised the man of God, Balaam, very great honor and whatever he wanted to CURSE these children of Israel. Balaam, told him if he gave him a KING'S HOUSE, a PALACE, FULL OF SILVER AND GOLD, he could only do as God commanded. It really appears that Balaam didn't want to curse them. He even turned an attempted curse into a blessing. However, Balaam REALLY WANTED those riches that Balak promised him. The scriptures seem to imply here that Balaam went home and did not curse God's people (Num. 24:25). HOWEVER, Balaam DID,

through Balak, curse the children of Israel and, we read in Joshua 13:22, they killed him.

I don't want to minimize the FACT that God turned the curse into a blessing. This is mentioned more than once in the Scriptures. However, Balaam is also mentioned in connection with the "wages of unrighteousness" (2 Peter 2:15), the "error of Balaam" - Jude 1:11 and the "doctrine of Balaam" in Revelation 2:14.

Rev. 2:14, KJV, "But I have a few things against thee, because thou hast there them that hold the doctrine of Balaam, who taught Balac to cast a stumblingblock before the children of Israel, to eat things sacrificed unto idols, and to commit fornication."

Notice that Balaam cursed the Children of Israel, temporarily, by TEACHING BALAK to cast a stumbling block before them by getting them to eat things sacrificed to idols and to commit fornication.

This is were the "Doctrine of Balaam" comes in and also were the Antiquities of the Jews by Flavius Josephus comes in. Josephus tells us HOW Balaam instructed Balak to curse the children of Israel. This seems to be supported and reinforced by the references in Second Peter, Jude and Revelation.

I'll give you a hint, a clue, a tip to save you some time. The Works of Josephus is a pretty big read for one sitting. Go to Antiquities of the Jews, Book IV, Chapter 6. He goes into great detail on how to seduce the children of Israel.

POINT: Do you ever wonder WHY the media, supported by the courts in the name of free speech, promotes so much ludeness and vulgarity? I'll give you a hint. "The Doctrine of Balaam !"

This ballad about the Indian Ocean
http://rhhardin.home.mindspring.com/aus2.ram

was played at 23:30 UTC Jan 8 21740 kHz

The ID sounds like (to me) ``Barnett Carney with a song called
Marsingles Baily'' but google suggests nothing for it. ID at the end.

Maybe somebody with a browser that can navigate the RA website
can find a play list? Mine pulls up blank pages for everything.

Oh yes, I forget -- as a Marxist, you believe that it's ALL THE GOVERNMENT'S MONEY.

It's not! As Americans, we are willing to give the government some of OUR money to function. You see it as all THE GOVERNMENT'S money, and they LET US KEEP some of it.

It's a big distinction serves as the foundation for your mountain of flawed thinking.

I didn't hear this commentary, and this is not exactly on your topic, but RA had a guy who commented that alot of countries make aid agencies buy supplies in the home country with the monies they collect, and that alot of aid does not leave the donor country. It was hard to get a sense of what countries that was. I think it is very important to do some good research before donating to make sure the funds are actually going to the right places and not remaining in the pockets of the agency collecting it.

There other comment was about suspending interest and debt payments (? 4 billion for Indonesia - not sure I got this right, and I don't know if AUS $ or other).

Re your topic, there are always the pundits who are prepared to make dumb comments about anything. BTW I'm betting neither Killer Kofi or the silly announcer can ski. Kofi Annan lost all credibility when he failed to back up General Deliaire in Rwanda and let a million+ people get massacred by not sending in reinforcements for the UN soldiers there in 1993. Delaire's book "Shake Hands with the Devil" tells the story in complete and disturbing detail. Unbelievable that Annan is running the UN. Unbelievable he's running anything at all.

Easy there buddy. You posted a good topic and it is about SW. You tend to
have a balanced view within the mainstream so don't let the nutbars get to
you (yeah I should talk, they get to me too, but there you are). I
appreciate your approach to the NG. Keep it up.

That's quite a deal at 100 dollars for the YB400 at Heartland. And that includes the adaptor too. For small portables, you can't go wrong with either radio (7600GR or the YB400). The 400 has great audio for its size. Let us know how you like the 400 once you had a chance to play with it.

No cover up. It was reported as soon as it was suspected. All cows from the farm where the suspected cow was born were quarantained. They tracked all cows who's gone elsewhere. They did several (3, I think) of the "quick" tests, and all were inconclusive until the last one came in on 06 Jan, and confirmed BSE. The system is working exactly as set up: early detection, early alerts and full public disclosure. BTW, the system is coordinated fully with the USA and the response and standards are identical. As they should be.

The cows on the infected farm are all destroyed and all will be tested, so will cows who have left that farm and the secondary farms also.

A girl from Lethbridge Alberta is on a baton twirling scholorship at some US university and is going to perform at US pres Bush's second swearing in ceremony.

What in the blazes is a baton twirling scholarship? This has to be a joke. People get university degrees in this?? There must be scholarships in card playing and channel surfing at this rate. Maybe I'll apply for the one in listening to the radio.

WBCQ is still blasting in here at 30 over 9 on 7415... but that doesn't
necessarrily mean it will stay that way!

Do I actually listen to them a lot? No, but I was simply checking the frequency.

Hi ShortwaveMan,

Sorry for the delayed reply; I don't go on the internet everyday. The loop is made of aluminum and is about 3-feet in diameter. The antenna interface and power supply is located somewhere conveniently near your receiver. You can see pictures of the unit on the website.

The antenna does not feature exceptional gain; that is not its design goal. What it DOES do (and EXTREMELY well) is to lower atmospheric and local electrical noise relative to the signal. In other words, this antenna greatly augments the signal-to-noise ratio of the short wave signal. If it is there, you will be able to hear it. If one is in an electrically quiet area, a long wire will do as well or better in the winter, though not necessarily in the summer. However, in your circumstances, it may be your best choice.

Of course, we have to be practical in today's world and there is no denying that it is a costly piece of equipment (though you only have to buy it once; you will probably change radios many times if you stay in this hobby long enough).

Check it out. (That costs you nothing!)

Best,

Joe

Don't know what kind of antenna you have, but I'm listening to the UFO net on 3,977,7...lsb. Sometimes they discuss astronomy, and right now they're talking about that visible comet in the Pleides this month. (I can't remember the name of the comet right now). 80 meters seems pretty strong this evening.

Hello Leonard,

I hope you have read some of my previous posts so that you know about the terrible reception conditions and the local "covenant restrictions" of my townhome association which precludes outdoor antennas.

That said, I have tried many, many antennas here over the years: "long" wires (coiled and straight) in my listening room and my attic with and without MFJ-1020, MFJ-1020B antenna tuners and a number of other "homebrew" and purchased types.

I tried the Sony AN-LP1 Active Loop Antenna which, though it works well with my Sony ICF-SW7600G and 'GR models, does not provide satisfactory performance with my Grundig Satellit 800 or my AOR AR7030 Plus.

I major step up is the AOR WL500 Window Loop Antenna. This antenna provides better gain that the Sony and greatly lowers the noise level on many short wave signals. Still, while it is quite good for the "powerhouse" stations (and even for some DXing), it is not a "great" antenna in my location, though, when I purchased it, it was a major step up in my reception.

Having seen the improvement the AOR WL500 antenna made, I figured that the Wellbrook should be even better.

The Wellbrook ALA 330S Active Loop Antenna is a "great" antenna. Check it out for yourself on the Wellbrook website (quoted above) and look on the web (and on this group) for others' impressions.

It has greatly improved my ability to DX (both on SW and, though I do not do it often nor is it supposedly designed to do so, on MW).

It is of course difficult to justify spending $400+ on something based just on my enthusiastic recommendation. I bought mine because I was desperate and had been reading the good reviews the antenna had gotten in PASSPORT (see reviews in 2003, 2004, and now 2005) and WRTH (see its 2005 edition).

I can only tell you that, in my location, where I have EXTREME (take it from me on that account) local electrical noise and limitations on the antennas I can use, it has totally revolutionized my short wave listening experience.

Best,

Joe

>Well, I hope free TV continues in the future!

Well, it is a rare concept: Broadcasting you don't pay for!

Let's see if it survives.

Likely it won't. The FCC is pushing for digital TV and radio, and will require broadcasters to shut down their analog (free) channels soon.
What it means, is that with digital signals they can start ADDRESSING their siganls. No pay-no TV. And that means big brother will know what you're watching because they know what you're paying for.

But take it a step further. You're a Democrat or a liberal, or an arch-conservative, you may be BLOCKED from watching certain shows, or even worse, the content is EDITED to suit your particular tastes. Of course, they can also manipulate you.

Pretty scary huh?

Why do you think the government is funding PBS/CPB/NPR? Wait until they need to control content. It'll be interesting.

In a really weird way, ANALOG IS FREEDOM!

WIGG,
.
I have the Sony ICF-SW7600GR and like the
Radio very much as my on-the-go Travel Radio.
.
Stand-a-lone the Sony ICF-SW7600GR is a very
good AM/FM Shortwave Radio and at it's "Price
Point" with the AM SycnDet it is a 'Best Buy'.
.
TIP - I use the Sony ICF-SW7600GR with the
Sony AN-LP1 'portable' Shortwave Antenna
and together they both perform super.
.
FWIW - Found a medium size cosmetic bag
that allows the Sony ICF-SW7600GR and its
AC Adapter and Accessories to be placed in
the right side compartment; and the Sony
AN-LP1 Shortwave Antenna to be folded-up
an placed in the left side compartment.
The whole thing Folds-Up and Zips together
and the Radio and Antenna are protected
and Ready-to-Pick-Up-and-Go.

Close, but not *quite* right....

When the conservatives post, it's generally a well-thought and coherent
argument, based on actual facts.

When the liberals post, it's almost always a shallow, ill-thought-out, or
completely false premise (usually ignoring logic altogether), or just
name-calling....In other words -- "tardism."

Hello Gary,

May I suggest that you purchase a new Sony ICF-SW7600GR receiver which you can purchase very inexpensively - $130 or less.

For the moment, keep your 7600D.

I believe you will find the '7600GR to be a superior receiver than the 'D model (if only for the synchronous selectable sideband circuitry).

That said, if you really like the 'D model, and it has some sentimental value to you, later, when you are feeling "flush," you can then look to having it fixed or restored. It doesn't hurt to have more than one short wave radio! (I still have my old Lafayette HE-10 radio and I still use it occasionally.)

Remember, though, that these portable receivers are not really designed to be repaired. I'm told that at best you'll get 10 to 20 years of regular use of a portable radio and then it is ready for the "scrap pile." (I have had some portables which didn't even last 5 years! My two Sony ICF-SW7600G models are 7 and 5 years old respectively and they still work perfectly. My three 'GR models are 4 and 3 years old. I figure that it I use them "lightly" [due to having so many none gets used "heavily"] they will last for many, many years. Am I right? Ask me in twenty years, assuming I'm still around then!)

Best of luck,

Joe

A Sony 7600gr or a Sangean ATS-909 are both MUCH more radio than a Yacht Boy
400, which -- even when new -- is not in the same league as the other two
radios (as far as clarity of sound) because of the "buzz" or "hum" that many
of them exhibit.

> -- Stinger

That wasn't my point. My point was that conservatives are always telling liberals here to stay on topic, to post things shortwave related, and calling them tards if they don't. But when the *conservatives* stray off topic, the other conservatives justify it with comments like yours or declare it shortwave related. The original post was just about as shortwave related as my post about a BBC report on Iraq. In fact, mine was MORE shortwave related, since it had little of my own commentary and was mostly an account of an actual report on the BBC about an interview they did with an Iraqi who just happened to have some very nasty things to say about Americans. The post that started this thread briefly mentioned a RN commentary (not an actual news report but the station management's OPINION) and then used this opinion to justify his own opinion about liberals. But this gets lauded by the conservatives while the liberals get called tards. Can you say "double standard"?

I don't know; I haven't been here that long. Al basically believes
everything the kooks on domestic US SW say; he's a great way to see what
the kooks are talking about without actually having to listen. He
particularly follows Pete Peters closely.

406. Re: Wellbrook ALA 330S on MW

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 02:09:36 UTC
From: Joe Analssandrini <analssandrinij@yahoo.com>
Message-ID: <1105236576.948906.55560@c13g2000cwb.googlegroups.com>
Source record: 4356

Hello Ron,

I am not advocating the Wellbrook ALA 330S as a medium wave antenna; many people on this and other sites have questioned whether it is usable on the MWs. PASSPORT and some other references have said that the '330S is quite "dead" on the medium waves. At least at night, this is not so. If someone is interested in this antenna, at least they should know that, though it certainly is not a first choice, it is adequate for some MW listening, at least in my experience. (As I have stated here and other places, I do not often DX on the MWs.)

Other people, such as yourself, who do MW DX, are more qualified than I am to comment on the '330S's relative MW performance.

I must mention, however, that I could not hear the Ukrainian station on my Grundig Satellit 800 with the C. Crane (Justice) AM antenna; too much local noise.

But I did hear it clearly on my AOR AR7030 Plus with the Wellbrook Loop when the Newark, NJ station faded out.

Best,

Joe

I've committed myself to the "400" Grundig. It's intended use will be as an on-the-go radio. That being said, it should suffice. The sync feature is a big plus for the Sony. Darren

You should see the class schedules of football and basketball
scholarship players. It's nothing but PE and some "jock classes"
(classes that are even more dumbed down than the norm, although I find
it hard to see how that's possible). Most athletes spend their college
careers simply playing their sport, both on campus and traveling around
to different schools to play. When they're not playing they're training
to play and doing college credit courses like weight training. (That
doesn't include extracurricular activities like drinking, partying, and
sex.) I'm not surprised to find out that a student can go through her
entire college career simply twirling a baton and taking jock classes. I
don't know what she expects to do for a job once she gets out. At least
there's pro leagues for football and basketball players.

That would be Eaton's (eh) as in the Timothy Eaton Company (eh)
Later known at the T. Eaton Company, then simply known as Eaton's,
then later bought out by The Hudson's Bay Trading Company, which is now
known as "The Bay" - so ends the Canadian retail history lesson.

On to the radio: Eton is the resurrected Grundig.

(Beauty eh, like Grundig makes great radios, not for hosers...)

Sounds like propaganda time! Didn't we drop a lot of radios on the Iraqi people so we could give them instructions and tell them how wonderful we were while dropping bombs on them to keep their evil dictator from dropping bombs on them? ;-) The more things change the more they stay the same!

The US is starting to look more and more fascist by the day. My guess is that the government will have total control over what gets broadcast, and will allow only a) that which is profitable or b) that which toes the government's party line. The trend is towards a handful (4-5) big cable companies and 2 satellite companies. That means that all broadcasting in the US will be controlled by a handful of huge corporations-tied to the Republican Party and George W. Bush and his friends, of course. Then they will cover the country with BPL in order to totally wipe out all shortwave reception, because they know that SW can go places other media can't. With shortwave unusable and domestic media totally under the thumb of the government, the American public will be helpless to turn back the tide of neoconservative dominance. America will be a parallel universe where everybody believes that the economy is going straight up, that we are winning in Iraq, that George W. Bush is a genius comparable to Albert Einstein. And with all outside sources of information cut off, they will have no choice but to believe it, because they will have no other opinions except the approved opinion. It will be like Orwell's 1984 where the telescreen insisted that the world was just humming along wonderfully when in fact

everything was breaking down and barely functioning. We'll need to find a way to null BPL so that we can still listen to real news. I wonder if the anti-jamming antenna on Radio Free Asia's website is effective against BPL?

Now we're talking shortwave. Kooks have SW stations (and kooks listen to
the kook SW stations), tards don't. :)

424. The BBC "noise" is back

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 03:20:37 UTC
From: running dogg <run@ning.dog>
Message-ID: <41e0a24e$1_3@127.0.0.1>
Source record: 4374

I just tuned into the BBC (it's just after 0300 UTC as I write this) and both 5975 and 9525 are covered up by that noise again. The one that sounds like it's flourescent light QRM. The one that suddenly appeared just after Christmas, then disappeared just after New Years, but now is back. Whoever is doing this is quite close, RF wise, to my Northern California location; I hear the noise even when I have the radio in a position that is usually a "dead spot". It totally wipes out the BBC's signal. I'm SURE this isn't a mixing product or front end overloading; it doesn't appear on the stations on either side of the BBC's channel. Is anybody else hearing this? I know that Arnie and Mark Zenier heard it last time, so I'm not going crazy. Tune in to the BBC on 5975 and 9525 around 0300, just to see if you hear it. I'd like to know if more easterly DXers like Ace can hear this and what they make of it.

What is the administration going to do, give conservatives a "liberal
hunting license" and allow you to hunt down and kill liberal tards like
Rambo? Didn't Hitler wipe out the opposition so that nobody would be
around to question where he was leading the country?

Don't you fellows forget that "The Doctrine of Balaam" comes about as much from The Antiquities of the Jews, by Flavius Josephus, a Jew, as it does from the Bible. ;-)

NO, you misundestand. She proably won a scholarship to ANY school by winning a competition. It probably doesn't require her to study twiling. The scholarship was a prize.
For all we know, she's studying math or physics. Or cooking.

Hell, there's a scholarship for Ukrainian-Americans, and it doesn't require them to study Ukrainian law or history.

LOL, do you really think anyone really cares about this stuff??

The vast majority of us in this group want to talk about SW RADIO, not
about your jew hatin propaganda spouting whackaloon preachers, and the
shit they blow out their asses. At best, they are good for a chuckle,
but the worst part is people like you believe their nonsense. Since it
fits your jew hating agenda, you swallow it, and think it tastes great.

Most people have other ideas..

LOL, out in Las Vegas 25 years ago, a few of the star basketballers not
only didn't go to class, and yet passed them, they didn't work at their
"job" that paid 3.75/Hr, and "mysteriously" somehow drove new Corvettes
and Trans-Ams.

Well they did until the whole scam exploded. A couple of them could
barely read when tested. What a shock!

Didn't hear them on at all this evening.
Propagation has been horrible with a
near s-6 noise floor. HF 90% useless this
evening, even the Florida boys on 3.945
who are usually 20-30 over s-9 were
barely moving the s-meter. AM Broadcast
is strange also! Hearing Cuba and Mexico
AM BCB as strong as WWL and WWVA.

444. Re: Wellbrook ALA 330S on MW

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 08:21:56 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <41E0E9A7.2EE7@mindspring.com>
Source record: 4394

My overly elaborate antenna farm was constructed a bit at a time
entirely to hear Imus from this or that distant affiliate (5:30-10am)
so is MW oriented, and concerned with daytime performance mostly,
though getting rid of Cubans and a couple ``locals'' on 660
conveniently in opposite directions N and S competing with WFAN
in NYC was a nighttime problem too.

At night, there's no real question of MW performance except for
nulling stuff away, which can be very difficult except at the low
end of the band because direction of arrival varies by more than
the size of a deep null (nulls are bigger at the low end).

So anyway it has a couple ALA 1530's in the array, which null N-S
unless the wind has blown them around. They're not as sensitive
as the Dymek McKay DA100E whips but do have that convenient null
built in, and at night the sensitivity simply doesn't matter much.
All signals are strong then.

As you know I am a program listener. I'm interested various program material (read culture) across the globe. Like many I like to hear other countries take on current events but like any sane human being it has to be intelligent commentary, which is not necessarily defined by how I happen to think.

I generally like Green's self effacing humor but there was none this time around. In its stead was just an ignorant opinion and that was not enough so he had to extrapolate his tongue-lashing to what we will do next. You would have thought after the idiot at the UN made the stingy comment about the US earlier this week Green would have thought better than going with another knock at nations trying to do good in a time of need. Essentially it looks to me that people in the UN and people like Green use the misfortune of others to play their favorite brand of politicks. This sort of thing makes me ill.

The remark I made about skiing was that Kofi was skiing in Colorado at the time of the disaster. Because Kofi was off on vacation another UN idiot made the stingy comments shortly after the disaster and while the US was actually delivering aid.

It makes sense to me that you are having your best success with a small amplified loop antenna due to your receiving situation, which is electrically noisy and where erecting a full size wire antenna would be a problem.

This antenna design is a good one for medium wave or BCB. Local
electrical noise generally goes up the lower in frequency you try to
receive on. The allowed electrical compliance curves for most items
increases at lower frequencies. The small loop is sensitive to magnetic
fields where the locally generated noise tends to be electric fields.
This insensitivity to local voltage noise fields will result in better
signal to noise than a voltage field sensitive antenna.

As long as the loop amplifier response is flat down to 100KHz then the
antenna should work just fine for BCB.

That one could hide numbers in LSB -- geez

How would a "sophisticated code breaking and powerhouse computer" be any use
at digging out a station in a LSB? I did it with my Sony 2001D.

Don't need no smart 'puters!

DAVE,
.
FWIW - The smaller TV type Binocular (Two Hole) Ferrite
Cores will work OK. They can be build if you use small
enough Magnet Wire. However, If you live in an area that
has frequent Thunder and Lightening Storms and you have
a 50 Foot or more long Wire Antenna Element. You may
find that your Balun burns out very easily due to near
by T&L Strikes.
.
.
FERRITE CORES :
Here are two Ferrite Cores that can be used to build
your own Matching Transformer.
.
AMIDON - Cores, Beads, Rods and Balun Kits
http://www.universal-radio.com/catalog/misc/amidon.html
.
Binocular (Two Hole) Core
For a 9:1 Matching Transformer:
- Antenna to Ground Primary Windings = 15 Turns
- Coax Cable Secondary Windings = 5 Turns
http://www.universal-radio.com/catalog/misc/0471.jpg
0471 - BN-43-202 Two Hole Core
.
Ferrite Toroidal (Donut) Core
For a 9:1 Matching Transformer:
- Antenna to Ground Primary Windings = 30 Turns
- Coax Cable Secondary Windings = 10 Turns
http://www.universal-radio.com/catalog/misc/1544.jpg
3494 - FT114-43 Ferrite Toroidal Core
.
Most Random Wire (Long Wire) Antennas use a so called
Magnetic Longwire Balun (MLB). These are 9:1 Matching
Transformenrs as shown here; and are in-fact "UnUns".
http://www.hard-core-dx.com/nordicdx/antenna/feed/9_1balun.html

Given that the ferrite in a VHF and/or UHF television balun
is most probably designed for those higher frequencies,
even better results would most likely result if you had
a ferrite core better suited for the SW bands.

463. HF-150 gone deaf!

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 14:30:02 UTC
From: n17man <dleader@mac.com>
Message-ID: <1105281001.989686.179030@c13g2000cwb.googlegroups.com>
Source record: 4463

Having moved house, my HF-150 remained packed in storage for two years. I have just retrieved. It is as deaf as the proverbial post. However, I have established that the whip antenna circuit works perfectly. Both other antenna systems function intermittently. It suggests a severed connection somewhere. I have the original manual and can access the circuit diagram. First, am I correct in assuming that I should focus my attention exclusively on the antenna conections to the RF side of the board. Second, if anyone out there is familiar with the circuitry could I be directed as to where I might really focus my inspections. If all else fails, is anyone out there repairing these excellent radios?

The sideband accessibility is little more than a novelty for me. I have a "base unit" here that provides that capability, but the conversations I've come across have done little to intrigue me. The Grundig's superior audio appeals to me. I'm not a "headphone" guy. Darren

466. Here is "Why" I am 'skeptical' about DRM and IBOC

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 15:32:15 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1105284735.310488.68540@c13g2000cwb.googlegroups.com>
Source record: 4465

For One and All,
.
Here is "Why" I am 'skeptical' about Digital Radio Mondiale
(DRM) and In-Band On-Channel (IBOC); and will continue to
buy a a few more radios in the next Ten Years (10 Yrs) that
simply offer normal 'analog' AM/MW, FM and Shortwave Broadcasts.
.
DRM - Digital Radio Mondiale (DRM)
DRM => http://www.drm.org/
.
Digital Radio Mondiale (DRM) Broadcast Schedule {Links}
WWDXC => http://www.wwdxc.de/drm.htm
DRM => http://www.drm.org/livebroadcast/globlivebroadcast.htm
.
Experimenting with DRM - {FineWare SWL}
DRM SWL => http://www.fineware-swl.com/drm.html
.
IBOC - In-Band On-Channel (IBOC) AM and FM Digital Audio
Broadcasting is designed for use in the USofA (Only).
IBOC => http://www.ibiquity.com/technology/iboc.htm
IBOC => http://www.ibiquity.com/technology/hdradio_how.htm
RW => http://www.rwonline.com/reference-room/iboc/index.shtml
"iBiquity Digital designed its IBOC technology to bring
the benefits of digital audio broadcasting to today's
Radio while preventing interference to the "host" analog
Station and stations on adjacent channels."
.
For the most part TV is an Every Family (Household) and
Every Family Member (Everybody) Broadcast Media Activity.
[Everyone Watchs TV 3-5 Hours a Day Every Day]
TV is "The" Mass Market Media in the USofA [.]
.
Contrast that to Shortwave Radio; where One Household
in Ten in the USofA and 'only' One Member of that
Household (One-in-Three) may be a Shortwave Listener
(SWL) and 'want' DRM and IBOC. This is a limited and
specialized Consumer Market with small Profit potential.
Likw AM-Stereo this may be a Product the the Consumers
"Do Not Want" {Feel They Need}.
.
.
IN-THE-NEWS :
So here is the News Article that got me to start Thinking
and Writing this post. It is about the the near term

future (2-4 Years) of Digital High Definition TV (HDTV)
and related Technologies and Products.
.
READ - Waiting for a TV Technology to Inherit the Future
http://www.washingtonpost.com/wp-dyn/articles/A58311-2005Jan8.html?referrer%3Demail&sub=AR
http://www.washingtonpost.com/wp-dyn/articles/A58311-2005Jan8_2.html
The good news from this year's Consumer Electronics Show
is that companies manufacturing the latest television models
have finally learned to make some of these sets fit into
ordinary budgets. - by Rob Pegoraro, The Washington Post
.
MY-POINTS - About High Definition {Digital} Television HDTV :
.
* It's coming and will become the 'standard' for most
American Households but not for the next few years.
.
* The Commercial Forces behind it are Great because
there is Big Money to be made selling the 'new' TVs.
.
* The Consumer Demand is 'growing' and as TVs wear out
more and more of the replacements will be HDTVs.
.
* Since most 'analog' TVs still have a "Picture Tube";
I would expect that a TVs useful life would be 3-7 Years.
.
* While our AM/FM Shortwave Radios being fully Solid
State should have a useful life of 10-15 Years; barring
a user caused 'accident'. (Or the Urge for a New Toy.)
.
so - what say you ~ RHF
.

I have a brand new Zippo lighter in the box in front of me right now.
It is still in the original Zippo box with the Red flame

I just brought it from the bedroom. My father must have bought it
back in the 60's or 70's.

It has never been used. It has a picture of the U.S.S. Little Rock
battleship on the side. then the words CLG-4

How many hundreds of thousands of dollars is this one worth? I'm ready
to sell it for a fair price

I'm having an interesting moment now.

I'm sitting her at my computer listening to my YB 400 PE that is hooked up to the scanner antenna on the roof.

I'm listening to 15.190 the BBC. I have the direct lead from the antenna hooked to alligator clip and the other end hooked to the antenna of my YB 400 PE. The signal is weak, coming and going, and lots of noise. I have also plugged the antenna directly into the slot on the side of the YB 400 PE, but I still don't get a very clear signal on this frequency

I get up and go into my bedroom, turn on my 1972 Zenith Trans-Oceanic D-7000Y and tune the same frequency just using the whip. The signal is loud and clear. Very little fading, and almost no noise. Just a big booming clear signal.

That is really amazing to me that there could be so much difference between the two radios

So I think I'm going to get me a Satellit 800 and call it a day. Forget about the receivers that cost thousands of dollars. I don't believe there would be that much difference anymore

What you have pointed out is one of the reasons IBOC is being pushed to begin with - they want to attract more listeners = more money.

In regards to SW DRM, I can only surmise that the "digital" may attract more listeners but the advertising dollars are not interested in an international audience.
Unless DRM is designed to create more local and regional listeners which the advertising
industry may respond to.

If the industry can't attract more listeners then the MW & SW will remain on track to become the dinosaurs of broadcast media. Whatever the final outcome may
be - Long Live Analog!

USA Mad Cow Testing--A Deliberate Coverup?
USA Government Falls Short on Testing for Mad Cow--Is This A Coverup?

USDA Mad Cow Strategy: Don't Look, Don't Find
April 2, 2001 by Jeffrey A. Nelson vegsource.com

Compared to the actions taken by countries in the European Union, the United States government does not seem to be aggressive enough in protecting American consumers from bovine spongiform encelphalopathy (BSE), commonly known as mad cow disease.

The type of testing methods now used in the U.S. have been shown to miss prions detected by the more advanced testing methods employed in Europe. (A prion is a microscopic protein particle similar to a virus but lacking nucleic acid, thought to be the infectious agent responsible for BSE and certain other degenerative diseases of the nervous system.)

Germany, which long proclaimed itself "BSE-free" using the same type of testing the US currently utilizes, did not discover its first mad cow cases until it began using the more sensitive testing procedures.

The U.S. currently uses Western Blot analyses, immunohistory chemistry, and histopathology, which are more labor intensive and take longer than the newer tests. They require removing a portion of the brain, growing a culture, staining it with dye, and examining how the dye has interacted with the culture.

The U.S. also is presently testing only 1 out of every 18,000 cows slaughtered, whereas countries like Switzerland test 1 out of every 60 cows...

Dr. Marcus Doherr is a veterinarian epidemiologist at the University of Bern, Switzerland, who received his Ph.D. from University of California at Davis. He helped design the Swiss mad cow testing program, regarded by many

experts as the most advanced in the world.

Doherr says that if the U.S. has as high an incidence of mad cow as France,
for example, the current USDA testing program would not detect it. "They're
not testing enough animals," he says. "The USDA argues it's a good sample,
but it isn't representative of the population it is trying to extrapolate."

European countries have for some time been testing a far greater percentage
of their cattle. And unlike the U.S., European countries are now testing
animals which are headed into their food chain. The U.S. is currently
testing a tiny number of "downer cows," cows which are selected for testing
visually by USDA inspectors because of obvious illness.

Dr. Linda Detwiler, a veterinarian who chairs the BSE Working Group at the
U.S. Department of Agricuture, defends current U.S. testing, asserting it
is adequate to detect mad cow if it is in the U.S. "We are targeting fallen
stock, and we know it's best to target those cows because in Switzerland,
the country with the greatest scientific experience with spotting the
disease, they found all their BSE cases in fallen stock, and none in
testing animals going into the Swiss food chain."

Actually, that's not entirely correct. Dr. Markus Moser, a molecular
biologist and guest researcher at Oxford University in England, heads the
Swiss company Prionics, which developed a rapid-response test for BSE,
called the Prionics Check Test. The Check Test costs about $40 per cow, and
Moser says it has found cases of mad cow in tests of "healthy" cattle which
otherwise would have entered the food chain.

Glad to see that it is them and not my equipment. I've had the same problem. I've haven't tried online for a few days though so maybe they are working again.

I listen to them on 9.580 here in the Middle Midwest most late nights until around sunrise. That would be from about 0700 UTC to about 1400. The signal is weak but understandable.

I get them here in the Midwest most every night from On Sun, 26 Dec 2004 14:42:34 GMT, "Burr" <pitz2@verizon.net> wrote:

Here's a photo of me decoding TASS RTTY with a Sony ICF 2001D and a
Commodore 64 in 1988. The frequency shift was possible using the on screen
display. The interface pc board had an on board CW filter.

Good old TASS RTTY! I had an M6000 decoder years ago and monitored them via
Cuba.

Back when there were still a few news services using SW.

It was after decoding Soviet ship to shore messages in RTTY that I saw that
the Russians were not the evil people our leaders used to make out. They
were very touching messages to granddad Oleg and little Misha.

Maybe all the folks who want to listen to the Radio National track,
instead of ABC Local Radio are going online. Early Saturday (local
time), Radio Netherlands on 12080/9345 wasn't coming in so I had
the great choice of BBC's Sportsworld, or ABC Local's cowboy music
program. Feh.

The ONLY advantage the 400 has over the 7600 is the speaker and absolutely nothing else. The relative audio
quality of the 400 is overrated. The audio difference compared to the 7600 is small. These are portables after all.

I chuckle when people equate speaker frequency response to receiver quality.

> Hmmm, a mistake, that's possible. I'm optimistic >though. Darren

I have both and the 7600 blows the 400/G4000 away in every other category.

From: HankG <hank@invalid.com>
Message-ID: <JPednaX4Kexc4XzcRVn-pw@comcast.com>
Source record: 4499

It's 18:40 z and I'm 'listening' (I think) to WWRB. There is some religious fervert doing his thing. At first I thought it was a pirate as the frequency seemed to be drifting up and down.

This guy is shouting so loud into the mic, that I came across his splatter as high as 20 khz and more above his broadcast frequency. In my recent SWL experience, I found that most AM signals could be detected at less than +/- 10 khz (usually 5) from the broadcast frequency. He's on 12.172 (I think). My meter seems to be resting on +30. His lower sideband is unclear, being interrupted by other powerhouse stations.

In the ILG database, WWRB's modulation is listed as DAB. What is this, and are SW broadcasters limited to 100% modulation as are (were?) amateur and commercial broadcasters? What is a reasonable bandwidth for an AM station.

504. OT Indulging "Le Donald" Endangers the Personal Security of Every American

Newsgroup: rec.radio.shortwave
Date: 2005-01-09 19:02:14 UTC
From: David <rickets@knac.com>
Message-ID: <2rv2u0hpn56h5tc3lijhen1mfed7es73vf@4ax.com>
Source record: 4502

January 9, 2005

Indulging "Le Donald" Endangers the Personal Security of Every American

Note: This January 9, 2005 BuzzFlash Editorial marks the ninth in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

Even though the nation was warned by GIs and whistleblowers that most Humvees were not properly armored prior to the Iraq war -- and that many soldiers did not have body armor, "Le Donald" held forth almost daily with a bizarrely idiotic display of doublespeak and sweeping hand gestures at Pentagon news conferences ensuring us that our troops were protected.

Rumsfeld and Cheney have been sidekicks since the Nixon Administration, and you can assume that he, Cheney, and the Pentagon Psy-Ops division is pretty much running the abysmal failure known as the war in Iraq.

Of course, Rumsfeld assured Congress that the army was in top shape and fully ready to meet the needs of overthrowing Saddam. The problem, of course -- almost 1500 GI deaths later, with thousands more wounded -- is that he was wrong.

Rumsfeld was a wrestler at Princeton, and he loves to dodge and weave, but he's a complete failure at pinning down his opponent, except when the grappler he is facing is himself. This guy, as Jon Stewart, has pointed out, appears to hold full blown press conferences with himself, where he asks and answers his own questions, without providing any real answers at all. In fact, his most famous rhetorical trick is asking himself a question before the media, and then answering it with more questions, which means he doesn't REALLY have any answers -- or none that make any sense to a resident of this planet.

His position basically appears to be: "I'm here. I'm Rumsfeld. I ain't going anywhere as long as Cheney's heart holds up. So F*** off."

Of course, when a soldier had the audacity to ask Rumsfeld why all the Humvees weren't armored, the Pentagon suddenly went into media blitzkrieg PR overtime showing how hard they were working to protect the Humvees and the soldiers. Uh, but the factory providing the armor said that the Pentagon had never asked it to increase its pace of

production and that it wasn't working nearly to capacity.

Oh, that "Le Donald." He's such a kidder.

And what a thin skin that "Le Donald" has. Clearly, he must be aware of how he serves the American people, as the following example from the book "Sixteen Acres," illustrates. It concerns a dinner at the White House in 2004 in remembrance of September 11th, at which:

One fearless firefighter's widow found herself at a table with Rumsfeld, then very busy trying to get control of the nation that he had conquered the spring before. He asked her what she thought of the war with Iraq. "You don't want to know what I think of it," she answered, and when Rumsfeld said he did, she told him: "I resent that you are exploiting the death of my husband." The secretary of defense stormed off, leaving his wife behind to patch things up.

Maybe Rumsfeld has learned from that experience, but we highly doubt it. "Le Donald" is not into "personal growth." His office, however, claims that he has stopped having an automatic signature sign "personal" letters of "condolence" to the families of men and women soldiers killed in Iraq. Now, he'll have his secretary personally sign the letters for him, we guess.

What a guy, that "Le Donald" is.

If you know of anyone more incompetent, let us know.

Of course. We forgot. There's the rest of the Bush cabinet.

And Bush, of course.

I'm no expert, but why don't you try the YB400 with another antenna,
even a portable wire like the Sangean ANT-60.

BBC 15190 is about the most reliable broadcast I can imagine, so unless
your Grundig is dying I'd really suspect a big mis-match with the antenna.

Nope. As soon as the HF users reach a certain level of decline,
the FCC will auction-off the HF band for use in WI-FI local
broadband networking, telling the hams to enjoy "2 meters and down."
Count on it.

I had to replace the antenna switch on my HF-150. I tried contact cleaners but that did not work for long. I ordered the switch from the "Lowe Workshop" a few years ago (hopefully it is still in business). Replacing it requires quite a bit of disassembly but it can be done with a good soldering gun, a set of allen wrenches and a lot of patience.

Jim

So, "tote your portable ;-)". Well, I mean that in the real sense of taking a radio around your neighborhood and seeing if it's local or outside the area. If you don't have a portable shortwave, see if you can pick it up on the high end of the AM band. Back when I really had a problem, I found that it was the neighbor's line doubled back projection TV when somebody was playing with the game console. (That, and a corroded antenna wire).

The stuff I get now sounds like one or more computer monitor or TV horizontal scan circuits, so I expect that one of the neighbors is leaving their TV on. Or got a new set or 'puter for Xmas. Since they run on (sort of) standard frequencies, the interference can seem the same all around the world, but comes from a multitude of local sources instead of one very powerful distant one. (OTOH, if it's drifty, suspect those damn compact fluorescent lamps).

9525 has been so variable lately. Last Friday was strong all evening until signoff at 04:00, but other nights last week were just horrible. Makes me wonder if the folks in Florida let their antenna fall in the swamp over Xmas vacation.

Keep track of the signal strength. The interference may be there all along but doesn't really have an impact unless the signals are down around S2-3.

He said it's a *scanner* antenna. It's probably an antenna made for
picking up VHF signals, which is likely why it's doing so poorly on HF.
He also said he clipped it onto the 400's whip using an alligator
clip-another potential mismatch situation.

Hey, I heard it too. (6195 kHz, 04:20 on Sunday, local Saturday evening)

I thought it was pretty frigging cynical, but probably too close to
the truth. This fund raising thing is getting a bit out of hand, and
his point is that if this could have negative effects next time around
and a lot of beneficiaries aren't the poorest countries around.

People who are on a feel-good trip thinking that their efforts can only
help and not hurt should think about their addiction to "doing good
things" that really aren't necessary. Remember the people who donated
tons of stuff to New York City after 9/11 which later was found to be
unneeded and looted out of the warehouses it was stored in. The poor
bastard who bankrupted himself buying a truckload of gloves and stuff
should be a cautionary tale for all of us.

And I bet Robert Green would be amused that you would classify him
as anything as right wing as "liberal".

Did you listen to Amsterdam Forum, too. It was interesting. A
repeat of a program from Oct. '03 about the problems caused by
(and to) people who live on the Internet and tailor their readings
and participation to only things they agree with, and how a forum
where everybody is in agreement leads the participants getting more
and more extreme and disconnected from reality. (I don't think
that's a problem with r.r.s).

You know, you're right. I've never seen "David" post any loggings, or anything remotely shortwave related. He always posts "OT" stuff he finds on the net. And it DOES provoke a response. I just happen to be liberal, and it seems I can't resist responding to the conservative responses to the liberal OT posts. Let's stop the vicious cycle by not responding to ANY of David's OT political posts. That means Ace shouldn't post his "go tote it, tard" response to these posts, because he and David always get in an insult fight that takes up bandwidth. If we just IGNORE all posts that are "OT" then we can get back to discussing shortwave. I've seen little discussion lately of such things as the BPL threat to HF.

But if you do this, then David and M II (and unfortunately myself and a few other liberals) will respond back to you and try to correct you. Then you try to correct us, and the vicious cycle continues. And David has once again successfully taken up bandwidth and disrupted the group.

>so - what say you ~ RHF

1. DRM

DRM is a European solution to a European problem. It's a system
that a bunch of second tier broadcasters have come up with to
use their existing frequencies to continue to be continent wide
broadcasters in the face of the various national broadcasters
conversions to local digital radio systems.

2. IBOC

The US National Association of Broadcasters method to jam adjacent
(out of area) signals and restrict the possible number of stations.
On a local NPR station's program about their conversion to IBOC, one
of the particpants admitted that the reason that IBOC is being pushed
was that other systems could double the number of stations and that
was unacceptable to the NAB.

3. Cost

Both of these systems need a digital signal processor with a hundred
million instructions per second or so of throughput. That sort of CPU
power is going to cost in both money and electrical power consumption.
That means about $100 more than an analog radio and a hard time to
make a portable that doesn't suck batteries like no tomorrow.

The IBOC promoters seem to think that people only listen to the
radio in a car, too. Well, maybe that's the only market that
will spend the $$$ for the equipment.

I hear that the IBOC digital CODEC (compression scheme) is lousy
for voice. Just what the talk radio people need. ;-)

IBOC and HDTV have the same problem. I'm gonna be damned if I
will spend several hundred bucks for a new radio or TV if it's the
same crappy programming as I get now.

I see that the commercialization of college "amateur" sports is nothing new. I was watching the college football "bowl championship" games on New Years Day, and EVERY aspect of the broadcast was sponsored by some big corporation. "Dodge Defensive Playbook". "Ford Road Ahead to the Orange Bowl". (Ford America's current slogan is "Focused on the road ahead".) Even the first downs were sponsored by Citibank! Silly me, I thought this was amateur sports. Anyway, yes all of the college athletes are on the take, apparently the universities think that giving shitloads of money to athletes who can barely function otherwise is better than spending it on academics. Many American universities are an athletics program with an incidental academic schedule. Ever wonder why tuition is so high? I bet it all goes to the athletes and the coaches and the rest of the athletics department while professors make less in salary for an entire year than what it costs to attend for a quarter. Really sad.

I have one. I enjoy it very much. It is quite good on most shortwave and AM (MW) frequencies. Also very nice with FM and has good sound through the headphone output (in stereo). The whip seems to have good sensitivity as well. For the money I think it's great. It does not do so well on SSB, and has trouble with weaker signals, but if you will be doing primarily program listening, this is probably one of the best portables out there. Mine doesn't do so well indoors (it is excellent if used outdoors), but I live in a very RF-noisy apartment building...if you'll be using it inside, you might want to string up an outdoor antenna before hand, or looking into an active antenna of some kind.

I agree 100 %. I have a 7600gr and I have used the YB-400. Other then the superior audio quality, the 7600gr is a much better radio in general.

Also.... I have a PL-550 that cost me brand new just under $50.00 plus shipping and I think the audio quality on the PL-550 is about as good as the YB-400. The PL-550 also has way more features then the YB-400.

If I want better sound I use ear buds. You get stereo on FM also with
the 7600.

I owned an old Radio shack DX-380 portable for years and when it came
time to buy another portable I went to the stores in the area and
compared several. After that and reviewing specifications and features
the ICF-SW7600G won hands down.

Try looking here:
http://www.rtty.com/rtty_list.htm
KAWN at 13528(850Hz shift 75speed)
was very active back in 2002. I tuned in jsut now 5:45EST
and there is a strong FAX signal.
KWAN is located, I think, in Elk Creek Nebraska, so they
should put a stong signal into your area.
The 7782 signal is strong at night.
My MFJ1278 is in strarage because receiving
mil aero WX forcasts gets old.
There just isn't that much interesting, to me at least,
RTTY still on HF.

It's not easy to determine the bandwidth of a station by using a receiver. For instance, just because you can hear "something" from a station as you tune your receiver over a 20 kHz range doesn't mean the station is 20 kHz wide. You have to take the bandwidth and shape factor of your receiver's i.f. section into account. The strength of the signal will also affect what you observe.

For instance, a steady unmodulated carrier has essentially zero bandwidth. But if you tune across it in lsb or usb mode, you will hear the heterodyne over at least a few kHz. That's a funtion of your receiver, not the transmitted sugnal.

The correct way to characterize a station's bandwidth is with a spectrum analyzer.

The electric company has a maintenance number for you to call or you
can probably to go a web site and report the outage. Go out side and
see if there is a pole number. If you can't find a number then just
give an address it is in front of and a description of the problem such
as cycling on and off. They fix the street lights around here in one to
two days usually.

Spectrum analyzers are generally expensive items. Got a source for a
modern one that covers 1 to 30 MHz that does not cost a lot?

Yep, and if it's a real problem the FCC requires them to get it fixed... my local power company spent over $5k this fall just to bring in a guy from Maryland to show the folks here how to find the problems I complain about!

It's rare and obviously highly collectable.

In addition to that the street light is a road safety issue that
obligates either the city, country, power company or whomever owns it
to get it repaired quickly. It will get fixed soon for legal reasons.

It looks like a really nice old radio that is rare. Not accounting for
collectors of anything under those circumstances.

Zenith Stratosphere's are one of the most collectable radios, and they DO
fetch extremely high prices. The one in question will no doubt fetch over
$100,000 for the buyer once it's been completely restored. Radios like the
Sparton "Sleigh" (a blue mirror-faced radio with otherwise pretty common AA5
innards) can go for as much as $5000. And that's a table radio.

Yes, I was just about to say the same thing. Once the cabinetry is repaired by a competent individual, and the electrical work is gone through it would certainly be worth much more.

Someone bidding that kind of cash knows what they are doing.

Zenith only made 350 of those radios, and only about 40 are known to
still exist.

The odd thing is the cabinet on this one has quite a few missing bits of
veneer, and scratches, a knob is missing and the other knobs aren't in
great shape. The seller doesn't indicate if it works.

He may regret it after seeing the radio in person, but the high bidder
bid at least $21k more than the next highest bidder to meet the reserve.

But this is somewhat of a "holy grail" radio - he might never see
another one for sale.

It would have to be the U.N. that holds the auction as SW is not a "single country" phenomenon.
In which case you can expect it to be riddled with FRAUD!

Oh yes, if it has ANYTHING to do with a "corporation," then it's
automatically bad, isn't it?

The main reason lefties don't like corporations is that they are a big part
of the capitalist system, which is (of course) what they REALLY dislike.

And as far as media is concerned, of course those losers would LOVE to go
back to the days of three major news outlets controlling all the news. Back
then, the only debate you'd hear was liberal Democrats debating moderate
Democrats.

Would you like some government cheese with your whine?

This from a poster in rec.antiques.radio+phono:

The seller of the Zenith Stratosphere 1000Z just e-mailed me. Apparently the
$50,000 bid was made in error according to the high bidder. The 1000Z WILL
BE
RE-LISTED with a new reserve and "buy it now" feature. The last legitimate
bid
was $28,700.

Yeah - my wife is the most supportive and loving person in the world
to my hobbies, bless her. But if I suddenly told her I'd spent fifty
G's on a 67 year old radio, my last sight would have been her standing
over me reloading.

For the price, these are an excellent buy. They lack sync detection and, for me, the display is a little difficult to read unless it is held at just the right angle. Otherwise they have excellent audio, great FM stereo with earphones and the ability to receive SSB transmissions. They are very durable but tend to consume batteries at a rate a little above average.

Anything with the "SONY" label is very susceptible to being pilfered if you do much traveling. The YB400 is presently just a tad too funky to be a hot item on the black market.

I own a lot of portable SW radios and the YB400 is the one I use the most because it ranks most highly considering performance against replacement cost. It takes a licken' and keeps on ticken'! It performs well and baggage handlers aren't interested in stealing it. It has survived many "drop tests" and supplies beautiful FM stereo. SW DX depends on your choice of antenna, but mine performs unusually well from the whip.

Unless you can find a killer deal on a sony 7600, you should go for the YB400. If you are looking for a "traveler," I would go with the YB400.

Worth exactly 2 cents....Your mileage may vary...

> innards) can go for as much as $5000. And that's a table radio.

It's ridiculous what an antique radio can go for nowadays. Even the most
Plain Jane AA5 wood table radio can go for hundreds of dollars. I
remember when you could go into an antique store (a major one, not a
dusty little forgotten place in some hick town) and have yourself a nice
5 tube wood cabinet table radio for $60. And it WORKED! This was back in
the early 90s, when I was collecting. Nowadays a wood table radio that
has major veneer damage and does not work can go for several hundred
dollars. If it's a Zenith "black dial" (a radio that has a distinctive
big black dial) it can go for more. And the rarest Zeniths can fetch
absolutely obscene prices. Mirror radios are extremely rare, and fetched
big bucks even when I was in the hobby, but the prices being asked and
paid for even the blandest pre WW2 table radios nowadays are absolutely
astonishing. ONE HUNDRED GRAND for a radio that's nearly 70 years old?
Give me a break!

No, they were quite clear that the scholarship was FOR baton twirling. Apparently there are golf, tennis, cheer leading and other "sport" scholarships also. Tether ball, hopscotch, marbles and 4 square, here we come. None of these are available at universities this Albertan in Canada. We also don't have skiing, snow mobiling or fishing scholarships. Would've liked the fishing one.

there were 10 different legitimate bidders who bid from $20K to almost $30K.
I think the winning bidder who bid only once at $50K was out of his mind...if
that's a mistake, but it takes two clicks to bid. The reality check came after
the bidding ended.

EBay should throw him off EBay, after his wife auctions his genitals for a
transplant.

It will also wipe out low VHF TV (channels 2-6, about 62-88 Mhz). But from what I've read I suspect that the FCC is seriously trying to end over the air TV broadcasting, so this may just be the excuse they need to pull the plug on analog TV and force every American to buy a pricey (several thousand dollars) high definition TV, and force them to use either cable or satellite services that have expensive monthly fees. I personally think the FCC may be playing with fire here-if there's one thing Americans care about, it's TV, and suddenly rendering 300 million + analog TV sets useless may create a severe backlash. The British pulled something similar off when they stopped all 405 line TV broadcasting, but the Brits care much less about TV than Americans do.

I would rather have the money to spend. :) It must be nice being able to pay a quarter of a million dollars for a table and not think twice. I want to be able to do THAT. Just happening to have a radio that somebody is willing to pay $50,000 for isn't as great as being the person who can plunk down $50,000 for that radio and have it be a drop in the ocean of their fortune.

What bothers me most about the high-end collectibles is that many of them are never used in the way they are supposed to be. I can't speak for the radio in question (I sincerely hope the eventual buyer reconditions the innards as neccesary and *uses* it) but I am versed in the vintage guitar market. There are certain Gibson Les Pauls and Martin acoustics that sell easily in the $30,000 range at auction, and most of them are not played - or even wall-hung. They go into bank vaults as an "investment". Shrewd money planning, maybe, but that instrument may never again be used for what it was designed for - making music. I'll bet there are old Hallicrafters out there you could say the same thing about. I think that's sad.

Tony

> Oh yes, if it has ANYTHING to do with a "corporation," then it's
> automatically bad, isn't it?

Not necessarily. The corporate entity isn't automatically "bad", just like any other thing isn't bad or good, it's just a vehicle. There are many small corporations out there, and many medium sized ones, that focus on keeping their customers happy and don't try to force their hands. But anything can get too big and too powerful, and when something or somebody gets too powerful they tend to try to bend everybody to their will and not see anything wrong with trying to force the hand of their customers. It is this phenomoenon of something that is so big and powerful that is has the power to force the will of millions of people to go along with its wishes that liberals are against, not "corporations" per se.

> The main reason lefties don't like corporations is that they are a big part
> of the capitalist system, which is (of course) what they REALLY dislike.

Some do. I don't. Capitalism as originally concieved had many sellers and many buyers competing freely. But when there are too few sellers or too few buyers or both the market gets distorted and one or a handful of sellers or buyers has the power to force the other side to do what it wants, often against its will. That's not competition, which is the essence of capitalism (not corporations). When there are too few sellers AND buyers then you get what some call "sweetheart deals". These can be fine if it doesn't entail bending other third parties to the will of the sweetheart deal. But if there are third parties involved, the sweetheart deal usually goes sour. The no bid contracts given to Halliburton by the feds are one such sweetheart deal that forced millions into situations they didn't agree with.

>

> back to the days of three major news outlets controlling all the news. Back
> then, the only debate you'd hear was liberal Democrats debating moderate

> Democrats.

Unlike today, when the only debate you hear is far right Republicans
"debating" moderate right Republicans. Same devil, different cloak. Same
bad situation.

Thanks, I tried the Icom R-75, and thought that I could barely make out
some of the regulars. It wasn't good enough for a copy though. The R-75 has
the outdoor antenna, the Yaesu FRG-100 is limited to an indoor antenna that
goes around the room near the ceiling. Surprisingly, the Yaesu performs
better on some shows than the Icom, likely due to the shorter antenna wire
being closer to the resonant frequency of some stations.

I'm sure you've read these letters asking you to send $1 to six different addresses. Putting your home address or mailing address on the internet can be risky, but through PayPal all you have to provide is your email address. It's safe and easy. Just go to www.paypal.com and set up your FREE account! No credit card is needed. I am not a gullible person and have never trusted things like this, but I gave it a try. Hey it's only $6. I figured at least 6 people would respond out of the millions of people that use the internet. You should give it a try too! You have nothing to lose, and thousands to gain! Read on for the letter that I found (of course, I added my PayPal e-mail on #6)...

HOW TO TURN $6 INTO $6,000+!!! THIS REALLY CAN MAKE YOU EASY MONEY!!! IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO THE LETTER FOR IT TO WORK!!!! A little while back, I was browsing through newsgroups, just like you are now and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah, right, this must be some kind of scam" but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 though PayPal to each of the emails stated in the article. You then place your own email address in the bottom of the list at #6, and post the article in at least 200 news groups. (There are thousands) No catch. That was it. So after thinking it over, and talking to few people first, I thought about trying it. I figured what have I got to lose except $6.00, right? Like most of us I was a little skeptical and a little worried about the legal aspects of it. It follows the same regulations as the "mailed chain letters, which according to the U.S. Post Office (1-800-725-2161) is indeed legal! Then I invested the measly $6.00. Well GUESS WHAT!!? Within 7 days, I started getting money in my PayPal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $20.00. By the end second week I had made a total over $1,200.00!!! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $36,000.00 and it's still coming in rapidly. It's Certainly worth $6.00. I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works? Also, make sure you print a copy of this article now, so that you can get the information off of it as you need it.

$$

REQUIREMENTS: You must have a confirmed PayPal account. If you do not have a PayPal account you can go to www.paypal.com and follow the instructions to set up a free account. In order to place the initial $6

into your account, you will have to confirm your bank account with PayPal (which may take a few days). PayPal is 100% secure and is used my millions of people world wide. Confirming a www.paypal.com account simply means (1) PayPal will first ask you to confirm the email you used to sign up your PayPal account by sending you an email with a link for you to click to that email. As soon as you click that link your email is confirmed. (2) PayPal will then make two small deposits into your bank account if you set up your PayPal account with a checking or savings bank account. Or PayPal will make two small deposits to your credit card if you set up your PayPal account with your credit card. Then after a few days (it takes up to a few days for these deposits to appear in your bank account or on your credit card statement) then after a few days you go back to the www.paypal.com website and sign in. Then you click where it says this account is not yet confirmed. A screen will pop up that gives you 2 boxes to fill in. You then enter the numbers of the 2 small deposit amounts (two separate 2 digit numbers) that were deposited to your bank account or credit card. Now you have a working and confirmed PayPal account and can receive payments.

$$

[STEP 1]
Send, though PayPal, $1.00 to each email on the below list. Make the subject of the payment "Email List" and in the comments, write "PLEASE PUT ME ON YOUR EMAIL LIST." What you are doing is creating a service by this - and best of all you are not giving your address to anyone you do not know. THIS IS ABSOLUTELY LEGAL!! YOU ARE CREATING A SERVICE. Here are the latest PayPal e-mails on the e-mail lists:

#1)brittany...@excite.com

#2) mth...@renc.igs.net

#3) Mishav...@aol.com

#4) nike31...@aol.com

#5) careent...@hotmail.com

#6) jjrvn...@hotmail.com

www.paypal.com

Subject of Payment: ***Email List***

Comments: ***PLEASE PUT ME ON YOUR EMAIL LIST***

[STEP 2]
Now take the #1) email off the list that you see above, move the other addresses up one (6 becomes 5 & 5 becomes 4, etc) the put YOUR email address (the one used in your PayPal account) as #6) on the list. **MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL ACCOUNT**

[STEP 3]
Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups, message boards, etc. (I think there are close to 32,000 groups) All you need is 200, but remember, the more you post, the more money you make - as well as everyone else on the list! In this situation your job is to let as many people see this letter as possible. So they will make you and me reach!!!! You can even start posting the moment your email is confirmed. Payments will still appear in your PayPal account even while your bank account is being confirmed.

$$$

DIRECTIONS ON HOW TO POST TO NEWSGROUPS/MESSAGE BOARDS.

[Step 1]
You do not need to re-type this entire letter to do your own posting. Simply put your CURSOR at the beginning of this letter and drag your CURSOR to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into your computer's temporary memory.

[Step 2]
Open a blank Notepad file and place your cursor at the top of the blank page. From the 'Edit' menu select 'Paste'. This will paste a copy of the letter into notepad so that you can add your email to the list.

[Step 3]
Save your new Notepad file as a .txt file. If you want to do your postings in different sittings, you'll always have this file to go back to.

[Step 4]
Use Netscape or Internet Explorer and try searching for various newsgroups, on-line forums, message boards, bulletin boards, chat sites, discussions, discussion groups, online communities, etc. EXAMPLE: go to any search engine like yahoo.com, google.com, altavista.com, excite.com, then search with subjects like "millionaire message board" or "money making message board" or "opportunity message board" or "money making discussions" or "business bulletin board" or "money making forum" etc. You will find thousands and thousands of message boards. Click them one by one then you will find the option to post a new message.

[Step 5]
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting 'Paste' from the 'Edit' menu. Fill in the Subject, this will be the header that everyone sees as they scroll thru the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations! THAT'S IT!! All you have to do is jump to different newsgroups and post away. After you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS

AND/OR MESSAGE BOARDS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money within days! **JUST MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS ON PAYPAL.**

Have fun!

594. Radio Six International

For a auction to reach a skyrocketed price on eBay, TWO people need to
be involved (if the bid is a 'joke'.

Based on the proxy bidding system, let's say someone sells a widget
that's worth $500. If someone bids $500.00, and then the 'jokester'
comes and bids $50,000. The 'bid' is actually the next increment of
$500 - probably like $505. And that is what the auction will close at.

Rapper's Inaugural Invite a Shocker, Say Family Advocates

By Fred Jackson, Bill Fancher, and Jody Brown
January 6, 2005
(AgapePress) - Christians who helped re-elect George W. Bush are in for a major shock. WorldNetDaily reports that organizers of this month's inauguration festivities have invited one of the most vile rock starts in the country to entertain Republican young people.
WorldNetDaily describes Kid Rock as "a popular vulgar rock-rapper whose lyrics wouldn't begin to pass muster with the Federal Communications Commission." But that is who Republican organizers have chosen to headline the entertainment at the inaugural youth concert, hosted by none other than the president's two daughters Jenna and Barbara.
For those who may not be familiar with Kid Rock, also known as Robert James Ritchie, he is a Detroit-based rapper who, among other things, has received a 1999 MTV video music award for being the "Sluttiest Male Celebrity," and shared the same stage as Janet Jackson at last year's controversial Super Bowl halftime show. His lyrics often focus on the recreational nature of sex and send a message of female sexual exploitation.
In addition, a search on Yahoo! indicates he performed in at least one pornographic video (released in 2000) along with well-known porn stars Tricia Deveraux, Ron Jeremy, and Teri Weigel. The video was produced by infamous porn video director John Stagliano, whose trail of porn videos slinks back to the early 1980s.
ï¿½
*

The rapper's invitation has created a stir among many pro-family supporters of the president. Dr. Don Wildmon, founder and chairman of the American Family Association, says the White House has sent a shocking statement to millions of families who supported his re-election.
"Kid Rock is an inexcusable choice," Wildmon says in a press release. "His music lyrics serve to teach our young men to disrespect women in a most vile, self-serving manner. Obviously, someone on the Presidential Inauguration Committee has made an extremely poor judgment call."
Bob Knight of the Culture and Family Institute concurs. "I think the Republicans are so sensitive to the fact that the Democrats have a lot more Hollywood support, and support from MTV, that they'll take anything they can get," he says, "but taking Kid Rock is going a step too far. [He] advocates mindless sex, he uses the f-word -- he's anything but a representative of family values."

Both Wildmon and Knight believe Kid Rock needs to be removed from the inaugural program as soon as possible. But can that happen? Knight thinks so.
"I think if they hear enough outrage from the people who elected President Bush, that this is a slap in the to their values, that they'll have to reconsider," Knight says. "He ought to be dis-invited."
WorldNetDaily quotes California pro-family leader Randy Thomasson who says if Kid Rock is allowed to perform at this inauguration event, it will send a clear message to pro-family Americans that the GOP has "taken them for a ride and ditched them in the gutter."
That is why Thomasson, executive director of Campaign for Children and Families, tells WND that the rapper's presence at a GOP event is "more than inconsistent" with the pro-family principles of the Republican Party. "It's a sham," he says. "This guy is one of the worst role models for youth imaginable."

Hi all.
I have a mint condition Sony ICF 7600GR. It is boxed with manual and the reel antenna. I have a reciept of purchase. It has about 6/8 months warranty left on it.
I would like if possible to swap it for a base model HF reciever, not too bothered about looks, make or condition. But would obviously like it to be working perfectly.
If anybody is interestd, please email me at
short.wave@fsmail.net
I have another private email address but use the above to stop spam on my main account. I shall of course reply to any emails using my private ntl account and include my details such as contact phone number etc etc.
Thank's for looking
S-Wave
PS. I would consider an overseas deal but would have to come to some arrangment in respect of import duty that we have to pay on incoming goods into this country.(UK)

Every couple of weeks someone asks where, in the US, they can get a Lowe receiver repaired. Well, just out of curiosity I inquired with a place called Land Air Communications, and they say that they will repair Lowe receivers.

I've never worked with Land Air Communications and so I can't vouch for their work. Their website exudes a certain credibility in my view, but aside from reviewing their site I know nothing about them. Still, I thought that someone who was desperate to get a Lowe receiver repaired would be glad to have this information.

To view Land Air Communication's website, just go here:
http://www.landaircom.com/service.html

From: r2000swler@hotmail.com
Message-ID: <1105361085.611651.167240@c13g2000cwb.googlegroups.com>
Source record: 4599

1)Get a ham license. Every state law that I know of allows
hams to have radio that will recieve police frequencies
in there car. However not all LEO will understand. The
KY AG wrote a lettr for hams to carry in KY to help avoid
this hassle. I supect the ARRL or the rec.radio.scanner
group can provide specifics on a state by state case.
2)Be prepared for some interesting noise problems. Modern
engines/brakes/suspenesion often have rather noisy CPU
control systems that produce odd noises in the 5~30MHz
frequency range.
3)The ignition system in modern engines is a killer noise source.
Your radio will need a very good noise blanker.
4)It is very difficult to get a really effective SW antenna on a car or
truck.
An active antenna will work, but tends to magnify the mentined
noise
sources.

There is an exception to the "you need two bidders to drive the price up" rule.

If an auction hasn't met reserve yet, it will go from wherever it is to the amount of the reserve the first time someone bids high enough.

On this radio, the reserve was set at $50,000.

Two bidders had maxed out tied at $28,700. The last guy came along and bid at least $50,000 so the auction went right up to that.

The bid may or may not have been a joke. If it was my auction, and it involved that kind of dollars, I think I'd have relisted it by now.

I requested my new password on 1/7/05
and received it on 1/9/05. I configured
my old copy of RLDB with the new pw and user
info and after going online used the update
dialog and dowloaded the latest database file
and RLDB automatically installed it. It is
working fine.
Is anyone using RLDB and have the WHAM AM and
FM database files? If someone could email them to me I'd
appreciate it very much. It doesn't matter how old
they are, as I'm disabled and need to control my
receiver by computer. Thanks for the help.

O.K., guys, I got it. Don't really need to know the station's bandwidth.
It's just that I've never heard a station sound exactly like that.

How about my question re: modulation (limit ?), and any idea what DAB
stands for?

Been there done that. The last one failed
about 10 years ago and the utiltiy did
nothing until it died completly.
And the comment about a BB riffle was a
joke.
As far as trying to get the FCC to do anything,
someone is smoking bad dope.
The FCC is out of the enforcement business,
unless of course a young lady manages to have a
"Wardroboe malfunction", or a DJ gets too
gross.
We have some really cold weather moving in
and that will kill it. It was warm the last 2 nights
and the light worked OK. When the temp drops
below freezing, it starts strobing, and the colder
it gets, the faster the strobe. The last one went the
same way.
Terry

The FCC may have rules on paper, but they don't
seem interested or able to enforce them. You are
very luck your utiltiy even tries to "do right".
As I pointed out in another post, the light
will fail very soon now that some seriuos cold is
coming.

Source record: 4655

PHIL,
.
"WHY" I would Buy the Eton 'Elite' E1 Receiver with XM
Satellite Radio
.
I would agree with you, that in many respects the Eton
'Elite' E1 Receiver with XM Satellit Radio should be a
better receiver than the Grundig Satellit 800 Millennium,
and I love my GS800M.
.
What have been many of the problems and grips that have
been written about here with the GS800M.
- Small Ferrite Rod Antenna
- Internal RF Noise from the Radios Circuits
- Hash from the LCD Display.
and many more . . . all this in a big, Big. BIG ! Box.
.
Well for Eton / Drake /Tecsun to take the GS800M and place
it into a much smaller Box; would mean that at least two
of the above problems would have had to be Fix or at least
significantly reduced to at least the same performance
levels as the GS800M.
.
Imagine a GS800M with a 'lower' Noise Floor and able to
"Hear" those Weak Signals that are just now on the edge
of Listenability with the GS800M.
.
The nature of the Business Product Process Cycle is to
Continously Seek to Build-It-Better and Make-It-Cheaper.
[Increase the Value of the Product to the Customer.]
.
The Grundig Satellit 800 Millennium was ETON Corps
Premier [Flag Ship] "Big Box" Radio. The Eton 'Elite'
E1 Receiver with XM Satellite Radio is designed to be
ETON Corps Premier 'Small Box' Radio. For ETON Corp,
the Eton 'Elite' E1 Receiver with XM Satellite Radio
has to be at least as-good-as the GS800M; and ideally
much better. Remember, it has been four years since
ETON Corp has released the GS800M and it need a New STAR
for it's Consumer Marketing "Image". If the Eton 'Elite'
E1 Receiver with XM Satellite Radio is as-good-as the
GS800M and in a 'smaller' Box; it will be a Hit with the
Buying Public. (An Executive Gift) However, if the Eton
'Elite' E1 Receiver with XM Satellite Radio is much better

than the GS800M; then it will be a Hit with the Radio
Enthusiast who will feel they need to "Got-to-Have-It !"
.
Please Note - That when I write about the Eton E1 XM Radio;
I 'label' it as the Eton 'Elite' E1 Receiver with XM Satellite
Radio. That is because 'for me' what it is as the Eton
'Elite' E1 Receiver is what I am interested in as a Radio.
What it will do as an AM/MW, FM and Shortwave Radio is the
"Why" that will make 'me' want to Buy it. The fact that
it also comes 'with' XM Satellit Radio is not a Selling
Point for me.
.
.
For now all we can do is wait and keep listening ~ RHF

.
hi Michael:
.
i see no reason to doubt Drake, who designed the R8B, SW8,
and Sat800. IMO the E1XM will surpass the performance of
the Sat800 due to the PBT. add small size [S350-like],
1700 memories, and likely 5-kHz tuning steps . . .
it should be a winner.
.
regards,
phil :)

That is correct.

From eBay:

A bid increment will go higher than the standard increment in two situations:
To meet the reserve amount
To beat a competing bidder's high bid

Not true at all. If you believe that, then YOU perhaps are smoking bad dope.

I have recent first hand experience.

If you had to wait ten years, then you simply did not complain loud enough or to the right people.

As to the BB gun, an AK-47 or an SKS does a much finer job.

I've seen 13181 listed as being used by fixed coastal stations, so what you may have heard was some ship to shore traffic.

I've also seen the freq. listed as being used by the US military at times.

RADIONMAN,
.
It is not silly at all when 3-7 Years later you can sell:
.
The {$130,000} 1967 Mustang for $200K
.
The {$350,000} for a MB Gullwing for $475K
.
The {$250,000} Pembroke Table for $325K
.
The {$10,000} Stamp for $15K
.
For the most part Collecting is usually about Pride of "Possessing"
an Item or about the 'Appreciation' that an Item will being over time.

Lowe can no longer ship directly to the U.S.
I too would suspect this area. If it were permanently low in sensitivity,
the first mixer is the likely culprit- hard to find here in the states.

Hey! I am slightly on the liberal side, and I don't feel this way at all.

Robert Green is wrong - My wife and I sent some $$ because we felt bad (I won't differentiate between pity and sympathy here) for the folks in SE Asia that got smacked by the wave. It wasn't guilt, and it surely isn't guilt that makes us happy our government is chipping in either.

And apart from that, it's just what we do...and that makes me proud.

And I think, if another disaster befalls someone, we'll do it again...because it's just what we do. Green is wrong.

But Telamon, you don't quite have it right, either. Not all liberals think like Green.

Comet Macholz. A pretty nice one if you have even binocs (the optical kind of course, not the ferrite kind).

You are right...many collectibles are no longer used as they were intended. They are put in a vault or on a shelf. And the collectibles don't necessarily have to be expensive to just sit. The ice cream scoop collectors don't pay a whole lot for most of those early kitchen tools. I'm going to guess the evening dish of B&J Chubby Hubby get's scooped with a modern aluminum ice cream scoop.

I think it is unfortunate that price keeps old collectibles from being used. I guess that's why I prowl real auctions, estate sales and flea markets. I've found a working Zenith TO for $10.00, a National HRO 500 for $35.00 that only needed a new power cord, a National Panasonic RF-5000b for $50.00, etc. All of them were in great cosmetic shape and were put to work as found.

At least from reports it is fairly certain it is not direct from CAR, but rather either Issoudoun in France or via Gabon.

Apparently some conflicting info in the current HFCC data also.

I myself rather doubt that it is direct from CAR.

It's just that I've never heard a station sound exactly like that.

> How about my question re: modulation (limit ?),

You can't exceed 100% modulation on negative peaks because the modulation envelope can't be less than zero. There are "super modulation" techniques that allow a bit over 100% on positive peaks.

As for bandwidth, if there is no distortion, the bandwidth of an AM station should be twice the highest audio frequency transmitted. For high fidelity voice modulation, the sibilants (mostly "s" and "t" sounds) may have frequency components up to nearly 10 kHz. Music can go higher than that. So unless the higher audio frequencies are filtered, the bandwidth of an AM station could be 20 or 30 kHz (not good with the 5 kHz channel spacing on shortwave). Just for reference, I believe the allowable bandwidth for an AM broadcast station in the US is 10 kHz.

FIGHT IGNORANCE: READ BUZZFLASH

Bush's Baby Tax: A Bill for Tens of Thousands of Dollars Presented to Every Baby Born in America By George W. Bush.

Note: This January 10, 2005 BuzzFlash Editorial marks the tenth in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

You've known them in your lives. The guys who go on credit card spending sprees and then skip town leaving their families to pay off their debts. They are louses, creeps, guys who mortgage the future of their children to their high off the hog living and lavish life styles.

Everything seems fine: the Porsche, the mansion, the champagne, the first class airfare, the Penthouse hotel suites, until the debt eventually comes do -- and Mr. Grifter skips town, leaving his wife to deal with the credit card companies.

That's just what George W. Bush is doing to America. He's giving tax cuts to the wealthy during a period when the asset and income gap between the richest Americans and the middle class and poor has widened to its largest distance ever. He's enriching campaign contributors with war profiteering contracts.

He's giving the middle class a few hundred dollars back in taxes, while charging them thousands of dollars for the war in Iraq -- from the pockets of the taxpayers to the wallets of Halliburton.

Bush is the "Music Man," but the band costumes don't miraculously show up in this real life story about a flim-flam man who became president. Yes, Professor Hill may have pulled the "moral values" con on River City, but they didn't end up with a "baby tax" that will come due for all of America's children, courtesy of the Bush budget busters.

It's been the goal all along of the chief Bush domestic policy guru, Grover Norquist, to run up such a grossly unconscionable debt that the American system of public services, including education, will have to be cut off. Or as Norquist has so "eloquently" said, public services will be thrown into a bathtub and drowned.

Meanwhile, in place of the repealed "estate tax," which only affected millionaires, we now have the "baby tax," which will be borne by every new baby in America.

The baby tax, brought to you by George W. Bush, who took a surplus and turned it into a record-breaking debt in no time at all.

With each birth certificate, a tax form should now be given to the newly born in America. The babies might as well start paying off the mountain of debt Bush is leaving in his reckless wake. Maybe parents can start a "baby tax" account before their newborn even arrives.

Instead of the "death tax" for the wealthy, Bush has instituted the "baby tax" for every new American.

Professor Hill, Mr. Music Man, you ain't got nothing on George W. Bush. This guy could sell you a car without a motor and get you to pay for his limousine fare home.

A BUZZFLASH EDITORIAL

636. Start learning how to win at poker today.... I DO NOT sell anything!

Please visit http://www.pokergameofskill.com
All informations is FREE. I sell nothing.
I am a poker guru who has built this web site mostly as a hobby. I talk about some of the things it takes to win at poker.
I have been winning at poker month after month for years. I know that it is a game where skill will win in the long run. I would like poker to be more widely excepted as a sport. Once you start thinking about the advanced concepts of poker, wich I will talk about some of them in my website and if you play a little bit so that you can grasp the concepts better, then you will start to realize how much skill is actually involved when playing poker and you might find yourself facing the challenge of a lifetime. I sure did. Poker is a competitive sport where the best player will end up with the money in the long run. If you like to compete or just like a challenge, then you will like playing poker after you have learned more about it.

My site is new and I have not had the time to edit some pages yet, so please be understanding of some of the grammar errors you will find.

USDA Mad Cow
Coverup Unravels
By Robert Cohen
Not Milk.com
12-8-4

I now realize that there may never again be a confirmed case of Mad Cow Disease during the George Bush Administration. Oh, the diseased animals are out there, but in the name of homeland security, we are being "protected" in this Orwell-like twenty first century by rulers who think we need sheltering. We may never know the true reason that Ann Veneman resigned her post as USDA's boss the day after the latest Mad Cow incident began. Shortly before her (forced?) resignation, she remarked that her intention was to serve through a second term. Did she leave because she was ordered to fudge the Mad Cow results? I've discovered new evidence that is quite suggestive of a continuing coverup. You be the judge, as I reveal disturbing new information in this column.

The problem with lying, is that many lies have to be told to cover up the original lie, so that the liar often forgets to protect the original lie.

Records show that after USDA concluded that the pre-Thanksgiving cow was not a Mad Cow, they then began to test an unprecedented number of other cows. Had the test come back negative, USDA would logically have gone back to previous test levels. Instead, significantly more animals were tested.

During that ten week period prior to the discovery of America's latest case of Mad Cow Disease, the United States Department of Agriculture (USDA) examined the brains of 60,655 slaughtered creatures. That's an average of 6,066 per week.

During that one week period of discovery (11/15-11/21), USDA tested 7,900 cows, an increase of 1,835 over the previous ten week average. Such a dramatic increase makes sense, of course, but what followed after USDA's "safe" conclusion contradicts USDA's lie.

Once USDA fudged the results, I anxiously awaited the following week's data. Was USDA telling the truth? If so, it would have been logical to return to the previous test level of 6,066 tested animals per week. If USDA officials were more concerned than they let on, the test numbers would be close or would exceed the key week's 7,900 level.

Here are the results.

During the Thanksgiving week of November 22-November 28, how many cows were tested for Mad Cow Disease? Most of America enjoyed two weekdays days off of work, plus a weekend. A shortened four day work week had to have resulted in fewer animals being tested, particularly after USDA's big lie. So, from 11/22-11/28, just 5,878 animals were tested. If USDA had been telling the truth, the following week's testing would have reverted to the running 6,000 average or lower. If USDA had fudged the test data, the following week's data would have jumped through the roof. So I waited. And watched.

Here's the surprise. Last week, from 11/29 through 12/3, USDA tested 9,110 animals. See their test history:

http://www.aphis.usda.gov/lpa/
issues/bse_testing/test_results.html

Tiny URL: http://tinyurl.com/5f2qu

The numbers do not lie. They expose USDA's lie. Over 9,000 cows were tested last week by concerned USDA regulators. An increase of fifty-five percent! Had there been no mad cow, the numbers would have been much lower, not 55% higher. More cows were tested because the cow was positive for Mad Cow. USDA lied to America to protect cattlemen.

Only USDA's Department of Enlightenment (Propaganda) lies. Mad Cow is here, and in order to do damage control, insiders are in a panic, testing more animals to prevent the coming plague. Why test more animals? Because USDA confirmed that the original animal tested positive. Had it not, USDA most certainly would have returned to routine testing. They are now in an accelerated testing mode for good reason. It's here...

Mad Cow Testing Timeline

During that ten week period prior to November 18th, 2004, USDA tested 60,660 cows for Mad Cow Disease, or an average of 6,066 per week, or an average of 867 cows per day.

_____
November 15, 2004-Oklahoma Cow suspected of Mad Cow Disease
November 16, 2004-USDA Secretary Ann Veneman Resigns
November 17, 2004
November 18, 2004-USDA First announces positive Mad Cow Test
November 19, 2004 November 20, 2004**(X=1129 cows tested each day this week)
November 21, 2004
_____
November 22, 2004
November 23, 2004-USDA Announces 7900 Cows Tested 11/15-11/21
November 24, 2004-USDA Announces no Mad Cow Disease
November 25, 2004-Traditional Day Off Before Thanksgiving
November 26, 2004-Thanksgiving Day
November 27, 2004
November 28, 2004**(X=839 cows tested each day this week)

_____
November 29, 2004
November 30, 2004-USDA Announces 5878 Cows Tested 11/22-11/28
December 01, 2004
December 02, 2004
December 03, 2004**(X=1301 cows tested each day this week)
December 04, 2004
December 05, 2004

_____
December 06, 2004
December 07, 2004-USDA Announces 9110 Cows Tested 11/29-12/5

Had the original cow tested negative, USDA would have shifted their testing procedures into neutral, or into a lower gear. Instead, they now have their accelerator to the floor in the highest gear in their history. That's because they know the truth, and it's panic time at USDA. Now that the truth be known, do not expect future numbers to be true. They will fudge their future results. This time atound they were caught with their pants down. How can you be sure? Do not drink the milk. Do not eat the meat.

Bottom line: After lying to America, USDA increased their testing from 839 cows per day to 1301 cows per day, an increase of 55%! Such an increase reflects extremely concerned bureaucrats. The numbers do not lie.

Your best bet is the Philips DC777, after that possibly the Kenwood RZ1 or the Icom R100. All those are no longer made, but ebay is your friend. If you want more limited SW (at a more reasonable price) some of the various flavours of grundig WKC-models are also often offered there. You will find more of them via the advanced search page - select "any country" as the source, and don't be surprised if you pay more in shipping than for the radio.

Unregulated corporations have a tendency to become monsters.
Corporate owned media is generally pretty lame, especially concerning
political-economic coverage. What's best for the people is usually
against the best interests of a megacorp. That's why I try to spread
a little sanity everywhere I go.

The last thing the current administration wants is a healthy and
diverse media landscape. To that extent my OT postings are less OT
than they may first appear.

Ability to listen to shortwave radio is one of the things
totalitarians restrict.

!0 years ago I called the FCC filed office, found out
who was "responsable" and started trying to contact
them. Repated voice mails, emails and regular snail
mails did nothing but raise my blood preasure.
I never got a response from the clown.
While I was wsting time and energy a cold snap,
10F hit, and the damn bulb blew, like BANG, in less
then an hour. I tried to carry on, but when I told
the field engineer the noise had qui, he got very
uncooperative. Told me there was no longer a
problem and they (FCC) had real work to do.
I even contacted the local US attourny and got a royal
run around.
At about the same time we had several fools in the central
KY area using modified crossband ham transcievers to
crossband state police comms into county PD freqs.
Even the police couldn't get any action fromt he FCC.
Now a nother local clow was running about 1.5KW(yea KW!)
on and around 27MHz. He was causing severe TVI and when
the TV stations complained, the FCC showed up 2 days later.
Follow the money.
We had troubl ewith local cable TV company running a leaky system.
Thye ignored all complaints, and the FCC promised to get back with
the local ham club.
Yea, sure.
The cable company runs several CW carriers to set the system gain and
maintain EQ. On was around 52MHz. At my suggestion some of the local
hams started a CW net on 52MHz. Drove the AGC amps nuts. They had to
tighten thier system up to stay in business. At least the FCC now
requires
all cable comapies to monitor and log their leakage profile. The cable
companies found it a good way to catch those who steal cable.
They plot the leakage from every house in the system from a hour fly
over.
The FCC only gets invovlved when money is at risk.
This was under El Jeffe Clinton.
But a BB gun is much quiter...less likely to get the LEOs out in force.
Terry

Common peoples are rarely ever the problem or evil. It takes governments and selfish leaders mixed in with a heavy dose of religion and propaganda to motivate people to the dark side.

654. Amateur Radio Under Threat in the UK

Newsgroup: rec.radio.shortwave
Date: 2005-01-10 18:05:40 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <crug5k$8an$1@xuxa.iecc.com>
Source record: 4604
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,uk.radio

Andrew Moseley (G7VOT) on January 9, 2005

OFCOM are the UK's Regulator for Communications. And they have come up with a pathetic plan called the Spectrum Framework Review.

After reading this please visit my Notice board here http://g7vot.myikonboard.com/viewthread.php?threadid=20 and let me know your opinion.

UK Hams. Your opinion counts in this matter don't just sit there and let others act for you as it may not be enough. Amatuers outside the uk can help too by emailing Ofcom here, contact@ofcom.org.uk and let them know what you think.

Ofcoms Spectrum Framework Review has been given a thorough examination and what has been uncovered is very very alarming. If you have not yet sent a letter of concern to OFCOM, then reading the following may well give you a kick up the butt to do so. Deadline is the 15th of February.

The following information is taken with thanks from the Chelmsford Amateur Radio Society's web site.

It is also with a serious request to put pen to paper and reply to the Ofcom Proposal. Failure to inform them that they are acting in a totally cavalier manner, will result in the radio spectrum used by Radio Amateurs being swallowed up by Mobile Phone Companies.

By the time that Ofcom realise their errors, the infrastructure will be fragmented and the damage will be done. It should be realised that Ofcom is now no longer Staffed by Engineers/Radio Amateurs, it is entirely Commercial people with Mobile Phone backgrounds who are attracted by the possibility of charging someone £1m/MHz.

The phrase "If you do not use it, you will loose it" will be wasted unless YOU put pen to paper.

Summarised Ofcom's 23rd November 2004, proposals for Licenses and spectrum.

o Spectrum Framework Review with a Deadline for replies by 15 February, 2005.

o Advocates total disregard of all International rules in the interest of National flexibility

o Suggest that 60% of all spectrum is tradable

o Is in favour of Software/Cognitive Radio that could potentially operate on top of
Radio Amateurs without warning

o Proposes to withdraw from CB, Amateur, Maritime licensing

o Proposes to simplify access to entrants - barely after the new Licence structure is in place

o Has caught RSGB totally off guard, with a weaker structure

o All Radio Amateurs and Clubs are urged to reply with a copy to their MP with a request that he/she questions Ofcom on their intentions.

o Original Documents on http://www.ofcom.org.uk
Be warned this is a massive document which seems as thought it has been made deliberately big - the cynical would say "to stop people reading it"! It is OK for Broadband users.

o Easier to download from www.essexrepeatergroup.org.uk

Many of the threats are TLAs (Three Letter Acronyms) so here are some:-

o PSB - Public Service Broadcasting

o DTT - Digital Terrestrial Television

o DRLs - Digital Replacement Licences

o SFN - Single Frequency Network - BBC/National DAB is a SFN

o DVB-T, DVB-H - Digital Video Broadcasting

o DAB-S, DAB-T - Digital Audio Broadcasting (Satellite, Terrestrial)

o SFR - Spectrum Framework Review

o ACC - Adaptive Cruise Control, - uses SRR and LRR

o SRR/LRR - Short /Long Range Car Radar on 79 or 24GHz

o UWB - Ultra Wideband

o SDR - Software Defined Radio

o A whole new set of threats is on us now. . .

o Most attention so far on Broadband over Powerlines

o BPL - Broadband over Power Lines - USA

o PLT - Power Line Telecoms - UK

o Data can be Voice, Internet or TV

o In use by Southern Electric

o Raises noise floors etc over most of HF bands

Yes, those old wood floor model radios are great. My brother-in-law bought a house not too long ago and resting up in the rafters of the garage was an old mw and shortwave floor model radio. The dial was so big we first thoght it was an early television! Name escapes me right now, but I think it's a Zenith, complete with tuning eye and an internal rotating antenna in a silver metal box. The mahogany case is dark, but pretty much complete. It's mine for the shipping, if I can convince the wife it will "work" with our furniture.

Here's a late brief from China (!) Just one dead, but still :-(A couple dozen injuries.

Bruce Jensen

>>US submarine docks at Guam after accident

www.chinaview.cn 2005-01-11 00:12:30

WASHINGTON, Jan. 10 (Xinhuanet) -- The US Los Angeles-class nuclear submarine, USS San Francisco, which ran aground on Friday killing one sailor, arrived in Guam Monday afternoon Guam time,the US Pacific Fleet said.

Joseph Allen Ashley, a machinist's mate 2nd class, died Sunday from injuries suffered during the accident, and 23 other sailors were treated for injuries such as broken bones, lacerations, bruises and a back injury, the Pacific Fleet said in a statement.

The submarine had a crew of 137 and was enroute to Brisbane, Australian for a port visit at the time of the incident, approximately 350 nautical miles (about 648 km) south of Guam.

The Navy was investigating the cause and circumstances of the incident, the statement said.

Navy officials said there was no damage to the sub's nuclear reactor. Enditem<<

Yes, I had a similar experience with Russian RTTY. I was able translate enough of the cyrillic to know these were health and welfare messages from some guys on very lonely remote duty sent to the family back home. Made me realize we were a whole lot more alike than different.

I was using a Kenwood R-5000 and AEA PK232MBX fed to an extensively modified TRS Color Computer and 40 column monitor.

> Count on it.
>

Parts of the HF spectrum will always be protected for military and emergency communications.

The remainder isn't very much spectrum for broadband purposes, especially considering the high noise levels and possibility of interference from just about anywhere in the world.

Building compact, efficent antennas is a real problem at HF, and using higher power with inefficent antennas hardly seems like a good solution for a battery powered portable..

I am looking for a B&W portable antenna model AP-10A or AP-10B.

If you have one available, please contact me at: ebohnn@gmail.com

I am located in the Denver area.

Thanks,

Bill

The RZ1 is an unsupported nightmare. Unless you want to do this as
some kind of nerd hobby thing, the satellite radio option makes a lot
of sense. Sirius carries the BBC, plus WRN and will keep you
interested. Otherwise, make me an offer for my HF150. I'll even
throw in an adaptor for Motorola to SO-239.

Indeed, Frank. I wonder if many of those people who would propose to use HF as if was the new frontier of digital communications know exactly what they are dealing with.

HF is an unruly beast, where sections can be entirely shut down depending on solar activity, or a small signal can sometimes be propagated across the world. In addition, it has nowhere near the bandwidth capacity of the higher frequencies. And finally, the ham sections are such a small portion of the HF spectrum, that it would not make much difference if they went away or stayed.

Most modern "wireless" apps *need* the characteristics of GHz + frequencies.

It varies by field office. I've heard some areas get good cooperation and
enforcement; the Chicago office traditionally takes action only when a
strobe lamp is burned out on a land-mobile tower.

I think "pod people" are supposed to be like zombies, blindly following a leader who may not be visible, oblivious to the real world around them.

If you'd like to know more, I suggest hanging out near a theater showing a Michael Moore movie.

Perhaps that goes with Sinclair Broadcasting's running "Stolen Honor" just before election day and the White House paying off Armstrong Williams to tout "No Child Left Behind"?

Perhaps it shows why the FCC shouldn't let all the broadcast media be concentrated in just a few hands so that all broadcast news is filtered through a few corporate offices?

In several cities, including New York, and Los Angeles, there were two all news radio stations, one owned by Westinghouse and one owned by CBS.

Now, of course, both stations are owned by Viacom / Infinity.

Also in New York, one newspaper and two TV stations are owned by News Corporation. (Murdoch)

About the only feature of HF vs UHF or microwave is that distant
nodes or stations can directly talk to each other without
supporting infrastructure (phone lines or Internet). Same
thing that attracts ham radio operators. Though the fact that
a pair of users will hog the same bandwidth world-wide is not
such a hot feature.... Unless digital shortwave broadcasting
is desired, forget it. And how well will digital handle QSB
and QRM and QRN? Assuming the modulation method is designed
to cope with such...

Well, digital error checking can take care of that..... again and again
and again and again, until it works, or more likely, times out.

Great, as long as you don't mind a slow connection. Of course, maybe
that is why BPL is at DSL speeds instead of cable modem speeds.

Holy crap, what a great price.

Right now, the Transoceanics seem to be going (at least locally) for
around that, thanks to the rare/expensive (so they say) 1L6 tube,
intact with both antennas (MW and SW), but I have yet to find
one with an outstanding, clean case.

Yeah, the more I think about the darn thing I wish I'd bought it. As I recall the owner of the shop later gave it to her daughter who committed suicide. Who knows, the little shop is hardly ever open and I've not been there for some time. Maybe I should try to stop when it's open...

The '7000 model (don't remember the nomenclature precisely) is,
for its low parts count (or maybe because of its low parts count,
acutally), a really decent portable.

There's a shop called "Grampy's" in the Benson neighborhood, in Omaha, and they tend to get the chairsides from time to time. I saw a Philco motorized console there a couple of years back, and kick myself often for not buying it.
Also, saw an old Grundig console, with AM/FM/Shortwave and turntable, selling for $25.00. "Works great," said the tag. "Better recap it," said I.
What a beautiful radio - once again, another one passed up.

What a pain in the butt.

Has anyone tried or seen the Grove Radio/Television Broadcast Directory on CD-Rom with:

The AM broadcast (530-1700 kHz) station section includes station listings for North, Central and South America. The FM (88.1-107.9 MHz) and Television (channels 2-69) sections include listings for the United States, Canada and Mexico.

news:NaydncyyPK4yf3_cRVn-uw@comcast.com:

DRM (Dickheads Rely on Monopolies)

It's one of those extended translations. It means "suckering the world into another useless product".

I can't wait for the day when I can toss out all of my AM/FM radios to buy a digital radio whose format will only be good for 5 years until they expect you to throw out that radio and buy another. How about those TVs as well. What a hoot that Radio Shack is still selling the tiny handheld TVs, considering that soon they will be totally useless, I guess everyone is going to carry a cable TV converter size box so that they can use their handheld TVs. Not likely.

And for all you radio collectors, those of you with radios from the 1930s that still function. You'll need to start your own low power station to listen to them soon.

Computers have brought us this ludicrous idea of junking what we have every 3 years to buy a faster machine. You can't even order one without improvements in speed occurring while you wait for the delivery of your now antiquated machine.

Bill Gates states that DVDs will be antiquated within 10 years. Throw them all away and buy the new system.

Today's products are more interested in obtaining exclusive manufacturing rights than they are in truly improving the service.

Soliloquy.

Already ahead of them on this one.. there's nothing worth tuning in on AM
anymore anyway (or even FM for that matter in many cases). Besides, I can
run my own AM transmitter without all the sickenening, ear-pounding
processing used in commercial stations these days. Those old radios had a
lot better fidelity than any of the new ones, why not use a signal source
that can take advantage of it instead of a sickeningly narrow 5KHz bandwidth
with the modulation processed to have a whole 6 dB dynamic range??

| Let's say the winning bid was $50k.
|
| Based on what little is known about it from the pictures and description
| that accompanied the auction, how much *more* would one need to invest in
| it to restore it (just a best-guesstimate) -AND- once restored, how much
do
| you think it might go for if it was re-listed on eBay?

I've restored a number of radios, and without getting too deep
(It's almost dinnertime, and I'm about to run off), there are two
ways to go in the world of restorations: The first is complete
OEM parts, but when you're talking about wax caps and multi
section electrolytics which had a lifespan of perhaps 20 years,
coupled with the rarity of OEM parts, it wouldn't cost altogether
very much to restore the unit. At the very most, I'd budget $1,000
for such a project.

As to the second part of your question, you may very well not
expect to get a thousand dollars more (to pay for your restoration).
Radios are really fickle eBay (and auction) items, and the best
answer I can give you (with a few exceptions, i.e., Catalins,
the old Scotts, and so forth), the price we saw this Zenith go for
is really very incredible. The best answer I can give to answer
your second question is, "However much you can get for it."
Not offered in a mocking tone, but it's hard to get a very solid
idea of what any given set would be "worth."

| on my first house for something the size of a chair.

BINGO!

Sorry, I somehow completely skipped over that sentence
(premature Alzheimer's, I'm sure).

You hit the ball out of the park. I'd end the following words
to the end of your sentence: "Especially with so many outstanding
radios in this world."

The R-390 (non-a) is an example of "hollow state" engineering
at its very best. The aesthetic appeal is not "there" for some
collectors, but it definitely gets me jazzed up. I guess that
collecting comes down to "what strikes my fancy?" -- and that
is the greatest determining factor (price-wise).

So you post offtopic stuff in OTHER groups too? Do you waste as much
bandwidth there as you do here? Anyway, yeah corporate owned media is
only focused on profits, which means that the news division is turned
into a profit center, and what draws in the advertising bucks is
ENTERTAINMENT, not news, so news becomes entertainment, with as little
depth as a Reality TV show.
>
> The last thing the current administration wants is a healthy and

You COULD waste less bandwidth by just posting links and let people go
to the link if they so choose instead of downloading a big long post.
>
> Ability to listen to shortwave radio is one of the things

True, so go listen to it. You could post what stations agree most with
your viewpoint, at least that would be a LITTLE on topic.

It's 31m in general. I've noticed that Radio Havana on 9820 has been
subject to such deep fading that it's almost impossible to make out what

they're saying. 6000 too, but 9820 is really bad. The BBC's 9525
frequency does it as well, although their signal doesn't usually have
the severe ups and downs that Cuba does.

I'm much more likely to give the BBC a "pass" -- just for that reason.
Their website is a real news resource, but still as Euroliberal as so
many others.

My only beef with the BBC is its lack of focus on Britain, for want
of being a strong (the strongest?) media / business "player" in that
part of the world.

I'm sure you've read these letters asking you to send $1 to six different addresses. Putting your home address or mailing address on the internet can be risky, but through PayPal all you have to provide is your email address. It's safe and easy. Just go to www.paypal.com and set up your FREE account! No credit card is needed. I am not a gullible person and have never trusted things like this, but I gave it a try. Hey it's only $6. I figured at least 6 people would respond out of the millions of people that use the internet. You should give it a try too! You have nothing to lose, and thousands to gain! Read on for the letter that I found (of course, I added my PayPal e-mail on #6)...

HOW TO TURN $6 INTO $6,000+!!! THIS REALLY CAN MAKE YOU EASY MONEY!!! IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO THE LETTER FOR IT TO WORK!!!! A little while back, I was browsing through newsgroups, just like you are now and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah, right, this must be some kind of scam" but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 though PayPal to each of the emails stated in the article. You then place your own email address in the bottom of the list at #6, and post the article in at least 200 news groups. (There are thousands) No catch. That was it. So after thinking it over, and talking to few people first, I thought about trying it. I figured what have I got to lose except $6.00, right? Like most of us I was a little skeptical and a little worried about the legal aspects of it. It follows the same regulations as the "mailed chain letters, which according to the U.S. Post Office (1-800-725-2161) is indeed legal! Then I invested the measly $6.00. Well GUESS WHAT!!? Within 7 days, I started getting money in my PayPal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $20.00. By the end second week I had made a total over $1,200.00!!! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $36,000.00 and it's still coming in rapidly. It's Certainly worth $6.00. I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works? Also, make sure you print a copy of this article now, so that you can get the information off of it as you need it.

$$

REQUIREMENTS: You must have a confirmed PayPal account. If you do not have a PayPal account you can go to www.paypal.com and follow the instructions to set up a free account. In order to place the initial $6

into your account, you will have to confirm your bank account with PayPal (which may take a few days). PayPal is 100% secure and is used my millions of people world wide. Confirming a www.paypal.com account simply means (1) PayPal will first ask you to confirm the email you used to sign up your PayPal account by sending you an email with a link for you to click to that email. As soon as you click that link your email is confirmed. (2) PayPal will then make two small deposits into your bank account if you set up your PayPal account with a checking or savings bank account. Or PayPal will make two small deposits to your credit card if you set up your PayPal account with your credit card. Then after a few days (it takes up to a few days for these deposits to appear in your bank account or on your credit card statement) then after a few days you go back to the www.paypal.com website and sign in. Then you click where it says this account is not yet confirmed. A screen will pop up that gives you 2 boxes to fill in. You then enter the numbers of the 2 small deposit amounts (two separate 2 digit numbers) that were deposited to your bank account or credit card. Now you have a working and confirmed PayPal account and can receive payments.

$$

[STEP 1]
Send, though PayPal, $1.00 to each email on the below list. Make the subject of the payment "Email List" and in the comments, write "PLEASE PUT ME ON YOUR EMAIL LIST." What you are doing is creating a service by this - and best of all you are not giving your address to anyone you do not know. THIS IS ABSOLUTELY LEGAL!! YOU ARE CREATING A SERVICE. Here are the latest PayPal e-mails on the e-mail lists:

#1)brittany...@excite.com

#2) mth...@renc.igs.net

#3) Mishav...@aol.com

#4) nike31...@aol.com

#5) careent...@hotmail.com

#6) jjrvn...@hotmail.com

www.paypal.com

Subject of Payment: ***Email List***

Comments: ***PLEASE PUT ME ON YOUR EMAIL LIST***

[STEP 2]
Now take the #1) email off the list that you see above, move the other addresses up one (6 becomes 5 & 5 becomes 4, etc) the put YOUR email address (the one used in your PayPal account) as #6) on the list. **MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL ACCOUNT**

[STEP 3]
Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups, message boards, etc. (I think there are close to 32,000 groups) All you need is 200, but remember, the more you post, the more money you make - as well as everyone else on the list! In this situation your job is to let as many people see this letter as possible. So they will make you and me reach!!!! You can even start posting the moment your email is confirmed. Payments will still appear in your PayPal account even while your bank account is being confirmed.

$$$

DIRECTIONS ON HOW TO POST TO NEWSGROUPS/MESSAGE BOARDS.

[Step 1]
You do not need to re-type this entire letter to do your own posting. Simply put your CURSOR at the beginning of this letter and drag your CURSOR to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into your computer's temporary memory.

[Step 2]
Open a blank Notepad file and place your cursor at the top of the blank page. From the 'Edit' menu select 'Paste'. This will paste a copy of the letter into notepad so that you can add your email to the list.

[Step 3]
Save your new Notepad file as a .txt file. If you want to do your postings in different sittings, you'll always have this file to go back to.

[Step 4]
Use Netscape or Internet Explorer and try searching for various newsgroups, on-line forums, message boards, bulletin boards, chat sites, discussions, discussion groups, online communities, etc. EXAMPLE: go to any search engine like yahoo.com, google.com, altavista.com, excite.com, then search with subjects like "millionaire message board" or "money making message board" or "opportunity message board" or "money making discussions" or "business bulletin board" or "money making forum" etc. You will find thousands and thousands of message boards. Click them one by one then you will find the option to post a new message.

[Step 5]
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting 'Paste' from the 'Edit' menu. Fill in the Subject, this will be the header that everyone sees as they scroll thru the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations! THAT'S IT!! All you have to do is jump to different newsgroups and post away. After you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS

AND/OR MESSAGE BOARDS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money within days! **JUST MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS ON PAYPAL.**

Have fun!

733. Re: Lowe receivers discussion group?

There's a Yahoo group for the HF-150 but not the other models.

I've thought about starting a group for the HF-250/250E for a while. What receiver do you have?

Yes, I listened to some of the Amsterdam forum and they were talking
about web Blog's.

I don't think its a problem with RRS either.

Thank god that all liberals don't think like Green but I do think I have
it right. If you were a far to left liberal instead of "slightly on the
liberal side" you would be thinking same as Mr. Green.

Criticism works for the good when it is constructive. There was nothing
constructive in Mr. Greens monolog. You can't go around publicly bad
mouthing peoples intent to provide charity to others facing disaster.

Our intent is an expression of our will. Charity is giving, which by
definition requires one to relinquish control over goods. I don't know
what one can do other than give what they perceive as needed and to
require them to be responsible for what other people do with those goods
is nonsensical. It's just like anything else in life. You do what you
think is best, take your best shot and let things fall where they may.

Darren,
The 'utilities' he was likely referring to are 'utility stations' such
as military, aeronautical & Coast Guard. They operate on HF and
mostly use USB.

CUHULIN,
.
The 'new' IRS Tax Eligibility "Means" Testing Questions:
.
[ ] Is Your Dog/Cat/Pet a Christian Animal/Being ?
{ Do You Believe - That He/She is Blessing from God ? }
.
[ ] Does Your Dog/Cat/Pet Vote ?
{ Have You Registered Him/Her To Vote ? }
.
[ ] Does Your Dog/Cat/Pet Vote Republican ?
{ Do You Vote Republican in His/Her Name ? }
.
If the Dog/Cat/Pet (Dependent) 'meets' ALL of the above
Criteria. You may "Deduct" the Dog/Cat/Pet on your USofA
Income Taxes as a part of the new "Leave No Pet Behind"
One Nation Under God {Allah} Tax Policy.
- We Feel Your Dog/Cat/Pet's Pain !
- - Animals Have Feelings !
- - - Animals Are People Too !

AMIN,
.
You will NEVER Convince a RL Drake R8B Receiver Owner that
an Eton 'Elite' E1 Receiver with XM satellite Radio is
as-good-as a "R8B" [.]
- - - And I Did NOT and Would NOT Make That Claim.
.
I am simply suggesting the it should be as-good-as the
Grundig Satellit 800 Millennium; and just 'possibly'
a little better. Plus it will be a Real 'portable'
AM/FM Shortwave Radio with the capabilities of the
Grundig Satellit 800 Millennium; and that ain't bad.
.
The Proof will be in the Radio Listening Experience !
.
For Grundig Satellit 800 Millennium "Big Sound" Quality
just add a Set (2S+1B) of Self Powered Computer Stereo
Speakers with a center Bass Sub-Woofer and individual
Right and Left Channel (Side) Speakers.
.

.
Hi there,
.
I'm still doubt that E1XM uses the same 1st mixer and
oscillator as Sat800. This is due to the fact that the
lowest frequency able to be dialled-in is *100Hz* in
both radios - this implies that they are subject to the
same phase noise level.
.
-R- There is more to a Radio's Circuity that will impact
its Sensetivity and RF Noise Levels then simply the 1st
Mixer/Osc and the fact that it uses a PPL Circuit Design.
.
If Drake designs E1XM to be better than Sat800 (in this

respect), then where will the R8B stand? Does Drake want
the R8B to be killed by E1XM ?
.
-R- See the Top Most Reply.
.
? Anyway, where can we get the E1XM "block diagram" ?
.
-R- Well you can expect that ETON will not provide you
with one. Most likely some?one will find a 'copy' of
what ever name and model number is given to the Tecsun
'labeled' E1XM that will be for sale in China (PRC).
.
Best regards,
Amin
.
.

= = = "just_rtfm" <just_rtfm@y...> wrote:

hi Michael:

i see no reason to doubt Drake, who designed the R8B, SW8,
and Sat800. IMO the E1XM will surpass the performance of
the Sat800 due to the PBT. add small size [S350-like],
1700 memories, and likely 5-kHz tuning steps...
it should be a winner.

regards,
phil :)

Apparently not even Sinclair Broadcasting cannot totally swallow
Williams. The Bush White House is not responsible for funds paid by
the Dept. of Education to a commentator?

The Mayor of New York recently arranged to have the somewhat
independent Board of Education terminated and made into a City
department so he could have power and BE HELD RESPONSIBLE for the
schools. A head of government is held responsible for the actions of
departments of government.

If you have something like the USPS or the Federal Reserve Board or
the BBC which is not under the direct control of the government in
power then that's a different story.

By the way, wasn't there a big shtunk in Canada over government-funded propaganda? Of course, the Congressional fear of Government-funded internal propaganda is why the VOA, under its charter, can't send a schedule to Des Moines and why it needed a law to allow that VOA film about JFK to be seen in the U.S.

Sinclair Investigates Commentator Williams
Tue Jan 11, 2005 03:49 AM ET

By Andrew Wallenstein

LOS ANGELES (Hollywood Reporter) - Television station owner Sinclair Broadcast Group is conducting an internal inquiry into an appearance made on one of its news programs by political pundit Armstrong Williams.

Williams admitted last week he received more than $240,000 from the Department of Education to promote its No Child Left Behind initiative, a relationship he did not disclose to networks where he had discussed the subject, including CNN, as well as in his newspaper column syndicated by Tribune Media Services. Tribune has since terminated his column.

Barry Faber, general counsel for Sinclair, a station group with holdings in 39 U.S. markets, disclosed that Williams was under contract last year as an independent consultant to the company and is believed to have interviewed Education Secretary Rod Paige on a Sinclair-produced nightly news program, "News Central," about No Child Left Behind. But he asserted that Sinclair had no knowledge of Williams' relationship with the Education Department.

"Our news department is reviewing whether there was anything inappropriate that aired on our station," said Faber, who added that the contract with Williams has since expired. He could not specify the date of Williams' interview with Paige.

771. Icom R71a repair

Newsgroup: rec.radio.shortwave
Date: 2005-01-11 14:33:47 UTC
From: Brian Lyons <Nospam@nowhere.com>
Message-ID: <spn7u099td8cdctqqeg1oq55p753pcsb7h@4ax.com>
Source record: 4770

I have an Icom R71a which I bought new in 1990.

Its performance is degraded and I wish to restore it back to service, so that I may once again use it on a daily basis.

Here is what I have done for repairs to date

a) correct cold / open solder joint on bridge rectifier in power supply to correct intermittent loss of power and noise problems

b) replace electrolytic capacitors with tantalum caps in dc to dc converter stage of display board (replaced on spec to help reduce noise)

c) replace C1, C7, C11 on RF board to regain lost sensitivity (must have had high RF power hit at some point)

I still experience noise in medium wave band. The noise will build to a point that there is complete loss of signal below about 2.5khz with the radio going silent. At times, the signal returns after brief interruption. Tuning up to higher frequency and then back down sometimes restores signal.

Also, years ago, local AM stations would cause full deflection of S meter. This no longer occurs and there is poor DX reception in MW band.

Any suggestions what to look at next for cause of fault?

I have read posts that some owners have replaced capacitors on PLL board. Which ones? What problems does this correct?

Thanks!

Only one more day of this mess then I can go home.

Been trapped down south for a week, glad I bought the four wheeler down,
I've been in a foot of water many times this week.

Hung out in the gym four hours at a time for something to do.

I've been warm and dry just stuck down here (Ontario, Ca.) The roads are
full of pot holes and some sink holes. Most city services are still working
well, the trash truck just came by.

It's a shame that the cities give permits for houses on the side of
these hills in the first place. Our tax money is spent saving these house
and the people in them and the land would have not slide if it didn't have
the weight of the house, pool and streets.

Burr

The plug won't be pulled on analog television
any time soon. Too many people own analog

televisions, and too few people have migrated to digital broadcasts to warrant the cutover yet. In other words, too many consituents for Congressmen would call up and complain for the FCC to follow through on the original transition plan.

Father Dearest

Note: This January 11, 2005 BuzzFlash Editorial marks the eleventh in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

At the center of a number of theories surrounding the blind loyalty to Bush among some 90% of Republicans is that he represents the father figure for the nation. A patriarchal hierarchy reveres the father no matter what errors he makes, because he -- well -- sits at the head of the table and is the "leader" of the family.

So the father could go out on a bender and sleep with a couple of tarts, go to church and ask repentance, and all is forgiven because he is the father, the provider, the protector of the family.

Perhaps that's why Andrew Card, Bush's Chief of Staff, told a group of Bush Maine supporters last summer that George regards the citizens of America as 10-year-olds (we are not making this up) who need to be led. The irony that Bush may be the 10-year-old defying the law of majority rule that comes with democracy did not go unnoticed by BuzzFlash.

If you're not into the patriarchy model, you just see Bush's worldview as arrogant, elitist, and toxic. This is one father figure who is so bumbling that he wears the word "failure" out. Indeed, the only thing he is successful at is failing -- and, of course, lying about his failures.

That's some father figure. It reminds us of the male counterpart of "Mommy Dearest." It's the "Godfather" if Fredo ended up running the Corleone crime family instead of Michael.

In Bush's patriarchal hierarchy, a Christian God has chosen him to lead America onto "a righteous path." Bush's primary mission was not to be elected. He has told staffers, as documented in many articles, that he believes that the almighty picked him as president and to lead the crusade against terrorism. It wasn't an election in 2000, according to George; it was divine intervention.

There are two kinds of people in the world, the old saw goes: people who believe there are two kinds of people, and the rest of us. George W. Bush falls into the first category. Let's try this theory out:

Islam: bad. Christianity: good.
Republicans: good. Democrats: bad.
Rich people: good. Poor people: bad.

Are you getting the picture now?

That's our national Daddy: a simple-minded elitist who believes that he is divinely inspired.

His icon is everywhere now, even, as Paul Krugman has pointed out, including multiple photos of "our father figure" in the United States budget. (No presidential photos have ever appeared before in the budget.) Like Mao or Castro or Stalin, his propagandists are branding him as the "mighty leader" fighting to "protect the homeland." Large billboards are already popping up with Bush's photo and the simple title, "Our Leader." No doubt, statues and marble busts will soon be springing up around the nation of "our president leading the valiant struggle against the terrorist enemies who hate freedom."

Bush almost isn't a real person anymore. He is a branded image.

The White House markets Bush like a product, and the press treats him as if he were advertising copy.

But, truth be told, he is just a chronic failure in three thousand-dollar suits.

He is a dangerous man in a dangerous time.

What does a nation do when its father figure turns out to be an inept, inflexible child who doesn't understand his limitations?

Perhaps, people begin to pray.

George W. Bush sure is bringing a lot of people back to religion.

Prayer may be all that's left after he's done dismantling our Constitution and our infrastructure as a national community, not to mention bankrupting our nation and conducting an unnecessary war that has resulted in the deaths of tens of thousands of people and the radicalization of more terrorists.

Pray for "your President," our soldiers are told.

Pray for America to survive this president.

A BUZZFLASH EDITORIAL

You can hear it on the digital cable/satellite/INTERNET STREAM network BBC7 amd there are any number of fan websites which have probably illegal MP3's.

BBC7 has it both - well, live ain't exactly the word for half-century old programs in which all or most of the cast are dead - and on demand.

http://www.bbc.co.uk/bbc7/listenagain/monday

(Monday, times are GMT/GMT+1 in summer)

12:30-13:00 The Goon Show
Listen Again The Burning Embassy: The
Listen Again British Embassy in Peking is
on fire, so the Goons help by
wrapping water up in a parcel
and posting it there. From Oct
1957. [Rptd tonight 7.30pm and
Tuesday 6.00am]

(What do you call an old time radio program which "streams live"? CFRA in Ottawa has an hour of old time radio, mostly off AFRS recordings, after the 3 A.M. Eastern news and in the opening for the CFRA program, they tell you how it's live from their studios in the heart of the Bytown Market, which seems a bit unlikely unless they're having a seance.)

Invasion of the Body Snatchers (1956) is a thrilling, disturbing classic science fiction/alien film from veteran producer Walter Wanger. [Wanger had just been released from prison in the early 50s for attempted murder. He had been imprisoned for a short 4-month jail term for the 1951 shooting incident of the lover (MCA agent Jennings Lang) of his unfaithful movie-star wife, Joan Bennett. The incident provided an indirect inspiration for the Billy Wilder movie The Apartment (1960).]

It was originally based upon a three-part serial story written by Jack Finney that appeared in Colliers Magazine in late 1954, and then in 1955 was rendered into an expanded novel, The Body Snatchers. The screenplay, written by Daniel Mainwaring (who also wrote the script for the classic noir Out of the Past (1947)) was aided, according to some sources, with uncredited scriptwriting and dialogue direction by Sam Peckinpah (the great Western director who appears in a bit cameo part as a meter reader).

A quintessential, black and white B-picture, it was precisely-executed and packed with action by director Don Siegel, plus a scary musical score from Carmen Dragon. The subtle, low-budget film (at about $420,000) is very effective in eliciting horror with slow-building tension, even though there are no monsters (just indestructible plant-like pods), minimal special effects, no violence in the take-over of humans, and no deaths. The film had a few preliminary titles: Sleep No More, Better Off Dead, and They Came From Another World before the final choice was made.

The psychological sci-fi film was re-made twice:

Philip Kaufman's adaptation Invasion of the Body Snatchers (1978) with Donald Sutherland and Brooke Adams (and featuring cameo roles by Kevin McCarthy as a man running on the freeway and Don Siegel as a cabdriver) and set in San Francisco and nearby Mill Valley, with the tagline: "You'll never close your eyes again"
Abel Ferrara's The Body Snatchers (1994) - the book's original title - with Gabrielle Anwar, Meg Tilly and Forrest Whittaker, and set on a Southern military base
The original film would become more and more revered and distinctive as time passed.

The theme of the cautionary, politicized film was open to varying interpretations, including paranoia toward the spread of a harmful ideology such as socialistic Communism, or the sweeping mass hysteria of McCarthyism in the 1950s and blacklisting of Hollywood, the spread of an unknown malignancy or virulent germ (read fear of annihilation

by 'nuclear war'), or the numbing of our individuality and emotional psyches through conformity and group-think. Yet its main theme was the alien (read 'Communist') dehumanization and take-over of an entire community by large seed pods (found in basements, automobile trunks, a greenhouse, and on a pool table) that replicated and replaced human beings. And it told of the heroic struggle of one helpless but determined man of conscience, a small-town doctor (McCarthy), to vainly combat and quell the deadly, indestructible threat.

This relentlessly haunting film received no Academy Award nominations. It was originally released at 80 minutes, and then reissued at 76 minutes in 1979. The prologue and its unconvincing matching epilogue were not in the original shooting of the film and were later tacked on. (The studio-imposed footage was removed in the 1979 re-issue.) Allied Artists wanted to soften the paranoia of the original and provide a more hopeful ending with the framing device. Executives at the studio also forced Wanger to release the film in SuperScope - an anamorphic widescreen process that altered the original 1.33:1 ratio that the cinematographer had used.

ADDITIONAL PROLOGUE:

In the exciting opening prologue with extended narration, dishevelled physician Dr. Miles Bennell (Kevin McCarthy), distraught and seeming to be psychotic and mad about alien invaders, shouts to an unbelieving group of nurses, interns, psychiatrists (including Whit Bissel as Dr. Hill), and doctors (including Richard Deacon as Dr. Harvey Bassett) in the emergency room of the city's Emergency Hospital where he has been brought by a police car, that seed pods are taking over the planet:

Doctor, will you tell these fools? I'm not crazy. Make them listen to me before it's too late.
General practitioner Dr. Miles Bennell explains, in a series of flashbacks from a few days earlier, the terrifying take-over of the town of Santa Mira, California. [Note: The fictitious town was first planned to be modeled after Mill Valley - a town in the Bay Area north of San Francisco. But then the town of Sierra Madre was chosen for filming, just east of Pasadena in the greater Los Angeles area.]

> Point for me.
> .

This gets at one of the worries I have about the E1. People who are interested in satellite radio can find satellite receivers much cheaper than the E1; and people who are interested in AM/FM can likewise find cheaper receivers. Now, my *sense*, and I stress that this is my *impression* and not the result of any sort of research, is that most people who are interested in satellite radio won't be attracted to the AM/FM capabilities of this receiver, and consequently they'll pass it over in favor of a less expensive satellite receiver. Likewise, SWLers will pass over the E1 because there are superior tabletop sets (Icom R-75, Palstar R30) in the SAME PRICE RANGE as the E1. Furthermore, the E1 will not have the benefit of the Grundig name.

If I worked for Eton, this is what I'd be worried about...well, aside from whatever mechanical defects might emerge in the first production run. (I'm extremely curious to find out what the build quality is like on the E1. I hope it's built like a tank, but I can't help but worry.)

I hate to beat a dead horse, but have you called your electrical service provider?

Who is your electrical service provider?

What is their telephone number?, and do they have a 800 number?

An email address?

I'm willing to try to jump in here to give you a hand, as I know what electrical interference can do to reception on shortwave.

Running dogg, when you say "N. California location," where is that?
Near SF?

I am near SF (East Bay) and I get scores of seemingly random noises
across 5 - 10 MHz. 49m is especially bad for weird unidentifiable QRM.
Some of it sweeps (moves up and down the frequency scale), or changes
pitch while maintaiing a single RF.

I get intermod junk from local 50kW MW stations. Bad in wet weather
when the ground improves.

I also get screwy stuff that just comes on and off. Some of it fades
in and out like the HF signals, so some of it may be far away.

Also get the usual streetlight junk, too - that's fixable.

What I find sickening about the majority of how Americans reason is this:

Would you sentence a person who steals a 100.00 worth of groceries because he is unemployed and has a family to feed
to the same amount of jail time as you would someone who robs a bank of $1,000,000 dollars?

Would you sentence a married man who has extramarital sex with a willing female to the same sentence that you would a married man who was a serial killer like the "Green River Strangler?"

If you answered "no" to both of the above, then why are most Americans so willing to allow "CBS News" to be punished... for a trivial mistake, and yet they worship George Bush who despite all the expert advice he received from weapons inspectors, CIA, and other people rushed this country in to an unnecessary massacre.

Even now after he has admitted that there are no weapons of mass destruction in Iraq, he still is to arrogant to admit that he has made a HORRIFIC mistake in judgment that has cost thousands of families their happiness for the rest of their lives.

Over 25,000 American troops have been killed, or wounded, and over 100,000 innocent Iraqi and Afghani civilians have been killed.

What do you people study in school that causes your brains to be so horribly mis-programmed causing you to not be able to add one and one getting two?

I studied Advanced algebra, Trigonometry, Geometry, Calculus, Chemistry, Biology, 19 hours of psychology, Advanced Logic, and I made "A's" in all of them.

These are the course that teach students how to think clearly and in an unbiased manner. Apparently, they are not required course, and because most people are lazy and trifling they go through school taking Shop, general business, PE, and other mundane mess. Then when they graduate, if they graduate, you end up with a George Bush mentality.

If I am wrong here, please explain to me in a intelligent manner without name calling why what CBS news did is more important than our president and his regime lying to the American public on important matters dozens of times.

I want to hear someone's opinion besides dXAce. It's obvious to me
that he received a massive lack of oxygen at birth, and is suffering
from irreparable brain damage.

Are there any wise people on this forum besides me?

Peace

The dumbing down of Americans is definitely a real problem

Who deserves to be impeached and imprisoned the most?
A president receiving face from an adult willing female?

Or a president who lies to over 3,000,000,000 people
worldwide and then orders the attack and destruction
of hundreds of thousands of innocents, 1,200 American
GI'S killed and over 25,000 injured?

Those of us who are not brain damaged, or racially
biased the answer is obvious!

I decided to plunk for a Wellbrook ALA-330S. I was very nervous about spending a lot of money on an antenna, but the Wellbrook's many positive reviews finally convinced me to take the 'plunge'. It turned out to be the right decision. The Wellbrook works very well and is the perfect choice for someone, like me, who lives in or near an urban area. It works beautifully...no kidding.

Yes, but the listing of what classes the person
(not sure he or she) has taken, and pulling a
Victor Hugo on us by presenting us with two
extremes, rather than the natural grey area that
most places provide make me think that the person
was still trolling.

Let's talk reality here... No one's going to change
their opinions on these issues, so don't bother
trying to bring them up in a newsgroup that isn't
where this stuff should reside. I've yet to see
anyone say, "Wow!! You know what, I was
thinking that XXX was right, but you know
what?? I think that YYY is right now!!" That
doesn't mean that it doesn't happen, but the
arguments are such that everything is painted
in black and white. It's hard to find anything
resembling middle ground if everyone claims
they are right and all who disagree are wrong.

That is both the great promise as well as the
great problem of the internet: if you're in an
argument, you can find anything you want
to back up your side of it.

Hello All,

A general aviation pilot friend of mine brought me a wattmeter with an adjustment between the wattmeter and the swr meter. It ranges between 0 and 10. The only marks of identification are Mura CBM-30. So my questions are..

1. What is the darn adjustment for?

2. What frequency range is for? VHF would be ideal...

Thanks in advance for any information,
Chris

Im Hotep,

Thank you Bruce. One intelligent answer out of four is par for the course in America I guess. Bruce this may be off top ice, but the truth needs to be told. Everywhere I go online I hear this insanity about how perfect America is and how wrong and inferior everyone else is.

That is the most unhealthiest position to take mentally.

This "I'm Ok, but you're not OK idea.

Eric Berne explained why in his best seller "Games People Play" a few years ago.

http://www.itaa-net.org/ta/bernehist.htm

http://en.thinkexist.com/quotes/eric_berne/

http://www.businessballs.com/transact.htm

Games People Play

The psychology of human relationships

http://www.poewar.com/reading/games_people_play.htm

I would like to hear your logic on the points that you think are incorrect.

Email me privately, and we can discuss it. Or better still join my list where I have a couple hundred people from all over the globe discussing these things 24/7/365.

http://groups.yahoo.com/group/Nature_Knows_No_Color_Line/

You are right though. The idiots on these talk shows don't do any better. I started listening to Stephanie Miller a couple of weeks ago after finally finding her again. I loved her nightly talk show on Fox she did back in 1993, but it was quickly cancelled after she made a few fatal mistakes.

She is from the left. I listened to them talk for a couple of days and I'm just as bored with her as I am the conservative right.

These people name their show silly stuff like "Crossfire" Even though most of them have never been in the military and can't even fathom what it is like to be under real attack.

They are some of the silliest, most biased adults I have ever seen in my life. So far I can't point to even one who has the BIG PICTURE of things. Even my home boy Rush is whacko on a lot of issues.

that's why I started my own lists, forums years ago. I wanted to be one lit candle in a sea of darkness. :-0

These folks running America right now are going to get all of us killed if they don't stop trampling over everyone who refuses to kiss our behinds. that attitude doesn't work in your neighborhood, and it won't work on a global scale.

Here are some of the wisest people on planet earth Bruce. People that I study and admire. go read some of the things they are saying. It will totally change your life for the better.

http://www.zmag.org/CrisesCurEvts/Iraq/tim_wise.htm

http://www.timwise.org/

Look around on the ZNET site Bruce and you will find links to other extremely high-minded folks from all over the world.

Gore Vidal

Ramsey Clark

Tim Wise

Clyde Benson

And many many more.

If you program your mind with correct information it will work much better just as the computer in front of you will if it is programmed correctly.

Filling your brain with hatred of other races, religions, Nations is a sure fire way to insanity.

Need I say more?

Steve do you have your wellbrook mounted on an antenna rotor..
how far from your home do you have your wellbrook located.
as i read on the wellbrook website that they recommend the loop to be
mounted as far as possible from your home...
i have quite a large garden about 45 feet long by about 20 feet.
20 feet being the longest distance from my house...
is it just me or is the entire HF band suffering bad conditions as in the
daytime hours my receiver is receiving 9+ of mush and i can hardly hear any
stations over this mush only very local transmitting stations. and it don't
seem to get any better at night time with only a slight drop in mush.....i
may well order the Wellbrook.
is there much difference in the wellbrook ALA-330S and theALA-1530 loop....i
normally listen into most of the HF bands from 5.000kHz to 30MHz depending
on what i want to listen to and the time of day or night..

> Thanks: John

I decided to plunk for a Wellbrook ALA-330S. I was very nervous about
spending a lot of money on an antenna, but the Wellbrook's many
positive reviews finally convinced me to take the 'plunge'. It turned
out to be the right decision. The Wellbrook works very well and is the
perfect choice for someone, like me, who lives in or near an urban
area. It works beautifully...no kidding.

Steve

I wonder if you are getting the "image" of an AM or FM station in your area. I could be wrong...but I think the 22000 range is known for that sometimes. I've had similar things happen on my YB400, though without an external antenna. Plus you said you are using a scanner antenna...I'm not sure (as I'm still a relative novice to this hobby), but I don't think those are designed for shortwave frequencies.

830. Re: Is the YB-400 a good SSB reciver?

Newsgroup: rec.radio.shortwave

Personally I love my YB400, but have never found it that great for SSB...the sound is usually pretty muddled, and it seems like once you get a communication "dialed in" using the analog tuner adjustment on the side of the radio, the signal drifts within a few minutes. Maybe I am not in a good area for ham/utility listening (SE Wisconsin).

I am using the ALA-330S under less than ideal circumstances, but it still performs extremely well. I live in an apartment building in Brooklyn, with no yard and no garden whatsoever. So, I really had to think carefully about how I would use this antenna. I had little luck with it indoors, as it picked up too much QRM. Others find that it works well in the attic, but I don't have an attic. Before I even ordered the Wellbrook, I used a small portable radio to demarcate, at least roughly, the boundaries of the 'noise envelope' surrounding my building. I found that whenever I could get out a mere six feet (that's right, just six feet!) from the building, reception cleared up *dramatically*. My first plan was to put the Wellbrook on the roof of my apartment building, but it's especially noisy up there with power lines, etc. So, at present, I have the Wellbrook mounted on a horizontal mast that is attached to a fire escape and that extends about 9 feet away from the building. I know this scenario is far from the one Wellbrook recommends, but you'd be surprised at how quiet reception is for me now. If you read some of the reviews available on the Wellbrook website, you'll notice some of them also remarking that placement of the antenna doesn't seem as critical as the Wellbrook

literature suggests. It's not at all far from my building;
nevertheless, my reception is whisper quiet.

I do not currently have the Wellbrook attached to a rotor. Almost
everything I listen to falls between 3 and 30 mhz, and the signals
there (especially at 5+ mhz) just aren't very directional--or so it
seems to me. Others may disagree about what's best. I found it very
important to get the antenna *outdoors*, but it seems omnidirectional
on the frequencies that interest me.

The ALA-330S is optimized for SW and is designed to attenuate strong MW
signals. In fact, I find that it still works very well on MW and I have
never had any problem with overloading. At the same time, I understand
that the ALA-1530 is optimized for MW, but nevertheless performs
admirably on SW. I went for the 330S, since SW is my primary interest.
I doubt you could go wrong with either antenna.

I suggest that you consult the excellent reviews of this antenna that
are available in this group, on the Wellbrook website and elsewhere on
the internet. This is an especially good one, I think:
http://www.radiointel.com/review-wellbrook.htm

Good luck!

Steve

834. Voltmeter question...

Newsgroup: rec.radio.shortwave
Date: 2005-01-11 21:50:38 UTC
From: Guy <gwkuddles@comcast.net>
Message-ID: <BE098A2D.D68C%gwkuddles@comcast.net>
Source record: 4934

Hello:

Until it puked and died recently, I used to have a palm-sized, battery-powered, AC Voltmeter (by Radio Shack) that I used across my headphones to help me peak voice frequencies with my audio filter. It had a scale that read out in 150 milliamps AC. I'd like to replace it, but Radio Shack no longer makes this particular model (surprise!)

What's worse is that I can't seem to find a volt meter anywhere that measures AC milliamps.

Can anyone suggest a possible source for a voltmeter of this type that would measure 150 milliamps AC?

Thanks in advance for any help!

Lawson,

Im Hotep,

Lawson,

You folks are the ones who started the discussion about CBS; not me.

Surely you can see well enough to understand that.

I just got fed up with the clueless thinking going on here and everywhere else I look and decided to have my say.

To say that no one will change their minds about how they feel may be true, but I still feel a responsibility to present a side that is far more Christian and humane than what MOST Americans hold.

No one died in the CBS episode. someone made some mistakes in researching information. That happens thousands of times a day in this country. So what! That is just a molehill compared to other issues on the table.

George Bush's mistakes are costing tens of thousands of innocent people their lives, and many American soldiers as well.

To try and say that they both are of the same weight is ridiculous! This is like Mount Everest!

Despite the fact that your grammar is much better than most here, your logic is equally infantile.

Tell me this honestly...anyone here.

Do you people feel that Iraqi. Afghani's Africans, Iranians, Jews, and other non white people are full human beings just like you believe yourself to be?

Would you be comfortable with your sisters marrying one of them?

I know what lies deep deep down at the very bottom of these issues, but I want to see if you are in touch enough with how you really look at other human beings; to answer that honestly. :-)

What do these countries that we have unnecessarily attacked, or are otherwise threatening to harm, or are interfering in their internal affairs, have in common? I'll give you a hint. It's one of two things .

Somalia
Grenada
Panama
Afghanistan
Libya
Iraq
Bosnia
South Africa
Cuba
Haiti
Zimbabwe
Korea
China

Ignoring both minor bombing raids and the numerous subversive efforts not involving military forces, since the end of World War II the United States has committed acts of aggression against Guatemala (1954), Lebanon (1958), the Dominican Republic (1965), Vietnam (1954-75), Laos (1964-1975), Cambodia (1969-1975), Nicaragua (1980-1990), Grenada (1983) and Panama (1989). I would argue that the Persian Gulf war was also a case of U.S. aggression, as the U.S. took advantage of Iraq's aggression against Kuwait to smash a regional power that had defied it. In short, the U.S. has been the number one international aggressor over the past 50 years.

In the case of the Vietnam War, the global rogue was able to ignore the 1954 Geneva Accords, place a puppet in power in South Vietnam, invade and bomb all of Indochina, killing as many as four million people over two decades, without the slightest interference from the UN or World Court.

In the case of Panama, the rogue invaded in 1989 to capture its leader, Noriega, allegedly for drug dealing and authoritarian rule. But Noriega had been on the U.S. payroll for years while dealing in drugs and ruling by terror.

THE REAL REASON FOR THE INVASION OF PANAMA WAS NORIEGA'S REFUSAL TO COLLOBORATE WITH THE U.S. IN IT'S ILLEGAL ATTACKS ON NICARAGUA.

Again, the U.S. veto and overall power allowed this multi-leveled rogue operation to go forward without impediment.

I know that practically the whole 49m band is filled with weird QRM at
my location. It's so bad that the BBC is practically unlistenable most
nights on 5975-I have to use 9525 even though that freq has problems of
its own.
>
> I get intermod junk from local 50kW MW stations. Bad in wet weather
> when the ground improves.

On 9525 I'll get some other signal that occasionally wipes out the BBC
for several seconds at a time. Usually it's talking in Spanish, but a
couple nights ago it was American sounding jazz music, sounded like that
"soft jazz" muzak stuff that seems to be a popular FM format nowadays.
The transmitting tower of a soft jazz FM stn is near my location. But
that doesn't explain the Spanish.
>

> Lucky

The two most popular models are the HF-150 and HF-250. Other models of note are the HF-225 and HF-235. All of the Lowe models are fairly difficult to come by and tend to fetch a premium, especially in the UK where they were made.

I have the HF-250E, the European version of the HF-250 I'm very happy with the radio being that it's 10+ years old.

If you'd like to test drive my HF-250, I currently have it available online:

Steve thank for that review link its made my mind up.
i will be ordering the wellbrook ALA-330S in the next couple of days...i shouldn't have any problem ordering the 330s as i will just phone wellbrook direct and have one delivered the day after i place my order....i am out all day Thursday so there is no point in ordering tomorrow. i will more than likely order when i get in Thursday for delivery Friday. if i get home in time to call wellbrook.
i am living in quite a small village you might say good location but one thing our village is located very close to Heathrow Air Port...
if i stand at my front door or in my back garden i can watch plains taking off and landing and i don't need any binoculars....
i sometimes listen in but i like HF / SW ..

It sounds like an inexpensive SWR meter for CB use. It will work on ham freqs below 30 MHz. Probably will be inaccurate at VHF.

There should be a FWD/REV switch on it. Put the switch in the FWD position and key up your rig. Set the adjustment to full scale. Then, switch to REV and read yer SWR. If it's the type I think it is, it will only give a relative power indication, not actual watts.

about 5 HF-225's show up on eBay for every HF-250 so I would say the 250 is not that popular if you measure it by ebay exposure. the 225's don't sell for nearly what they are worth. the 235 is fairly rare, only about one or two show up a year on ebay. the 250E would be the most desirable but are hard to get.

Make sure you have a good impedence match to your receiver, make sure
you have a good solid outdoor ground from said receiver, and try to find
out by process of elimination what in or around your home is generating
extraneous noise - shut if off while listening, if that's feasable.

All of that may/might help some, but not as much as you are hoping for.
Longwire antennas will inherently pick up noise, period. Loops are much
quieter, but overall don't have the same signal pulling ability.

Tony

TouchStone Energy, formerly RECC.
But the damn light went out a few minutes
ago with a loud SPLAT that was loud inside
our house.
Ah, listen to the quite!
Had to work late today running video tape,
so I didn't get a cahnce to check this group
during my missed afternnon break.
I am very glad it went on and died because I
intend to use the upcoming three day weekend
to test an idea I have for a "better" feedline.
"Big Time TV" cameras use Triax.
Similar to Coax, but there are 2 isolated
shields. At work we had a MAJOR cleanup
and I have about 80' of slightly used Triax.
(I think Triax is a registered trade mark).
I suspect that some noise is creeping back up
my feedline to get into the antenna. I have placed
enough feritte split cores on my equipment to
pose a hazard to the compasses in overhead
aircraft! But I still have a few birdies that vanish
when I kill my PC. If this works I will try to write it up.
"Noise ingress", BT TV's term, is a major problem
for high end studio and field TV cameras. Triax
is very good at surpressing ingress.
Of course the temps are going to be about 4F,
but antennas allways work better if you suffer
errecting them!
BTW I have friends who used to work in a repair
shop and they salvaged all of the supresion cores
from dead equipment. I have a "whole bunch".
The more you add the better the results.
I have been tempted a time or two to pull the feritte
rod frm my McKay DA5 MW loop, it has an ~1/8"
hole lengthwise and it is about 10" long. But tempted
as I am,I have resisted. So far.
At least the bug zappers are quite this time of year.
Next on my insane noise reduction list is to add
filtering at every AC outlet and across every light
switch. I have found that a 0.1Ceramic cap, with
a 1 Ohm carbon film resistor in seires will quiten
the mains nicely. My insurance company and the
local fire department insist the caps be placed in
a "sturdy" metal box. I plan on using the micro Altoid

tins, spot soldered, protected by fiberglass tubing,
with the leads protected by flame proof heat shrink.
The 1 Ohm resistor makes a dandy fuse. I hope to
add feritte cores as I go.
Everyone already knew I was crazy, right?

Terry

Best choice you could have made Steve. Make sure you check out the battery box for corrosion. Users tend to put in alkaline batteries and then plug in the AC adapter- this attempts to charge the alkalines, causing them to leak. I have had 3 150's- only my current model has a pristine battery box.

Not HAARP. XM and Sirius paying the FCC. The satilite radio market shut down BBC to the western hemisphere. My suggestion is to keep broadcasting! SW and DX have been here long before these guys showed up and SW and DX will still be here!

Keep broadcasting. Just don't air any of that religious stuff. That is kinda the main reason SW never caught on. 50 stations of religous broadcasting and not one station plays Stairway to Heaven.

Sorry Art,
There is no FWD/REV switch. That is what the SWR side of the meter is
for. There is no need to reverse the meter and sense the reflected
power.

But as far as it being for CB/HAM, other folks had the same idea. And
it will not be accuarate up in the airband.

As an added note, I have pulled the back off and there is a straight
rod between the in and the out so-239s. Running parrallel are two
more rods used for sensing. Wires run from the sensing rods to the
pot in the middle. Actually it is a double pot. So might it be some
sort of attenuator or ballence....but I would guess that should be a
cap....I dunno....that is why I asked you guys.

Again thanks Art for taking a stab at it...
Chris

In another post cuhulin mentions always having a transistor radio with him when he was in the US Army. That reminds me of something that happened to me when I lived in San Francisco 10 years ago. I was browsing the junk for sale at one of the city's sidewalk garage sales, where homeless people sell stuff fished out of dumpsters in order to eat or buy some dope. One guy had a TO 7000 in reasonably good shape. He wanted $20, which I didn't have. He said that he had lugged it through his entire tour of duty in Vietnam and that it had kept him connected to home. He didn't want to sell it since it had a lot of sentimental value to him but he needed to eat. I told him I would get the $20 later that day and come back tomorrow and if he still had it I would buy it. I came back the next day at the same time with the $20 but he was nowhere to be found. I still wish I would have had the money to buy it off him right then and there. Can you imagine hauling a TO through the jungles of Nam for a year, what with all those soldiers went through? And then having to sell it-your last real possession-on some godforsaken street corner in San Francisco for $20 in order to eat that night? (Another time, I DID buy some bum's Silvertone AM transistor radio for $4. It had a hinged plate that flipped up to reveal the dial and thumbwheels. Real neat little radio. I don't have it anymore, though.)

Try Ebay. He'll be rolling in dough. He just needs to remember to put
the initial bid on that 7600 at $9.99 so it will sell for $300...

Perhaps, with all the collections being taken up for our brave troops
who have been railroaded into another hopeless war, we could take up a
collection of portable shortwave radios to send over to Iraq so the
soldiers would have something else to listen to besides AFRTS.

I think that anything capable of taking their minds off of the task
at hand (momentarily, of course) would be useful - something to
help them escape, maybe?

I think I read somewhere that an effort to send radios to troops is
already underway. I'll have to look into that.

AAFES (PX/BX) doesn't seem to be too interested in selling SW radios. I've seen three models since I've been over here (Korea), one I'm sure was an accident (a JVC boombox that had a SW band on it), then there's the Sony SWF-35, and the little jWin pocket sized one. And out of all of those, I've seen exactly 15 pieces total in all the AAFES stores in country.

Most of the troops are young-in their 20s-and from poorer households.
Unless somebody in the family is into SWL, I doubt that the vast
majority of them know what shortwave is. The AFRTS SW stations that we
in this group listen to are simply feeders-they're picked up by the
comms units and rebroadcast on AM and/or FM to the troops. I bet it gets
very lonely being in a foreign country where none of the civilians speak
your language or even like you, and the only thing to listen to in
English is AFRTS. Sure, they have DVDs sent from home, but DVDs can't
keep you informed about what is happening outside Iraq from a
perspective other than that of the US military, or offer the wide range
of programming that SW does.

I'm not sure what the SW stations are even used for nowadays, unless maybe ships at sea. All the terrestrial AFN stations are now satellite fed from various sources with someone sitting at a mixer at the local outlet (or, in the case of AFN-Korea, at Yongsan, feeding all the outlying outlets) switching feeds according to a local programming schedule. All the AFN radio feeds are available in Asia and Europe now via DTS satellite feeds (in stereo, no less).

887. BBC in Spanish on 9525?

Newsgroup: rec.radio.shortwave
Date: 2005-01-12 03:24:17 UTC

I tuned in to 9525 at 0300 January 12 to hear the news on the BBC, and all I heard was an IS followed by Spanish. They clearly said "BBC Noticias" so I know it was the BBC, but I thought this frequency and time was in English, at least it usually is. What's going on? I know this freq is targeted at Mexico, did they finally decide that people in Mexico indeed speak Spanish instead of English and adjust their programming accordingly? ;)

I haven't seen one of those old Simpsons in years! Damned good meter, but given the age and capabilities of that one, I think $50 is an optimistically high starting bid, unless you're a collector to whom it's a "must have". I have a soft spot for analog meters (still have one, use it occasionally, too) but for a U.S Grant, you can buy a much more widely capable and accurate meter today.

Tony

Insurance companies often demand that the grass be kept quite short due to wildfire risks. Unfortunately this makes it much easier for the ground to be disrupted from heavy raings.

Ahh the joys of living in California. Just finished pumping out more water from under my house - in a few hours more will seep in and the pump will have to be run again. Compared to many folks my water issue is a nothing. What really frosted my was how bad radio reception has been this past week, a real increase in atmospheric noise. Things got real quiet when I disconnected the antennas (heard we might get lightning so it seemed the prudent thing to do).

Now we're down to just some light and intermittent drizzle, our ground rods have moist soil and the idiots who didn't figure out how to kill themselves by playing in the desert washes & flood channels will have to wait for fire season and see if they can manage to torch themselves via campfire in the midst of dry brush. At least we didn't have a major earthquake during the rains - all that saturated soil, can you say liquifaction??

Yes..but...

The super high input impedance of the new digital meters can actually be a drawback in some cases. You can get voltage readings from wires that have no right to be carrying any current. A case in point was some trouble shooting for a friend. There was a lighting circuit out in a basement parking lot. We started measuring things, and a lot of the wires were reading 7 volts, 9 volts, etc..

This was with a digital meter. It didn't make sense. We tried a junky pocket size 2K ohm/volt analog and got ZERO volts on the same wires. The lack of a slight load using the digital meter was showing us the induced voltage from other circuits running through the same conduit. As soon as the meter load was reduced to a few thousand ohms and a bit of current could flow, , the voltage basically disappeared.

In this case, the antique analog meter was the better tool to use. An old teacher once said that any meter with less than *20*k ohm/volt was junk. In most cases he was right. Two megohm/volt or higher was something reserved for the expensive VTVM instruments that normal people couldn't afford.

You seem to have the deluxe version with 2 meters but without FWD/REV
switch.
While transmitting, use pot to adjust power meter to full scale, then read
SWR on other meter.

897. Cleaning Inside Old Radio

Go for the icom R75....please don't waist your money on a yaesu VR5000 they
are the biggest load of S? i have ever owned.
when they were released i paid ?700+ for one of them with the DSP unit
installed...all i will say is i only owned it for just six months and sold
it on at a loss.....
i then went out and paid almost 3k for another as i am one who only wants
the best and after buying the VR5000 i know why i am the way i am....short
wave radio magazine run an article on the VR5000
and to be honest they even said they are not worth buying.
in my opinion i can not understand yaesu why bring out a receiver
that is so bad well next to useless... they yaesu have a good reputation so
why bring out such a crap receiver...
i will look in my old copies of short wave magazines and if i can find the
review i will post it hear for you...

900. Crystal Set Query

Newsgroup: rec.radio.shortwave
Date: 2005-01-12 11:08:28 UTC
From: peter berrett <p.berrett@optusnet.com.au>
Message-ID: <41e50519$0$25421$afc38c87@news.optusnet.com.au>
Source record: 4850

Hi all

Cam someone please help me with a query I have about an old crystal set I used to own.

When I first came to live in Melbourne (1970s) my parents purchased for me a small crystal set.at a local, now long gone, toy store. As I recall the set was manufactured in England although I may be wrong on this point.

It was housed in a small plastic box (red?) and from memory was about 2 inches long and maybe an inch wide and high.

Inside the box was a small wound coil (about 1/4" diameter) around a thin cardboard tube. There was a ferrite rod inside this which could be slid back and forth within the tube by means of a small rod that stuck out of the end of the ferte rod and protruded from the end of the box. This was used for tuning stations. There was also a piece of wire coming from the box with an alligator clip on the end. This was the antenna and by attaching it to a long piece of wire one could receive stations. There was also another piece of twin wire protruduing from the box which went to a crystal earpiece so that you could listen to stations.

Aside from this I think there were only two other components - a diode and a capacitor as I recall which formed the crystal set circuit. Unfortunately the set is now lost after so many years.

This was my first introduction to radio and despite moving on to bigger radios and getting my ham license, this example of a crystal set has always stuck in my mind as being a particularly simple but efficient example of electrical engineering. I now have a young son of my own and would like very much to buy one of these sets.

Does anyone know who manufactured these sets and whether they are still available to be purchased?

cheers Peter VK3PB

Source record: 4951

We used to build them with 1N34A diode, capacitor across the headphones,
and a coil wound on a toilet paper tube, with taps on the coil
that you'd clip an allegator clip to, for tuning.

Assemble atop wooden board.

There were some with an actual cat whisker instead of the diode,
but we went the modern way mostly.

The project is mostly winding the coil, many turns of enameled wire,
and scraping bits of it clear of enamel for the allegator clip
landing spots.

Another tuning method was a slider over the coil but it never
seemed like that would be very easy to get to work reliably.

Antenna and ground across the live portion of the coil.

Now that we're all agreed what it means, how about this? How do you
pronounce 'Mondiale'?

Trashy version: mon (as in monitor) dial (as in soap or radio if you
prefer)

Italian version: mon " dee ali (as in Muhammed)

French version: moan not sure about the rest

January 12, 2005

Let's Talk About Sex

Note: This January 12, 2005 BuzzFlash Editorial marks the twelfth in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

Let's talk about sex.
Well, really, here at BuzzFlash we don't talk much about it.

What we do is talk about Republicans talking about sex, because they can't seem to stop talking about it.

You might say that the right wing morality police are obsessed with sex, in a way that indicates some mental health issues.

So much of BuzzFlash's coverage over the last four and a half years has been about hypocritical Republicans who hold themselves out as moral scolds, but are bed hopping like jackrabbits in a lettuce patch.

Let's see, we've got the contingent of gay Republicans who are anti-gay (with their journalistic contingent headed by Matt Drudge). We've got anti-adulterers who are regular adulterers (remember beloved husband Newt Gingrich was shtooping a Congressional staffer while calling for Clinton's impeachment and his right wing replacement in waiting, the former Congressman Bob Livingston, was exposed as a married Capitol Hill Romeo, by Larry Flynt, no less.) We've got the anti-gamblers and kinky sex preachers who are gamblers and into kinky sex (Bill "Moral Virtues" Bennett where are you? You can come out of hiding now.) We had Bush supporters like the former Republican Mayor of Bridgeport, Connecticut, who paid a mother so that he could have sex with her underage daughter in his mayoral office.

Oh, we could go on and on, but what's the use? They get away with their sexual hypocrisy because the media has a double standard. If you're a Republican male, you're just having a good old frat party sort of Hooters time, just some lusty male fun. But if you are a Democrat engaging in sex, the same acts are considered sin.

God just has a more forgiving standard for Republicans we guess.

But frankly, we wouldn't know about how sexually depraved America has become if we didn't keep hearing the Republicans decrying it all the time (while engaging in the same activities that they are deploring.)

Oh, we are sure there are a couple of faithful Republican Congressmen up on Capitol Hill, well maybe one. That's right, we've always said that Tom DeLay picked Dennis Hastert to be his puppet Speaker of the House because Denny was the only Republican male Representative DeLay could be sure would prefer a leg of lamb to a woman's leg -- or a man's leg, for that matter.

But if the Republicans would just stop their hypocritical fire and brimstone lectures on sex, we all might be able to get back to a "G" rated society.

I mean, we haven't seen anyone fornicating in the streets lately, have you? But, we see a lot of leg in Rupert Murdoch's FOX Television programming. How come the GOP Puritans aren't coming down on Republican media mogul Rupert? How do you spell FOX NEWS? You spell it, G-O-P P-R-O-P-A-G-A-N-D-A.

And it's all posturing and propaganda, the sex talk that is. It's the modern day descendant of our Puritan and Southern Baptist and Evangelical heritage in which man is always wrestling with the devil of his sexuality.

When it comes to the bedroom, most Republican politicians do a lot of sexual wrestling all right -- and they emerge from the erotic tussle to denounce our "sinful" society.

Hey, maybe we're going out on a limb here, but what percentage of the guys who fly Hooters airlines down to Myrtle Beach for some golf do you think voted for Bush? Maybe 95%? Or make it 98%?

And what about all those gasoline stations in the South with the pin-up calendars hanging out just beyond the grease pit?

Frankly we don't know of any depraved Democrats, but we sure read a lot about Republicans who are sexually obsessed philanderers. You know, like Bernie Kerik, who was Bush's kind of guy and the kind of man he could trust in his gut (as Bush is wont to say) to head our "Homeland Security Department." Well, Bernie, as we now know, wasn't just cheating on his third wife; he was also cheating on his mistresses.

The claim of the Republican leadership to a moral high ground on sex is nine planets beyond hypocrisy. Their hero was the legendary Strom Thurmond, who manhandled just about every woman he could get his racist paws on. The GOP knew that Strom couldn't resist a comely woman, or even an uncomely one for that matter. But Strom stood for those good 'ol Southern Values, right?

Right, and at the top of the list of the Confederacy morality Thurmond exemplified was one simple word: hypocrisy.

And that is what BuzzFlash makes of the Republican obsession with all things sexual: naked, raw, lascivious hypocrisy.

Now, can we please talk about something else besides sex?

Please.

A BUZZFLASH EDITORIAL

Last summer-more this month

FDA Betrays Public Trust; Reneges on Promise to
Quickly Reduce Mad Cow Risk in Animal Feed

(Yonkers, NY) -- Consumers Union, the independent, non-profit
publisher of Consumer Reports, today criticized the Bush
Administration for reneging on a promise made in January to quickly
tighten rules governing what material can be in animal feed for cattle
to help reduce the risk that the feed might transmit mad cow disease.

ï¿½This is a betrayal of a promise made to consumers to protect their
health,ï¿½ said Jean Halloran, director of Consumers Unionï¿½s Consumer
Policy Institute. ï¿½Six months ago the administration said it would
take the necessary steps to address this problem, and now it is
dragging its feet.ï¿½

At a news conference on Jan. 26, HHS Secretary Tommy Thompson and then
Food and Drug Administration (FDA) Commissioner Mark McClelland
announced that FDA was issuing an interim final rule that would change
four U.S. feed practices it said were risky. FDA said it would change
its rules so that cattle could not be fed blood from other cattle,
floor wastes from poultry facilities, and plate wastes from
restaurants. These types of feed practices were similar to those in
place in the United Kingdom before that nationï¿½s mad cow outbreak and
may have contributed to Britainï¿½s epidemic. FDA also said it would
require separate machinery at feed facilities for handling cattle
protein and other types of protein.

However the changed rule was never issued. Today FDA said in a press
release that consideration of such measures had been demoted to an
ï¿½Advance Notice of Proposed Rulemaking,ï¿½ a very preliminary stage in
the rulemaking process that might never result in final FDA action.

ï¿½As a result of FDAï¿½s backing off from its commitment, calves can
still be fed cowsï¿½ blood in their milk formula,ï¿½ Halloran said. ï¿½Cows
also can consume poultry wastes that may contain poultry feces and
spilled feed that could carry the mad cow agent. These practices
increase the risk that this deadly disease may infect cows, and in
turn infect people who eat beef.ï¿½

FDA had issued an Advance Notice of Proposed Rulemaking two years ago,
in November 2002, regarding the need to tighten the feed rule to
reduce risks of mad cow disease, technically known as bovine
spongiform encephalopathy or BSE.

ï¿½FDA does not need another round of comments; it should act on what it said it would do,ï¿½ stated Halloran. ï¿½They know what needs to be done and how to do it. This further delay needlessly puts public health at risk. This action today raises profound questions as to whether the public can trust statements made by the Bush Administration on food safety.ï¿½

At the Jan. 26 press conference, Secretary Thompson stated that ï¿½[a]lthough the current animal feed rule provides a strong barrier against the further spread of BSE, we must never be satisfied with the status quoï¿½this is the time to make sure the public is protected to the greatest extent possible.ï¿½ This statement is very similar to one issued today by Secretary Thompson. Commissioner McClellan further said at the Jan. 26 press conference that ï¿½we are bolstering our BSE firewallsï¿½we are further strengthening our animal feed rule.ï¿½

Given todayï¿½s announcement, Halloran countered, ï¿½Now it appears this was empty rhetoric. Any action will be far in the future. In the meantime, public health is at risk.ï¿½

FDAï¿½s announcement also included the issuance of an interim final rule to prohibit the use of certain cattle-derived materials in human food and cosmetics, and a proposed rule on recordkeeping requirements. Both of these proposals are welcome and will help in the fight against the spread of mad cow disease. However, in the absence of stricter animal feed rules, the totality of FDAï¿½s announced actions are inadequate.

DENNIS;
I have the ICOM R-75 and use the LF H-800 antenna with the unit. I can tell you that the R-75 will pick up many stations and with the many controls the unit offers you will be pleased with the audio. Also if you desire and it does improve the audio is the new ICOM Speaker -23 which has several filter controls to enhance audio.
This receiver is a very good value and I think there are now several deals being offered where you will be able to get the unit for under $500.00
Good hunting and have fun
Howard

You used to be able to buy a spray can that with compressed
air that was ejected at a rate safe for circuit boards. Don't know
if Radio Shack or any other place has it around any more.

Free hint: don't use regular compressed air. I found that
out the hard way while I was in college.

Ordinary DMMs have at least three other "quirks":
They sample at only several times per second so can give annoying
and misleading readings with slowly varying signals or when on the
ohms range with some inductors (wallwart transformer primaries
are a typical example).
The digital circuits generate RF noise,
On AC ranges, they are only good for sine waves and only at 50-60
Hz, at best some to 400Hz.

> Surely you can see well enough to understand that.

I am not "you folks". Do not confuse some with
most. It used to be said that for every poster in
a newsgroup, there were somewhere between
4-10 lurkers who simply read, and not participated.
Don't presume that some speak for most or all.

> I just got fed up with the clueless thinking going on here and

In a place inappropriate for it. That would be
roughly the equivalent of myself walking into
a library and shouting out to everyone my
opinions on whether ozone depletion will lead
to an increase in skin cancer. While my opinions
may or may not be valid, screaming in a library
is a place inappropriate for it.

> No one died in the CBS episode. someone made some mistakes in
> researching information. That happens thousands of times a day in
this
> country. So what! That is just a molehill compared to other issues
on
> the table.

Because no one died in the CBS episode doesn't
make it unimportant. One of the most important
issues that faced this country when it was new

didn't involve anyone dying over it; it was the
replacement of the Articles of Confederation with
the Constitution. I'd consider that a pretty important
issue.

Death != importance, and death does not make
one issue more important than another. By this
rationalization, the most important issues affecting
the world the past decade would have been two
episodes of genocide in Africa, AIDS in Africa,
and the Tsunami. Not Iraq. Not Terrorism. Not
George W. Bush. Not Israel and Palestine.

> George Bush's mistakes are costing tens of thousands of innocent
> people their lives, and many American soldiers as well.
>
> To try and say that they both are of the same weight is ridiculous!
> This is like Mount Everest!

No, it's not. To presume to compare, I have to
assume that first you are correct in your assumption
concerning George W. Bush's prosecution of the
war in Iraq. I do not make that assumption, so I
do not compare.

> Despite the fact that your grammar is much better than most here,
your

>
> Tell me this honestly...anyone here.
>
> Do you people feel that Iraqi. Afghani's Africans, Iranians, Jews,
and
> other non white people are full human beings just like you believe
> yourself to be?

This is a loaded question and has nothing to do
with the discussion at hand. A discussion about
CBS or George W. Bush does not hinge on
whether one is a racist or not.

> Would you be comfortable with your sisters marrying one of them?

It doesn't matter to the discussion; and even if I
had sisters, it would be their concern whether they
had found the right person to marry, not mine.

> I know what lies deep deep down at the very bottom of these issues,
> but I want to see if you are in touch enough with how you really
look
> at other human beings; to answer that honestly. :-)

No, racism does not lie at the bottom of these issues. To say that it does is like saying mathematics is racist because some Englishman named Newton co-invented Calculus.

People see in things what they want to see. If some people think that an alien spacecraft crashed in the Indian Ocean and caused the Tsunamis, so be it. If some people think that NASA faked the moon landings, so be it. If some people think that the Holocaust didn't happen, then so be it. If some people think that I am a racist because I get annoyed when people accuse myself and my entire country of racism, then so be it.

I can't change another person's thinking on emotive issues, whether I agree or disagree with what they said, so I don't often try. All it does is raise my blood pressure. All I can do is present my opinion of the facts, and that has to be sufficient.

<<snipped rant about the US's racist attacks against other countries since WW2, which ironically enough was a war against primarily a European agressor>>

Go down the makeup aisle in your local pharmacy and find a large size "blusher brush". Handiest little duster in the world. It is soft enough to use on electrical components, but will really do the job. Either blow off disloged dust with your breath, or hold the nozzle attachment of a vacuum cleaner about 2" from the board while dusting it.

Spray electrical contact cleaner is available through most large retailers and hardware outlets. RatShack sells it, too, but it's a lot more expensive (for essentially the same product).

Dennis & Judy, be advised that you'll have to have cap mod ICOM's R-75 to get satisfactory agc, audio, & sync performance. Bought Radio Place's last R-75 before they went out of business two years ago, had the cap mods incorporated, & it's been a stellar receiver ever since. Although ICOM gets ripped for lousy audio, those cap mods produce a robust, midrange-centric tonality via external amplification. If you want to go Yaesu, though, get a Century Frog (FRG-100). They don't seem to suffer the bugaboos of FRG's 7000, 7700, or 8800. B.T.W., really miss Lucky Ocean's "Planet" via Radio Australia since the holidays!!!

Steve
i have just got off the phone to wellbrook antennas.
and i was told that i was better placing my order through the short wave shop as wellbrook don't have facilities to take payment by cheque. not even for uk customers.
so my next day delivery is out of the window.
i have just phoned the short-wave shop up and i have placed an order for a wellbrook ALA-330S and i am expecting delivery of the antenna on Wednesday of next week....another new toy to play about with... and another antenna to add to my garden....
antennas i already have in my garden are (1) random long wire antenna (2) full sized G5RV for the HF amateur bands (3) Wide band discone for VHF & UHF...i also have a couple of home made antennas mounted in my loft space.....
Will let you know when and how i find the antenna at my location..

Mike

If you look at his posting history through Google, I think you'll see he's preoccupied with racism, and makes racist remarks on a regular basis.

He'll call white people racist, and a few paragraphs later he'll say something like: "The new strong black people don't give a damn
about white folks because we know MOST of them have cheated, lied,
stolen, and murdered their way into whatever riches they may have."

He's just an angry troll.

From: "Chris Murray" mwmwmfilms@yahoo.com

Re: G & F Ssales Company, Chicago -- 1930's Futuristic Wood Radio has been called the "Searchlight radio" by some or "Disk-shaped Radio by others."

I have one of these and am looking for any info. Please feel free to email me if you know anything at all about this radio or if you have one. Mine is missing a tube and I am trying to find out what it was. I also would love to know what value it has -- I have been told it is "quite valuable." It is a really funny a interesting design. Something from the 1933 Chicago or 1939 New York World's fair. It turns up and down and from side to side, just like the tourist quarter binoculars at the Statue of Liberty or Empire State Building. What I have been able to find is listed below. Thanks to all who have emailed me from other lists as well as from this list. There seems to be little or no info on these sets. It seems that it is very rare. I would love a copy of any articles or pictures from those cited below. I would also buy a schematic if there is such a thing on this set.

Please see picture of radio at link below or email me for picture:

http://photos.groups.yahoo.com/group/oldradioparts/vwp?.dir=/&.dnm=G+%26+F+Supply+Company%27s+radio.jpg&.src=gr&.view=t&.hires=t

Patrick Franzis <old_radios@yahoo.com> wrote:

Hi Chris,

I'm still researching.. Can you send me any information that is on maybe a metal plate in the back? The tubes you have in it 1-6A7, 1-25Z5, 1-75, 1-78 make me think it is not the General TV and Radio 5A5 as one of the below references say, as this chassis was made with post-war tubes like 12sk7, 12sq7 etc. I remember reading the article you copied in Antique Radio Classified a while ago, that's where I was trying to find (from the back of my mind) when you described it. I

then found a picture on the web. Thanks for the tube line up, that may help identifying it. It was most like made by one of the many shops in Chicago and then resold under a different name. By the way- it's quite valuable.. Where did you find it?

--- Chris Murray <mwmwmfilms@yahoo.com> wrote:
Subject: Re: Fwd: Re: Please help figure out what radio this is.

Hi Patrick,
I don't know if you got my other email but I am very impressed that you found it. Since you led me in the right direction I came up with these web citings. I really need to still find a schematic, a tube list if nothing else and a value would be nice. I only have 4 of the 5 tubes (1-6A7, 1-25Z5, 1-75, 1-78 missing the other it has a ballast marked triad and a 6pin tuning eye.) Below are all the excerpts that I could find on the web, I tried emailing to those mentioned but who knows if that will work.

Thanks for your help!
Best,
Chris Murray

Found on the web

==========
Disk-Shaped Radio Help ID
Dear Editor:

The unknown radio shown in your Photo Review, February'97, p. 13, and again in the March 1999 issue, p.15, is a General Television Model 5A5 "Spy Radio," ca.1938. It appears to me to have Detrola knobs, possibly made for the company by Detrola(?). I have this radio and mine has a sticker on the front saying "GF Sales Co., Chicago, Illinois."--Jim Hauskins, Bloomington, IL
==========
Dear Editor: In the March 1999 issue of A.R.C., a disc-shaped radio is shown asking for the identity of the manufacturer. I have the same radio. On the back is a metal plate with the following information: "Licensed under patents of Radio Corporation of America, General Electric Company, Westinghouse Electric & Mfg. Company, Hazeltine Corporation." There is also a sticker on the back which reads: "G&F Radio Patent applied for. For maximum efficiency for local and distance reception, add 15 to 25 feet of aerial. For foreign reception add 40 to 50 foot outdoor aerial." The serial number for this unit is 25-174958. I hope this information is helpful. --J. Melvin Isett, Huntingdon, PA
==========
Following these leads reveals an example in "Machine Age to Jet Age II" by Mark Stein on page 148. And yet another can be found on the cover of

the 1997 tube catalog of Electron Tube Enterprises, Essex, Vermont, which clearly shows the G&F Sales Company, Chicago logo on the lower portion of the disk. It appears that the mystery is now solved. (Editor)

Photo can be found at
http://www.antiqueradio.com/radiomisc04-99.html

My G & F sales, searchlight radio has 6A7, 78, 75, 25Z5 but is missing another unknown tube , it also has a ballast marked triad, and a 6 pin tuning eye.

Still stuck on the Searchlight radio

Subject: Still stuck on the Searchlight radio

Had no responses to my inquiry on the "Searchlight" radio nearly identical to the General Radio and Television model shown in "Evolution of Radio" book. The decal says "GF" in script, with a ???? Co., Chicago. Cant read the ????. The tube lineup is: 6D6, 6C6, 25Z5, 25L6 and a L55B ballast. Riders shows several models with a similar lineup, but the output tube is always a 43, not a 25L6. Do the Riders on CD do a search on tube complement? Their ads imply they do, but dont seem to be clear. Does anybody remember "GF" associated with a store or store brand in Chicago in the mid to late 30's?

In order to reply by mail, please change "davis" in my address to "david"

Thanks for any hints anyone might have.

Dave

I found 48 schematics in Rider's with the above tube compliment in 15 seconds using Gerald Larsen's handy dandy reference book "The Locator". This book is a tabulation of all of the schematics in Rider's listed in alphanumeric order by tube compliment. The listings are for radios up to 8 tubes and they are listed by tube number starting with the output tube(s), followed by power rectifier, then the remainder starting at the antenna and working towards the output. It covers Rider's 1 - 18 and covers A.C. powered sets only. This book was compiled out of the frustration of the author who is interested in off brand radios. He spent many hours thumbing through Rider's in search of schematics as well as other clues to the maker's of his off brand sets. He finally decided that it would make more sense to make an index by tube compliment than to go through all of Rider's looking for each new set that came along. The man hours of work to assemble this data probably was huge! For those of us who have spent many bleary eyed hours paging through The Mallory Radio Service Encyclopedia looking for a Rider's reference for a certain tube compliment, this is a fantastic reference. Should anyone wish to pusue this book, drop me a note end I'll send you the author's info.

Subject: Re: Still stuck on the Searchlight radio

The decal is black with gold highlighting; says "GF (or G&F) Sales Co. Chicago".You can get a copy of the ETE catalog at http//members.aol.com/etetubes.
It is an excellent color photo.
The owner says it's a General Radio mod 5.

Hope this helps Dave.

Dave Gonshor wrote:
> I've scanned Riders, Grinders and the price guides for info on this radio. It is in the shape of a searchlight. It is nearly identical to the General Radio and Television set pictured in "Evolution of Radio" book. The dial, knobs and decal are different. Everything else is identical. The tube line-up is 6C6, 6D6, 25Z5, 25L6 and a 55 volt ballast tube. There is no readable manufacturer's name on mine, but the front decal says GF ????? Co., Chicago. I'm trying to find a model number and a schematic (the chassis has been worked on which is why it has taken up the bad habit of smoking). Any help would be appreciated. Note my email has been modified

I wouldn't use contact cleaner on anything except switches and pots.
Don't spray this stuff on components, especially in the high impedance
area of the synthesizer, of you could have a non-functioning radio. If
you do use a contact cleaner, use one of the Caig products such as
De-Oxit or Pro Gold.
If you brush the dust off the circuit boards, make sure that you don't
bump any of the trimmer capicators.

Ok I'll be careful. I picked up some stuff this morning from Radio Shack. It's an electronics cleaner. Looks to have ether in it but the brush is stiff. I won't use it on the components even though it says it can used. Was $10.50 a can!

Reminds me of when I was a kid - my best friend decided to soup up his dad's radio and found the trimmer caps and the slugs in the IF transformers were loose and needed tightening. ;)

Any update on the enthusiast's MW radio you were working on?

French version: moan DEE ahl (not certain of the accent, French isn't
my first second language.. :))

moan dee ahl French does not accentuate some
syllables like we do " en Anglais " k35454.

CRC is still made - I bought a can of it a month ago, but many
stores that used to carry it don't anymore, true. In the North Central
states we have a chain called "Meijers" (Like Wal-Mart or Target) that
always has it.

They sell it in the automotive section, and if you haven't tried a
large auto parts store, they should carry it or it's equivalent. Rat
Shack does too, last I looked.

I'm confused. You are concerned about the sexual interests of neorepublicans, but proceed to talk about only Hastert, Thurmond, Delay, Gingrich, Livingston.

For someone who want's to: "...please talk about something else besides sex" your column seems to be unusually focused on gay republicans and philanderers. Maybe all this writing is a manifestation of physical interest?

This is interesting. Steve, did you manage to hear this one too?

I'm rarely near a radio at that time, but even if I were, those midday DX blues and yecch noise would probably make it darn near impossible (although a *few* African signals are quite potent then).

Source record: 4856

ML,
.
HERE IS WHY I THINK THE "ETON E1 RECEIVER WITH XM SATELLITE RADIO WILL
BE A BETTER 'BASIC' PRODUCT THAN THE DRAKE SW8 AND GRUNDIG SATELLIT 800
MILLENNIUM RADIO/RECEIVERS : {What I Think and Why}
.
Since RL Drake Co. (including Grundig/Eton/Tecsun) have a History of
"Lesions Learned" for the Grundig Satellit 800 Millennium and the Drake
SW8 Radio/Receivers. It would be in RL Drakes and the others
collective "Best Interests" to make any and all small Fixes that would
Reduce Customer Complaints and Improve Initial Customer Satisfaction
with their new Radios. Each Dollar spend doing so usually results in
about a Seven Dollar Saving in Repair Maintenance Costs 'after' the
Sale of the Product {Radio/Receiver} .
.
If you had read all the little 'low cost' FIXES that Grundig Satellit
800 Millennium Owners have Reported about in the Grundig Satellit 800
eGroup on YAHOO! You would know that there are many minor 'parts'
improvements that could make the new Eton E1 Receiver with XM Satellite
Radio a "Better" Product {Radio/Receiver} for the Radio Enthusiast.
.
NOTE : This is a Product {Radio/Receiver} that is Up-Scale-Priced and
"Targeted" for the RADIO ENTHUSIAST : Or to be Given as what is usually
called an "Executive Gift" . [Money & Image]
.
I Will Repeat Myself: [IMHO] In order to put the 'basic' Electronics
of the Drake SW8 / Grundig Satellit 800 Millennium into a much
'smaller' [Box] as that which is the "Size" of the new Eton E1 Receiver
with XM Satellite Radio: The Design Engineers at RL Drake Co. (USA)
and the Manufacturing Process and Testing Engineers at Tecsun GEM China
(PRC); would have to BUILD THE RADIO BETTER; or offer an inferior
product to the SW8 / GS800M. All the Companies concerned simply would
NOT DO THIS with what will be Their PREMIER "Flag Ship" Product
{Radio/Receiver}
.
.
and that's what i think ~ RHF
.
All are WELCOME and "Invited-to-Join" the
ETON 'Elite' E1 XM Radio eGroup on YAHOO !
http://groups.yahoo.com/group/ETON-E1-XM-Radio/
The Topic is the Eton 'Elite' E1 Radio with XM Satellite Receiver
.
.

ZAMBIA 4910, 1601-1655, ZNBC Radio 1 Jan 10 'A Mighty Fortress is Our God' hymn by bell choir at tune-in; male announcer with mentions of Zambia at 1603, then female announcer with presumed news items in unid. language. Mentions of Lusaka at 1610, and into another hymn by a bell choir at 1611; followed by 'What A Friend We Have In Jesus' song on organ. Female chorus to woman announcer at 1615, and into soft Afropops music. Mentions of Zambia again at 1630. Good reception half-hour before Lusaka sunset, and 40 minutes after my local sunrise; finally dropping down to poor by 1650. Strong het only noted on 3306. I also checked 4965 for R. Christian Voice, but it was also just a het. ZNBC 4910 also heard on Jan 12, peaking to good at 1620. (Atkins-WA)

My father was telling me recently about how he built capacitors from scratch when he was a boy. He scrounged broken bits of glass and alternated them with pieces of tinfoil from gum wrappers. Together with some wire leads they formed a capacitor for use in homebrew crystal radios. He used the large oatmeal boxes for coil forms, and transducers from old telphone handsets for the earpiece. A galena crystal and safety pin was used for the detector, but I don't know where he came upon the galena.

The modern reproduciton that I have was made by DaMart Company.
I found this web site in Engalnd:
http://www.greatgizmos.co.uk/damert_company_page_1.htm

Rocket Radio (Reference #D4025)
It receives radio signals without using batteries! In the late 1950's,
kids learnt that the magic of radio could be achieved without batteries
through an ingenious gizmo known as the Rocket Radio. Now it's back! By
attaching the antenna/ground wire and tuning the nose cone, a handful
of AM stations can be received and heard through a crystal earphone. An
informative booklet will help curious minds understand the science
behind radio transmissions and crystal diodes. For ages 8 and up.

The show a blue one, but mine is red.
My sister tore mine up back in 1960.
She bought me one in 2001 for my 50th birthday.
My orignal was blue but I didn't complain.
It works pretty well, but I found a site that has some improvements,
but I can't find the $#%^ URL right now. I never got around to
making them, after all why complicate something simple that really
works. When I find the URL I will post it here as a new post.

969. eBay bans use of the word "Degen"

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 00:04:15 UTC
From: Sanjaya <sanjaya_49@yahooNOSPAM.com>
Message-ID: <3WiFd.4860$KJ2.4682@newsread3.news.atl.earthlink.net>
Source record: 4869

I saw at http://www.radiointel.com that Liypn told Russ
eBay has stopped allowing the word "Degen" to appear
on eBay auctions, due to a complaint by Degen. Not much
information other than that.

I went to eBay and checked Liypn's auctions. Sure enough
he's selling DE1103s etc. with no mention of "Degen". Then
I checked Brochhi's stuff. He's still using the Degen name.

Here's what it says at radiointel.com:

< Ebay Bans The Use Of The Word "Degen" On Auctions
Thanks to Ebay seller Liypn we learn that Ebay as prohibited
the use of the word "Degen" on their auction site. This is result of a
complaint filed by Degen GmbH Communication with Ebay as
unauthorized use of intellectual property rights, copyright, trademark, etc.>

Does anyone know why this happened?

That's interesting. It would appear that that company of course is in Germany and looks as though they have nothing to do with 'Degen' radios per se. So one gets into copyright, trademarks etc.

So it looks like a simple case of a trade name dispute and since eBay does business in Deutscheland perhaps they felt it best to remove it.

The Chinese perhaps are not to good at respecting trade names?

So maybe they'll choose a new name?
I hope it's not like the sewing machine thing.
A US marketing expert went to China to help
them get off the ground with selling a new
sewing machine.

He asked the company chief what the brand name of
the sewing machine would be.
The honcho said "Typical. Typical Sewing Machines."
Trying not to laugh the marketing guy asked,
"Why would you name the brand 'Typical'?"
Without hesitating, the Chinese entrepeneur responded,
"Why not? You have 'Standard' Oil."

I would put forth the 'Dang' trademark.

Then one can say... I've got a Dang 1103...

And someone else could respond... That's cool, but my Dang 1107 is better.

And so it goes.

Message-ID: <Xns95DCBB9615BE8conanfordhotmailcom1@24.71.223.159>
Source record: 4878

I was using a balun wound on an Amidon FT114-43 torroid, on opposite sides. Since then, someone posted impedence_matching_bryant.pdf or similar (was it DxAce?). Anyways, I wound another one with the overlapped method, and I must say, performance seems to be much better, especially between 5000 and 10000 khz. I was able to pull many stations in last night, despite increased solar activity, including many that I had never received before.

So thanks, to whoever posted it. And I can say, from my impressions only, with absolutely no evidence, that the overlapped winding method is better than the opposite-sides method.

980. why does Radio Canada retransmit Radio Communist?

Probably because they didn't want their company reputation to be ruined.

The company in Germany is probably searching for "Degen" with www.ebay.de.
Since Brochhi doesn't sell outside of the USA, his items won't show up on
www.ebay.de by default, but lipyn's will.

If you run www.degen.com.cn through babelfish.altavista.com, the
translation of the name Degen uses in Chinese is "German Vigor."

John,
I have also been considering a Wellbrook loop mainly for noise reduction.
I would be especially interested in your review as you have
a decent assortment of wire to compare it to.

I'll be looking for your post!

One advantage of the toroid core is near complete flux linkage- I think if
you were able to do instantaneous comparisons, you would see no difference.

I think you'd be better off getting one commercially first. Then experiment with it so you can make your own. It's much less frustrating that way.

Purists insist on using a chunk of galena and a "cat's whisker" for the detector, but you can substitute a plain old 1N34 germanium diode to accomplish the same thing without all that trouble of having to poke around to find a "hot spot" on the chunk of galena.

There are different ways to accomplish tuning. You can have a variable coil, or a variable capacitor. Big variable caps can still be found, though not new, and they're easier to work with. Smaller variable caps can be salvaged from junked transistor radios.

It's been said that "A dollar in the antenna is worth ten in the receiver." That holds true. String up as much long wire as you can for your antenna. And also make sure you have a good earth ground. That will really help.

After you get all this done, please let us know what you hear!!!!

Here's a froogle search sorted low to high price

<http://froogle.google.com/froogle?num=20&hl=en&lr=&c2coff=1&safe=off&tab=wf&scoring=p&q=rocket+radio+crystal&btnG=Search+Froogle>

$9.95 (plus shipping) seems typical.

Babel is wrong.

The Chinese word for German is "deguo".

Degen can be roughly translated as:

De = Very good, good performance or quality.
Gen = Vigor

Or in English, Degen "marketing" roughly translates into something like
Quality performance and strength.
As in many translations the meaning can be lost in translation.

1) Because money rules over morality.
2) The Chinese need to spend their excess US Dollars.
3) Radio Canada needs money.

Notice that many mainland Communist China TV stations are also available
from DishNetwork.
For a subscription fee of course - which goes straight into Das Party's
coffers.

992. Re: Battery corrosion

The old formula (maybe the 14 year old stuff you mention) for CRC contained CFC's (Chlorofluorocarbons), a nasty substance and one which can contaminate thousands of gallons of water with just a drop. It's also thought to cause cancer. The new formula doesn't contain CFC's.

I had some alkaline batteries leak recently and called one of the big battery companies (Duracell I think) and they told me to use a 50/50 mix of water and white vinegar. It worked fairly well for getting the battery leakage out of/off of contacts and the case of the radio.

Not only that, they have the entire manufacturing capacity of the WORLD
there now, so that they can bring the world to its knees simply by
cutting off the spigot. Much like the terrorists could do if they took
over Saudi Arabia.

BTW, I thought Voice of Korea was the closest thing to "Radio Communist"
there was nowadays. ;)

Yeah, now there's NO ham radio store in Sacramento ever since Radio Place went under. You have to go to the Bay Area if you want to buy any HF gear in person. There's that Chicken Lips place that sells CB equipment to truckers, but other than that there's absolutely NO "alternative radio" stores in northern CA outside of Ham Radio Outlet in Oakland and Sunnyvale-unless they've gone under too. When I was a teenager (early 90s) there were 2 or 3 ham radio stores in Sacramento and Rat Shack had a good selection of SW radios. Now all the ham stores have closed and Rat Shack only sells a couple Grundigs, and you have to know where to look for them in the store. A sad scenario. Looks like SW has really died off since the Cold War ended.

As for Radio Australia, the program head in Melbourne who decided that the station should keep playing cricket and rugby games as the greatest disaster to EVER hit SE Asia was happening should be fired and locked in a padded room since he's clearly insane.

My FRG-8800 has its quirks, but it's still a decent receiver. Just don't leave it plugged in, or else the next power blackout might fry the chips for good.

I check out this and other Asian re-broadcasts on a regular basis and find
them to be very culturally oriented- rather than the political propaganda
you might expect. Listen awhile and you may find it very entertaining- in
other words; nothing like the Cuban news commentary!

1007. Radio Canada retransmit Radio China International : Chinese PTT leases SW transmitters in China, similar model to VOR.ru (via ROSTELCOM)

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 05:00:42 UTC
From: Max Power <mikehack@u.washington.edu>
Message-ID: <cs4v9q$fu0$1@xuxa.iecc.com>
Source record: 5005
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting,rec.radio.shortwave

In China, CRI leases SW transmitters from the Chinese PTT.
Voice Of Russia, does the same in Russia via ROSTELCOM.

In fact -- Radio France International has the same 'broadcasting
organization' model.
[France Telecom owns ALLOISS and ISSODUN SW relay sites, and leases them
back to RFI.]

Jamming in China may be done by the military [or other entities] in country,
with no connection to the PTT.
There was a connection with the PTT in the USSR, but China has not perused
that model internally.

Jamming was started by Italy under Mussolini, against the USSR.
In international law jamming does have some legitimacy -- pursuant to
certain conditions being met.
Religious broadcasters broadcasting into China are not jammed, that I am
aware of.

If a broadcaster is being jammed on SW, it is indicative of a failure in
international relations.
Jamming also shows a failure of the broadcaster to take into account the
realistic needs of its target audience.

The US is obsessed that there still are some non-Christian heathens that
exist on earth that are 'communistic' -- and it is willing to endanger
relations with China by using Cold-War ideological broadcasting tactics.

I can only assume that the US wants to re-create the Hungarian revolt of
1956 in China -- a concept 1000 years out of date considering Wal-Mart's
dependency on cheap Chinese goods to be profitable!

I had a crystal set in the 1960's that used a real galena crystal which
was mounted in a small metal cup. The cup served as one of the
electrical connections for the crystal. The crystal was embedded in some
kind of metal which I assume was poured into the cup in a molten state.
Could it have been lead?

You can obtain them very easily from any cosmetics store.
I find a lot of the commercial cleaners leave a residue on the boards and this detracts from they appearance.
Hope this helps, cheers, Ken, G4KIR.

In a homebrew crystal radio, I tried a chunk of galena, but it did not work as well as an iron pyrite ("fool's gold") crystal. For a "cat's whisker", I used a small gold-plated safety pin.

In my experience, the old high-impedence headphones (which typically have Bakelite ear pieces and a headband made of spring steel covered with cloth or leather) work much better than the cheap in-the-ear kind found on modern crystal radio kits.

As mentioned earlier, http://www.midnightscience.com has some great crystal radio info.

You can use solder, but Woods Metal is better as it melts in boiling water
and you can make your mould in wood or plastic. I've just made some crystals
using it for a reproduction 1920s style xtal set.

1017. Crystal set Transmitter

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 09:28:59 UTC
From: peter berrett <p.berrett@optusnet.com.au>

Body handling: HTML body converted to readable text

Thanks to everyone who replied to my query about Crystal Sets. I have firm plans to purchase a rocket radio for my son. I have built my own crystal sets in the past but I think for a present the rocket radio is hard to beat.

That aside I have another query for which I would be grateful if people could provide a response.

When I used to build crystal radios I found that my voltmeter would show a small voltage when measuring the output of the circuit. For some time I have toyed with the idea of building a crystal set transmitter which seems to me to be a logical extension of the idea of a crystal set reciever.

First one would tap a large coil in parrallel with a variable capacitor and attached to a long wire. Several taps would extract the strongest stations in the vicinity. Each signal extracted would then be rectified by the use of 4 diodes so that a pulsating DC current is generated. Finally the various DC currents would be combined and smoothed out to provide a power souce for the transmitter stage.

Next, a simple single transistor crystal locked transmitter would be built which would be powered by the dc current mentioned earlier. This could be keyed on and off to give a morse signal.

Finally, and separately, a short wave crystal radio could be built for reception on the frequency of the transmitter stage

Is such a project doable or is the power that you would extract out of the air too low to drive transistors etc?

cheers peter

1018. Grounding the Home (PC) Computer's Frame and Power Supply ? ? ?

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 10:38:27 UTC
From: RHF <rhf-newsgroups@pacbell.net>

SEAN [G4UCJ/G4001SWL],

Grounding the Home (PC) Computer's Frame and Power Supply
- Does It Help ?
- Will It Work ?
- Could It Do Any Harm ?
To Reduce and/or Eliminate RFI / EMF Sound that are Heard
at various Frequencies on your Radios and Recivers.

A GOOD IDEA :
I just read your comments about Grounding the Home (PC)
Computer's Frame and Power Supply. And it started me to
Think (Warning) WHY NOT ? Can't Hurt and Just May Help !

STARTED BY :
Turning on three Radio/Receivers that are on the oposite
side of the room that has the Computer in it. Tuned for
what I thought was the 'best' RFI/EMF Noise or general
High Static Sound (Off Frequency Dead Spots) on the Radios.

TEST RADIOS, SET-UP AND CONDITIONS WERE :
* Icom IC-R75 on AC Power with Thirteen Foot (13') SWL
Coax Cable Loop Antenna in-the-room and a background base
Noise Level reading of 3 S-Units at 9.830 MHz with Pre-Amp
#2 Turned "ON".
* Sony ICF-2010 on AC Power with a Thirty Foot (30') SWL
Loop Antenna in-the-room and a specific 'hum' Noise Level
reading of 3-5 S-Units at 9.862 MHz.
* CCRadio +Plus using Battery Power and only it's internal
AM/FM Ferrite Rod Antenna and a specific 'buzz' Noise Level
reading of Two-Bars at 853 kHz.

GROUNDING THE COMPUTER FRAME AND POWER SUPPLY :
Examined the Back of the Computer and chose a Case Screw
that went througH the Metal Frame and into the Metal Body
of the Computer's Power Supply. Backed-Out the Screw and
attached a #14 Stranded Copper Wire and connected this
Wire to the Ground being used for the Radios.
The "Initial Test Results" Were:
* Icom IC-R75 = No Change in S-Meter or Sound Levels.
* Sony ICF-2010 = Slighly Higher +1 S-Unit reading
but the Audio "Hum" did not sound any louder.
* CCRadio +Plus = Much Higher Four-Bar reading and a
Higher Audio "Buzz" Sound.
[Suspected the Ground Wire was acting like an Antenna.]

FERRITE "DONUT" CORES :
Installed a Ferrite 'Donut' Core on both ends of the
Ground Wire about 3"-4" from each end.
The "Follow-Up Test Results" Were:
* Icom IC-R75 = Again No Change in S-Meter or Sound Levels.
* Sony ICF-2010 = Returned to the 'original' S-Meter reading
and the Audio "Hum" Sound was slightly less.
* CCRadio +Plus = Went Down to NO-Bars (Zero) and the
and Audio "Buzz" Sound was reduced greatly.

CONCLUSION {FUZZY LOGIC} :
What FIXES one Radio's Noise Problem; may have "No Effect"
on other Radios; and could Cause a New Problem for yet
another Radio. Not Very Scientific - But What Works... WORKS !
[You Have To Try It Yourself - To Find Out [.]

= = = "Sean ()" <g4ucj@t...> wrote:

Some computer PSU's are fine, others are not. The one in
my shack PC generates no RFI hash, but the one in my main
PC throws up s9+ on 160 and 80m, using a mfj noise canceler
reduces it to a tolerable level but the only real way to
hear the weaker stuff is to kill the mains to the supply.

The only problem is you've got no real way of telling
what's going to be a quiet PSU and what isn't.

Perhaps grounding the metal case would help in some situations?
[RHF - Note - The Light Bulb Goes "ON" Here :<]

But I guess you would have to exercise caution when doing
something of that nature. One other source of noise can be
the displays on some radio's (the one on my 756 is quite
noisy).

Good luck and I hope it works!

The old Raytheon ``What to do with your CK722'' project book has
a crystal-set-powered transistor radio, taking the DC from a crystal
set output and using it to power a CK722 amplifier.

They used the same station for both, however, which was a major
conceptual error. You want to use a local for the power, to
amplify a more distant station.

1022. Think About Using the CCRadio Plus in your Automobile ?

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 11:58:04 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1105617484.024912.4570@c13g2000cwb.googlegroups.com>
Source record: 5022

SOX FAN 1968,
.
Hello - All are "Welcome" to [JOIN] the CCRadio and
the CCRadio Plus eGroup on YAHOO !
CCRADIO PLUS => http://groups.yahoo.com/group/CCRadio/
NOTE - The CCRadio and CCRadio Plus are Made by Sangean
and they are Sold and Marketed by the C. Crane Co.
.
ABOUT USING THE CCRADIO PLUS IN AN AUTOMOBILE :
.
Two Choices - Replace the Car Radio -or- the Car ;-}
.
Something-to-Think-About . . . The 'common' Auto-Trunk Radio is
a pretty good $200-$300 AM & FM Radio with a $10-$20 Antenna
and a $15,000-$60,000 'mobile' Ground Plan System :o)
.
Really - If your current Car Radio's AM/MW Reception 'stinks'
I would recommend that you "Invest" in a better Car Radio/Receiver
.
TUNER TALK - The Steps to Finding a 'good' Automotive
Radio {Tuner} for your 12-Volt Automotive System.
- by David Navone (Car Sound eZine)
http://www.carsound.com/columns/navone/nav0004.shtml
.
FWIW - Most Standard Factory (OEM) Car/Truck Radios will
Out-Perform the CCRadio and CC Radio Plus in-or-out of the
Vehicle. . The CCRadio and CC Radio Plus are NOT a good
'substitute' for a Good Quality AM/FM Radio that is 'designed'
to Perform Very Well in an Automotive Driving Environment [.]
.
GOOD {STANDARD} FACTORY "OEM" AUTO RADIOS HAVE :
+ Better AM/MW Band Reception
+ Better FM and FM Stereo Reception
+ Better Overall Sound Quality
+ Higher Audio Output = More Sound
+ Dynamic Stereo Effect (Surround-a-Sound)
Then the CCRadio and CC Radio Plus
.
TIP - Many AM DX'er claim that a 'high quality' Car Radio
will provide "Excellent" AM/MW Reception; equal to many
high-end AM/FM Shortwave Radios. You would need a AM/MW
Loop Antenna connected to the AM/FM Shortwave Radio to
get better results than the Car Radio.
.

IIRC - Some where I remember reading that Pioneer 'SuperTuner'
Car Radios were rated very good for AM DXing with an automobile
radio. Although Sony, Kenwood, JVC, Jensen, Alpine, Panasonic
all make some very good AM/FM 'replacement' Car Radios.
CIRCUIT CITY => http://tinyurl.com/3rxqh
.
CHECK-OUT - The Pioneer SuperTuner IIID Radios that features new
Digital AM/FM Tuner circuitry for audibly better FM and AM sound.
http://www.pioneerelectronics.com/pna/article/0,,2076_4035_46832,00.html
.
The main Benefits of Pioneer SuperTuner IIID Radios
advanced Analog and Digital Signal Processing are:
+ A Stronger Signal
+ Increased Dynamic Range
+ Reduced Multi-path Noise
+ Less Distortion
+ Better Stereo Imaging
.
READ - DXing with Car Radios
- by Mark Connelly [WA1ION]
http://www.hard-core-dx.com/nordicdx/dxlab/car_dx.html
.
What Equipment Do I Need To DX ?
http://www.amfmdx.net/fmdx/dxing.html
One can DX the AM/MW or FM Bands with Car Radios
with some degree of success.
.
If you are a AM/MW Radio DX Listener who would like
better Radio Reception.
http://www.northcountryradio.com/Kitpages/actant.htm
"Have you ever wondered how an AM car Radio Receives
AM signals so well even in a hotbed of Electrical Noise such
as a modern automobile? The Secret is Isolation from the
Noise Source (Ignition and Electrical System), mounting the
Antenna on the outside of the car body, and good Impedance
Matching of the Antenna to the Receiver."
.
IMHO - The only thing that would warrant the use of the
CCRadio and CC Radio Plus in a Car/Truck would be for the
Reception of the TV-VHF Sound and Weather-WX Band.
.
.
BACKGROUND "INFO" ABOUT THE CCRADIO PLUS :
.
The CCRadio Plus features AM, FM, Weather
and TV Audio for Channels 2-13

Has anyone had any experience using CCRadio in their car?
The Crane website advertises a car interface kit where
you can hook up to the car's antenna, and I have an aux
audio input to my car stereo so I could listen over the
car's speakers. My current car stereo's AM reception stinks,
and I like to listen to Boston stations while I drive
(I live in New Hampshire). I'm not sure if there would be
alot of noise interference from the engine and alternator
because of how sensitive the CCRadio is.
.
Thanks for any help.

FIGHT IGNORANCE: READ BUZZFLASH

Christian Nation or Medieval Coup to Overturn Our Constitution? Or Both?

Note: This January 13, 2005 BuzzFlash Editorial marks the thirteenth in 20 consecutive editorials BuzzFlash will be publishing through January 20th.

A BUZZFLASH EDITORIAL

Antonin Scalia believes that America is officially a Christian nation.

John Ashcroft has declared that God is our King. George W. Bush believes that a Christian God chose him to become President and lead the nation in killing tens of thousands of people.

The Bush right wing religious base firmly believes, with few exceptions, that America was founded as a Christian country.

This is not hair splitting about "moral values." This gets to the heart of whether America was created, as Jefferson pronounced, with "a wall of separation between church and state" or whether we have an official state religion.

The Scalias, Ashcrofts, Bushes, Falwells and Robertsons are not just talking about a Christian nation; they are talking about THEIR vision of what a Christian nation should be. And a vengeful one it is.

There are many Christian denominations and interpretations of the Bible, and most of them are not radically extremist like the Bush hard core base. The Methodist Church, for example, to which Bush nominally belongs, opposed the War in Iraq, as did, it appeared, most of the major Christian groups in the United States. So the Bush religious contingent is a splinter group of fundamentalists.

Not only do the Bush religious zealots believe that there is no wall between church and state -- in contradiction to our Constitution and the intent of our founding fathers -- they believe in a radical interpretation of the Bible -- and that they are literally on a Crusade.

Jefferson foresaw the dangers such an outlook held to the Republic: "Reason and free enquiry are the only effectual agents against error. Give a loose to them, they will support true religion, by bringing every false one to their tribunal, to the test of their investigation. They are the natural enemies of error, and of error only. Had not the

Roman government permitted free enquiry, Christianity could never have been introduced. Had not free enquiry been indulged, at the era of reformation, the corruptions of Christianity could not have been purged away. If it be restrained now, the present corruptions will be protected, and new ones encouraged."

As Mark Crispin Miller notes in his brilliant one-act monologue on the Bush administration, "A Patriot Act," the right wing Republican religious base doesn't want America to return to the status quo before the Civil War; it wants to turn America into a nation founded on a religious outlook that preceded the Enlightenment.

John Leland, a Baptist minister who voted to ratify the Constitution, observed that "religion is a matter between God and individuals, religious opinions of men not being the objects of civil government nor in any way under its control."

Much of the debate on issues leading up to the Constitution played themselves out in Virginia, where many of the founding fathers lived and were involved in politics. In response to a Virginia bill that would have provided governmental stipends to the clergy, Madison vigorously objected in a lengthy "Remonstrance": "What influence in fact have ecclesiastical establishments had on civil society? In some instances they have been seen to erect a spiritual tyranny; in no instance have they been seen the guardians of the liberties of the people. Rulers who wished to subvert the public liberty may have found an established clergy convenient auxiliaries. A just government, instituted to secure and perpetuate it, needs them not."

Madison knew that a just government need not cloak itself in the robe of religion in order to be perceived as credible. And that a religion too intertwined with government runs the high risk of being used to achieve political goals, thus corrupting the religion itself.

We don't know what Constitution the Bush fanatics are looking at when they assert that we are a Christian nation, but it's not the American one. They aren't "Strict Constitutionalists." To the contrary, ideologues such as Antonin Scalia are, in reality, radical Constitutional revisionists.

They don't want to restore us to the America built by our founding fathers and enshrined in the Constitution. They want to change the very foundations of the Constitution; in this case, the separation between church and state.

Some time after the Revolution, a Unitarian minister from England, Richard Price, wrote a treatise praising the separation of church and state incorporated into the creation of the American nation. It was a wise step to take, Price noted because: "Civil establishments of formularies of faith and worship are inconsistent with the rights of private judgment. They engender strife. They turn religion into a trade. They shore up error. They produce hypocrisy and prevarication.

They lay an undue bypass on the human mind in its enquiries and obstruct the progress of truth."

What's clear to BuzzFlash is this: In 2005, the right wing has so twisted the psyche and Constitution of this nation, our founding fathers would have been considered radicals. And they wouldn't have gotten a minute of airtime.

Those 1776 guys were more concerned with principles than sound bites.

People would switch channels in a New York minute if one of THEM started talking.

A BUZZFLASH EDITORIAL

I had a RF2200 for years, and only gave it away
last spring to a friend. Due to not being used for
years(maybe a decade), the SW band selector switch
needed some heavy duty cleaning and turning. After
a few days of use, with many turns of the band switch
it worked great.
Very nice radio, but the analog tunning and lack of
stability limited it use to me. When I bought it I was
into RTTY and the RF2000 just didn't work for that.
Terry

Source record: 5037

Hi Mark,
All of the RF design is done.....I have built two prototypes. On one of them, I use a ten turn pot to tune the VCO. The other unit uses a PLL for tuning. I think we will have some time to develop the tuning software, etc.
We were tied up with a big project for the last several months; this was the Automark election machine that you may have heard about in the news. All kinds of fun things, getting it through EMC certification.
Speaking of MW receivers, I did purchase the Boston Acoustics Receptor clock radio. MW performance is not bad, but the selectivity is pretty wide. It appears to be a single conversion affair that uses a 450kHz I.F. It might be a double conversion unit, but when I peaked the Radio Shack loop antenna on the image frequency, I was able to receive the image. It could also be that the (2 X 2nd I.F.) rejection isn't too good, if this is truly a double conversion unit. Is it worth the 150 dollars? Could be. I did call up Boston Acoustics to see if I could get ahold of some service information. The wouldn't make it available. When I asked them how to remove the main circuit board from the unit so that I could change the 450kHz filter, they explained that they couldn't give me that information, since I if were electrocuted, they would be liable. When I explained that I was going to quote them in my review, they said that it was ok. If anybody figures out how to get this thing apart, feel free to contact me.
Oh, another thing.....it could be off topic, but this is good for you Drake '7 line folks. If you change the 1st mixer in your Drake R7/TR7 to a Mini-Circuits SRA-3MH (Level 13) mixer, and you change the 1N4148s in the 2nd mixer to matched sets of 1N5711 hot carrier diodes, the receive performance improves a bit. The original 1st mixer has an SSB conversion loss of 6.5dB, while the Mini-Circuits mixer has a conversion loss of 4.75dB. As far as the 2nd mixer, it is good to get rid of those general purpose switching diodes and replace them; the 1N5711 Hot Carrier diodes have lower loss, better IM characteristics, and they are designed for RF applications.
One thing about that Radio Shack cleaner. I have used some of it in the past, and it has dissolved plastic switch wafers. I would stay away from that. The Caig De-Oxit is in the same price range, and it doesn't destroy components.
In the old days, we used to use Freon based solvents to clean circuit boards. I would get ahold of the De-Oxit and play it safe. Caig is the same company that marketed a product called Tweak.

Pete

Here's some more OT OT for you:

Dr. Myers is a United Church of Christ minister.

**Dr. Robin Meyers' Speech to students at OK University **

As some of you know, I am minister of Mayflower Congregational Church in Oklahoma City, an Open and Affirming, Peace and Justice church in northwest Oklahoma City, and professor of Rhetoric at Oklahoma City University. But you would most likely have encountered me on the pages of the Oklahoma Gazette, where I have been a columnist for six years, and hold the record for the most number of angry letters to the editor.

Tonight, I join ranks of those who are angry, because I have watched as the faith I love has been taken over by fundamentalists who claim to speak for Jesus, but whose actions are anything but Christian.

We've heard a lot lately about so-called "moral values" as having swung the election to President Bush. Well, I'm a great believer in moral values, but we need to have a discussion, all over this country, about exactly what constitutes a moral value -- I mean what are we talking about? Because we don't get to make them up as we go along, especially not if we are people of faith. We have an inherited tradition of what is right and wrong, and moral is as moral does.

Let me give you just a few of the reasons why I take issue with those in power who claim moral values are on their side:

a.. When you start a war on false pretenses, and then act as if your deceptions are justified because you are doing God's will, and that your critics are either unpatriotic or lacking in faith, there are some of us who have given our lives to teaching and preaching the faith who believe that this is not only not moral, but immoral.
b.. When you live in a country that has established international rules for waging a just war, build the United Nations on your own soil to enforce them, and then arrogantly break the very rules you set down for the rest of the world, you are doing something immoral.
c.. When you claim that Jesus is the Lord of your life, and yet fail to acknowledge that your policies ignore his essential teaching, or turn them on their head (you know, Sermon on the Mount stuff like that we must never return violence for violence and that those who live by the sword will die by the sword), you are doing something immoral.
d.. When you act as if the lives of Iraqi civilians are not as important as the lives of American soldiers, and refuse to even count them, you are doing something immoral.
e.. When you find a way to avoid combat in Vietnam, and then question

the patriotism of someone who volunteered to fight, and came home a hero, you are doing something immoral.
f.. When you ignore the fundamental teachings of the gospel, which says that the way the strong treat the weak is the ultimate ethical test, by giving tax breaks to the wealthiest among us so the strong will get stronger and the weak will get weaker, you are doing something immoral.
g.. When you wink at the torture of prisoners, and deprive so-called "enemy combatants" of the rules of the Geneva convention, which your own country helped to establish and insists that other countries follow, you are doing something immoral.
h.. When you claim that the world can be divided up into the good guys and the evil doers, slice up your own nation into those who are with you, or with the terrorists -- and then launch a war which enriches your own friends and seizes control of the oil to which we are addicted, instead of helping us to kick the habit, you are doing something immoral.
i.. When you fail to veto a single spending bill, but ask us to pay for a war with no exit strategy and no end in sight, creating an enormous deficit that hangs like a great millstone around the necks of our children, you are doing something immoral.
j.. When you cause most of the rest of the world to hate a country that was once the most loved country in the world, and act like it doesn't matter what others think of us, only what God thinks of you, you have done something immoral.
k.. When you use hatred of homosexuals as a wedge issue to turn out record numbers of evangelical voters, and use the Constitution as a tool of discrimination, you are doing something immoral.
l.. When you favor the death penalty, and yet claim to be a follower of Jesus, who said an eye for an eye was the old way, not the way of the kingdom, you are doing something immoral.
m.. When you dismantle countless environmental laws designed to protect the earth which is God's gift to us all, so that the corporations that bought you and paid for your favors will make higher profits while our children breathe dirty air and live in a toxic world, you have done something immoral. The earth belongs to the Lord, not Halliburton.
n.. When you claim that our God is bigger than their God, and that our killing is righteous, while theirs is evil, we have begun to resemble the enemy we claim to be fighting, and that is immoral. We have met the enemy, and the enemy is us.
o.. When you tell people that you intend to run and govern as a "compassionate conservative," using the word which is the essence of all religious faith-compassion, and then show no compassion for anyone who disagrees with you, and no patience with those who cry to you for help, you are doing something immoral.
p.. When you talk about Jesus constantly, who was a healer of the sick, but do nothing to make sure that anyone who is sick can go to see a doctor, even if she doesn't have a penny in her pocket, you are doing something immoral.
q.. When you put judges on the bench who are racist, and will set women back a hundred years, and when you surround yourself with

preachers who say gays ought to be killed, you are doing something immoral.

I'm tired of people thinking that because I'm a Christian, I must be a supporter of President Bush, or that because I favor civil rights and gay rights I must not be a person of faith. I'm tired of people saying that I can't support the troops but oppose the war.

I heard that when I was your age--when the Vietnam war was raging. We knew that that war was wrong, and you know that this war is wrong--the only question is how many people are going to die before these make-believe Christians are removed from power?

This country is bankrupt. The war is morally bankrupt. The claim of this administration to be Christian is bankrupt. And the only people who can turn things around are people like you--young people who are just beginning to wake up to what is happening to them. It's your country to take back. It's your faith to take back. It's your future to take back.

Don't be afraid to speak out. Don't back down when your friends begin to tell you that the cause is righteous and that the flag should be wrapped around the cross, while the rest of us keep our mouths shut. Real Christians take chances for peace. So do real Jews, and real Muslims, and real Hindus, and real Buddhists--so do all the faith traditions of the world at their heart believe one thing: life is precious.

Every human being is precious. Arrogance is the opposite of faith. Greed is the opposite of charity. And believing that one has never made a mistake is the mark of a deluded man, not a man of faith.

And war -- war is the greatest failure of the human race -- and thus the greatest failure of faith. There's an old rock and roll song, whose lyrics say it all: War, what is it good for? ... absolutely nothing.

And what is the dream of the prophets? That we should study war no more, that we should beat our swords into plowshares and our spears into pruning hooks. Who would Jesus bomb, indeed? How many wars does it take to know that too many people have died? What if they gave a war and nobody came? Maybe one day we will find out.

Why do SW stations broadcast scary and silly religious nonsense: because they sell the airtime on the open market. It's called capitalism. Same reason that China is buying pieces of petroleum companies in North America. It's for sale and they buy it.

China is a big and growing trading nation, and everyone wants to be friends with those with money to spend. China is allegedly moving in a market economy direction so friends is good and makes $.

Actually given the continual corruption in China, probably into some corrupt
official's pocket. They're learning all the lessons of capitalism
currently, including how to be on the take.

This is getting serious:

==========
Just hours after confirming that the search for weapons of mass destruction in Iraq was over, President George W. Bush leveled his harshest charge ever at Saddam Hussein, accusing the former Iraqi dictator of "knowingly telling the truth" about not possessing WMD in the months leading up to the U.S.-led invasion of Iraq.

"After years of lying about his weapons, Saddam Hussein willfully decided to tell the truth about them," Mr. Bush said. "His treachery knows no bounds."

No, your leakage inductance is going to be higher with seperated windings,
so each winding will act like there's an independent series inductance
that isn't coupled into the transformer. The tradeoff is less interwinding
capacitance, and lower isolation (arc over) voltage.

Last week I was listening to the early morning BBC transmissions from
East Asia but reception sucked so I tried the local FM band to see if
one of the local educational stations was carrying it. The news bulletin
ended when I had headphones for both on my head.

(The easy way to search a band for another transmission of a current
program is to put a diferent radio in each ear and do a quick sweep of the
band. When each ear gets the same thing, you get a strange echo effect.
If you work in an open (cubicle zoo) office you can tell when somebody
in the same room calls you on the phone, even though you couldn't hear
the person over the rest of the noise).

The next program on shortwave was one of their current events blocks
running one of a multi-part series on the problems of privitization
of public utilites around the world. But the FM band program was some
sort of inspirational filler about somebody or other. I guess that PRI
didn't want to offend any free market fundamentalists.

Does it look like the one at:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5744258400
&category=48699

If so, then its for CB radio and won't work for VHF.

Radio Havana had a news item on what we have actually done to Fallujah-namely, bomb it into rubble. Not one house is inhabitable. Rotting corpses are everywhere. 300,000 people are homeless for the foreseeable future. Then they mentioned that not one piece of WMD has been found. In fact, American news confirmed this-the stated reason for going to war was a lie. Yet the president says we must "stay the course", and America agrees, when there is absolutely NO REASON for this war to be happening and no reason for it to continue. The stated "reason" for America staying the course shifts like a desert mirage. It's not to destroy WMD, because there are no WMD. It's not to bring democracy to Iraq, because the Iraqis will for the large part be unable to vote. Maybe it's not to fight the terrorists on their own soil either, because the terrorists are winning. What does that leave us with? Bomb Iraq into rubble and steal all its oil to add to the colossal fortunes of a few? Why is America silently acquiescing to the destruction of Iraq and the bankruptcing of America in order to make the President and his friends wealthy?

DaviD,
.
Once Again - Two Choices :
#1 = Replace the Car's AM & FM Radio :o)
#2 = Replace the Car ;-}
.
If he were BUYING a New Car: Then a Monthly "Pay-to-Listen"
Satellite Radio Service like XM or Sirius might be a worthwhile
option to consider.
.
However - Most People would rather Listen to the Radio for FREE !
.
And the most "Cost-Effective" 'choice' for an AM/MW Radio
Listener is a 'new' High Quality AM & FM Automobile Radio
that has a Superior Tuner 'designed' for the Mobile
'on-the-road' Radio Listening Environment.
.
ReplacementRadios.Com
For "Reconditioned" Quality Factory (OEM) Car Radios

.
READ - Expensive and Inexpensive Ways to Improve the Quality
of FM Radio (Works for AM/MW Too) Reception in your Car.
- by Wayne Harris
http://www.termpro.com/articles/antenna.html
.
OBTW - A 'new' Car Antenna would also be helpful and be
worth the money spent to get a Better Signal to the Radio.
.
* AM/FM Auto Antenna Mast Element
http://www.ccrane.com/am-fm-auto-antenna.aspx
* Full Replacement AM/FM Auto Antenna
http://www.ccrane.com/replacement-auto-antenna.aspx
C. Crane Co. Claims "Purpose: Improve AM reception on your
Automobile. Remember: An antenna is more important than
your radio, always! This Loaded Coil Antenna will improve
reception by almost double on AM and may improve FM.
Our antenna works by increasing the electrical length
over your existing antenna. The antenna has a coiled
stainless steel spring which will allow the antenna to
bend under the pressure of high speed, and helps prevent
damage. Our version is less susceptible to static caused
by spring movement. Although our antenna does not introduce
any radio noise, it will pick up noise from your auto's

electrical system and more noise from power lines when
they are overhead.

I started out with a DX-398 and by the time the wire had grown to 100'
the noise and overloading were bad. Running the wire through a
grounded ICE 180 transformer greatly reduced the noise and I was able
to add another 20' of wire w/o overloading.

Brian<<

Agreed, and the weekend English programming from Xian to Africa (audible here in the US, probably off the back of the beam) is a good bet for actually being able to easily QSL a Chinese outlet - and the programming fun and decent.

Selling my stuff here before I place on ebay.

JRC NRD 535D with a Kiwa 3.5khz filter in the Aux slot. Receiver has the Passband tuning, Notch, the works. I have the original box and manual. Unit works flawlessly. Pictures are available upon request.
Price: 650.00

Timewave DSP-599zx with manual and reference card. Again unit works flawlessly and pictures available.
Price 225.00

2 Kiwa Preamps- One Broadband and One SW(attentuated below 1.8khz). Nice units, work great...for info you can look at http://www.kiwa.com
Price 50.00 each or both for 85.00

MFJ-956 Pre-Selector/Antenna Tuner - Passive tuner/preselector
Price 20.00

Dave Clark Noise Canceling Headphones - Am at work so I dont know the model number, if you interested email me and I'll send you the specs. These are aviation headphones and are awesome for Dxing.
Price - 50.00

Wellbrook Antenna splitter - The Splitter has a single antenna input with four outputs to allow up to four receivers to used with up to 25dB isolation between the receivers. The Splitter is built into an ABS box fitted with BNC connectors.
http://www.wellbrook.uk.com/AS1030.html
Price - 35.00

Wellbrook ALA1530 - If anyone is willing to pick it up in the Sacramento, Califronia area or have a shipping service come get it
Price 100.00

If you need more details or would like photos etc. please email me at pthal@gmail.com

There is certainly someone in there today at 2000, however conditions are poor due to a previous solar storm which seems to have subsided a bit.

There was a European station in earlier at 1900 and the interval signal escapes me at the moment.

The frequency bears watching though.

For the time being, I moved and really dont have any antenna room and dont want to let this stuff sit idle when it can be used. I might get back in to it later. I also have a Collins R-390A I'm selling but I have a tentative offer from someone but I think they might flake, this is the hard one to give up, I had to it restored by Walter Wilson 2 years ago.

Point is, 'tard boy, in two sentences you state: "I should have bought ebay stock a couple years ago. they already make too much money in my opinion"

On the one hand you are perhaps envious of those who did indeed invest, and perhaps because you did not invest, you're pissed because they actually make money.

Never ceases to amaze me that there are so many 'tards in this hobby.

Tardism has no boundaries Steve. It's typical of the liberal mindset. They want everyone to suffer equally and anyone who gets ahead or makes a profit is considered heartless and opportunistic.

Trouble is...ebay positions itself as a safe and honest place to do business. Actually, it allows people like radio-mart to shill bid his own auctions and end up with a "summer vacation" suspension, only to be allowed to trade again.

Ebay's good far outweighs the bad, so it continues to be accepted by the buying public. Where else can you buy a nice little radio like a Degen 1103 for under $70 shipped to your door.......nowhere. Where else can gottahaveit1995 buy a radio for $100 and then two weeks later sell it as radio-mart for $300?......nowhere.

When their fees get too high, another operation will come along. Ebay is badly in need of competition. But, if they make billions in the meantime, so much good for them....that is what built this nation and makes it a great place to live.

1067. Sony SW100 bits?

Newsgroup: rec.radio.shortwave
Date: 2005-01-13 22:40:48 UTC
From: wigg <griggg@tiscali.co.uk>
Message-ID: <41e6f95a$1_3@mk-nntp-2.news.uk.tiscali.com>
Source record: 5215

I have JUST acquired a Sony SW-100 from a certain www auction site that I had better not mention by name due to recent posts hoho.

It was the bare radio with no instructions, psu, active aerial etc.

This was to tide me over while I got my ICF 7600D fixed BUT ...
I am so impressed with the littler beast I would like to get the missing bits to complete the kit.

Anyone got a, UK psu, active aerial (hoho) or manual lying around? or know where to get an electronic copy of the manual? I have worked my way around it but just for completeness.

Thanks in advance
Garry

Even at the $135 final bid, that's not too bad of a price for this radio at the "collectible" level. Definitely not a "steal", but not horribly overpriced. This model sells easily for $200+ in excellent physical and operational shape. The antenna can be replaced for a few bucks from the right source and the radio probably wasn't used much on SW, so the band switch contacts probably just need a good cleaning with Deoxit. The RF-2200 is considered to be in the top 5 best shortwave portables ever made.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged
only through the public witness of shared mutual
experiences, simple, yet, the bushite strategy
implemented continually on behalf of the enemy forces in
Iraq have been to divide the nation's people with
different "legal" definitions, while speaking for
typical bushite bigotry, by then offering distinctions
of human value between US some from "others". Not

freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment, and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no

legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law.

God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was

justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till

whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own

distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have

warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege. So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or

bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good

guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in

such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best
intentions, for I will perhaps not receive another
chance to publish, if as usual, the Internet community
at large extends me little support in my UNCHALLENGED
assertions on who truly committed the crimes of 9/11. A
single bushite corporatist sends a complaint to a
Internet provider alleging I talk "spam", therefor,
without any hearing, private owners are threatened to
lose their privilege to communicate, by an enemy bushite
protagonist who exercises his "authority" by stating
only, "spam", and not even providing my actual post in
it's entirety. One Internet service was shut down for
the sole reason that discussing George W. Bush as the
9/11 perpetrator in tx.politics, was against the rules,
for such subject material must be confined to only a
American nation political forum. I talked to the kid on
the phone who made that power decision on behalf of all
usenet, and let it be known, he knows what he's doing.
But "they" can't do this everywhere. I can not "take
over" your big old lonely world that you must work to
protect for yourself as an equal citizen sworn to
freedom. I have written all I need to say about Justice
and Freedom, and if the human race can not still find
enough care for themselves to propagate my writings for
others to read, or demand Art Bell be removed to allow
Johnny Wizard to debate the ungodly dumfuk bushite
vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that

he and other soldiers shot more than 30 unarmed Iraqis, including women and a six-year-old child, at a U.S. military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in Falluja, as most fled the city before the U.S.-led operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't even bother to seek for an update on their "about 100", that had not ever been given. Red Cresent, the day previous to Dec. 6, no... actually reported on, Dec 3rd!, stated, (from their limited circle of reference) they had witnessed a minimum of many corpses, of completely innocent pro-Iraqi women, children, youths, and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri estimates that some 6,000 people have been killed, many of them civilians. \ \

(That is discounting murdered armed defenders of Freedom in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite enemies, thay'l' "bushite lie" to the bushite nation about the "holy" benefits of, sacrificing America's young life., all done for the glorious betterment of the traitor demon anti-Christ liar, the war criminal, Our Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind

bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America would be hunting them down with the Law as the traitors to freedom they clearly are.

--

http://www.theallianceforde mocracy.org/html/eng/2180-AA.shtml

/ / "We cannot be the home of the thief and the land of the slave." \ \

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that some in Canada, didn't agree with. Like for example removing Saddam Hussein, and enforcing the demands of the UN security council."

Saddam was not found in violation of 1441, so the war criminal anti-Christ's demands were not our world's, nor

that of the UN Security Council. How does thieving our assets, destroying our infrastructure, and indiscriminately murdering more than a hundred thousand innocent people, (in turn to sacrifice more worthless bushite nazi teens) bring about their closer fraudster bushite "Freedom"? Again, CNN, and CBC let the demon liar spew his hatred of our liberties, without factually challenging his lies with our un-debatable established truths. CNN and CBC would "sell" seeing our dimmer youths sacrificed as bushmob thieves through blatant bushite lies, to truly, steal our freedoms and liberty with further murders by proxy.

/ / .. or when [bush] just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels of mercy, and hunt with Law to kill George W. Bush, Rumsfeld, and Condoleeza Rice for the crimes committed on 9/11. Just because the corporate T.V. doesn't mention the facts to draw our own conclusions, doesn't make it not so out of our realms of expertise as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's not too much to ask for our vote to count." \ \

--

/ / Colonel Ron Johnson "If I could have an Iraqi security force guy who's honest, reliable and dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated the city of Fallujah."

Sattler openly lies to the lives of America with this insult, and the bushite nazi dumfuk, is too stupid or evil to frag him as enemy proudly for it. The People of the world, look, see.. bushites are murderous liars, cheats, and thieves as the enemies of America, who even lie to THEMSELVES on how many have been sacrificed to blood the coffers of the American pension thieving war monger bushite 9/11 cancer. A liar nazi bushite commander would sacrifice his nation, along with own

family, before saying a word in defence of our freedoms, our humanity, or our God. COWARDS. American nazi bushite commander gets killed american nazi bushite grunts, in dreams they too, can financially profit off the talentless continuing THEFTS for enslavement to sacrifice themselves as fascist tyrannies. Hmmm. but the nature of American freedom, is to be one as everyone being equal scores. "Gee, maybe some day even you could be Presidential."

Weak intellectually, prone to cuss, the bushite nazi dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words except "fuck" and "shit". Each communication, each order is accompanied by a flow of 'fucks', 'shits' and 'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest group, then Africans and semi-Africans. The officers are mostly whites but there are also blacks... But I cannot understand at all, why the US Army soldiers speak broken English!! \ \

/ / During the five days, while the count was yet conducted, more than three thousand wounded passed through our hospital. These were the people who lived nearby. The people who could be delivered to us. Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know?

(nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the

"censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit

margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in

John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

--

http://www.topplebush.com/article54_recpres.shtml

/ / Musil said the [rumsfeld's] Pentagon's effort to draw a distinction between the weapons was outrageous.

"It's Orwellian. They do not want the public to know. It's a lie," he said. \ \

--

/ / Hammad said he had seen elderly women carrying white flags shot by U.S. soldiers. ''Even the wounded people were killed. The Americans made announcements for people to come to one mosque if they wanted to leave Fallujah, and even the people who went there carrying white flags were killed.'' \ \

--

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that the media's adamant refusal to address the very real irregularities of the 2004 vote is a deliberate act of psychological warfare. [...]

"if the USA's honor can go along with these tactics . . . then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid' (fighter for the faith) derives, has always been, because of an anti-Islamic prejudice that dates from the Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task Americans can perform to restore progressive priorities and our respect in the world. We have passed the point for graceful exit strategies. Our policy is to go on mechanically killing people unless they vote in January for us to keep on killing people. \ \

God is Great

A person accused in our name(s) of a criminal offence, needs to be established somehow to be as such, and the only way to do that, is to present evidence that formed your/our conclusion. Without evidence our accused is ourselves as the innocent, being falsely imprisoned, tortured, or murdered. Murdered, as the Allawi and the bushite nazi forces did to our friends and family in Falluja, to please the demon liar, lawless George Bush Jr. as their central thief system of dishonor and betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without evidence needed to form a conclusion, or when he just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", the bushmob thieves plundered in our "lost" confusion. All the while bush always seeking to close America's on-going criminal investigations, by causing even more have nots among US. So, as a free person, to side for the, bush wars America, God, and Johnny issue, you would seek out to find for Yourself beholding likewise as We all are: bush is actually super fuking evil, like personified or incarnate even, and Johnny's almost like a stranger Messianic figure who just wants to be known as a semi-normal average GUY/god fellow. (Sheesh.. We gotta bring ourselves everywhere we go) I "hate" bush for being so not himself stupid to think there was no actual walking, talking, godly Persons from the outer-reaches coming in to get him for the crimes he has committed ourselves to. Corporate news dictate without a human presence, doesn't rule this world of communication, we do. (Jesus wasn't buying Satan's misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell

hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with 9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr.

should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers

and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America who blindly targets our residential communities to enrich the UN-AMERICAN demon anti-Christ bushite thieves further? That, as bushite nazi grunt, they die for? Paleeze.

America is dying to prosper their false-deity war criminal demon anti-Christ, Our Mr. bush Jr, the same responsible for the nine eleven travesty, who attempts escape only through fascist americans who willfully betray America by condoning the furthering of bushite censorship for tyranny. Is America the cesspool of corruption and greed, without a People person present willing to make a stand for God and Country? BUSH IS EVIL. Let's arrest'em, or kill'em for committing high treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this universe over, I am proclaiming, a war against the liar

George Bush Jr., the vilest contempt for mankind this
World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because
Saddam wouldn't let inspectors in; the media has treated
this as not really a lie because it's so obviously
untrue. \ \

America is a coming to kill the truly evil George
Bush Jr.,

Johnny Wizard

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as to whether he knew Zarqawi was in Fallujah with the answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's sons and daughters, Johnny's brothers and sisters. "No idea" rumsfeld states while his private partners cash in the blood checks for everything but the funeral services. I ask sacrificing soldiers to help grant me space to debate bush and rumsfeld on international radio. We gotta take away Art Bell's turn off button to thank him for all the enlightenment he has been a part of in America, but that these life death top priority issues of ours, he hasn't the right to censor communication on. This is your World that I wish to play servant of. As my subject; I promise a fight to return Justice through freedom for all. How? By believing in you to do as you should, demanding the immediate arrest or execution of bush, rumsfeld, and condi for the crimes of 9/11. Demanding the return of all stolen Iraqi assets, made by those who personally profited off the criminal transactions. Demand the arrest or execution of Allawi for the bombing campaign of Samara, along with bushite military commanders who organized the satanic attack. Why would America do this? To free the dying lives of their bushite nazi whored, dying grunt savage slave population. .or perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas: ``We're ready to go. I'm just ready to get this done. I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a

careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the

name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three or more, before December 25th, there will be an extra something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while
sacrificing weak and stupid American teens in the
process,)

See? Evil bushite kill "other" bushite to steal our
freedoms and money, and US true freedom fighters would
kill'em too to defend our innocent families. Like I
said, un-principled nazi facist savages is the
un-American enemy bushite without contention but for
lifeless corporate censorship on our core values.
Demand our voices be heard, or die not trying to do any
greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some
enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme
measures to protect the Iraqi people from these killers
and to liberate residents of Fallujah so they can return
to their homes." \ \

American Patriot Warriors, kill Allawi as our number
one, Iraqi People killer. Thanks in advance my friend.

The biggest most best Johnny Wizard international broadcast ever!

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth
degree felony things?

--

/ / Despite this, the Bush administration denies any
responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to
rob the pro-Iraqi central bank. It's just more American
deaths as dumfuk sacrifices for the evil anti-Christ,
like bush and rumsfeld committed as stolen from America
on 9/11. Who cares about America Limbaugh would quietly
trumpet, he's making a killing like Art Bell and
O'Reilly do, keeping US masses PORTRAYED uninformed and
ignorant beyond belief. Did you hear? Mr. bush is the

most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect

our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr. bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back

home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the first time to the Al-Qaqaa story, President Bush said that John Kerry, in using the story as he has, was ``denigrating the actions of our troops and commanders in the field.'' \ \

It was the actions of rummy and franks, not the mindlessly obeying war crime instigators as iliterately truly stupidly dying bushite dumfuk nazi grunt teen soldiers.

--

/ / How many more thousands will have to die before God will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons
of (now missing) explosives "was not high on U.S.
commanders' list of sites to guard." What was high on
that list? Spokesman Scott McClellan said we had to
"make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and
kids and our young American forces are being shot at

from weapons stolen from the ammo dumps that this president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction funds distributed by the U.S.-managed Development Fund for Iraq cannot be accounted for, according to an audit commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the tanks rolled, for imposing a new regime of low taxes on big business, and quick sales of Iraq's banks and bridges-in fact, "ALL state enterprises"-to foreign operators. \ \

Big deal. To the war mongering mass murdering thieves go the stolen spoils., as the bushite's devolving american new century would say.

/ / The American public is told that this butchery is part of keeping up pressure in the war on terror. All these terrorist brides and grooms and terrorist kids rushing round in party clothes ; all the terrorist musicians and the terrorist wedding guests, by God, they have to pay for 9/11 because (as millions of Americans still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the vast majority of those believe Saddam Hussein was behind the Sept. 11 terrorist attacks, and that freedom by justice through understanding is too complicated and wordy, ...yeah. and so corproate news control is lying to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts. Leaderless degenerates that any real human would destroy to protect their innocent families. Innocent families the bushite bombers commanding from Florida murder for no good reason but get more soulless bushite teens rightly killed, all done so to put more stolen money in the pockets of their ungodly satanic cult. Solution: hunt to kill those left un-arrested who willfully, criminally, ordered the needless bombing of Samara to get killed the bushite grunts for the further thievings of the bush backer traitors who bask in your stolen expenses.

Support calls for open dialog.

snpd

Is It Just?

/ / Is it just coincidence that 9/11 is also bush's "acceptable" reason for warring, (planned TOP SECRETLY prior by several days of 9/11, and confessed to US already as fully implemented by the Whitehouse) Afghanistan with a FALSE ALLEGATION [n o - e v i d e n c e] to heroin push, [is still leaving] ..the STOLEN American soldier pension money [...] sitting in the Cayman Islands? \ \

I guess perhaps I wasn't so clear previous, but listen: How's bush and rumsfeld's Afghan plan, gonna go down, if there is to be no surprising 9/11, nor any evidence, (not a scintilla,) gathered for public inditement against Laden for shoplifting? (No advisement from Tenent, nor Richard Clark?) Would bush start a war against life itself, by just simply stating, we don't need no evidence of our suffering?, with him demanding an innocent family to be crucified?, to save Enron? Again, bush is the for real antiChrist of all biblical folklore, hated this entire timeless universe more over than anything else Johnny cares to mention. George bush's naked treason as an enemy of Humanity is hidden from no one. A true soulless degenerate George W. Bush is, whom is purposefully attempting to destroy Your freedom as humanity with his utter contempt for our flying fricken flag. If a person has no evidence to substantiate an allegation as personal opinion on the advocation of perpetrating senseless bushite barbarity against those understood as US innocent, then your blind faith in evil bush as bushite, not lies with your God, your nation, your family, your neighbor, OR YOURSELF, but as the willing to be sacrificed for the ungodly bushite war crimes as enemy of everyone. Listen: Jesus..., KILL BUSH INSTEAD.

Kill un-arrested bush and rumsfeld for murdering the good American People thought left undefended by corporate edict as the still unjustly dying and near forgotten, and you'll be respected by this universe as truly honorable and courageous, in these of God and Humanity's, most troubling of times under the criminal dictates of Our evil Mr. bush Jr..

Those evil brethren of the bushite clan intend, through censorship, to allow the demon bush cabal our rights to leave, but where does the brethren of the bushite clan think bush is a gonna flee himself from, eh? We, The People are a' coming to get you George W. Bush for almost escaping our police protections. For, when the bush brethren clan wake up to the plan, that they'a have'a been'a deceived, the last think anyone would want, is to be without police protection... (Can you believe, the war monger thief and liar, Our Mr. bush Jr. actually banks for Christian fundamentalism, thinking he's gonna ride them bible belting for all he's worth?)

Again, America needs to wake up, load up, and go out to freely bag US some un-American bush and rumsfeld, all to save the lives of the leaderless dumfukked bush-teens, who are prodded criminally as cowards to die for the enemy. Those who would murder innocent Americans as bushite, then further publicly advocate as enemies to freedom, the victimization of God as the innocent elsewhere, should be turned against instead, questioned, arrested granted full legal rights through public due process, or hunted down to be destroyed by US real Patriots of this world as God's great believers. I'd destroyed any un-arrested proud bushite for warring America by indiscriminately dropping toxic cluster bombs on our friends and family, to get rightly killed more leaderless cowardly soldiers with Grand parents they leave undefended in bush's evil amerka. Who doesn't hate bushite I ask you to think as you should?

You kill bush because, we had unrestricted access to do anything bush pleased throughout Iraq, prior to sacrificing any good for nothing, cowardly bushite nazi dumfuk whore.

Now, because truly, the Iraq bushite war is illegitimately premised without any actual cause, the humans are faced with two questions that have no legitimate answer.

1: What can the ungodly and evil demon bushites do now in Iraq, that they couldn't prior to murdering one child, but for to rob from America by towing his

bushwhore nazi coward soldiers to commit criminal acts to rob freedom from all of US as Humanity?

(Kill an proud to be evil bushite, and all day long you'll have the thanks of every surviving American police officer, and a nod from all the American pensioners who are promised that maybe bush's america can learn for next time while the bushites just walk away with the stolen loot laughing.)

2: What could Saddam do, that he wasn't asked for?, to stop the senseless first degree murder of our friends and family?

Saddam provided the sites where all bremer's WMD was destroyed, the documents, the personnel, and so on, but corporate america won't let the facts be delivered without their bias of, who cares neutrality. A refusal to report for American interests regarding the sacrifice of American lives for the un-arrested criminals hiding inside Enron, Dutch-Shell, five dollar a day Bechtel, or double billers, commi Halliburton. Example: soldiers could have more effectively went into Iraq unarmed to search wherever, for there were no restrictions placed upon rational behavior, but just no money for the bushites to steal from America. The proud dumbfuk bushite soldier is coward and betrayer to America and God, by not, for America's America, killing bush and rumsfeld for near escaping the murder scene of 9/11 in New York City. Instead, they attack the defenseless and innocent with cluster bombs laced with toxic waste they happily eat themselves to die as the ungodly soulless bushite traitors. You get your gun Patriot, and instead of punishing a town, city, or state, bag yourself some individual evil bushite, and be respected by all true loyal Americans as a real freedom fighter. With the God of every religion by your side rooting you on for the home team, You'll be loved by all. At least until, we or me, can make the national news programs to communicate. Again, the management and news desk staff of CBC and CNN know, that the American FBI contend: bush's business partner, the un-arrested in retirement General Ahmad, funded Atta, the 9/11 mastermind. (While no evidence was established against bin as connected, to justify the Afghanistan war crimes. Nothing.)

CNN and CBC, in our names, are with malicious intent, refusing to allow justice to be our interest in protecting always.

snpd

New Recruit

Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for

ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite

rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

snpd

Again, none of any words world wide bare contention against the facts we've brought to our attention. The traitors to America, Our Mr. bush Jr. and rotten rumsfeld don't mention the willingness of American Soldiers to aprehend general Ahmad as the principle terrorist funder of Atta, because this general is also responsible for developing the bushmob strategy of killing Americans in New York City from Washington. A strategy of blaming bin Laden without any evidence to bomb Afghanistan for Enron. (The Dahbol Working Group.) Then closing criminal investigations, as it's not important to know who personally was responsible for the

insider trades, or the contacting of only Odigo. Never mentioned by CNN as top priority to American soldier concerns, who are expected by Blitzer and Hemmer to throw away their lives in sacrifice unthinking to bush, america's false deity, super evil anti-Christ. While bush and cheney threaten to murder more dumb Americans who would dare to articulate the demand for Justice as our own, like Laden has, while demanding American Patriots coware in fear of the sadistic savage mass murdering death squad leader, tommy franks, or the anti-Christ going out to kill their family too as not represented by corporate policy, while American soldier families are continually disrespected as unworthy. (Generally, they are pretty damn stoopid, but certainly, if they're not knowingly commiting first degree murders for the anti-Christ as pure nazi filth, they should be allowed to learn, instead of having their own undefended families robbed then slaughtered for American traitor, nazi puke terrorist, tommy franks, or for Monsanto's rotten rumsfeld. Do you notice corporate America continues to show outdated footage of those two demons standing near smiling armed American soldiers, who as a mass of dumfuks, aren't intelligent enough to destroy them instantly as established ememies of America as terrorists? Well, that is going to change. I have yet to find ANY American Soldier who is literate, who disagrees WE have some very important questions that need immediate answers before the bushmob murders more Americans in Our name. See for yourself through Google if you don't believe in Christ as the Redeemer.

As for the doubting American Soldier, LOOK, CNN will continue as cult members in their dying madness of just even lamer excuses, to convince US, we are alone in our concerns for Freedom as Justice instills for US all. This moment of History requires you to stand strong for only yourself to be represented truly among the stars. Evil stupid people can't make heads or tails of this, but, as evil bush does truly from his dark shallow existence, will continue by open piracy, to publicly advocate in Our names the further robbing and murder of your own family American Patriot, so too, will more american nazi dumfuks die to the tune of their own cowardice to protect themselves as garnered fairly. This is why rotten rumsfeld forbids the death tally of American soldiers to be made public to the ready for enlistment as the too dumb to know better. Life is life, and sorry to say american dumfuks, Christ on the cross is you too as a true dying American Patriot, and your already politically sitting in the position of

hatred and injustice against Humanity, and myself honestly as.. THE SON OF MAN! (The god of God's life/death guy, with a score to settle on behalf of the infinite Universe and True brave Soldiers everywhere. KILL AMERICAN COP KILLER BUSH NOW BEFORE HE MURDERS MORE IN OUR NAME AS THE INNOCENT COWARDS!)

CNN is not interested in working for American interests by asking why, as there is little of any money in just doing good for your neighbor, like saving a living, as we would wish to be helped for ourselves, if we were bound just the same to be equals at being. Mr. Blitzer and Bill Hemmer, as americans, wouldn't give a dollar of your time, to speak on human rights to be of their own concern, (they're rich!) or to save the life of an innocent poor victim, if it meant they would therefor, be compelled to honestly report on their false deity bush, the super evil criminal to ourselves as Humanity, the unelected dictator, American cop killing anti-Christ in person!, that they so leave to see Americans sacrificed as ignored to be robbed from as their profit margin increases. Do less for America, The People, and get payed more in collateral damages paid for by doubting Patriots, too slow to stand for the American flag in protection for their own living as lost to the wind. Mr. bush, tommy, rumsfeld, cheney and blair give no evidence, but for to show themselves as the criminals who openly harbor terrorist activity against our communities, and WE, as Humanity, according to CNN, are expected to go out and kill our friends in cowardice, instead of standing up to destroy the demon bush instead to save our own selves.

God, or no God, I hate that murderer bush as much as any real man would to care for his own life as family.

--

One More Thing

So, that demon bush, the American cop killer and his cohorts, are continuing to work destroying Humanity's gains in civility, by evilly dividing Our humanity with their blatantly open criminal intent to murder untold millions as US innocent, and as of yet, have not been executed by American Patriots for mass murder of God's Family in New York City. Traitors to US all on 9/11 without contention, for Our truth speaks as Ourselves, and witnessing just CNN's silence on General Ahmad, speaks volumes on their contempt for US as worthy of Justice. Refusing to do what is good for Humanity by offering the central facts as publicly recognized by Our

Police Agencies to be actually documented. According to the FBI: the vacationing General Ahmad financed the alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumfuk.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumfuks of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as

privately principled to stay ignorant of Justice to protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves. What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one

would need or asks for, and CNN with CBC corporate management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official

or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for

living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumfuk traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for

prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW? The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten

rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled, where it goes bankrupt as a toxic non-living entity, but leave richer as crooks than they did before calling an end to paybacks, with the People stuck to take the loss

together for sure as the victims. While bush, says corporating America, his america, should learn for next time, maybe, while the CRIMINALLY STOLEN money is still siting in the Cayman Islands!!! See the Depression, a Canadian High Schooler, or watch bush act in direct opposition to his word almost consistently as American death harborer terrorist psychopath. Then ask yourself, why can none of our defenses be publicly discussed as important deliberations?

Love Justice by allowing others to read this paper, to judge the truth for themselves as worth something for all persons, and I will be truly grateful you cared to believe in a better future, for together, we could find a new hope for freedom, as happiness and prosperity for Yourself included. We only need believe in ourselves as unstoppablly stupid, and the Universe is ours as God is now testifier.

I am my word,
and make believe King to this world I call home,

Yours forever,

Ya, it's me again,
King of a world forgotten,

Johnny Wizard

I was trying to point out it wasn't really a steal but that radio is only
worth about $80 in that condition

there is NO source for the proper antenna and there MAY be a serious problem
with the radio.

please give me the list of the experts who gave you this top 5 list.

> Ebay is raising their already high fees next month.
No; Sorry, OM, but everyone has got this wrong.
Only inventory items in an *Ebay Store*, big-ticket industrial
items and automobiles get the price increase.
You and I as "casual sellers" do not see increases in anything
except "gallery" and we're compensated by bigger, better photos.

Folks- please go read the notice again.
I don't think anyone here is affected by this at all.
Kindly,
David S.

It seems there is a server problem somewhere out there- cannot e-mail directly. Anyhow, what is the cosmetic condition of NR535 D ,and the year of manufacture.

I went and reread the notice.. and it's true, the way the notice is laid out, it appears that the price increases apply only to Ebay Stores. Now, my observation would be that there will be many ebay stores closing in order to opt instead to be a regular seller, so as not to pay the nearly double fees.

1088. DRM listing in Wikapedia needs more updating...

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 04:29:16 UTC
From: Max Power <mikehack@u.washington.edu>

```
==================================
DRM listing in Wikapedia needs more updating...

http://en.wikipedia.org/wiki/Digital_Radio_Mondiale
French / German / Spanish versions non existant...
==================================

Digital Radio Mondiale (DRM) is an international non-profit consortium
committed to designing an open platform for digital radio broadcasting
around the world, especially on shortwave.

The main advantage of such digital broadcasting is that it yields sound
quality comparable to FM, but over shortwave distances. As a digital medium,
DRM can also transmit other digital data besides digitized music, including
text, pictures and computer programs. DRM has been designed especially to
use older transmitters designed for audio AM, so major new investments are
not required for early transmissions. The encoding and decoding can be
performed with digital signal processing, so that small computers added to a
conventional transmitter and receiver can perform the rather complex
encoding and decoding.

The organisation has recently received approval for the AM standard from the
IEC, and the ITU has approved its use in most of the world. Approval for the
Americas (ITU region 2) is pending amendments to other existing
international agreements. The inaugural broadcast took place on June 16,
2003, in Geneva, Switzerland, at the ITU's annual World Radio Conference.

DRM's system uses MPEG-4 to code the audio: AAC for music and CELP or HVXC
for speech programs. All codecs can optionally be combined with SBR. The
resulting low-bitrate digital information is modulated using COFDM. It can
run in simulcast mode by switching between DRM and AM, and it is also
prepared for linking to other alternatives (e.g. DAB or FM services). DRM
has been tested successfully on shortwave, mediumwave (with 9 as well as 10
kHz channel spacing) and longwave.

When they don't have any respect for themselves, how in hell can they respect other cultures and people? Besides, these former residents of trailer camps all over Georgia USA do NOT need any more dehumanizing experiences, especially self induced ones like this.

Infantile Eighth grade humour at best. They must all be Pilots.

Is the 1N5711 a good substitute for the 1SS135?

1093. Nulling QRM

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 04:46:11 UTC
From: running dogg <run@ning.dog>
Message-ID: <41e74f17$1_1@127.0.0.1>
Source record: 5241

I've noticed in the last couple days that I can't get the BBC on 9525 at 0300, so I've had to listen to their 5975 freq out of Antigua. The problem is that 49m is for me full of noise. The noise is so great that it reduces the BBC to an unintelligible mumble, especially on my Degen. So I fired up my Yaesu FRG-8800 and tried using SSB to null the noise, but no luck, even though the LSB setting greatly reduces it I am still left with a mumble level of audio. The signal is strong, it's just that the QRM is stronger. I'm using about 50 feet of longwire (my old antenna) coiled up inside because I can't have an outside antenna for now. Any suggestions?

Yeah, ok, ok, I should have put a big IF qualifier in there. I didn't mention that I heard pretty much the same thing about Fallujah on the BBC about a month ago so that's why I gave more weight to the Cuban report than I normally would have. That said, in an age when even "news" from the BBC is suspect, I find that one SW outlet's "news" is pretty much the same quality as another's. (This of course doesn't count the latest heroic actions of Kim Jong Il as reported on Voice of Korea. ;))

RD,
.
Try an In-Door Antenna 'designed' for Shortwave Listeners
with RFI and EMF Noise Problems . . . The Loop Antenna !
.
RG8 AND RG58 'type' COAX CABLE "IN-DOOR" LOOP ANTENNAS :
.
* Coax Cable [Shielded] Loop Antennas {GreerTech}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1625
.
* Tuning the GreerTech [Coax Cable] HF Loop Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1730
.
* Loop Antenna -or- Active Loop Antenna ? ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1394
.
TV - CTV - DSS 'type' COAX CABLE "IN-DOOR" LOOP ANTENNAS :
.
* The "TRICK" to TV 'type' Coax Cable
[Shielded] Loop Antennas {RHF}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1626
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1627
.
* Using an In-Line Pre-Amp with TV 'type' Coax Cable
[Shielded] Loop Antennas
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1634
.
* Lessons Learned - TV 'type' Coax Cable
[Shielded] SWL Loop Antennas {RHF}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1643
.
* Hookin-Up your Radio/Receiver
to your TV Coax Cable [Shielded] SWL Loop Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1646
.
HOOK-UP WIRE / LITZ WIRE 'type' "IN-DOOR" LOOP ANTENNAS :
.
* "On-the-Wall" Loop Antenna and more . . .
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1459
.
* In-Door "On-the-Wall" Loop Antenna
for 'portable' AM/FM Shortwave Radios
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1845
.

* In-Door "Around-the-Room" Loop Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1883
.
IN-THE-ATTIC 'type' [SIMI-IN-DOOR] LOOP ANTENNAS :
.
* In-the-Attic Horizontal {Flat} 'double' Loop Antenna using 300 Ohm
Twin Lead
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1759

1104. Re: Nulling QRM

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 10:36:09 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <41E7A09B.1CC0@mindspring.com>
Source record: 5051

You're probably out of luck.

An actual beam antenna would work, meaning one with large forward gain and resulting low response in most other directions, which you aim AT the station you want to listen to. More dollars than most SW listeners want to spend, if one is even available for the frequency you want.

A small antenna can produce NULLs which you put on the stations you don't want, eg. a loop or a loop+whip phased array, but the nulls are small and everything else still pours in as before, and at night the direction of arrival is not likely to be stable enough to null even a single station unless it's a local (and so has a stable direction).

A long wire has forward gain, though I forget whether it's along the antenna or broadside to it. It's certainly along in the case of a beverage antenna, so maybe it's along. Aim that at the station you want and see if it helps. Be sure to look up the great circle direction, they're not what you'd think.

AP.
.
Next time try these types of Wire Antenna Insulators :
.
"Dog Bone" Ceramic - Antenna Wire End Insulators
http://www.wavehunter.com/cerins.htm
http://www.universal-radio.com/catalog/antsup/3250.html
http://www.durhamradio.com/s/customer/product.php?productid=43466&cat=1749&page=1

These Glazed Ceramic Insulators will hold-up for Years and
Do NOT Fail due to Exposure to Direct UV Sun Light like many
low cost and poor quality plasitcs.
.
Van Gorden "Dog-Bone" End-Insulators
http://www.universal-radio.com/catalog/antsup/2379.html
.
Ceramic "Stain" {Egg} Insulators
http://www.universal-radio.com/catalog/antsup/1868.html
http://www.universal-radio.com/catalog/antsup/2794.html
http://www.durhamradio.com/s/customer/product.php?productid=43455&cat=1749&page=1

http://www.durhamradio.com/s/customer/product.php?productid=43468&cat=1749&page=2

These Ceramic "Strain" Insulators have a Compression Strain
feature built into them; and if the Ceramic should fail the
wires are inter-linked to act as a safety back-up.
[This is my 'choice' for Wire Antenna End Insulators.]
.
Budwig HQ-2 Antenna End Insulator
http://www.universal-radio.com/catalog/antsup/3412.html
Made of ABS Copolymer, 35% Glass Filled.
They are UV Resistant and Weatherproof.
.
CIN Alpha Delta End Insulators
http://www.durhamradio.com/s/customer/product.php?productid=43454&cat=1749&page=1

.
Van Gorden HI-Q End-Insulators
http://www.universal-radio.com/catalog/antsup/2873.html
http://www.unadilla.com/endsulators.htm
http://www.durhamradio.com/s/customer/product.php?productid=43456&cat=1749&page=2

.
Assorted Antenna Wire & Insulators

http://www.surplussales.com/Antennas/Antennas-9.html
http://www.radioworks.com/cinsul.html
.
3 1/2 " Wood Screw Standoffs With Insulators
RadioShack Catalog # 15-853
If you are using 300 Ohm TV type Twin Lead for a Wire Antenna
Element these can work well for direct mounting to a build or
structure.
http://www.radioshack.com/product.asp?catalog%5Fname=CTLG&product%5Fid=15-853

.
.
WRAPPING THE ANTENNA WIRE THROUGH THE INSULATOR :
Her is the Method / Process that I use to Wrap the Antenna Wire
Through the Eye (Hole) of the Antenna Insulator.
.
Fold over One Foot of Antenna Wire at the End going into the
Eye of the Insulator.
.
Run/Route the Folded-Wire-End through the Eye of the Insulator
leaving about Three Inchs outside / unused Main Antenna Wire exposed.
.
Pass the Folded-Wire-End through the Eye of the Insulator a
Second Time and Snug-it-Up to lay with the Main Antenna Wire.
.
Take the Single Tag-end of the Antenna Wire an place it
Perpendicular (90*) to the Main Antenna Wire.
.
Take the Folded-Wire-End (Two Wires) and the Main Antenna Wire
(One Wire) and TWIST all Three Wires together Counter-Clock-Wise
(CCW) like you are forming a Western Ubion Splice. Do this
until all of the Folded-Wire-End is used up in the Twist.
.
Now take the Single Tag-End Wire (One Wire) and Tightly and
Closely OVER-WRAP it Clock-Wise (CW) Around the Three Twisted Wires.
Do this until all of the Tag-End Wire is used up in the Wrap.
.
RESULT - You have Four Wires (2x2) in the Eye of the Insulator
to Distribute the Force and Ware place on it; and Gives it a
Double Bite. The CCW Twisting of the Three Wires and then CW
Over Wraping of the Single Wire Mechanically LOCK the Four Wires
into a Solid Joint.
.

1107. Re: Eton E1 XM Radio "Up-Date" on Release Date and MSRP Price

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 11:59:20 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1105703960.568001.69100@c13g2000cwb.googlegroups.com>
Source record: 5054

For One and All,

WHY - The Eton E1 AM & FM Shortwave Receiver with XM Satellite Radio
Does NOT have "DRM" Digital Radio Mondiale reception feature.

READ : DRM - Do the Right Marketing !
[DRM - What Went Wrong in the USofA]
Why Digital Radio Mondiale (DRM) needs a Brand Name
- Commentary by Andy Sennitt, 13 January 2005
RNW => http://tinyurl.com/4cona
http://www2.rnw.nl/rnw/en/features/media/features/drm050113.html
"Eton Corporation, the company that brought Grundig radios
into the US, showed the Eton 'Elite' E1 XM portable Receiver.
It combines AM, FM, Shortwave Receiver, and XM Satellite Radio
into one ultra high-performance unit, which - although portable
- is sized at 13.1 by 7.1 by 2.3 inches and weighs 4 pounds."
.
OBSERVATIONS ABOUT - The 2005 International Consumer Electronics
Show (CES), the world's largest consumer electronics event,
ended a week ago in Las Vegas.
.
Unfortunately, due to the decision of the US to adopt iBiquity
Digital's HD Radio instead of DRM as the standard for digital
AM, a major opportunity to promote Digital Shortwave Broadcasting
in the US market has been lost.
.
But the Shortwave receivers in these new devices are only for AM,
because the digital system chosen for use in the US - iBiquity
Digital's HD Radio - is aimed at the AM (Medium Wave) and FM bands.
So even if a digital AM receiving capability is added to these sets
in the future, it's not likely to benefit Shortwave Broadcasters.
.
Also at the CES, 21 of the top radio broadcast groups in the US
announced an historic agreement with iBiquity Digital to accelerate
the conversion of 2,000 AM and FM stations to HD Radio Technology.
.
So it looks as if the US domestic market is firmly shut to DRM,
despite its status as a world standard endorsed by the International
Telecommunication Union.
.
Unless this marketing issue is addressed, only a subset of
existing Shortwave listeners are likely to be interested in DRM.
Consequently sales of DRM-capable receivers - when they eventually
appear in significant numbers - will be low, and the momentum
will be lost.

.
The majority of consumers will not even be aware that there's
a digital AM Broadcasting System out there, especially as they
need to buy a new receiver before they can hear it.
.
And since the total number of hours aired by the International
Broadcasters continues to fall, the selling of the medium in
terms of listener choice becomes harder and harder day by day.
.
DRM needs a brand name, preferably one that works in a number
of major languages, that will explain what the technology is
for, and cannot be confused with something else.
.
As we're less than a year away from the release of the first
'portable' DRM Receivers in significant quantities, I hope
attention now turns to how the technology is going to be sold
to the consumer, especially in the US. A lot of time and
effort has been spent getting to this point, but it could all
be rendered ineffectual by poor marketing.
.

Any western program material allowed in China is very carefully scrutinized
for content.
It is heavily monitored and censored. Providers risk losing access if they
don't comply
the CPC rules.

This also extends into the book publishing business as at least one well
known TV program
provider is also in the book publishing business. The Communist Party in
China has so
much clout with these morally corrupt publishers that the CPC can snap their
fingers and
the publisher will refuse to publish a book IN THE U.S. of A if it happens
to offend the CPC.

These are FACTS!

It is all a subtle form of propaganda.
Their programming is made to make you "feel good" about the country.
This removes your aversion to the fact that the Chinese Communist Party
is a murderous regime.

Go tote that CPC QSL boy! - LOL!

> but then they say its great that ebay keeps raising their fees.
>

Ebay fees going up will be good for stock holders in the short term. In the
long run, it will make it easier for a competitor to enter the market and get
big enough to become profitable. If this happens, auction fees are likely to
drop below their current levels. Competition is good.

> and its great that CEO's make over a billion $$$ a year but complain
> when their job is sent to china
>

Can you name one CEO who makes 1/4 of what you're claiming? I doubt it.
According to Forbes, only one CEO makes at least 7% of what you're claiming.

> wise up people, don't be stupid till the day you die !!!!!
> its all tied together !

Perhaps you should report to sick bay. Your powers of observation and logic are
off.

1118. Report From Port Blair, Andaman Islands

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 14:27:45 UTC
From: dxAce <dxAce@eclipsed.net>
Message-ID: <41E7D6E1.E2AC1EC1@eclipsed.net>
Source record: 5065

Dear Friends,

From mid December 2004, I was in the Andamans and returned only yesterday to Hyderabad. Although I went there for logistic support for the VU4 Dxpedition conducted by our National Institute of Amateur Radio, I ended up by providing emergency communications for those affected by the earth quake and tsunami. I could not get in touch via email from there as it was not easily available.

All our 6 members who were in the capital Port Blair escaped unhurt. Soon after the casastrophe, I had the opportunity to operate Ham Radio from Port Blair and a couple of days later from Rama Krishna Pur and Hut Bay in Little Andamans Island which were badly affected. I was mainly clearing health and welfare messages as there were no telephones. We used generators and batteries which were charged by solar power.

Several days before the earth quake / tsunami we had given a lecture and demo of Ham Radio for the officals of All India Radio and Doordarshan.

AIR Port Blair suspended most of it programs and were giving live phone in programs where listeners could send messages to their relatives / friends.

This was broadcast on MW, SW and on the newly installed 10 kw FM transmitter on 100.9 MHZ.

Some photes of my vist to AIR Port Blair etc.can be seen at

http://www.geocities.com/vu2jos/vu4

The AIR web site also gives lot of info in the following site:

http://www.allindiaradio.org/Tsunami.htm

(More details later)

Yours sincerely,

Jose
(Jose Jacob via dx_india)

Listeners can choose between a large number of very entertaining
conspiranoics and end-timers. Nothing wrong with that.

> .
> DRM needs a brand name, preferably one that works in a number
> of major languages, that will explain what the technology is
> for, and cannot be confused with something else.

Is Andy Sennitt serious? Does he really think a gimmicky name is the secret
to DRM success? Let's not forget Sony's well named Beta format lost out to
the other videotape format known by a dopey Three Letter Acronym.
> .
> As we're less than a year away from the release of the first

> .
> .
Poor marketing might keep one good product from selling, as long as
consumers can choose another good product. Poor marketing won't keep an
important new technology on the shelf. If DRM really meets a need, it will
be as easy to sell as ice water in a crowed desert town.

However, poor market research might well lead a company into wasting alot of
money developing a product few consumers want.

Other than slamming Dell did you have a point?

BTW, Dell is replacing the system boards with bad caps as they turn
up. call them and out comes a tech with a new system board. On the
other hand Abit also had that problem a couple of years back and
charged $25 plus shipping.

Bad wall warts are nothing new.

Yep, sending a reception report and getting a QSL does not necessarily entail
tacit approval of a particular regime.

Lookie here, Sweet Cheeks:

I've been a radio junkie for 50 years, listened to ''Suspense'' on a 6 tube superhet with the 7 series loctals under the blankets. Had a Truetone in my bedroom throughout the '60s, went through the Hallicrafters thing, then the DX-150 series solid states, Uniden (2024?) Sony ICF-2010, Lowe HF-150, Drake SW2, R8B, Stewart-Warner R-390A, Racal RA-17, etc. I am fully cognizant of the radio universe and I think satellite radio is fun.

Please Say NO to Gambling with Social Security!!!

It is one thing we should all be able to count on.

Social Security is far from bankrupt. Here are some facts from a telephone press conference held Tuesday by Rep. Sander Levin (D-Mich.) and others knowledgeable about the fund:

Some 48 million people get checks. Some 38 percent of those are disabled, widowed or kids.

Social Security faces a challenge, not a crisis.

Privatization means cuts of up to 40 percent for future retirees.

Transition costs for setting up private accounts - Bush's proposed solution - are estimated at over $2 trillion - money the United States does not have.

When Argentina tried something similar, its entire economy tanked. Challenge Bush's "the sky is falling" now and he'll back down.

Whether we are red-staters or blue-staters, most of us have relatives dependent on Social Security - if we are not dependent on it ourselves. Call 1-800-307-8525, the AARP hotline [regardless of whether you're a member or not]. It will connect you to your senators and congressmen. Write every senator and representative in Congress. Remind them that we can vote the whole lot of them out of office if choose.

> that model internally.

The Communist Party of China method of (non-)jamming is to park a domestic
service
transmitter ontop of any undesirable external Chinese language broadcasts
and pump up the propaganda
volume. It is no wonder China has the most number of shortwave
transmitters.

> The US is obsessed that there still are some non-Christian heathens that

> relations with China by using Cold-War ideological broadcasting tactics.

LOL - how long have you worked for the CPC propaganda dept? How are the
benifits?

> I can only assume that the US wants to re-create the Hungarian revolt of
> 1956 in China -- a concept 1000 years out of date considering Wal-Mart's
> dependency on cheap Chinese goods to be profitable!
>

No, it is the ordinary people in China who wish to start a Hungarian revolt.

Before you make a complete fool of yourself you need to begin you
re-education program:
http://english.epochtimes.com/jiuping.asp

Once you have completed the course you can take the Resign from the CPC
quiz:
http://www.9ping.com/

Now go tote that lil' Red Book.

Clueless liberal speak.

Funny in 1998 Clinton was claiming it WAS broke and needed fixing. And the left was all over it. Now it's magically fixed?

Couple of good articles on it:

1150. WV Telescope's Sensitivity (Cassini-Huygens)

Newsgroup: rec.radio.shortwave
Date: 2005-01-14 20:25:54 UTC
From: C Bun <anicnub@yahoo.com>
Message-ID: <1105734354.869620.302020@f14g2000cwb.googlegroups.com>
Source record: 5099

Anyone interested in science and outer space exploration knows that today Huygens probe had just now successfully landed on Titan, Saturn's largest moon. The probe began transmitting radio beacon siginal at 11:25 CET, and the Green Bank radio telescope in West Virginia, USA, picked up this faint but unmistakable radio signal (2040 MHz) from the probe.

My wondering is, considering the huge distance between Titan(Saturn) and Earth, and the undirectionality of the beacon radio signal (not the ones modulated with scientifically data that will be picked up by Cassini and relays directionally to Earth), the telescope in WV must be very very sensitive. Can anyone estimate what sensitivity it has, and compare it with a regular radio receiver (say, 0.1uV)?

I'm not really sure what is there after 1930 when apparent Turkey signs off. I do see Iran listed there in Russian from 1930-2030 to Eastern Europe, and I was able to hear what certainly seemed to be Koranic recitations.

I'm not sure what Mark was hearing, but it almost seems like it may be Iran as even my 70' N-S wire hears it better than the 200' W-E wire which would generally work better toward Africa.

And at least at 2030 the BBC comes on in presumed Portuguese.

I see China has finally learned the lessons of propaganda that the Soviets never seemed to get. Instead of political harangues, they broadcast "softer" programming (music, cultural, etc) meant to provide a positive view of their country to the outside world. The Soviet stuff unintentionally provided a negative view of their bloc-all you heard were political rants against "evil imperialist American dogs". Radio Peking used to broadcast the SAME phrase over and over for hours on end, as if the point wasn't made after the first 15 minutes. The North Koreans are still clueless on this front-all you hear on Voice of Korea is odes to Kim Il Sung and Kim Jong Il.

I would point out that Mark's report was from November, so it is indeed possible
that frequency usage has changed since then. However, EiBi lists Katanga (Zaire) on
7435 as does the BDXC list from April of 2004.

It isn't as though I am knocking anybodys personal computer's,because I am not.There are computers and then there are computers.That is why last year I bought myself a new ProMagix tower computer from Velocity Micro in Richmond,Virginia. www.velocitymicro.com and when I phone their toll free phone number to ask whatever question about my computer,the President of Velocity Micro is just as likely to pick up the phone as anybody else who works at Velocity Micro in Richmond.I know a couple whom I see at a local Goodwill thriftstore once in a while and last year his wife bought a new Dell computer and six days after they started using the computer,it quit working and they smelled a burnt smell coming from the computer.It was leaking capacitors on the computer's motherboard.The way some computer companies can offer such good deals is by cutting back on the quality of the parts they use in those computers.And besides,I don't care to own a computer that has propietary parts and or propietary operating systems.But,that is only my opinion.

That article was written in 1999, and represents an unusual year for
Eisner.

Most of his income was from gains on stock he sold. He gets options
every year. At the time, he'd been CEO for 15 years so he had a while
to collect them.

Still, even with the unusual extra income, he made less than 60% of the
amount you were talking about.

Here's the page on Eisner from Forbes for 2004:

<http://www.forbes.com/static/execpay2004/LIRC3YW.html?passListId=12&passYear=2004&passLis
tType=Person&uniqueId=C3YW&datatype=Person>

Is he over paid? Probably. But the stock holders are the ones who
should be complaining.

QST de W1AW
Propagation Forecast Bulletin 2 ARLP002
>From Tad Cook, K7RA
Seattle, WA January 14, 2005
To all radio amateurs

SB PROP ARL ARLP002
ARLP002 Propagation de K7RA

For the second reporting week for 2005 (January 6-12) both solar flux and sunspot numbers were down, as expressed in the weekly averages of the daily numbers. Average daily sunspot numbers declined over 9 points to 31.6, and average daily solar flux was down over 5 points to 89.9. These are not big point spreads, but at this low level of solar activity there isn't much room for decline. Eventually over the next two years we will see increasing periods of consecutive days with a sunspot count of 0 and solar flux down below 70.

The daily solar flux value is an expression of the noontime 2.8 GHz energy detected at a sun-pointing receiving antenna in Penticton, British Columbia. Canada's Dominion Radio Astrophysical Observatory does the measurement, and you can see details along with a history of this daily observation at, http://www.drao.nrc.ca/icarus/www/history.html. According to my records, the lowest daily solar flux value measured over the past decade was 64.9, on July 9, 1996. This was during a time when the sunspot number was 0.

Solar activity has been rising over the past week. Right after this bulletin was put to bed a week ago, the interplanetary magnetic field near earth dropped sharply to the south, which made earth vulnerable to geomagnetic storms. The geomagnetic indices (A and K index) rose sharply from very quiet to very stormy on January 7 and 8. A few days later earth was inside a high-speed solar wind, and conditions were stormy again on January 12. Fast growing sunspot 720 emerged, and this should increase the sunspot number and solar flux over the next few days. See, http://spaceweather.com/images2005/14jan05/midi512_blank.gif for a January 14 view of this fast growing spot.

Solar flux is predicted at 120 for January 14-15, and around 125 for January 16-20. This is a sharp increase over the average daily value of 89.9 for the past week and 95.4 for the previous week. Solar flux values around 120-125 suggest daily sunspot numbers rising toward (but not reaching) 100. Unsettled to active geomagnetic conditions

are predicted for January 14, and quiet conditions for the following week.

Last week's Propagation Forecast Bulletin ARLP001 didn't say anything about disturbed conditions on the first days of 2005. There was a powerful solar flare around 40 minutes into the UTC New Year on January 1 (0040z, or 4:40 PM December 31 here on the West Coast). The high latitude and planetary A and K indices rose dramatically over the following two days. This produced disturbed HF conditions. On January 2, the high latitude college A index (in Alaska) rose to 64, and it was 44 and 41 over the next two days. The planetary A index was up to 33 on January 2, indicating a geomagnetic storm.

If you would like to comment or have a tip, email the author at, k7ra@arrl.net.

For more information concerning propagation and an explanation of the numbers used in this bulletin see the ARRL Technical Information Service propagation page at, http://www.arrl.org/tis/info/propagation.html.

Sunspot numbers for January 6 through 12 were 14, 22, 34, 28, 40, 25 and 58 with a mean of 31.6. 10.7 cm flux was 83.2, 83.5, 88.5, 87.5, 90.1, 94.2 and 102.1, with a mean of 89.9. Estimated planetary A indices were 4, 37, 30, 4, 6, 14 and 30 with a mean of 17.9. Estimated mid-latitude A indices were 4, 21, 20, 3, 4, 9 and 18, with a mean of 11.3.

Hi all,
I have a icf-sw77 that has been working fine for years. I lost AM receive last night. FM works fine and I checked different antennas, jacks, power and everything else I could think of.

I came home from work and tried it again. I can scan through the band and toggle freq. no problem. I did see it come back a couple times for a split second and then go dead again.

Has anyone had this problem before?
I called sony and they said.
repair flat rate = $130.00
exchange = $383.00

I would like to trouble shoot it before sending if anyone has any ideas on this???

Amateur Radio Under Threat in the UK

o Advocates total disregard of all International rules in the interest of National flexibility

o Suggest that 60% of all spectrum is tradable

o Is in favour of Software/Cognitive Radio that could potentially operate on top of Radio Amateurs without warning

o Proposes to withdraw from CB, Amateur, Maritime licensing

o Proposes to simplify access to entrants - barely after the new License structure is in place

http://www.eham.net/articles/10030

And you think it won't happen in the U.S. of A.?

Do you have static removal of some type installed on the antenna lead in
? Static can wreck a silicon chip in a hurry. I fyou know anyone who can
do a diagnostic on your radio I would sure ask them if they would. I had
a scanner get zapped once because of static on the antenna. It would not
scan trunked systems all of a sudden. I finally turned it in and got my
money back.

The US has demonstrated a similar lack of concern for shortwave radio listners. I'd say we have a lot in common. I refer to broadband over powerlines. Where I live, the apartments all come with DSL if you can afford it, and no outdoor antennas allowed. That sure makes a mess out of shortwave. I can't imagine what it does to an amateur trying to communicate.

>compare it with a regular radio receiver (say, 0.1uV)?
The key isn't as much sensitivity of the receiver. That is seriously
limited by background noise anyway to something around .5 microvolts
unless you use synchronous detection. The game at Green Bank and the
others is the huge gain over an isotropic radiator the big dish gives.

If an 8 ft dish gives about 40 db, an 80 ft dish is about 60db, 800
foot dish (like Aericibo) 80 db gain over an isostropic radiator.
When you have 60db in the antenna system, ta picowatt becomes a
microwatt, and a microwatt turns into a watt.

1171. Re: Is the YB-400 a good SSB reciver?

I concur. Plus, the 7600 has an AM sideband-selectable sync detector, making it outstanding for broadcast stations (BBC, Dwelle, etc.).

Among others, I own the YB 400 and Sony 7600. The RS DX-398/Sangean 909 is much better than the YB400 for sideband, but it doesn't have a sync detector.

K9RZZ - Sounds like you aleady know the answer.
Care to share it with us ;-)

The general theme of this thread was a Mechanical Failure of 'cheap'
plasitic Antenna Insulators; and better replacements for them.

But as you point out - If you use a quality Plastic 'type' Rope and
"Tie" the Rope and Antenna Wire together - That will work also :o)

Doubling Over (Double Lay) and Twist together about Eight Inches of
the Antenna Wire and a Single Lay of Rope usually works well for a
"Secure and Lasting" Knot between the two pieces.

Well I have had the radio in the same place for a long time and use it as a
table top basically.

I'm not sure what I can do for it now if it got static zapped.

AM comes back only for a split second when I am trying to tune in something
and FM works fine.

How is having most of the workforce take money OUT of the Social Security system going to FIX it?

There is no logic in it.

If you take money out of the system, it leaves a huge shortfall for those coming up on retirement in the near term.

If you invest that money in the stock market, and we have another crash, as has happened several times in my lifetime (though nothing quite like the BIG crash), then you have a personal shortfall in the long term (i.e. you have no Social Security to fall back on).

Even precious metals are no guarantee of solvency, I'm sure you remember the gold crash back in the late 70's, where the price of gold dropped from the mid $400 range to the low $200 range literally overnight...

Source record: 5133

There's a nearby ski area, Snowshoe, that has to work closely with the
NRAO to keep from interfering with the deep space transmissions.

Wired had a good article last year about the problems NRAO faces.

http://www.wired.com/wired/archive/12.02/quiet_pr.html

>>
Issue 12.02 - February 2004

The Quiet Zone
Cell phones, pagers, Wi-Fi, Bluetooth - the wireless revolution is
everywhere. Except here.

By John Geirland

....
The subjects of radio astronomy are astronomically large, but the
signals they produce are astronomically weak by the time they reach
Earth. These emissions are measured in Janskys, named for the father of
radio astronomy, Karl Jansky. A Jansky is based on
0.00000000000000000000000001 watts - and that's a big signal at Green
Bank. Even a musical greeting card playing at the base of the telescope
could produce anomalous spikes in the data of an unlucky astronomer
trying to study stellar gases. If the interference is strong enough,
the telescope's ultrasensitive first amplifier - cooled by liquid
helium to minimize internal noise - shuts down.
<<

There was an article in the _WSJ_ two months ago as well.

http://www.mindfully.org/Technology/2004/Wireless-Devices-Increasing15nov04.htm

>>
Be Quiet. We're Listening.
Scientists in West Virginia are trying to hear what the universe has to
say.
But wireless devices are making it increasingly difficult.
MARCELO PRINCE / Wall Street Journal 15nov04

....
The task of preserving the Quiet Zone largely falls to Mr. Reynolds and
a team of scientists at Green Bank. The radio frequency interference
team spends hours every week driving around in a vehicle equipped with
sensitive antennas and special gear to pinpoint local sources of
interference, like a broken knot in an electric fence. They must also
monitor thousands of cellphone towers and broadcast antennas in the

zone to ensure they don't disrupt the telescope -- an increasingly
time-consuming and difficult task.

I come to this thread a bit late for which I apologise, but have you considered a
RF Systems DX-1 Pro, an active antenna I have had for four years and has given me outstanding performance?
Its characteristics are that it is very sensitive but also very quiet and resistant to local man made QRM.
It has the highest third order intercept point of any hobby active antenna on the market, so is very suitable if you live close to high powered transmitters, that will not break through or cause intermod problems.
It's egg beater shape gives it omnidirectional performance and is resistant to deep cycle fading.
It is a high performance design that is very sensitive, from chasing LF NDB beacons, through MW right up the top end of the HF band.
With this antenna I have recorded amazing catches from the four corners of the earth

Source record: 5139

According to
http://www.geocities.co.jp/SiliconValley-PaloAlto/4065/dev-di.htm#mixer
the 1SS135 appears to be a VHF/UHF switching diode, from Rohm
Semiconductors. It could be a good diode, but I know that the 5711 is
intended for mixer/detector service. I was unable to find a data sheet for
the 135, so I can't make direct comparisons. I have used the 5711 over the
past several years, with good results. Awhile back, I picked up a batch of
matched quad sets of these diodes from the Rockwell-Collins Inventory
Disposal store for around a dollar a pound. Too bad I got rid of most of
them.....I thought I would be living out there for
longer than I did. Easy to take things for granted, when they are plentiful.
Fortunately, these things are currently available, and they aren't too
expensive.

Found these in my garage.

KB-2 Beverage Antenna Transformer
Price 80.00
KB-3 Beverage Reflection Transformer
Price 45.00

Buy both and its 115.00
Both are in excellent shape, so good the stickers are hardly worn. For more info on these go to

http://www.qsl.net/k1fz/

Pictures are available....

Also have an Ameritron RCS-4 remote coax switch, basically run 4 antennas to your shack from one coax run. Unit works great. Comes with a switch for in the shack and a remote unit for the antennas.
Price 50.00
http://www.universal-radio.com/catalog/switch/0536.html
Pictures also available

Please email pbthal@gmail.com if you are interested

It is 3:18am EST (0818z). There are comms concerning a sea emergency going on on HF freq 2182 kHz USB.
The captain of the F/V Endeavor has been in comms with the US Coast Guard concerning the plight of a man aboard the F/V Rhianda, an 86-foot eastern-rigged red & white scalloper located at 41-25 North, 66-36 West. The 44-year old man aboard the vessel has collapsed several times and is in and out of consciousness. Winds in the area are from the NW at 25 mph, seas have 5-8 ft swells, and visibility is 4-5 miles. The F/V Rhianda is now at anchor there. I have not heard the US CG Station ID itself, but I have been told that it is CG Oceana Radio and CG Group Ft Macon that are maintaining comms with F/V Endeavor.

RHF

Your plan would fix SS as it should have been from day ONE. Flat tax on your income. This is not a political issue but a social issue and a humanitarian issue. Allowed to invest SS money will help few increase their money. Most of the new people that will depend on SSI aren't qualified to act as investors and to hire advisors will defeat the purpose(added cost).
Keep the politicians out of SSI. They usually screw up everything they touch.
One thing for sure, messing with AARP is a bigger political issue than the NRA ever thought of being.
;-p

;-P,
.
Yes - The Social Security System is a Matter of Public Policy.
.
Whereas Income Taxes and other Federal Levies are a Matter
of Funding the Operations of the USofA's Federal Government.
.
The Social Security System is really a Social Engineering Endeavor
that is Rightly-or-Wrongly based on the General Socialist Collective
Concept of Each According to Their Ability 'for' Each According to
Their {Basic} Needs. {A Society Taking Care of It's Own In Need.}
.
So the First Question Is :
Should We (The USofA) Even Have a Social Security System ?
- I Would Say - YES !
.
Next the Second Question Is :
How Should We (The USofA) Fund and Pay For the Social Security System ?

- Currently We Pay through a Flat PayRoll Tax; that is Funded
by both the Employee and the Employer; that has a PayRoll Limit CAP.
This PayRoll "Limit" [CAP] Actual makes a High Salaried Employee
'cheaper' (by about 6%) for the Employer; and is a "Tax Gift" of about
+6% for the High Salaried Employee.
Therefore High Salaried Employee Do NOT Pay 'their' Fair Share [.]
.
Then the Third Question Is :
In the Future - How Should We (The USofA)
Fund and Pay For the Social Security System ?
The Number One Answer (#1) is Eliminate the PayRoll Tax "Limit" [CAP]
- Require Employers to Pay the Full Cost of Employment for their
High Salaried Employees.
- STOP the "Tax Gift" for High Salaried Employees.
- Require High Salaried Employee Employees to Subscribe To and Invest
in a Personal Retirement Account (PRA) with Every Dollar of their
"Tax Gift" Money.
NOTE - These High Salaried Employees can be allowed to Join the
Federal Employee's Thrift Savings Plan (TSP) which is the very same
Option that Members of Congress have and is available to Every Federal
Employee to Save-A-Little-Extra for their Own Retirement.
- At Retirement Age the High Salaried Employee Standardized Monthly
Personal Retirement Account Payment (LERO Methodology) would Off-Set
their Monthly Social Security Retirement Benefit Dollar for Dollar.
.

So the Fourth Question Is :
In the Future - Who Will pay Into the Social Security System ?
- Everyone Who Receives a Salary.
- For the Average Salaried Employee NOTHING Charges [.]
- - They Work and Pay into the Social Security System.
- - When they Retire they Receive a Monthly Social Security Check.
- For the Employer of High Salaried Employees they Pay Their
Fair Share of the Full Cost of the Social Security System.
- - This provides an Immediate Cash Infusion for the Social Security
System to Start Paying Down the Trust Fund Borrowing by that Congress
started in the 1970s.
- For the High Salaried Employee they are 'Required" to Pay their
"Fair Share" into a Personal Retirement Account (PRA) via the Federal
Thrift Savings Plan (TSP).
- - In-Fact these High Salaried Employees will Put Away Enough
and Earn Enough via the TSP then when they Retire.
- - Their TSP Income will Provide for Their Full Retirement Benefit
far Exceeding the Amount they could get from Social Security.
- - They will NOT Draw a Single Dollar from the Social Security System.

- - This Will Reduce the Distribution Load that will be placed
on the Social Security System in the Future.
.
WHAT THIS CHANGE DOES :
It Ain't Perfect - But It Does FIX the Social Security System
1 - It does NOT Require the Average Working American Citizen
to Pay Any More Into Social Security.
2 - It does NOT Change Any of the Average Working American
Citizen's Social Security Retirement Benefits.
.
.
UNQUESTIONABLY - Another Crazy Idea From The Mind Of A Mad Man ;-}

Does anyone know what the FSK signal
on 289.6KHz is? While experimenting
with a new feed line I found this signal.
In Lexingotn KY it is a S6 and has been
steady for the last 12 hours.
And does anyone have a suggestion for
a freeware FSK demodulator? My MFJ1278
only shows garbage.

1215. Triax for feedline report

Newsgroup: rec.radio.shortwave
Date: 2005-01-15 15:23:02 UTC
From: r2000swler@hotmail.com
Message-ID: <1105802582.322435.102600@z14g2000cwz.googlegroups.com>
Source record: 5163

I had hoped that Triax might make a better
feedline. Better as in less noise ingres,
not lower line loss. After experimenting
with a new and temp 80' wire antenna,
with a Minicircuits 9:1 matching and a
Minicicuits 1:1
(see members.aol.com/WA1ION/nrants.pdf for
how the 1:1 is used) and a 90' piece of
Triax I found that Triax helps reduce the
ingress for frequencies below ~1MHz.
It made NO difference above 2MHz. Between
~1MHz and ~2MHz any diference is debatable.
I grounded the outer braid on the Triax
at the transformer/antenna. Using the
diagram in the NRANTS.pdf I found in
earlier experiments that R1/R2 have no
effect. Like the NRANTS diagram, the
shown COAX becomes the inner and ungrounded
shield. I grounded the outer Triax braid
at the base of the antenna with a 8' rod.
At the 1:1 transformer I did not ground or
connector the outer shield at the 1:! end.
The 1:1 transfomrer is located just outside
my radio room and is in a shielded (Altoid tin)
box that is directly grounded. The shield of
the cable that comes into the house is only
grounded at the ground strip in my room.
My ground strip was salvaged from a eletrician
friends junk box and is the grounding busss from
service pannel and is about 1' long, 1" wide and
1/4" thick and has 8 tie points and is connected
to the outside RF ground by 3 parallel 1/2" tinned
braids that are about 3' long. My RF ground is
bonded to the power/telco ground by 1/2" tinned
braid. The power/telco ground is the standard
8' rod.
The RF ground consists of an 8' ground rod,
connected to four 4' ground spikes(2 8' ground rods
cut in half) via 1/4" copper tubing that is brazed
at each end. The copper tubing rdiates away like
finges from the palm of your hand are about 10' away.
The tubbing and top of the ground spikes is about
18" under the soil surface. For this experiment
I laid the feed line on the surface of the earth.

The antenna was suspended at about 15'on one end
and about 30' at the other end, and sagged to about
10' at the middle.

I have found the NRANTS setup to be very good
in reducing noise and is the best antenna setup
I have used so far. Midline 1:1 transformer
really helps reduce noise from the PC used
with my radio to a minimum.

This afternoon a friend is bringing some shielded,
balanced video line and we will see how it behaves.
For this experiment I will use a modified matching
network with R1 halved and placed in series with both
out put legs of T1 (9:1). After that we will test
lamp/zip cord and some high end balanced microphone
cable.

Thanks!
I have a GPS38 and I located the
plans for building a differntial system.
Now all I have to do, is to refind them.
They must be running a lot of power
to produce that stong a signal here.
and that explains why my MFJ1278 only
shows "random" charctors.
Any idea when this station went "online"?
It has been a while since I tuned down
to listen to anything other the some NDBs.

As a matter of fact: Bush claims on Social Security should be compared to claims on WMD
Molly Ivins

AUSTIN, Texas -- Cheez, I go to all this trouble not to call the president of the United States a liar -- perhaps misinformed, did not seem to know about, no one has told him, etc. -- and then he just comes flat out with a whopper.

Drolly enough, he prefaced his latest with the unlikely statement, "As a matter of fact..." before he proceeded to do battle against truth: "...by the time today's workers who are in their mid-20s begin to retire, the system will be bankrupt. So if you're 20 years old, in your mid-20s, and you're beginning to work, I want you to think about a Social Security system that will be flat bust, bankrupt, unless the United States Congress has got the willingness to act now. And that's what we're here to talk about, a system that will be bankrupt."

Let's try this again, slowly, for those who, like the president, seem to be having difficulty with reality. Social Security will not be bankrupt, will not be flat bust in 2042 or 2052 or even, as the president has also claimed, by 2018. According to the deliberately alarmist projections of the fund's trustees, it will have exhausted the trust fund in 2042. According to the nonpartisan Congressional Budget Office, Social Security will be able to rely on the trust fund until 2052 and after that will still be able to pay 81 percent of scheduled benefits.

And that's if no changes are made to the current system.

Iraq New Terror Breeding Ground
War Created Haven, CIA Advisers Report

By Dana Priest
Washington Post Staff Writer
Friday, January 14, 2005; Page A01

Iraq has replaced Afghanistan as the training ground for the next generation of "professionalized" terrorists, according to a report released yesterday by the National Intelligence Council, the CIA director's think tank.

Iraq provides terrorists with "a training ground, a recruitment ground, the opportunity for enhancing technical skills," said David B. Low, the national intelligence officer for transnational threats. "There is even, under the best scenario, over time, the likelihood that some of the jihadists who are not killed there will, in a sense, go home, wherever home is, and will therefore disperse to various other countries."

Low's comments came during a rare briefing by the council on its new report on long-term global trends. It took a year to produce and includes the analysis of 1,000 U.S. and foreign experts. Within the 119-page report is an evaluation of Iraq's new role as a breeding ground for Islamic terrorists.

President Bush has frequently described the Iraq war as an integral part of U.S. efforts to combat terrorism. But the council's report suggests the conflict has also helped terrorists by creating a haven for them in the chaos of war.

"At the moment," NIC Chairman Robert L. Hutchings said, Iraq "is a magnet for international terrorist activity."

Before the U.S. invasion, the CIA said Saddam Hussein had only circumstantial ties with several al Qaeda members. Osama bin Laden rejected the idea of forming an alliance with Hussein and viewed him as an enemy of the jihadist movement because the Iraqi leader rejected radical Islamic ideals and ran a secular government.

Bush described the war in Iraq as a means to promote democracy in the Middle East. "A free Iraq can be a source of hope for all the Middle East," he said one month before the invasion. "Instead of threatening its neighbors and harboring terrorists, Iraq can be an example of progress and prosperity in a region that needs both."

But as instability in Iraq grew after the toppling of Hussein, and resentment toward the United States intensified in the Muslim world, hundreds of foreign terrorists flooded into Iraq across its unguarded borders. They found tons of unprotected weapons caches that, military officials say, they are now using against U.S. troops. Foreign terrorists are believed to make up a large portion of today's suicide bombers, and U.S. intelligence officials say these foreigners are forming tactical, ever-changing alliances with former Baathist fighters and other insurgents.

"The al-Qa'ida membership that was distinguished by having trained in Afghanistan will gradually dissipate, to be replaced in part by the dispersion of the experienced survivors of the conflict in Iraq," the report says.

According to the NIC report, Iraq has joined the list of conflicts -- including the Israeli-Palestinian stalemate, and independence movements in Chechnya, Kashmir, Mindanao in the Philippines, and southern Thailand -- that have deepened solidarity among Muslims and helped spread radical Islamic ideology.

At the same time, the report says that by 2020, al Qaeda "will be superseded" by other Islamic extremist groups that will merge with local separatist movements. Most terrorism experts say this is already well underway. The NIC says this kind of ever-morphing decentralized movement is much more difficult to uncover and defeat.

Terrorists are able to easily communicate, train and recruit through the Internet, and their threat will become "an eclectic array of groups, cells and individuals that do not need a stationary headquarters," the council's report says. "Training materials, targeting guidance, weapons know-how, and fund-raising will become virtual (i.e. online)."

The report, titled "Mapping the Global Future," highlights the effects of globalization and other economic and social trends. But NIC officials said their greatest concern remains the possibility that terrorists may acquire biological weapons and, although less likely, a nuclear device.

The council is tasked with midterm and strategic analysis, and advises the CIA director. "The NIC's goal," one NIC publication states, "is to provide policymakers with the best, unvarnished, and unbiased information -- regardless of whether analytic judgments conform to U.S. policy."

Other than reports and studies, the council produces classified National Intelligence Estimates, which represent the consensus among U.S. intelligence agencies on specific issues.

Yesterday, Hutchings, former assistant dean of the Woodrow Wilson School of Public and International Affairs at Princeton University, said the NIC report tried to avoid analyzing the effect of U.S. policy on global trends to avoid being drawn into partisan politics.

Among the report's major findings is that the likelihood of "great power conflict escalating into total war . . . is lower than at any time in the past century." However, "at no time since the formation of the Western alliance system in 1949 have the shape and nature of international alignments been in such a state of flux as they have in the past decade."

The report also says the emergence of China and India as new global economic powerhouses "will be the most challenging of all" Washington's regional relationships. It also says that in the competition with Asia over technological advances, the United States "may lose its edge" in some sectors.

Source record: 5181

Thanks for the comments on the ICF-5900W. I'm curious if a collector will be the high bidder, or someone who just wants to use it and appreciates its fine condition.

I would have liked to try this 5900W and a Panasonic RF-2200 side-by-side, but I've never owned this two models at the same time.

Speaking of nice radios, have you noticed this awesome Zenith Trans-Oceanic A600 on Ebay?
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=5743311111&ssPageName=STRK:MEWA:IT
My good friend John Bryant is the author of "Zenith Trans-Oceanic: The Royalty Of Radios", and this particular unit looks as nice as some of the models he used to own. A while back, John got out of the collecting side of radio, and sold off most of his Zeniths, including an unopened, new-in-the-box T-O 7000-1 model.

ranier lichtes top 5 portables (from 1987):

panasonic rf-B60
sony 2010
sony 2002
toshiba rp-f11
satellit 400
uniden 2021

sets he put in the desktop that could be in the above category are:

sony crf-1
sony ic-6800wa
sony crf-320a
satellit 650

so no where is the RF-2200

and ranier is a top authority in my book

I have two RF-2200's and enjoy them a lot. I personally rate them very high.
I would rate the 2200 in the top category but I don't think they are worth
over $200. more like $150 in excellent condition

1234. LOOK AT THIS!!

Newsgroup: rec.radio.shortwave
Date: 2005-01-15 19:32:42 UTC
From: matippc@gmail.com
Message-ID: <1105817562.008225.266810@f14g2000cwb.googlegroups.com>
Source record: 5184

I swear it works! I just did it, and it worked!!!

Instructions:
Please read this over completely.

It is extremely powerful and will pay you very well.
This is not MLM or a ponzi scheme or gifting.
All funds come from the company's advertisers so
You Pay Nothing! -- not one penny.
The company pays you to promote it -- you don't pay them.
It doesn't take any money to start, and takes only
5-10 minutes to set up. It can pay nearly
$350,000 at NO Cost to You except a little time.

The Details:
Carefully follow the instructions below...and hopefully you may be
willing to give it a chance...after all the opportunity is totally
FREE...nothing out of your pocket now or ever!
You will make $100 in the next (3) minutes if you want it... WITHOUT
SPENDING A DIME!
This will cost YOU NOTHING! - HONEST!

"Yeah right," you say.

You get $100 just for joining and the referral potential earnings is
STAGGERING! You will NEVER SEND MONEY, NEVER SPEND anything and NEVER
ASK FOR MONEY, but you will make THOUSANDS!

Just follow the steps below.

* * * THREE STEP PROCESS * * *

Read Very Carefully & Take Your Time for Accuracy
Listed below are three e-mail addresses & sign-up
URLs.

(1) First, sign-up at RichMails.com - Under the first (1st) ID and
You'll get $100 just for joining. [You can't use AOL for this. I would
suggest free
www.Yahoo.com or another email account you might have.]
So Click on the #1 Position's url and Sign-up.

(2) Next, send an e-mail to the #3 - third person on the list and put
in subject line: "I signed up under #1"

(3) Now, Copy and paste this letter into a file. Delete the person in
the #1 position of this letter. Move the other two URLs - UP to #1 & #2
positions

respectively, and INSERT YOUR information at the BOTTOM, in the #3 position.

Please be sure you copy or type YOUR e-mail and your new RichMails sign up URL correctly and the other 2 addresses also!

Replace your own name where mine now is.

FINAL STEP
Send this ad until you have 3 responses saying they signed up under #1.
That's it, only 3 responses, not 6 or 10 or 20, (just 3)!
Of course, you can mail more and make more, too!
When your address gets to the #1 position, you will have (27) people signed up under you!

Not bad, but ONLY THE BEGINNING. A short (very short) time later, each of those 27 people will have 27 people signed up under them which equals 729, and so on. RichMails pays you for everyone who subscribes under you for three levels, and it adds up fast!

They make their money from the advertisers.

See calculations below...Here's how the payout works:
Your own sign-up $100
First level is 27 X $25 referral 675
Second level is 729 X $25 referral 18,225
Third level is 19,683 X $25 referral 492,075

Here is the list of names:

#1:
http://www.RichMails.net/cgi-bin/signup.cgi?r=tangirl1042000@yahoo.com
#2:
http://www.RichMails.com/cgi-bin/signup.cgi?r=windblade20@hotmail.com
#3:
http://www.RichMails.com/cgi-bin/signup.cgi?r=matippc@gmail.com

Mail to me with the subject: (I have signed up under #1)
TO: matippc@gmail.com

A WORD OF CAUTION:
"IF YOU CHEAT, YOU LOSE"! And, the people above you, know it!
This is the reason you would lose: It must go through all (3) levels to work!
The Money builds up and goes to you! If you type your information in the #1 position, you will only make, maximum, $75!
Once you have your page set up, simply advertise it everywhere and anywhere(spamfree or course) and watch your income e-x-p-l-o-d-e-

Don't forget funding your favorite charity!
See ya at the Top!! May you be richly Blessed

Sincerely,

Matt.-

I guess he's on a bent to piss me off. This week it's a slam on Christians. A little late for the holiday but that just falls in line with nothing else right about it. Christ did not exist was the point of the, I guess you would call it, commentary. I think he is trying to be funny but he is not. Radio Netherlands should just blow this guy off. Independent thinking does not mean broadcasting ignorant thought or blatantly offending other peoples religion.

Wonder if Mr. Green will be man enough to insult Muslim's next week by insisting Muhammad did not exist. He just makes himself out to sound like some Trolling jackass in the news group. Robert Green, on the air international SW Troll and coward.

This was during the otherwise great programming on the weekend broadcast from 19 to 21 hours UTC. Robert only gets to puke on 5 minutes or so of the broadcast. Why Radio Netherlands bothers with him is beyond my understanding.

I had a very good signal on all the following frequencies during the 19 to 21 hour broadcast.

17,875
17,810
17,725
15,315

All these frequencies should come in well for anyone in NA or CA.

He is just making fun of other peoples religious beliefs. This will only
generate bad feelings on the part of people that believe. What's the
point of doing this other than just being disrespectful?

Mr. Green is a coward knowing that he can get away with mistreating
Christians in a world wide broadcast. Let's see him do the same for
other religions that don't take kindly to this kind of treatment if he
is an atheistic.

I have a question for you. Why don't you find such commentary offensive?

There's one comparison which comes to mind. The BBQ joint generated
interest among BBQ enthusiasts, but that interest didn't translate to a
broader interest among the general restaurant consumers. Good marketing
would certainly have helped.

DRM doesn't seem to have much interest even among radio enthusiasts, if the responses on this forum are any indication. Expecting DRM to generate interest in shortwave radio among casual radio listeners looks like somebody's pipe dream.

> DRM may or may not be a (good, better, best) broadcasting service. But
> without a decent marketing plan, it would be pure luck for *any* product to
> succeed (IMHO).
>
> -=jd=-

Monopolies in vital services don't need marketing. Marketing becomes increasingly important as the markets become more competitive.

DRM has the monopoly on shortwave digital modulation for international broadcasting. If people want digital SW broadcasting, DRM is the only game in town.

So, what's the best way to market digital SW radio? With a gimmicky name? If the DRM wizards asked me, I'd suggest they need to develop a low cost, easy to use, long battery life portable radio. I don't know if such a radio is possible.

Or the old line international broadcasters could broadcast programs which the casual radio listener would want to listen to. But, since the Cold War and colonial era have both faded away, I don't know if that's possible, either.

If Alex Jones and the Prophet of God go to DRM, I'll be right there with them.

FO&A,
.
160 METER {BAND} BALANCED COAXIAL RECEIVING LOOP ANTENNA
- - - Article and Website By KN4LF
.
160M LOOP INFO => http://www.kn4lf.com/kn4lf40.htm
.
KN4LF Writes "My 160 meter receive loop antenna has a diameter
of approximately five feet, with the bottom of the loop mounted
approximately four feet above ground on a AR-35 Hy Gain rotator.
The support system is made up of 1.5" OD schedule 40 PVC pipe.
The preamp is made by Gary Nichols KD9SV and is sold by Radio
Ware Radio & Bookstore. The preamp provides up to 22 db of
amplification with a high dynamic range and has tuned broadcast
band station filtering on the input and output! The rig here
is a Yaesu FT-1000MP Mark V Field. Also if you would rather
have someone build you a balanced coaxial receiving loop
contact KC2TC."

1259. Shielded balanced feedline report

Newsgroup: rec.radio.shortwave
Date: 2005-01-16 01:32:19 UTC
From: r2000swler@hotmail.com
Message-ID: <1105839139.425194.66750@f14g2000cwb.googlegroups.com>
Source record: 5258

Sonet the afternoon experimenting with
some new ideas for a feedline. We tried
shielded and unshielded (lamp cord).
The unshielded was bad. Very bad.
The shielded was the best, from a low
ingress, or no signals from my radio
pc getting back into the antenna.
Got ot: members.aol.com/WA1ION/nrants.pdf
to see the basic setup. I halved R1 and put
5 Ohms in series with each side. The 270 Ohm
does make a clear difference in this application.
I grounded the shiled at the antenna only.
The shield made no connection at the 1:1
transformer end. Both of the inner balanced pair
were connected to the 1:1 and brought into the radio
room as shown. The 1:1 is mounted in an altoids tin
that is grounded to the bulkhead outside my radio room.
No cable is grounded at thet end.
There was no trace of birdies from my PC, infact there
was a minimum, much less then before, of impusle static
when I turned lights on and off.
The TV/VCR/DVD produced no birdies. Themicrowave did jam
everything.
This cble was so old that the printing was so faded that
we couldn't read the cable number. I will try to find
a comparable smaple and report the number here/
At this point I have to say that a shielded balanced
feedline is much better then anything else Ihave tried.
Microphone cable was dead. With it I got NO signal at
any freqeuncy.
Terry
The standard members.aol.com/WA1ION/nrants.pdf connection
is a great feed system and makes and ideal starting point
for any serious antenna experimentation.
Terry

Email no longer checked due to terrific spam,
and some serious hate mail. Someone in this
NG hates the idea of using a matching transformer
ona recieving antenna. Their loss.

I'm hearing "Varmint!" on 5 MHz in southeast Texas, Saturday night
(U.S. time).

There's no sign of Sam on 2.5 or 10 MHz.

This is just too bizarre.

I tried 5 and 10 Mhz at 0100 and didn't note Sam or any other unusual
signal, just WWV as usual. Sam was so strong at my location the first
time around that I was able to hear him on my Degen during the day. No
such luck this time around. It IS certain that if this is a pirate (not
a government operation of some kind) interfering with WWV will get one
busted in a hurry.

The Sam activity observed in December would seem to point to a spy or some other government operation of some kind. The Sam transmissions were neatly spaced over four different frequencies audible at different levels of signal strength at my location, indicating four different transmitters in four different locations acting together. It is unlikely that a prankster would go to such trouble. The big question is what it means, if indeed it's a spy station. It was theorized that it was a "go signal" for some sort of spy operation. But since it's back at reduced power (my check of 5 and 10 Mhz at 0100 showed nothing unusual) that would not seem to be the case.

1265. Partly OT: Why wasn't this NASA launch mentioned on the National News?

Newsgroup: rec.radio.shortwave
Date: 2005-01-16 03:12:36 UTC
From: Warren <juny57@rcn.com>
Message-ID: <rtmju09knj7ejrskkbcml0r18i82k5aon1@4ax.com>
Source record: 5265

Unlike other recket launches, this one, called "Deep Impact", was completely omitted from almost all national news broadcasts.

Here is the link:
http://deepimpact.jpl.nasa.gov/

Usually NASA wants to brag about their accomplishments but not this time. One wonderes why?

Does "Deep Impact" have a second meaning? I don't know. Just wonder what any other group readers think or know about this event other than the stated reason; the study of what is inside a Comet.

Your input encouraged and welcomed. Maybe we can monitor some NASA frequencies - does anyone know of any HF frequencies used by NASA that we can monitor?

Warren

I, too am hearing Sam on 5 MHZ with a strong signal in North Texas.
This is almost certainly a covert "go" signal from our government.
Could be an exercize (most likely).
It's on WWV at 5 mHz because that provides a "BFO" for cheap SW
receivers. I will note the times I hear him.
Please note those you hear.

Loud 3:22:50 Z
Loud 3:23:35 Z
Weak 3:24:05 Z

Like that.
Let's see if we can do a little snooping of our own.

I don't think you can draw that conclusion, since at any given time,
different frequencies are going to have different propogation (and
noise) characteristics.

However, I agree with your conclusion that it wasn't some prank simply
because of the precise timing of the signals and the apparant data
burst at the start.

Sam in North Texas, 5 mHz

This pattern:

moderate 3:25:25
Loud 3:26:10
weak 3:27:25
weak 3:28:10
Loud 3:28:50
Loud 3:29:25
moderate 3:30:10

was followed by this pattern:
3:32:08 weak
3:32:48 weak
3:33:28 weak
3:34:08 weak
3:35:28 weak
3:36:08 loud
3:36:48 weak

Sam seems to have stopped at this time,
at least in North Texas.
The pattern likely carries some intelligence in itself.

More like "Uncle Sam," if you ask me.

D.S.

I agree. That sort of rapid oscillation of the signal strength doesn't happen by accident. I take back my earlier observation that it wasn't a go signal-apparently the idea that it IS a go signal from the CIA or some other spy agency is credible, judging from the posts here. Any speculation as to what it indicates? There was no major news making event that happened after the Sam transmissions in December (unless you want to theorize that the tsunami was caused by HAARP), but for the government to go to this sort of trouble indicates that it's SOMETHING big.

No, they talked about getting material ejected from the comet to
study, and not knowing what the result of the collision would be.

While it's likely this is part of a large exercise,
it is possible for it to be a "real deal."
A lot of operations that affect the safety of
our nation go down without you or I hearing a
single thing about it, now or later.
I could tell you about some from the 1980s,
but then I'd have to kill ya ;-).

1276. More News of Radio Amateurs' Work in the Andamans

Newsgroup: rec.radio.shortwave
Date: 2005-01-16 05:35:41 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cscufdcrn1@xuxa.iecc.com>
Source record: 5278
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

News from the Echolink Tsunami Relief Net indicates that a limited amount of health and welfare traffic is now flowing via amateur routes, although there is still a lack of information from some locations. News of the amateur operation in the Andaman Islands demonstrates the value of amateurs providing emergency communications.

Electricity and landlines are yet to be restored in Little Andaman, where there is heavy damage. Amateur radio volunteers have been providing a helping hand to the Andaman and Nicobar administration and assisting governmental and non-governmental agencies by coordinating the rescue and relief operations locally, and passing third-party welfare messages. From the original small DXpedition team of five Indian amateurs on the Andaman Islands at the time of the earthquake, there are now between 25 and 30 amateurs there. They have been operating from various parts of the Andaman and Nicobar Islands, including a relief camp housing 2500 tsunami victims. Amateurs involved on the islands include VU2JOS, VU2LIC and a team of eight volunteers from Gujarat headed by VU2CPV, who is also a police official. Many of the amateurs are using VHF hand portables for local coordination.

Whenever they have messages for the mainland, these are relayed through their HF base stations located in different parts of the Andamans, generally on 7095kHz. There is also emergency traffic on 14190 and 21245kHz.

Please keep these - and any other frequencies heard to be carrying emergency or health and welfare traffic - clear. Thanks to RSGB Radio Communications Voluntary Services coordinator Paul Gaskell, G4MWO, for this report, which was compiled with information supplied by VU2MUE and G4HPE.

According to The Daily DX, compiled by Bernie McClenny, W3UR, all Indian amateurs were authorised to operate from the Andaman and Nicobar Islands from 29 December in order to "assist the Civil Authorities in handling the messages pertaining to the disaster". Prior to December, there had been a 17-year ban on amateur radio operations from the Andamans and Nicobars.

A detailed report on the involvement of radio amateurs in the tsunami disaster relief operation can be found on the RSGB website at www.rsgb.org

For a more detailed report on the involvement of radio amateurs in the tsunami disaster relief operation please click http://www.rsgb.org/news/tsunami.htm

1277. Major Geomagnetic Storm Alert

NW7US Propagation Alert

January 15, 2005

During the series of flares from solar sunspot region 0720, at 0614 UTC 15 January 2005, a strong solar flare and radio sweep event was observed. This indicates a full-halo coronal mass ejection (one that is headed directly toward Earth). The start time of this Type II burst was 0554 UTC 15 January 2005. The shock speed is estimated at 1300 km/s - this is a MAJOR SHOCK. An extremely strong Type IV event followed the Type II event. The sweep looks optically correlated with the flare from region 0720. (To see the sweep, browse to

It is now expected that the start of January 16 will see strong geomagnetic storminess, increasing to MAJOR GEOMAGNETIC storminess, then declining late on January 17 to active levels. This could well be a major Aurora event, as well. *STRONGLY DEGRADED HF PROPAGATION CONDITIONS ARE EXPECTED* from 16 January through 17 January 2005.

Additional details will be reported when available.

Internet noise threatens emergency radio

4 January 2005

New Scientist
Barry Fox

After the tsunami hit Sri Lanka on 26 December, Victor Goonetilleke, head of the island's amateur radio society, delivered a short-wave radio set and two 12-volt car batteries to the prime minister's emergency headquarters in Colombo. At the same time, three of his friends drove through the devastation to Hambantota, on the hard-hit south-east coast, where they set up another battery-powered short-wave radio.

For two days, while the military struggled to restore electricity supplies and phone lines, the prime minister was able to use the short-wave link to talk to staff on the ground.

Short-wave signals from Sri Lanka, the Andaman Islands and mainland India also helped to spread news of the disaster around the world. The same happened after the 9/11 attacks and last year's hurricanes in the Caribbean. When phones and mains electricity are down, making the internet unusable, short-wave radio enthusiasts are able to maintain emergency communications.

But not, perhaps, for much longer. Plans to deliver broadband internet signals to homes and businesses down mains electricity cables, rather than telephone lines, could cause interference that will drown out the faint signals from distant short-wave transmitters.

Unshielded cables
Power companies in the US and Europe are pressing ahead with the technology, with the aim of setting up in competition to existing phone-based services. The downside is that the packets of internet data pulsing down unshielded mains cables makes the cables behave like aerials that send short-wave interference beaming out over a wide area.

Unless interference of this kind is tightly controlled, it could spell the end for emergency short-wave communications. "A few extra decibels of interference from future networks and I would not have been able to hear the news from amateurs in Sri Lanka, India and the Andaman Islands," says Hilary Claytonsmith of the International Amateur Radio Union's UKbranch.

The threat began when the US government gave the go-ahead to broadband over power line (BPL) technology in October. And the European Commission (EC) is close to approving its own version, called power-line communications (PLC). The names are different but the technology is the same: broadband data is

sent into people's homes as a high-frequency signal piggybacked on the 50 or 60-hertz mains supply.

Unhappy coincidence
Because the mains is a noisy environment with ever-changing patterns of interference from sockets, switches, control circuits and electric motors in appliances, the power-line data must be spread over many high-frequency carrier signals if it is to be delivered at the 5 to 10 megabits per second that these services are aiming for.

The carrier frequencies used range up to 30 megahertz - which by unhappy coincidence is the radio band that travels best around the world. It is used for amateur radio, short-wave broadcasting (such as the BBC World Service and Deutsche Welle) and includes several dedicated emergency frequencies (see graphic).

Because these frequencies bounce off the ionosphere, they carry long distances, which makes them ideal for long-range intercontinental broadcasting.

When the US Federal Communications Commission (FCC) gave the go-ahead to BPL, it ruled that at frequencies up to 80 megahertz service providers must use filters on their household equipment. These could be set by a service engineer to chop out any internet transmission frequencies shown to be causing interference to any short-wave radio receivers nearby. The EC and the European Committee for Electrotechnical Standardisation (CENELEC) are trying to set similar filtering rules.

Deciding on importance
But radio amateurs fear that the rules will allow the filtering to be lifted if it is having a serious effect on internet access speeds. The EC says it wants firm rules that balance "technical, social and economic" factors against the "importance" of services which suffer interference. But who is to decide what is more important, and on what grounds, the radio amateurs ask.

Michael Copps, the one FCC commissioner who opposed BPL, believes the organisation has made a rod for its own back. It is going to have to "work hard to monitor, investigate and take quick action" over any power-line internet interference to radio amateurs and others, he says.

Some technical fixes may be in the works though. The BBC, for instance, is developing a PLC modem that makes use of the fact that the short-wave frequencies for broadcast radio change throughout the day, as ionospheric conditions dictate. The BBC modem detects which frequency bands are in use at any one time - and filters them out. Such technology is not part of any PLC or BPL system currently in trials, however.

Europa Radio International has acquired a refurbished 5 kilowatt AM transmitter which is to be installed at a site in the former Soviet Union. The transmitter will be shipped next month and, after conversion work to double its output power and the antenna system has been upgraded, we aim to have it operational by late Summer 2005.

Whilst the transmitter will be owned by us, it will be operated and maintained by a former engineer at the (until now) redundant site.

We anticipate that we will have some air-time available for hire at a later date.

In the interim Europa Radio International will continue to use the excellent transmission facilities in Latvia and shortly, a second transmitter in the United States.

HISTORY:

We carried out our first test broadcast via the 100kW Short-Wave transmitter located at Ulbroka near Riga in Latvia.

The transmission took place on September 5th, 2004 and the response to the broadcast was overwhelming with listeners contacting us from all over the World

> If Alex Jones and the Prophet of God go to DRM, I'll be right there
> with them.

They have taken their shot at marketing and blew it big time. They came out and presented DRM as an open system, which it is not. They state that it will sound better in the same bandwidth, which it can not. They state that it can stay in the current channel assignments but does not spreading out beyond + / - 5KHz.

DRM = Deception Radio Mondiale

It is just a different system with some pluses on one side and drawbacks on the other side of "better than the current analog system."

For digital to be unquestionably better it would take another approach than DRM, which would use digital signals to better adapt to the resultant distortions HF of propagation.

Newer and different does not equate to better.

hmmmmmmmmm
I find that rather funny. they mentioned it on all the science stations, the
local news/national news almost 3 weeks ago. it wasn't played up, but it
was KNOWN.

The Business Week article only mentions wasted spectrum in the TV bands, not the SW bands. You may not be aware of this, the SW bands have much, much less available spectrum and not nearly as well suited for short range communications as VHF/UHF wavelengths.

The RF-2800 and 2900 were about ten years before the B65 and B60. The
latter two were real PLL designs, not analog with a frequency display
(counter) like the 2800/2900. The 2900 is identical to the 2800 except
it has a fluorescent display instead of red LED's on the 2800, which
saved battery power. The 2800 display only worked for AM/shortwave
tuning, not FM. The current Tecsun/Grundig S-350 is loosely based on the
RF-2800/2900 but it does not have dual conversion like the two
Panasonics did.
I've been trying to locate a National Panasonic DR-29. This version was
not sold in the US. It had a built-in preselector to reduce images and
overloading in strong signal areas like Europe.

It remains to be seen (tested in court) if shortwave listeners have any
right to hear foreign broadcasts, free from local interference created
by BPL. This will be determined if/when someone sues a BPL company for
interfering with shortwave reception. It will probably be a ham' (ARRL?)
not an SWL that starts this litigation process.

Add to that a cryogenically cooled (liquid nitrogen) front-end (RF amp)
to greatly reduce the thermal noise from the componants in that circuit.

Speaking out
By Paul Donovan
The Sunday Times
January 16, 2005

On the day the waves rose up in the Indian Ocean, there appeared the first of only two obituaries on a modest man from the Highlands who had deep knowledge of the languages spoken by those swept away - Thai, Sinhala, Indonesian and English. His name was George Campbell, and he could apparently speak and write in 44 languages. Once listed in the Guinness Book of Records as "the world's greatest linguist", he worked for the BBC World Service for 40 years, retiring as head of the Romanian section.

Campbell, who was 92 when he died, appears never to have been written about in his lifetime, and the World Service has not even mentioned his passing in its own output. Yet his gifts were extraordinary. When he was a child, a dog attacked him, leaving him with a stammer. His teachers thought he was slow and sat him at the back of the class. There, from books he found at Inverness fish market, he taught himself the basics of Spanish, Portuguese and Danish, as well as the French and German on the syllabus. His natural bent became his life's work. In retirement, for fun, he taught himself Basque.

Some may dismiss that as arcane and obsessive, the product of a vanished era of the gifted amateur. Does English not now dominate the globe? Has it not marginalised foreign tongues? Campbell lived long enough to see that such arguments were misplaced. "Other lan- guages are actually growing in importance," argues Chris Westcott, director of BBC Monitoring, which (with some help from the Americans) listens to the world's news agencies and radio and television output in 100 languages, including highly sensitive ones such as Korean and Uighur, which is spoken by a Muslim minority in western China. "This is because the web has given a global footprint to languages once confined to a relatively small area." The World Service itself broadcasts in 43 languages (including English, though not Korean or Uighur). What is less well known is that each of them can be listened to on, and has a section of, the BBC World Service website - an array of strange scripts and fonts.

Politics, as well as the web, gives buoyancy to languages. The war of words rarely calls a ceasefire. For all international broadcasters, of which the BBC is only one, Arabic has become vastly more important as a result of 9/11 and the Iraq war. (It was the first of the BBC's foreign- language ser-vices, launched in 1938 at the behest of the Foreign Office to counter Mussolini's Arabic broadcasts denouncing "British imperialism".) The break-up of both the Soviet Union and Yugoslavia has led to the emergence of new republics with a renewed nationalistic impulse, expressed in languages such

as Kazakh, Kyrgyz and Macedonian.

So, even if there are no George Campbells any more, what he stood for - a respect for languages - is still of vital importance in the radio world. "I don't think we have anyone here at Caversham who can speak 44 languages, but quite a few have mas- tered six or seven," says Westcott. "Being barely literate in one, I'm rather in awe of them. I think sometimes we're in danger of under- estimating the linguistic abilities of the British."

The 2200 got it's reputation as a good MW Dx'ing receiver because, being
an analog design, it has less circuit noise than some digital portables.
Otherwise, the 2200 is easily surpassed by many portables, particularly
the Sony-2010, which can capture weak signals with it's sync' detector,
better than the 2200 can without that feature.

What's the point? This article is about the presumed waste of TV spectrum.
It doesn't mention SW at all.

SW isn't nearly as well suited for short range communications as UHF/VHF.

Such a system might be technically better, but would people buy it? The synchronous detector reduces the problems with SW reception and a radios with synchronous detectors have been around for years. But radios with synch detectors haven't taken a large percentage of the radio marketplace.

Technically oriented people see a problem and expect a technically oriented solution. International broadcasting isn't what what it was twenty years ago. Thinking that people are being driven away from SW by SW radio's sound quality is an understandable reaction. But, if sound quality is really the reason old line international broadcasting is declining, shouldn't radios with sync detectors have been much more successful?

As I see it, sound quality is irrelevent to the decline of old line international broadcasting. Governments are less interested in public diplomacy since the end of the Cold War. Also, people with interent access have the world's news at their fingertips when they want it, not when the broadcasts get through.

The problem with DRM, as I see it, isn't marketing, it's market research. It seems this scheme got started without a firm answer to the question, "Will people really want to buy this thing?"

The capacitor problem occurred a few years ago when an Asian company tried to copy the chemical formula for the electrolytic paste used by a well known capacitor manufacturer. They got the formula wrong and made millions of bad capacitors which were used in computers and other equipment. I have a motherboard which has some leaking/bulging electrolytics. I expect it will work fine again, if/when I get around to changing them. But by then, it will be obsolete. :-)

The US government apparently didn't agree. They used to intercept and
open mail, sent by SWL's to the radio stations of communist countries,
on a regular basis. It was common practice in the 60's and 70's. In most
cases the letters were eventually delivered to their destination, albeit
in a somewhat used condition. One would hope this has stopped but I bet
any letter sent from the US to the Voice of Korea or Radio Havana Cuba
may not only fail to be delivered but is opened and scrutinized.

Depends on the water content of the rope and what it's tied to for
support. It would be most noticable in a humid climate near the ocean.

Probably a bunch of radio geeks playing around. With the Internet,
it's too easy to coordinate this sort of stuff. A private IRC channel,
a web site, or somebody sophisticated enough to be goofing with VoIP or
setting up their own streaming audio server.

One time I got into a BS session with a guy about how he and his buddies
wired up northern Idaho with a chain of freeband repeaters so they
could make phone calls and the usual two way radio stuff. 40 years ago.
So it looks like a bunch of "cool dudes" are following in the footsteps
of the previous generation. Probably with the same transmitters.

Well, I heard it here on 15.000 MHz (Jan 16, at 21:11 and about 40
seconds). I'll stick with a bunch of kids and a .wav file.

Let me guess. You hit the ceiling when he compared Jesus with magician
David Blaine and said the Resurrection was done with mirrors. (BTW, I
didn't hear him say that Jesus didn't exist, just a number of miracles
like the "water into wine" and "the loaves and fishes").

>funny but he is not. Radio Netherlands should just blow this guy off.

I got some of that on either 11615 or 11655, just tuning around about
19:40 UTC. Since it was in the middle of something I usually get
in the evening, I didn't note the exact frequency.

As usual, I tried to tape the 04:00 UTC broadcast on 6165. I got
Green, but dead or dying batteries in both my FR-200 and my cassette

tape recorder truncated Amsterdam Forum. Pity, it sounded like a real shouting match about the Iraq election.

While your shortwave radios are blasting static over the next 48 hours, turn on the FM radio and listen for distant signals. Look north after sunset Jan 17&18 for northern lights. The latest Kp index as of this morning was 7. See below for more information.

Space Weather News for January 16, 2005
http://spaceweather.com

Two coronal mass ejections (CMEs) are heading toward Earth and they could spark strong geomagnetic storms when they arrive on January 16th-17th. Sky watchers should be alert for auroras. The CMEs were blasted into space by M8- and X2-class explosions above giant sunspot 720 on Jan. 15th.

Visit spaceweather.com for more information and
updates.

You will not pick up the aviation bands on shortwave (except for Gander)
You will also not pick up police, public service and that sort of thing.
You need a scanner for that.
Look for a radio that receives from about 2 mHz to 29mHz continuous.
That'll get you your shortwave. Get one that receives SSB (single side
band).

Then get a scanner for the aviation, police stuff.

That is, unless you get a scanner similar to my Yupiteru 5100 or
whatever it is. That picks up everything in the known universe.

Read the suggested material. It'll answer a lot of your questions.

Or, do a google search of this group for best radio and variations of that and just get one of those.

My new Degen 1103 is a winner. So is my Yupiteru MVT 5100(?).
I guess I'll have to look at it.

1323. FRG-100

Newsgroup: rec.radio.shortwave
Date: 2005-01-17 19:43:42 UTC
From: Soliloquy <Notvalid@notvalid.com>
Message-ID: <Xns95E195D329ECFSoliloquyTriesHarder@216.168.3.44>
Source record: 5323

Probably very old news. I see that the Yaesu FRG-100 has been discontinued. I wrote to Radio Netherlands a few years ago when they prematurely pronounced the FRG-100 dead. I had to write to Yaesu to confirm that it was still a current offering, then informed that Radio Netherlands that their information was incorrect. They eventually changed it to indicate that it was a current model.

Well, that has changed. Yaseu is not listing it on their site as a current offering anymore, and various references on the internet list it is discontinued this year.

The passing of a superlative desktop radio is a tragic thing. The world is being flooded with inexpensive portable models, people that own some of these and never graduate to a model the likes of the FRG-100 don't know what their missing. I have the Yaesu FRG-100, the Yaesu FT-840, and the Icom R-75. (as well as a bevy of portables) They each have their own virtues and shortcommings.

As of this writing, shortwave is non-existant on the air. The sun has been up to no good again, and propagation is suffering.

For those of you that have not visited the Space Weather Sites, here are some links.

http://www.sel.noaa.gov/alerts/alerts_timeline.html
http://www.sel.noaa.gov/today.html

Auroral Activity http://www.sec.noaa.gov/pmap/

http://www.spaceweather.com/

Unrelated to propagation, but interesting
http://www.sundog.clara.co.uk/atoptics/phenom.htm

well, its a little hard to save when the money you get is spent trying to keep food on the table and a roof over your head (it is amazing how fast $600.00 a month goes away to little effect).

> him on this group.
I never purchased anything from him and I don't plan on it. in fact, I generally don't purchase much from e-bay unless I have some assurances in writing as to the viability of the item in question.

I don't watch much TV anymore (most of what is on there is CRAP) and even the news networks (fox, et al) are getting boring (another day's worth of the same old shit).

The only unwanted advertising I get anymore is in my e-mail box and I have taken the time to filter that to the trash (for the most part). sooooo. unlike most of my countrymen, I am a little better off (for 2 reasons, I can't afford to save and I can't afford to spend).

contrary to what others might say, living on "the dole" is actually very hard work.

I use a FRG-8800, and while it has its quirks, it works great for me.
Others recommend the FRG-100, AKA "Century Frog".

Thanks a *lot* for all the info. I am finally making some sense out of all this! Much more now then when I didn't even post anything here to begin with. But this is a lot to digest... but thanks to you guys I got a lot of resources here that I can chew on - finally!

You see I was wondering if I could buy an "all wonder" radio that could pretty much get all the different types of bands out there. You see that is what I thought 8 band or 10 band SW radios were all about - that each SW band was related to MW/LW/PS and so forth, but I guess not. Well I could get an "all wonder" radio but it would cost me a pretty penny. So what I am going to do for now is either buy a inexpensive "GE Superadio III" or C. Crane for good AM reception. And I'll just buy a descent little SW radio to test the waters and see what I like and don't like.

I found a SW radio here in town by the brand name "AirCastle". Fairly old radio and the reception isn't all that great but I get: SW bands, aviation, police, public scanners, and so forth - A little this and a little that. It's an old radio but descent reception for a beginner. After I wear it out then I get something significant.
Thanks again.

-Jer

It seems you are looking at cheap Chinese made, analog tuned receivers.
You will be severely disappointed in their performance and will quickly tire
of short-wave radio.
Get a digital tuned radio such as the Sony ICF-SW7600GR. It is very easy to
operate and
is a stellar performer in its class.

The Patriot Act has not to date been used against any foreign national in
conjunction with an act of terrorism or in connection with terrorists. It
has been used, thusfar, only against US citizens.. something which was
promised it would never be.

The most recent is the charge of a US citizen for a non-terrorism connected
episode of criminal stupidity...

1338. Recent Hawaii trip.

Source record: 5338

1 or 2 of you may remember I was off to visit Hawaii just before Christmas, complete with SW100E, and would report back on any DX had from the Waikiki area of Honolulu. As a matter of fact, was pretty much a lack of anything to hear on HF, even with the wire-reel antenna added on. New Zealand was about the only one, apart from WWVH, coming in loud and clear. I can only speculate that conditions were not too good in those 2 weeks. Either that or I should've stuffed the AR7030 in the baggage somewhere! That served me well when we lived there for a year and a half. Anyway, turns out we were rather busy with vacation activities, so DXing took a back seat.

On the plus side, did a bit of AM/FM searching on the rental-car stereo (Chevy Cavalier). Was pleasantly surprised at how many could be heard, which were difficult/inaudible on the Sony. Have a newfound respect for car radios!
Logged 3 other islands, apart from Oahu, on both AM and FM (Kauai, Maui and Hawaii itself). In all, 24 off-island and some 41 locals. If anyone wants to see the list, I can post.

It was great to see Hawaii once again, visit my Mother-in-law, hang out on Waikiki beach, partake of the amazing cuisine (looks at swollen waistline :-), and generally enjoy the novelty of Christmas paraphernalia in 85 degrees heat. For a Scotsman, that is very hot weather!

Consider myself lucky to afford such a trip, and hope that we can get there another time, before too long. It's an amazing place.

Couple of pics -

View from Diamond Head Crater, one of my favourite pics -
http://www.1r5.net/pics/honolulu_from_crater.jpg

View from Aloha Tower, with Scottish sailing ship "Falls of Clyde" being restored in harbor -
http://www.1r5.net/pics/honolulu_harbor_ship.jpg

kind regards (and good DX) to all,

Ian Smith, Clydebank, Scotland (10 miles from where that ship was built)

I never tried any of these. I use RF gain a lot and I don't think any of
these have it. Shoot, even my Sony 7600GR has a variable attenuator. I bet
they sold a lot of the FRG-7's.

1341. Subverting the press with propaganda on the rise

Subverting the press with propaganda on the rise

President BUSH has repeatedly attributed the 9/11 terrorist attacks • and, for that matter, virtually all hostility directed toward the United States by the Islamic world • to their envy and resentment of our way of life, our constitutionally guaranteed freedoms. "They • hate America because we love freedom," he said in Minneapolis 10 months to the day after 9/11.

This is, of course, self-serving claptrap that ignores the reality that Islamic extremism is, to a great degree, a reaction to "several decades of specific policy disagreements with the U.S.," as James Fallows of the Atlantic Monthly told me last year.

But as appalled as I am by Bush's willful misreading of history, I'm even more upset by his hypocrisy. He seems determined to destroy the very foundations of American democracy that he insists are our bulwark against our enemies and the cause of our enemies' hatred of us. He launched a preemptive war against Iraq by lying to the American public. He helped create an atmosphere in which the torture of enemy prisoners in violation of the Geneva accords was tolerated, if not encouraged. And his administration has consistently tried to subvert our free press by masking government propaganda as legitimate news and opinion.

The most recent example of the Bush administration's attempts to manipulate the media • and the American public • came to light about 10 days ago, when USA Today disclosed that the Education Department, working through a public relations firm, had paid an African American media pundit $240,000 to promote the president's No Child Left Behind Act with minority groups.

Armstrong Williams, a conservative commentator, promoted the law on his syndicated television program and in his syndicated newspaper column without disclosing that he was being paid by the Department of Education to do so.

This violates the most basic journalistic ethics, and Tribune Media Services, which syndicated Williams' column (and which is a subsidiary of Tribune Co., owner of the Los Angeles Times), announced that it would stop syndicating his column.

Because several federal laws prohibit the use of taxpayers' money to influence congressional action or polices of the U.S. government, prominent members of Congress are now demanding an investigation.

In a week when the big media story has been the report on how CBS and "60 Minutes" screwed up a story on Bush's National Guard service, I've been surprised by the relatively little attention given to the Armstrong Williams story. This is not to minimize in any way the shamefully unprofessional behavior of CBS. But the Bush administration has behaved even more shamefully – consistently – and used our tax dollars to do so.

Continuing illegal activity

The Williams case was not the administration's first effort at covert propaganda.

Shortly after 9/11, reports began to circulate that the administration's Office of Strategic Influence was planning to plant false news stories in the international media. In 2002, amid much controversy, the office was shut down. But as my Times colleague Mark Mazzetti subsequently reported, "much of OSI's mission – using information as a tool of war – has been assumed by other offices throughout the U.S. government."

In fact, Mazzetti wrote last December, "a young Marine spokesman near Fallouja appeared on CNN [on Oct. 14] and made a dramatic announcement" signaling the beginning of "the long-awaited offensive to retake the Iraqi city."

But the Fallouja offensive did not start until three weeks later. The CNN announcement, Mazzetti said, was "an elaborate psychological operation – intended to dupe insurgents in Fallouja and allow U.S. commanders to see how guerrillas would react if they believed U.S. troops were entering the city."

This, Mazzetti wrote, was "part of a broad effort underway within the Bush administration to use information to its advantage in the war on terrorism."

Although using misinformation or disinformation to deceive one's enemies has long been an accepted military tactic, deceiving our own news media and the American public in the process is quite another matter.

The Bush administration has not limited its use of propaganda to the battlefield.

Early last year, several news stations around the country broadcast a story on plans for a White House advertising campaign on the dangers of drug abuse. But the "journalist" who reported this story was not a journalist, and his report was actually produced by the Bush administration.

The nonpartisan Government Accountability Office, the investigative arm of Congress, ruled that this amounted to illegal "covert propaganda."

Last May, the GAO said the Department of Health and Human Services violated two federal laws when it created fake news footage to support the administration's Medicare drug benefit bill.

Last week, the GAO criticized the Bush administration for distributing prepackaged "news" reports, including a "suggested live intro" for local anchors to read, interviews with Washington officials and what the Washington Post called "a closing that mimics a typical broadcast news signoff."

TV stations knew these "stories" were put together by the Office of National Drug Control Policy, but viewers didn't.

"What is objectionable about these," said Susan Poling, managing associate general counsel at the GAO, "is the fact that the viewer has no idea their tax dollars are being used to write and produce this video segment."

Melanie Sloan, executive director of Citizens for Responsibility and Ethics in Washington (CREW), calls it "particularly outrageous that the government continues to engage in this sort of illegal activity despite the fact that the GAO has said that it is illegal.

"The question now is how extensively has the administration used propaganda to shore up its controversial policies," Sloan said. "Did it pay any commentators to speak out in support of the Patriot Act? Is it paying anyone now to convince the public that Social Security is in crisis?"

Shaping the news

In an effort to answer these questions, CREW last week filed a series of Freedom of Information Act requests with 22 government agencies, asking for copies of every contract they have with public relations firms.

All administrations try to manipulate the news media and shape the nation's news agenda. They do it by controlling access to the president and other top officials, by timing their announcements, by leaking selectively and &#65533; like any other institution or agency, public or private &#65533; by trying to put the best face on everything they do.

By the sheer force of his personality &#65533; and the prevailing mores of the time &#65533; President Kennedy was able to keep news of his philandering out of the media during his lifetime and well beyond.

President Reagan used his charisma &#65533; and sophisticated Madison Avenue advertising and public relations techniques &#65533; to so cow the news media that when Mark Hertsgaard wrote his book on Reagan and the press, he titled it "On Bended Knee."

But few administrations have actually tried to subvert the news media and use taxpayer dollars to mislead the American public as blatantly as has the Bush administration. When you combine those efforts with Bush's record of media avoidance &#65533; he had fewer news conferences in his first term than any first-term president since William Howard Taft &#65533; it becomes clear that for all his speechifying about American freedoms, he has no interest in the unfettered operation of a free press properly serving a free society.

1342. Abu Ghraib abuse firms are rewarded

Abu Ghraib abuse firms are rewarded

London Observer | Jan 16 2005

Two US defence contractors being sued over allegations of abuse at Abu Ghraib prison have been awarded valuable new contracts by the Pentagon, despite demands that they should be barred from any new government work. Three employees of CACI International and Titan - working at Abu Ghraib as civilian contractors - were separately accused of abusive behaviour.

The report on the Abu Ghraib scandal implicated three civilian contractors in the abuses: Steven Stefanowicz from CACI International and John Israel and Adel Nakhla from Titan.

Stefanowicz was charged with giving orders that 'equated to physical abuse', Israel of lying under oath and Naklha of raping an Iraqi boy.

It was also alleged that CACI interrogators used dogs to scare prisoners, placed detainees in unauthorised 'stress positions' and encouraged soldiers to abuse prisoners. Titan employees, it has been alleged, hit detainees and stood by while soldiers physically abused prisoners.

Investigators also discovered systemic problems of management and training - including the fact that a third of CACI International's staff at Abu Ghraib had never received formal military interrogation training.

Despite demands by human rights groups in the US that the two companies be barred from further contracts in Iraq - where CACI alone employed almost half of all interrogators and analysts at Abu Ghraib - CACI International has been awarded a $16 million renewal of its contract. Titan, meanwhile, has been awarded a new contract worth $164m.

Despite the allegations in the internal US army report, the two companies have described the claims against them 'baseless' and as 'a malicious recitation of false statements and intentional distortions'.
The disclosure of the new contracts comes as Specialist Charles Graner - described as the ringleader in the group of soldiers leading the abuse of Iraqi prisoners - was found guilty on Friday after a court martial rejected his claim that he was only following orders.

Some of the most graphic evidence against Graner came from Hussein Mutar, an Iraqi who arrived at Abu Ghraib accused of car theft.

He testified how, after jumping on him, Graner and other guards ordered him to strip, masturbate and simulate oral sex, and then photographed him and led him back to a cell, which they had soaked with water, where he had to sleep naked. Graner is now awaiting a sentence of up to 15 years in jail.

The jury of 10 soldiers deliberated for five hours before convicting the reser-vist of assault, conspiracy, maltreatment of detainees, committing indecent acts and dereliction of duty, as well as one battery count.

However the controversy over abuse of detainees at Abu Ghraib and Guantanamo Bay is likely to be reignited later this month with the publication of The Torture Papers: The Legal Road to Abu Ghraib by Cambridge University Press, the first compendium of the so called 'torture memos' of the Bush administration.

Compiled from material already in the public domain and other material acquired under the US Freedom of Information Act, it documents the chilling progress in the Bush administration's legal advice that allowed it to redefine the meaning of torture so much that it felt able to use interrogation techniques that amounted to the most serious physical abuse.

In one memo, Assistant Attorney General Jay Bybee advises the legal counsel to the president, Alberto Gonza les, that 'physical pain amounting to torture must be equivalent in intensity to the pain accompanying serious physical injury such as organ failure, impairment of bodily function or even death'.

He adds that actions by interrogators 'may be cruel, inhuman or degrading, but still not produce the pain and suffering of requisite intensity [to be torture]'.

In a new development, the New York Times revealed last week that Congressional leaders have scrapped fresh legal measures that would have imposed strict new restrictions on the use of extreme interrogation techniques by US intelligence interrogators.

The proposal - which emerged in the fall-out of the Abu Ghraib scandal and complaints over the treatment of internees at Guantanamo Bay - had been approved by the Senate by almost a unanimous vote.

It would have explicitly ensured that US intelligence officers were covered by the same prohibitions on the use of torture, and required the CIA and Pentagon to report to Congress on the techniques that they were using.

The issue of the CIA's treat ment of detainees first arose after agency officials sought legal guidance on how far its employees and contractors could go in interrogating suspects and whether the law barred the CIA from using extreme methods, including feigned drowning, in the interrogation of Abu Zubaydah, the first of the al-Qaeda leaders captured by the US. He was apprehended in Pakistan in early 2002.

It was in response to this reply that Bybee gave his ruling defining the scope of torture, which was later swiftly revoked when it became public

U.S. officers want more troops in Iraq

WASHINGTON, Jan. 17 (UPI) -- Despite the Pentagon's assessment there are sufficient U.S. troops in Iraq, officers there routinely request more, the Washington Times reported Monday.

A retired general, who asked not to be named because he does business with the Pentagon told the newspaper the most-often requested figure is six to eight more brigades, or more than 50,000 more troops.

"They are not bemoaning, not griping. It's just what they feel they need," the source said.

Gen. John Abizaid, the U.S. commander in the region, has not requested a sizable increase in strength. The Bush administration has settled on a total U.S. force of 150,000 troops in Iraq for the Jan. 30 elections, an increase of 12,000.

Retired Air Force Lt. Gen. Thomas McInerney, a military analyst and author, said the Pentagon's policy is the best way to win.

"We don't need more U.S. troops. We need more Iraqi troops," McInerney said. "American forces won't win this conflict. The Iraqis will. You always defeat an insurgency with indigenous forces, not foreign forces."

Ex-KGB and STASI Chiefs
To Work Under Chertoff
Foreign Press Foundation
1-16-5
http://www.rense.com/general61/work.htm
Why have Soviet secret service 'KGB', General Yevgeni Primakov, as well as Markus Wolfe, the ex-boss of the ''STASI'', the equally feared former East German 'State Security Police' been hired by - and for - the US Gov't.?

PEOPLE NOT UNDERSTANDING NOR SEEING THIS ''MENE TEKEL'' ARE BRAINWASHED BLIND...

"These appointments have already been made"

Dec. 16th - 2004 - If somebody would inform you, that the former Ex-head of the inhuman and despicable Soviet secret service 'KGB', General Yevgeni Primakov, as well as Markus Wolfe, the ex-boss of the ''STASI'', the equally feared former East German ''State Security Police'' - (Staats Sicherheitsdienst) - have been hired by the United States Gov't for the lawless and already feared secret service "HOMELAND Security", as experts to reinforce the control in the US of all it's citizens: would that make you sleep badly ? Im sorry to wreck your night's rest, but it seems that it just happened to you, or, better said: to all of us globally.

Nobody - outside the US mainstream media's reach - would be surprised if the US neocons would appoint a revived Dr. Josef Mengele from Auschwitz as the new Head of Medicare.

A FEW YEARS AGO [1997-06-09], WOLFE FROM THE STASI WAS REFUSED A VISA TO THE US BECAUSE HE WAS A TERRORIST.*

Or, do you still belong to this completely brainwashed group which - standing in the rain - assures everybody that it's dry and quite sunny still? Up to one's neck in the manure; saying it doesn't smell .... ?

Saying US concentration camps do not exist and are not prepared?*

http://www.indymedia.org.uk/en/2004/12/302870.html

Lots more here including cross references, all I can say is bend over and kiss your arse good bye. And I bet you still can't see it coming. Maybe they should advertise so you get the message.

1345. U.S. Lowers Expectations for Once-Heralded Iraq Vote

Newsgroup: rec.radio.shortwave
Date: 2005-01-18 01:59:09 UTC
From: Anonymous-Remailer@See.Comment.Header
Message-ID: <0T8IWMSU38369.8327430556@anonymous.poster>

Cross-posted to: alt.politics.bush,rec.radio.shortwave

http://www.reuters.com/newsArticle.jhtml?type=topNews&storyID=7337104

WASHINGTON (Reuters) - Unable to deliver on its lofty goal of bringing democracy to Iraq through the Jan. 30 elections, the Bush administration is pressing a damage-control campaign to lower expectations for the vote.

With fears for a low voter turnout among Sunni Arabs due to a boycott and insurgents' intimidation, the administration no longer touts the elections as a catalyst to spread democracy across the Arab world.

Instead, U.S. officials now emphasize the political process that will follow the vote.

"Clearly, we don't see the election itself as a pivotal point," Deputy Secretary of State Richard Armitage told NPR on Friday. "It's the beginning of a process, the process where Iraqis will write a constitution and at the end of the year will actually vote for a permanent government."

Almost two years after Operation Iraqi Freedom, a raging insurgency across mainly Sunni areas forced the White House this week to prepare the American public for elections it called "less than perfect."

For months, the Bush administration has been steadily lowering expectations over the vote, beginning with Secretary of Defense Donald Rumsfeld in September warning violent areas of the country might be excluded.

And with just two weeks to go, the administration acknowledges that despite military offensives meant to provide security for the vote, the fear of bullets and bombs will keep many for the 20 percent Sunni minority away from the ballot box.

Rather than ushering in Iraq's first free and fair national elections for decades, the Bush administration has now limited its ambition for a vote it refuses to postpone.

"I think a successful election will be an election where most of the population has gotten a chance to vote, and even though we may not get the same kind of numbers in the Sunni area, we're going to have to go forward and use the results of this election to build on," Secretary of State Colin Powell told PBS.

Powell has lobbied the Shi'ites, who were oppressed under former President Saddam Hussein by the dominant Sunnis, to include the disenfranchised Sunnis in the government after they overwhelmingly win the skewed vote.

But the top U.S. diplomat acknowledged such maneuvering also risked inflaming the insurgency

"The insurgency is not going away as a result of this election. In fact, perhaps, the insurgents might become more emboldened," Powell said.
GIVING DEMOCRACY A BAD NAME

Critics of the administration's Iraq policy complain the elections for a 275-member assembly that should draw up a constitution and pick a transitional government are so flawed they will be illegitimate -- and counterproductive for democracy in the region.

"These elections are a joke," said Juan Cole, a professor of modern Middle East history at the University of Michigan.

"The Bush administration has created the worst possible advertisement for democracy because the perception across the Middle East is that democracy means you get a country where everything is out of control," he said.

Before the vote, the administration "has definitely gone into damage-control mode," Stephen Zunes, a politics professor at the University of San Francisco said.

"Once their original rationale (to rid Iraq of weapons of mass destruction) fell apart, they created very high expectations for democracy to be able to justify their takeover," he said. "Now that they have ended up with a not particularly good demonstration of democracy, they are forced to lower the public's expectations for these elections."

So Far, the Interim puppets are running unopposed!

| 1 or 2 of you may remember I was off to visit Hawaii just before
| Christmas, complete with SW100E, and would report back on any DX had
| from the Waikiki area of Honolulu. As a matter of fact, was pretty
| much a lack of anything to hear on HF, even with the wire-reel antenna
| added on. New Zealand was about the only one, apart from WWVH, coming
| in loud and clear. I can only speculate that conditions were not too
| good in those 2 weeks. Either that or I should've stuffed the AR7030
| in the baggage somewhere! That served me well when we lived there for
| a year and a half. Anyway, turns out we were rather busy with vacation
| activities, so DXing took a back seat.
|
| On the plus side, did a bit of AM/FM searching on the rental-car
| stereo (Chevy Cavalier). Was pleasantly surprised at how many could be
| heard, which were difficult/inaudible on the Sony. Have a newfound
| respect for car radios!
| Logged 3 other islands, apart from Oahu, on both AM and FM (Kauai,
| Maui and Hawaii itself). In all, 24 off-island and some 41 locals. If
| anyone wants to see the list, I can post.
|
| It was great to see Hawaii once again, visit my Mother-in-law,
| hang out on Waikiki beach, partake of the amazing cuisine (looks at
| swollen waistline :-), and generally enjoy the novelty of Christmas
| paraphernalia in 85 degrees heat. For a Scotsman, that is very hot
| weather!
|
| Consider myself lucky to afford such a trip, and hope that we can
| get there another time, before too long. It's an amazing place.
|
| Couple of pics -
|
| View from Diamond Head Crater, one of my favourite pics -
| http://www.1r5.net/pics/honolulu_from_crater.jpg
|
| View from Aloha Tower, with Scottish sailing ship "Falls of Clyde"
| being restored in harbor -
| http://www.1r5.net/pics/honolulu_harbor_ship.jpg
|
|
| kind regards (and good DX) to all,
|
| Ian Smith, Clydebank, Scotland (10 miles from where that ship was
| built)

Outstanding photos, Ian!

Sounds like a lovely trip, too, with the exception of HF condx
(and possibly the fact that you had to drive a Cavalier, heh heh).

Actually there are some cheap, inexpensive and fairly high quality
radios out there for just a couple bux to get your feet wet with.

If I were you I'd go to a bookstore (or library) and get "Passport to
World Band Radio 2005" before making *any* short wave purchase.

Their web site is:

http://www.passband.com

Notable articles:

o How to choose a radio:

http://www.passband.com/pdf_files/HowToChoose.pdf

o Getting started in World Band radio:

http://www.passband.com/pdf_files/GettingStarted.pdf

For cheap and (realatively) good quality, There are a number of Degen
radios to choose from. You aren't getting the best, but some of these
are $20 wonders.

The Superradio III has a far better reputation than the C. Crane,
despite its somewhat dowdy appearance.

Once you've decided you want to go further, don't skimp on quality --
buy a good one.

By now there have been enough posters to let you know that the
SW1/SW2/SW3/SW4 breakdown of tuning on an *analog* short wave radio is
just a design convenience for the engineer who built it rather than
some defined separation. MW, medium-wave, is what the rest of the
world calls AM. (More accurately, MW broadcast band.) PS, as one
poster put it, probably means public service and is probably useless
on an analog radio (as opposed to a modern, trunk-tracking scanner).
Unless you live in a VERY small town, you won't get much use out of
that.

Good luck and keep us posted.

Turn the main breaker on and start with the smaller circuits one at a
time until the noise comes back. Keep narrowing it down.

This is not a free speech issue. He was not just expressing his beliefs
in God or not. He was just being insulting of a group that is not liable
to physically attack him. He is just a coward for being insulting to
Christians. I don't want him burned at the stake just kicked off the air.

Dude!, um, ahhh, reality check here.. If they are a "joke"
its because the people of Iraq are "making" it a joke. They
need to wake up and realize that they have *everything* to
lose, and *everything* to gain, it ain't nothin off our back.
If the Iraqis (and terrorist sympathizors/appologists like yerself)
wan't to make a mockery of it all - GO for it, there is only one
go-around, so if they (and *you*) want to make a mockery
of it, fine, you get ONE chance, use it or lose it sucka !

Tonight, while listening to Radio Havana recite the day's carnage in Iraq, I noted that they left one important detail out, the one that everybody else has been talking about-the kidnapping of the Catholic Archbishop. Gee, I guess that wasn't as important as the "roundup of dozens of Iraqis" which doesn't surprise me. Next news item: Seymour Hersh's allegation that "Iran is next" reported as fact. Where's your fatigues, Fidel?...

I find Radio Habana's "news" quite, well, uh, "interesting". Not necessarily factual, but interesting. Tonight they made a big deal of "the roundup of dozens of Iraqis" (I don't doubt that it happened, though) and didn't mention the kidnapping of the archbishop. Lately they've been full of outrage over the "scandalous" cost of Bush's second inauguration. Give them credit though, they were the first place I heard about it, even before the American media picked it up. At least Fidel's comrades are funny, unlike the whackos on WWCR, WWRB and WBCQ. And to hear their take on Hersh's New Yorker article and compare it to ABC's (US, not Oz) and even the BBC's was what makes SW worth listening to.

Steve, WHY do you feel the need to respond to every insulting post with an insult of your own? And it's the SAME insult, every single fucking time. You really need to get a life.

Not only that, he uses the word "buttfuck" often, as an insult. I think dxAce has some real issues. He probably buttfucks and checks out little boy's balls while listening to Diego Garcia all day. I'd hate to see the REST of his shack, not just the table with the radios (better hope it's sanitized!).

The problem is, as written and enforced, it CAN significantly impact you at
any time and you may not even know it.

The instance I refer to is the recent one of the dumbshit showing off to his
5 year old daughter and shining a laser up onto a plane (or was it a
copter?).. This instance would have been at worst a misdemeanor if not
prosecuted under the Patriot Act. As it stands, the guy could get 25 years
literally for being stupid (or, more accurately, for doing something
stupid).

You could buy some shortwave radio on ebay and get charged with funding
terrorists if the seller happens to be on some list the government is
keeping. Think not? It's happened. And other things, like the lawyer in
Oregon that the feds swore up and down they had his fingerprints on some of
the explosives they found at the train explosion in Spain... yet the guy had
never been there, or even knew anyone that had been there.. it took weeks
for the Spanish government to convince the feds that it was someone else's
prints.. meantime, the guy sat in stir. I call that a violation of a
citizen's rights, wouldn't you?

When you have an omnibus law, it gets abused. Period.

I find it difficult to understand how they can hold an election when all the candidate's names are being kept secret "for security purposes". Would you vote in an election when all you could do is mark one from column A and one from column B, without even knowing WHO you were voting for? I sure as hell wouldn't. Talk about your pig-in-a-poke..

You think people like Colin Powell are terrorist sympathizers?

The differences are mostly associated with the display circuitry. Did
you find any significant differences in the RF/IF areas of the
schematics?

1374. DX'ing and Invisible Pet Fence

Newsgroup: rec.radio.shortwave
Date: 2005-01-18 05:52:15 UTC
From: John Richer <tex@mex.net>
Message-ID: <ZbqdnRakQ_OTOXHcRVn-pQ@adelphia.com>
Source record: 5374

Hi All!

Silly question for the tech-savvies by whom I am overshadowed...

I am considering installing an invisible pet fence at my rural home. Will this adversely affect my DX'ing?

I use a 100' wire and favor a Satellite 800 and a DX-394. The wire will pass over the inground "fence" wire at about 18ft in height and will cross it at roughly the mid-point. At present I have no complaint with performance whatsoever.

Thanks in advance for any input!

John Richer

I think most of those fences work on CB frequencies. Shouldn't do too much
damage except for in the 27MHz range.. YMMV

This company says their system works on frequencies below 20khz.

<http://www.invisiblefence.com/product_solutions/indoor/product_faqs/purchase.asp>

From the answer to q5:

"...Our system works by radio carrier frequency -- either 7.5 kilohertz
or 10.8 kilohertz. We utilize 30-hertz modulation frequency..."

But it would certainly pay to ask the contractor you're planning to deal
with what frequency their system works on to make sure.

Pete,

I hope you make it to production with the MW receiver. It sounds like a real winner, especially if it gets all the bells and whistles. In the meantime is there any chance for offering the sync' detector as an outboard unit which could be added to a car radio? If not, are you free to release the schematic for homebrew projects?

Thanks

Simply (and please) don't respond / feed him. I've now killfiled him 3 times, and I bet I'll have to killfile him again. I killfiled his e-mail address three times, next step will be to have to killfile dXAce. Don't respond to his insults. He feeds off of it.

He claims to be a Vietnam Veteran, but based on his attitude, he acts about 13. I googled to try and find more information, i.e. a photo or age, but cannot.

He even thinks he's smart by calling me by my callsign (wow, he can use QRZ) and 'insulting' me telling me to go back to taking photos.. Wow, does it take a genius to find my call sign and know I'm into photography? No. But he's very well hidden. Typical troll behavior.

I think his attitude would very quickly change if people didn't respond to him.

Evan

If it happened only at night, a street light would be a likely suspect.
However street lights can make noise in the daytime too if the starter
(photocell) is also defective and it keeps trying to turn a bad light
on.

Especially if it's a smart charger which is trickle charging a fully
charged battery to keep it charged without overcharging it.

It's worse than that. It's not just the candidates' names. Even the positions and views of the different 'parties' are being kept secret...the theory being that there will be a last minute disclosure by EVERYONE involved. That will, in theory, assure no real candidates or puppets of foreign regimes get killed before the voting.

They must be really smart. I hear that immediately *after* the election, these same people will *retract* everything and revert to secrecy once again. That will keep everyone safe for evermore.

What a misunderestimated blunder.

I would probably get it mail order from a company such as Techni-Tool.
Either one is ok, but I like Pro Gold.....about 17 dollars a can, but
one can lasts a long time.

Hi Eric,
I was with them for a couple of years, once we moved back to
Chicago. Most of the work was in spread spectrum communications. It was fun
work. Isn't it funny, how a project grows like that? I used to kid some of
the folks when this would happen, and tell them "it looks as if the monster
is growing many more sets of horns".

I have had an invis fence system for our dog for about eight years now. I, too, had the same concerns and asked the contractor and the manufacturer what freq the transmitter is on. The contractor didn't know (or care)....the manufacturer would not divulge the info.

I have never heard the system on my receivers....at any freq from 100KHz up to 60MHz or on common UHF, VHF freqs. I have even taken a broadband receiver and held it to the buried wire and have not been able to hear a carrier.

My only guess is that it does operate on a very, very low freq....well below 100KHz. My unit is made by DOGWATCH.

BTW, the "fence" works well. You could put a fresh T-bone steak just a few inches across the wire....my dog would never cross for fear of the big jolt. He'd just sit on the "safe" side of the fence and bark at it. Too bad these divices can't be adapted to my teenage kids.

Well, I've got it sorted. I thought I might as well tell everyone. We have a timer on our pool filter ($10 from K-Mart). While it does not draw very much current, the pool wires run from the meter box to the pool some 30m away. So..a few milliamps at 50Hz down a 30m wire in parallel to my antenna (wires are buried in the ground (0.5m) and antenna is about 5m overhead) sounds like a transmitter to me that my antenna picks up very well. When I want to listen now, I just turn the pool off, and voila, I can hear BBC, VOA, RN, etc with no problems.

hello,

the last days - around midnight in Frankfurt am Main, I listened on 6085 (when Bayern inforadio has closed and shut up the transmitter) to a unknown station, weak signal, unknown language - do you have an idea which station it could be?

Thanks and greetings

J�rgen

1408. Questions on Inverted L antenna

Newsgroup: rec.radio.shortwave
Date: 2005-01-18 13:48:00 UTC
From: gweber@hfx.eastlink.ca
Message-ID: <1106056080.764569.177930@c13g2000cwb.googlegroups.com>
Source record: 5508

I have a clothesline that runs from my third floor deck about 45 feet to a tree - it's about 24 feet off the ground (a paved parking area). I am currently using my clothesline for an antenna. I am using a "UnUn" to match impedance, and I run a ground line from the UnUn and a coax feed into my flat. Although I think it works reasonably well, I have nothing to which I can compare it.

So, some question on the Inverted L antenna.

For SW receiving, what is the advantage, or primary difference between a correctly installed Inverted L antenna vs. an end fed horizontal?

Is there any advantage over my current horizontal antenna for receiving if I suspend a 65 foot, end fed wire (with UnUn and ground) off the bottom of the clothesline and run it over to the tree and down to the base of the tree?

Is it OK to run a ground line from the horizontal end of such an antenna or is it best to ground the Inverted L at the base of the tree where it's nearest the ground?

Inverted L antennas seem to be specific about feeding the receiver from the bottom of the vertical end. Is this required, or just for convenience? If I feed the antenna to the receiver from the end of the horizontal element, will this degrade the performance of the Inverted L?

I am just curious about trying something different, but I would like to know if there is any advantage before I purchase the material and set up and test alternatives.

Iran has awarded a U.S. energy firm a contract to develop natural gas reserves.

Iranian state television said Halliburton was awarded a major contract along with an Iranian firm, Oriental Kish. The television quoted an Iranian energy official as saying that Halliburton and Oriental were awarded projects to drill for gas in the giant South Pars project.

Akbar Toran, managing director of Pars Oil and Gas, said Halliburton and Oriental Kish were awarded the development contracts for Phase 9 and Phase 10 of South Pars. The deal was estimated at $310 million, Middle East Newsline reported.

A Pars Oil executive quoted by the Iranian daily Shargh said Halliburton did not formally participate in the tender. Instead, Halliburton, restricted by U.S. sanctions on Teheran, operated through Oriental Kish. In 1996, the United States banned companies from investing more than $40 million in Iran's energy sector.

Doing Business with a terrorist state is Treasonous , unless a company is associated with
a sitting VP. Anyone see the Irony? Anyone with an IQ above US Winter weather,can see
the real reason the US went to war in Iraq.

Although they have been gradually ratcheting back the hype since well before the xmas holidays, the expectation level has remained way too high. Instead of forcing Iraqis still there to vote locally, maybe we should charter a fleet of 747's to fly them to safer polling places. Like those in the U.S.

If it hasn't already happened I would expect that the Ridge Terrorometer will change colors soon to reflect both the U.S. inauguration and the Iraqi voting.

Ha. Anyone who's ever been to an academic conference
knows that having a Ph. D. next to your name does not
confer godlike status, nor does it confer wisdom or
intelligence. The entire Cold Fusion debacle in 1989
should have made that pretty plain, as did the stunt that
an NYU Physics guy did in 1994 getting a cultural
studies journal to publish a sham article that appealed
to the ideology of the publishers. Personally, I've a
couple of stories of my own.

First story: I had a friend who went to Berkeley for graduate studies in sociology the same year as the LA riots; while she wanted to go out and actually help these people, most of the other grad students and profs were more interested in how they could turn the riots to their own advantage in their internal academic power struggles. She finally got disgusted and left, and this was one of the main reasons why.

Second story: I accompanied my wife to Denver to the GSA meeting there back in '96. This was the year that the Mars Meteorite was unveiled by NASA, and there was a panel discussion there in one of the big halls. I tagged along for the discussion, since I was rather curious, given my own scientific background. I wasn't exactly sure what to expect, but I expected something more than what we got. It was a bit like a combination of a press conference and hype session. The NASA people there gave very generic answers to the few good questions, and didn't provide specifics to anything. However, most of the people asking the questions were really doing it to get their name announced to the auditorium, because most of their questions were really inane. 'Have you tried doing an [INSERT TEST NAME HERE] test on the sample?', or 'Can you give the sample to me for testing?', or 'Can you describe [WHATEVER] again?' were the bulk of the questions. It was essentially a waste of a 1/2 hour, and I could have probably learned more by looking at the research displays in the big hall. (Although some of them made me cringe, because too few data points were used on quite a few of them to draw the conclusions that some of them were drawing.)

This is interesting. Iran is going to have to do a lot better than
that. Halliburton got a multi-billion contract out of Operation Iraqi
Liberation. So why would they put off Operation Irani Liberation to
collect a measly multi-million contract.

It's a fairly simple receiver to use. But at any rate, I'd expect it to fetch
between $375 and $450. Unless it has the VHF convertor installed, in which case
it would get perhaps $100 more.

Of the radios I've owned and sold, the R8 is probably on the top of the list of radios I'd buy again if I had to buy a radio on a budget.

Why do you have this attraction to big boys? When did you come out of the closet? I noticed your perverse attraction to BOYS in an earlier thread. It would appear those photographs of you committing sodomy posted here a few month ago were very real. You are a failure as a human being.

The Ridge Terrorometer must have spawned some offspring. We have
meters for cities now. The threat level was was popped up to orange
mid-2004 for selected financial-center cities then dropped back to
yellow in November.

Is this the Terrorometer???

Due to his locale, he becomes eligible for the 'Goober' awards. He's won it three years running. The fine folks running the Goobers have adopted him as poster boy for all things intolerant and xenophobic. He also holds a very special award for his perversions and anal fixations. The 'Spankies' were invented just for him. Please note the number of times he mentions his own rear end in his posts. He's ALWAYS laughing it off. After a heavy 'date' it becomes LMFAO. It would appear he's quite active in his little circle of deviants.

He ships fast. Where there is a choice of colors (e.g. PL-200) you may not
get your choice of colors. He accepts returns if you have a problem, but
expect considerable hassle and time investment in getting a radio back to
him, and receiving an exchange. I mistakenly sent a radio back, using the
US Mail, to the sending address; whereupon he stopped responding to email,
saying only that the it would not be possible to deliver it that way. Only
after the USPS returned it after a month did he volunteer the correct
address for returns via UPS.

1434. Re: Questions on Inverted L antenna

Newsgroup: rec.radio.shortwave
Date: 2005-01-18 17:28:14 UTC
From: j999w@aol.com
Message-ID: <20050118122814.02088.00000071@mb-m14.aol.com>
Source record: 5534

The idea behind the inverted L is to have a vertically polarized antenna for the low bands when you don't have the means to put up a BIG vertical. The veritical polarization will aid in really long haul DX work. A horizontally polarized antenna at low heights (less than 60 or 70+ ft) will favor higher angles and be less effective for long haul DX.

The inverted L needs a GOOD ground at the feed point just like any vertical, otherwise you loose a LOT in efficiency due to ground losses.

Give it a try.

I had a 100 ft wire that sloped from my basement up to the top of a 70 ft tree ... was KILLER on the 90m band, horrible on 41m.

It's in their commercial catalog. I don't expect them to carry it in
stores. But the good news is, it doesn't seem overpriced compared to
stores that carry it.

Egads Judah - you spent $100 on radios in one day?

Don't know anything about your seller, but I'll venture a guess you'll enjoy the radios.

(For those who aren't familiar with Judah, years ago he wrote a series of fun to read reviews on the cheapest radios he could find. He ended up having to fix one brand new radio before he could review it.)

...or they were cognizant of the fact that humans, being naturally sexual beings, is not a significant limitation to being President - unlike the so-called 'liberal" press when Clinton was demonized for having what amounted to a mistress.

For what it's worth, the Liberals are just as annoyed by the press as the Conservatives. For example, to the environmentalists, NPR is known as National Petroleum Radio (not very witty, but illustrates their contempt anyway). It depends purely on your perspective.

Bought a Tecsun BCL-2000 from him that he stated was the more recent revision with the defeatable sleep timer and it was not. The sleep timer was most definately not defeatable. Poor responce to email. Doesn't seem to have a clear understanding of what he is selling.

1453. Eros and The Counter-Inaugural Ball ;)

Eros Day 2005
The Counter-Inaugural Ball
By Dr. SUSAN BLOCK

It's almost time for Thanatos, the ancient Greek God of Death, to ascend the throne of America. This is, of course, a throne His Immortal Ass is already sitting on. But that doesn't mean it's not an occasion to throw the most expensive American Presidential Inauguration in history, ushering in the second term of one of the most universally loathed American Presidents the world has known, including a 4-day, 9-ball, 40 million smacker shindig, with a parade, concert, fireworks display and, at the Ritz-Carlton, white chocolate cowboy boots (just white?) to honor our horse-fearing Cowboy-in-Chief. The 40-mil bill for the bash is 5 mil more than Ebenezer Bush's second offer of aid to tsunami victims, but just a drop in the bucket of human waste that is the American War on Iraq. Franklin D Roosevelt, another "War President" who came from privileged stock, at least had the sensibility (breeding?) to forego the showy parties when he was re-elected during WWII. No such restraint for Bush II, the Aw-Shucks White Chocolate Cowboy Prince of Thanatos.

Nobody talks much about Thanatos these days, except the occasional discontented Freudian. But His presence is keenly felt. Death is always with us, a constant companion to Life. But He is most powerful in wartime. According to the Greeks, Thanatos is the fatherless son of Nyx (Night), twin brother of Hypnos (Sleep), a wingï¿½d young male God who, in Euripides' Alcestis, coolly reminds Apollo, "I win greater honor when the victims are young."

Of course, Thanatos is no more merciful to victims of tsunamis than He is to victims of war. Yet there is something about being killed deliberately by our fellow humans that twists the knife more sharply (at least to those of us left behind) than death at the tides of nature. And killing fellow humans is what Bush, our second-term "War President," prides himself on. The Shrub is a Lynching Tree, a Burning Bush of Apocalyptic Mass Destruction, an obedient servant of Thanatos.

Thanatos will be inaugurated into His place at the very
pinnacle of the American political pantheon, with pomp
and ceremony, bands and some major balls, as the
Rape of Iraq plays on. Many of the important guests,
paying as much as $250,000 (not to mention
under-the-table billions) per "inauguration ticket package,"
will be leading Death profiteers, arms dealers and
world-class polluters, sponsors of Dubya's Christian
Crusade and End-of-the-World Environmental Policies.
Fine champagne will flow, but Inauguration Ballers are
sure to be high on the narcotic of war, hooked on the
endgame logic of death.

Cold Death, accompanied by His hot handmaiden
Torture, shall reign supreme, as the Chickenhawk Pussy named
Bush and the Dickless Dickhead named Dick are honored for
their crimes, and their devastatingly inept cronies and lackeys
are promoted for their doglike devotion, with deferential
Presidential Consigliere Alberto Torquemada Gonzales ascending
to the post of United States Attorney General. And we thought
old Ayatollah Asscraft was bad! Gonzales became world-famous
when it emerged that he wrote the Torture Memo essentially
greenlighting all the "disgusting" BUSH POW PORN of Abu
Ghraib, Guantï¿½namo and other American torture chambers.
Al appears to be the quiet type, exemplifying the Moral Values
of the New American Hero: "Speak softly and carry a big
stick you can shove up a detainee's ass without calling it torture."

At least, he's come out for abortion rights, sort of. But nobody's
asking one question on everyone's minds: Will Gonzales take
Asscraft's $8000 drapes off the venerable, half-topless Spirit
of Justice....?

But back to the party. I love a good party, but for
George W. Bush to have a mammoth Mother of All U.S.
Presidential Inaugural parties in his own pseudo-cowboy
honor, with the Iraq War, the Asian tsunami aftermath and
American poverty raging all around us, is, in a word, obscene.
Unless you can get yourself a quick Dumb-Me-Down-to-Red-State-Levels
lobotomy, it's enough to make you sing the Blues all over again, and you
know you've been singing that tune since November. SO, what's a
good Blue Values gal or guy who believes in Faith-Based Sex
to do to counteract the immeasurably Thanatoxic effects of the
Bush Party Blow-Out that's about to explode like a mushroom
cloud of anthrax-laced bullshit in our nation's capital and
throughout the virtual court of our 90% sycophantic media?

Why, fly the flag of Eros as high as you can! Yes, indeed Brothers
& Sisters, Lovers & Sinners, it's time to speak out against the
Bad Bush and celebrate the Good Bush (you know what I'm saying).
There are, essentially, three ways to do this: 1) PRAY, 2) PROTEST
and 3) PARTY. But more on the Three P's in a minute

Back to Eros, who (or which) is, as those discontented Freudians remind us, the opposite of Thanatos. Since Thanatos is Death, that means Eros is Life. Yay! It's good to be on the side of Life. Then again, it's not so simple. This isn't one of those black-and-white Battles between Good and Evil that the Red Staters love to fight. Eros has an edge. The word is, after all, from the same root as "erotic," so it has something to do with sex. But we're not just talking about Valentine sex here, true love, or procreation, or just lust, porn, or recreational sex. We're talking about the primordial sexual energy that is the essence of life. Yes, indeed.

The Greeks say it best. According to the Theogeny, the Genealogy of the Gods, written in 800 BCE by Hesiod of Boeoita, Eros was one of the four great original Creators of the Universe, all of whom emerged from Chaos. The other three were Gaia, Goddess of the Earth, Uranus, God of the Sky; and Tartarus, God of the Underworld. The fourth Great Creator was Eros, God of Life, Love and Sex. Eros blew the Breath of Life into all beings, even the Gods Themselves. This was what I call The Original Blow-Job. And this is why, at least mythologically speaking, Eros gets the clout to counter Thanatos.

In later Greek mythology, the Great Creator Eros trades some of His primal power for something akin to our idea of rock stardom, morphing into a classical rather naughty teenage heartthrob with glorious feathered wings, the original sex symbol. The arrows from his potent quiver never kill you (at least not directly), but only excite your desire. Still, like many stars, Eros is a trickster. Some people call him a Motherfucker. And he is. Because, in addition to billions of other lovers, Eros does occasionally fuck his mother (or at least, they engage in a lot of what we call foreplay), his mother being Aphrodite (Venus to the Romans), the supreme Goddess of Love.

Eros' father is uncertain, in keeping with his swinging character. It could have been Zeus, Ares, Hermes or any one of Mama Aphrodite's many lovers. It doesn't matter. Like a bonobo chimpanzee, Eros is a mama's boy in love with love and lust. Classical myth has him fall in love with a human girl named Psyche, who eventually becomes the Goddess of the Soul. Their love story is a timeless tale of passion, jealousy, faith and betrayal, suffering and redemption. In the happy ending, the child of their union is named Pleasure. Not quite a savior, but definitely a blessing.

Eros became Amor in Rome, and later, Cupid. Nowadays, Cupid is usually portrayed as a cuddly little angel, or a troop of cuddly little angels, cute as a Hallmark card and almost utterly drained of the potent sexuality of the primordial Eros or the erotic appeal of the teenage Eros. But in resisting the reign of Thanatos being inaugurated into our White

House, we need all the Powers of Eros we can get--primordial,
erotic and cuddly! No cynical retorts, now; that's succumbing
to Thanatosis! So, back to the 3 P's

1. PRAY

Brothers and Sisters, Lovers and Sinners: Prayer is not the
exclusive domain of the Christian Right. It is not even the
domain of religion. We all pray. Even atheists pray.
It's no great virtue to pray. The best of us pray, the worst of us
pray. It's human nature, maybe even pre-human (personally, I think bonobos
pray).
We all, at times, sit in contemplative silence, or sing out with
a few fellow humans, surrendering our consciousness to
forces we do not understand. We may pray from a place
where we are deeply grateful, or passionately hoping-even
asking--for something for ourselves or for others, or submitting
to the forces of nature, or marveling at the miracles of life,
or stopping and really thinking about what the hell we're doing
(or not doing) on Earth, or just singing those Blue Values Blues.
We don't have to pray in a House of Worship. We don't
have to pray in a particular direction or with our hands folded
together. We can pray when we meditate. And, by God and
Goddess, we can pray when we masturbate (or copulate, for that matter).
We can pray as we paddle our little boats down the river.
We can pray as we look up at the stars. We can pray as we
watch TV (though some call this "vegging out"). We can
certainly pray as we make love (oh God, oh God, oh baby, oh God!).
We can pray as we mow the lawn. We can pray as we sit in
endless bumper-to-bumper traffic (and a Pocket Rocket in the
glove compartment can only help in this case).

But back to the Inauguration. You can bet your last rosary
(or anal) bead that they're going to be doing a LOT of praying
there. And most of them will NOT have the Big Tent
definition of "prayer" that I have. Not at all. They will be praying
to the One and Only "Christian God," with a little "Judeo-" thrown
in as a prefix to appease certain Semitic Neo-Cons. They will
be praying to Jesus the Bloody Christ as revealed in the Gospel
according to Mel Gibson. Don't get me wrong; though I was
born and raised Jewish, and I'm now basically an
agnostic/tantric/pagan/ethical-hedonist, I love Jesus
(and Jesus Loves My Ass!). But the ketchup-streaked masochist
who virtually exhorts his followers to follow his example and
die painfully for each other portrayed in Mel's snuff movie is
not the Jesus I love. The only deity in classical mythology
that comes close to Mel's level of morbidity is Thanatos.
Even Ares takes a break from the wars to romp in the
sack with Aphrodite once in a while. Thanatos, like Mel's
Christ, like Bush's legacy, is all about the DEATH.
So yes, I plan to pray during Inauguration week.

Amen and Awomen. If I have to name a God to
whom I'll be praying--which does feel kind of silly,
but everybody's pushing their patron Gods these
days, so here's mine--Eros.

II want to reassure my fellow agnostics: this is not quite
as loopy as it sounds. Then again, maybe it's even loopier.
What I mean is, Eros is not just some funny Valentine
or mythological divinity. Eros is a planet! More
specifically, it is a "planetoid" or large asteroid, 25.3 by
9.1 by 8.8 miles in size, spinning on its own axis.
Coy astronomers say it's shaped like a banana. I say it's
shaped like the male member in its happy state.
The Planetoid 433 Eros was discovered in 1898 by
astronomer Carl Gustav Witt, who, while playing with
his telescope, must have had sex on the brain, so he
named this new heavenly body Eros. Recently explored
by NASA's NEAR spacecraft, Eros is especially
intriguing to astronomers because, despite its large
elliptical orbit around the Sun, it comes closer to the
Earth than any other body of comparable size, except
the Moon. Eros is also one of the most elongated
planetoids in our solar system (there's that delicious
banana shape!), the better to penetrate our hearts.

---> and here's the relevant clincher: the closest it comes to
Earth each year is right around Inauguration time (January 20-22)

So it's a good time to pray to Eros. Or is it for Eros? Either
way, we're talking about peace, love and understanding
here, so get down on your knees! Whether you're watching
the Inauguration on TV with a barf bag handy, or completely
avoiding it out in some mountainside teepee, whether
you're seriously helping the tsunami victims or unhappily
helping to tear up Iraq, give it a whirl. Offer up an Eros
Prayer. Pray for (or is it to?) Eros, Life, Love, Peace,
Understanding, Compassion, Passion, Sex. If you find it
difficult to relax and focus, try using a vibrator.

Okay, okay, it doesn't always have to be about sex.
There's a neat little movement to make Inauguration
Day "Not One Damn Dime" day, asking us to "boycott
all forms of consumer spending" for 24 hours..
This seems like a good way to focus your own personal
opposition toward the American corporations that
support this administration. Much as fasting from food
fosters a prayerful heightened awareness of your
body as your temple, fasting from spending can affirm
your existence as more than just another consumer.
It also gives you more time for sex (the free kind)!

2. PROTEST

Just Do It. Especially if you can get your ass over to
Pennsylvania Avenue and 4th Street in DC by 9 am
on Inauguration Day. Bring all your "Sorry, World!"
signs, and get your sexy protesting self on the boob tube.
Or make a different kind of statement, like, get married
to your same-sex lover on Inauguration Day
(t'll be legal again soon enough; show a little faith)!
Teach or attend a sex education class. Wear your
"Bush Sucks" T-shirt to work. Show our international
community that this King of the White Chocolate
Cowboy Boots does NOT have the "will of the
people at (his) back," at least not all the people,
and certainly not the cool people, the Eros people.

One intriguing idea is the "Turn Your Back on Bush" protest.
These folks plan to legally infiltrate several different
public inaugural gatherings and, upon a given signal, turn their
backs to the proceedings. Being the incorrigible pervert
that I am, I'm hoping that some protestors will turn Turning
Your Back on Bush into Mooning Bush, especially if they
have nice buns. If I could make it to that protest, I'd wear
my "Jesus Loves My Ass" panties, over tights, of course
(it's January!). Turn End Times into rear-end times.

Then there's the DAWN DIE-IN, "in memory of the
dead at the hands of Bush and his Administration."
Dying is sexy, if you're not really dead, but just
making a point: BUSH KILLS. One of the die-ers really
should act out Mel's Passion. Bush might not crucify
Jesus (though that first iconic tortured Abu Ghraib
detainee, with his arms outstretched, looked pretty
Christlike), but he'd certainly keep him imprisoned indefinitely
without any rights. And the torture? Well, let's just
say it would make an interesting sequel for those who
enjoyed the first Gibsonian Passion.

The theme may be Thanatos, but the Spirit of Eros
infuses any good protest--the drama, the costumes,
the excitement of marching together, laying your
body on the line, seducing hearts, minds and TV
cameras, and the potent possibility of going home
with that sexy fellow protestor later on...

Just remember the man whose birthday we celebrate
around this time, one of the greatest protesters
since Jesus, an American Man of Eros if ever there
was one: Martin Luther King.

3. PARTY

THIS is where we fight fire with fire. Sometimes fireworks.
Yes indeed, Brothers & Sisters, Party Animals and Blue Angels:
This is where we show ourselves and others that we don't

have to spend 40 million devalued dollaros to be the Party Masters of the World. This is where we reach out to one another to commune, comfort, collaborate and conspire, share knowledge and desire, information and aphrodisiacs, honoring Eros and our erotic resistance to the bullies and ninnies who give the Thumbs-Up (a kind of new Sieg Heil?) to Death, War, Torture, Born Again Censorship, Abstinence-Only Miseducation, Fleecing the Poor to Soften the Beds of the Rich, Creationism, Repression, Oppression, Regression, and did I mention Death?

This is where you hold your own Counter-Inaugural Party that celebrates all your favorite Blue Values that the President's Party is against (for examples of Blue Values worth celebrating, please see my column "Blue Values"). Charge admission and donate the profits to Tsunami Relief, or Iraqi War Victims, or the ACLU, or Sex Education, or the Bonobos. If you don't feel like throwing a Counter-Inaugural Party, get a friend to do it, or you may want to come to mine

Yes, indeed. Come one, come all or just come. Every year at this time, when the Planetoid 433 EROS is closest to Earth, I celebrate a holiday called EROS DAY. Introduced to me five years ago by pioneering erotic filmmaker Lasse Braun, I knew it was my kind of holiday, a celebration of love and lust with this intriguing astrophysical aspect. Every year, around January 22, the Planetoid Eros is at its closest distance to Earth. Does this mean that this is the time when some kind of astral sexual energy is closest to us? Perhaps.

Of course, our complex, neurotic human lives are ruled by far more than the stars and planetoids. It's not so simple to just point to a day on the calendar, and say that this is the day when we'll all be at our hottest. But if you believe that the positions of the Sun, Moon and other heavenly bodies have some influence over the tides and emotions of the Earth, if you believe in the power of Equinoxes and Solstices, then you might believe in the power of Eros, strongest when it is closest to us, on EROS DAY.

It certainly makes at least as much, if not a little more, sense to expect the erotic on EROS DAY than to, say, expect excitement or "resolution" on New Year's Eve, or romance on Valentine's Day, a date which commemorates the death of a Christian saint who believed celibacy was a virtue.
Halloween is kind of sexy because you get to dress up, but it's really for kids these days. Mardi Gras is hot, but it's never caught on outside New Orleans, and

Carnavale is so Brazil.

What truly adult holiday celebrates sex as the essence
of life, in the fullest, most unabashed, unapologetic,
orgiastic sense, AND boasts an astrophysical
component? EROS DAY! So, I make a point of celebrating
it every year, usually with a bunch of fellow Ethical Hedonist
types, always with plenty of whatever we find erotic
(bacchanalian works too) -- an art opening, a bar, music,
dance, fetish, perhaps a Commedia Erotica performance
of the Passion of Eros & Psyche, perhaps a speech and
a striptease. Some of my EROS DAY celebrations have
been more political than others. Actually, the more
Thanatos sinks His cold claws into America, the more
hotly political EROS DAY becomes.

EROS DAY 2005, coming in the wake of the Thanatoxic
Bush Inauguration, will be a Counter-Inaugural Ball
(in every fine sense of that word), a tribal revival crossed
with an orgy crossed with a private peace rally, a Celebration
of Love, Lust & the Blue Values we hold dear. As my
EROS DAY '05 co-host, internationally renowned digital
artist Laurence Gartel (whose work is in the permanent
collections of the Smithsonian Institution's Museum of
American History and the Bibliotheque Nationale in Paris),
emailed me, "I never get really political, but now I just
can't stop myself."

Don't stop yourself. Not now. Now is the time to release
your political art, prayers, protests and resistance
parties, while we've still got a few precious freedoms left.
As the Bushies hoist Thanatos to the top of their pyramid,
think of how you can topple that baby down. Think of how
you can honor Eros in your life. Then take it to the streets
(always with nonviolence, darling), or to the bedroom,
or to the EROS DAY Counter-Inaugurals, or take it to
your webcam. And don't let the Thanatoxic Brigade take
it away from you.

Yeah, I remember history classes in school. Always never
seemed to have enough time to cover from roughly the
end of WW2 to the present. And that was back in the
70's and 80's.

Im Hotep,

Keep up the high-minded conversations David.

I have to get away from these people regularly. I can take a few of these sick message by DX and others of similar ilk and then I have to move on for a few days. I'm glad to see someone here with some common sense though.

One of these days we may get some people in the white house like that. I'm not sure we have that amount of time before we get wiped off the face of the earth.

The Golden Rule says:

Do unto others as you would wish to be done by them.

So would we like the Middle East to treat us the same way we are treating them?

And remember we started this entire mess by Attacking Iraq in 1991, and putting sanctions on them which have killed nearly a million babies and children so far.

They are merely trying to defend themselves now.

Who deserves to be impeached and imprisoned the most?
A president receiving face from an adult willing female?

Or a president who lies to over 3,000,000,000 people worldwide and then orders the attack and destruction of hundreds of thousands of innocents, 1,200 American GI'S killed and over 25,000 injured?

Those of us who are not brain damaged, or racially biased the answer is obvious!

http://groups.yahoo.com/group/Nature_Knows_No_Color_Line/

Red Cross show how many innocent children have been destroyed by our sanction in Iraq.

Shocking isn't it! I'm as cheap as ever, but I couldn't resist trying these two radios. I have little doubt lengthly reviews will follow. After my long hiatus...

I just would like to add to J999W's post. The inverted L will also knock down alot of the background noise. The L will improve your reception, not matter it's length.
I use a 100 foot wire going from 10 foot high out 80 feet to a tree about 30 feet up,and then drops 20 feet at about a 120 degree angle. Fed with a 9:1 balun at the 10 foot end and grounded there also.

David,

Ask yourself if you have ever in the last five years heard a trained
psychologist, or psychiatrist give their opinion about how president
Shrub reasons, and looks at the world.

If not, why not?

Ask them privately. It' doesn't matter whether you ask a Republican
one, or a Democratic one, the answer is the same. go to some forums
where there are doctors who are highly trained in recognizing and
treating mental illness.

I've talked to several in person, and many online.

Hint: Their answer is horrifying!

He's a good seller......but you gotta remember a few things:

The seller lists an address in China as his contact info as listed in ebay's data base.

The merchandise is shipped from somewhere near Chicago at an excessive shipping rate.

I think that brochhi bulk ships the radio's to an operative in Chicago who could care less about customer service concerns and complaints. Brocchi sits overseas and rakes in the bucks....his operative probably keeps the profit from the high shipping charges. Just my guess.

Bottom line: We are buying radio's from these guys at about 50 cents on the dollar. Our risk is that of poor customer service for the amount of money saved.
I (and others) are more than willing to take this risk. I bought a BCL-2000 and a Degen 1103 from him and am very happy with the transaction....and the radio's.

Are you suffering from buyer's remorse?

Long but good article for all you SeeBS types.

http://www.worldtribune.com/worldtribune/05/breaking2453389.0680555557.html

All right, I've had enough. I am tired of reading distorted and grossly exaggerated stories from major news organizations about the "failures" in the war in Iraq. "The most trusted name in news" and a long list of others continue to misrepresent the scale of events in Iraq. Print and video journalists are covering only a fraction of the events in Iraq and, more often than not, the events they cover are only negative.

The inaccurate picture they paint has distorted the world view of the daily realities in Iraq. The result is a further erosion of international support for the United States' efforts there, and a strengthening of the insurgents' resolve and recruiting efforts while weakening our own. Through their incomplete, uninformed and unbalanced reporting, many members of the media covering the war in Iraq are aiding and abetting the enemy.....

Many 'members' of RRS are aiding and abetting the enemy too. I'm fairly certain that Homeland Security Forces are in the process of tracking them down, much like us having forces in Iran and various other places looking for potential targets.

The big day is coming, listen for the 'go' signal as broadcast by Yosemite Sam.

1479. IntelSat IS-804 has failed - HF monitoring opportunity...

Newsgroup: rec.radio.shortwave
Date: 2005-01-18 23:27:31 UTC
From: Mark <NoSpam@all.thanks>
Message-ID: <1106090813.169548@ftpsrv1>
Source record: 5478

IntelSat IS-804 failed on Saturday morning, NZ local time (around 23:00 UTC, Jan 15th.)

This satellite failure has affected more than one million people in the Pacific Islands, which is a lot of people in this part of the world.

Interesting, the New Zealand Herald is reporting that the Solomon Islands is relying on HF radio to communicate around the seven main islands in the group. So an opportunity to hear some Pacific activity that would not normally be active. Other island groups have also resorted to HF radio communication. Scott Base in Antartica also lost comms.

The satellite, worth 126 million NZ dollars, will be written off. So all the ground stations using it are being given a new bearing to an alternate satellite and they'll need to rotate their dish accordingly to get connected back to the rest of the world!

For those interested, here's the story online:
http://www.nzherald.co.nz/index.cfm?c_id=5&ObjectID=10007155

How can a psychiatrist or psychologist diagnose an individual they've
never examined?

Besides being inaccurate, it would be unethical, and a discredit to
their profession.

Huh? The western world is "engaging" with many regimes so as to make a
buck. Oh sorry, I mean to bring them on side re democracy and freedom.
Works great. It doesn't matter what the gov't ideology is as long as you
can make your money, though dictatorship apparently is the most efficient
to trade with. The problem is that not all dictators are "our dictators"
or turn into not being our's. Sadam was good, now he bad, Pinochet was
good (and apparently is still good to some), Norega was good, became bad,
Castro was never good though unless you're from the US the cigars are good
and the beaches are nice, Sukarno and Suharto were both good in their day,
Shah of Iran is good, Saudi Royal family is good, the apartheid regime in
South Africa was a grand bullwork against the commies (Mandela was
considered a commie, remember?). The other problem is that when people get
the idea of freedom and self determination they don't necessarily want what
the western world thinks they want.

A ROARING APPLAUSE!

Indeed few realize, thanks to the media, Kerry's dark and shady
relationships with the Communist Party.

17 January 2005
By Tom Pullar-Strecker

Radio New Zealand expects to step into the mainstream of online news publishing in February or March.

The state-owned broadcaster signalled in April that it planned to spend hundreds of thousands of dollars expanding its online presence and letting people listen to broadcasts at a time of their choosing over the web.

Chief executive Peter Cavanagh told a select committee that the website redevelopment was in its second phase and progress has been "wonderful".

Its revamped website will include online news, "some basic information about weather and finance" and "enriched information about programmes", he says.

This may include information that might be "some gateway to website links that our researchers have come across in producing programmes that we think our listeners might be interested in".

Mr Cavanagh says "audio-on-demand" will put the control of the radio schedule in the hands of the listener.

"I have very actively championed this project because I believe having a good, solid online service is now a fundamental part of core business for public service broadcasters.

"It is a bit unreasonable in this day and age when people are so time poor and they are under so much pressure to rely on them to be available to listen when we can broadcast programming live."

The audio-on-demand service is estimated to cost $259,000 to set up and $360,000 a year to run.

I've purchased 2 radios from him.
I got fast shipping, good products.
Prior to purchasing the second radio (a BCL2000)
I e-mailed and asked if he still shipped the English
labeled ones. I didn't get a reply... took a chance anyway,
and got a great working radio with English lettering on it.
Though my e-mail wasn't answered, others here have said
Brochhi answered all their e-mails.

Yea jd. But it's to bad that it's hurting the country. The media should be
put on trial for promoting negative propaganda against it's own country in
time of war. I wonder how many Iraqis have gone to the other side after
listening to our medias negative BS?

Message-ID: <Xns95E2CDE06A1D2SoliloquyTriesHarder@216.168.3.44>
Source record: 5490

"Lucky" <Lucky@TheBotStopsHere.com> wrote in
news:10upq9d1bum0t53@corp.supernews.com:

I suspect that you would not benefit from the acquisition of the FRG-100, unless you have the funding to do so for the experience. Having the choice of the Icom R-75 or the Yaesu FRG-100, I would rather have the Yaesu. BUT, since I have both, I cannot see a performance benefit from the Yaesu that you would benefit from by obtaining one.

As with most things in life, there are devotees, of which I am one (of the Yaesu).

Look here for the Picture: http://www.rigpix.com/yaesu/frg100.htm

Notice the lack of a Keypad. Not a problem for me. But some seem intimidated by its omission.

Boilerplate Description of features from
http://radioinfo.co.nz/frg100.htm

"Winning the prestigious 1992 World Radio TV handbook award for "Best Communications Receiver" when introduced is reason enough to make the FRG-100 your receiver. And if that's not enough, consider its industry-exclusive features like adjustable SSB carrier offset and user selectable 10 Hz, 100 Hz or 1 KHz tuning steps. Or the exciting broadcast band mode with 16 pre-programmed international broadcast bands. Even 50 memory channels and twin 12/24 hour clocks to keep you tuned in where and when you are - day or night. Additional standard features such as selectable AGC, noise blanker, all mode squelch, and RF attenuation provide the operator with the controls required for noisy and crowded band conditions. Join the experts and make the FRG-100 your "best communications receiver", too."

I also have the Yaesu FT-840 Transceiver. Interestingly enough, Yaesu in England says that it is no longer available. I am sure that the American Yaesu page will soon reflect this. Apparently they are restructuring their offerings. Fortunately for manufacturers, with many modern people, high performance is an obsession, even if the purchaser has no idea how to exploit the features fully.

Search for the book "The Psychology of everyday things" at Amazon. Here is a brief excerpt: "You would need an engineering degree from MIT to work this," someone once told me, shaking his head in puzzlement over his brand new digital watch."

The book relates how one individual became trapped in the atrium of a building when he entered. It seems that the doors had perfectly centered

horizontal bars to push on, and the doors also had invisible hinges. (They hold the glass by the top and bottom edges). When the man entered, he shifted to one side, and was pushing on the hinge side of the door. He did a 180 and tried to exit, but to no avail, since he was still pushing on the hinge side. He actually waited for someone else to enter the building then simply followed them.

I am sure that we have all walked into a door when the perceived functioning of the door misled us. How about those horizontal bars indicating the need to push mounted on the wrong side, so that they actually need to be pulled upon to open the door. Smash.

He also mentions a couple (man/woman thing of years gone by), that bought an elaborate Italian washer and drier combo. It had all the features, many different cycles offering optimum performance for various fabrics. He goes on to say that this couple was ecstatic if they were even able to turn the units on, and they eventually used them in their simplest forms, not justifying the expense for their purchase.

The smallest phone with tiny LCD screens sell. Conversely, the biggest Plasma screen TVs sell. We want the perceived "best of the best". This will liquidate such items as the FRG-100 in favor of the Yaesu VR-5000. "http://www.universal-radio.com/catalog/widerxvr/0050.html"

Having had my fill with intermodulation interference from the various cell and paging towers close to my house (with wideband scanners), I feel that keeping the design more specific is better. I don't believe that the VR-5000 will offer the Shortwave performance of the FRG-100, simply since the VR-5000 is VERY wide band. But look at it, all those buttons and multipurpose LCD screens. I believe that people increasingly opt for all the bells and whistles, and pay less attention to performance.

Soliloquy.

> can. =)

No, Judah, you missed the point. With that same tight budget and waiting a few weeks or months, you could have bought a radio with eye-popping performance compared to what you have. Patience, sir, would have paid off manyfold in this case.

And perhaps it still could: You could get a used SW-8 or an ICOM R-75 or even a Grundig Sat-800 by just waiting a few months and spending $400 or $500. I *guarantee* you that if you do that, you'll not be disappointed.

You could even get computer controlled radios that are "black boxes" or plug into a computer slot in that price range that'll run rings around the aforementioned radios.

As to why I should give a flip about how your spend your money... it saddens me when someone with such enthusiasm and a limited budget really cheats themselves out a great experience, repeatedly.

Different information than we are getting from AFRTS.. they're telling us
now that Intelsat is either fixing the bird somehow, or moving another bird
into that orbit, and that everything will be back online within a week.

Update as of January 18, 2005, 1200 PST

According to AFRTS, the satellite owner/operator continues to work on
restoring full AFRTS/AFN service to the Pacific region. There are also a
million people on Pacific islands without international phone, radio and TV.

Thanks to the great efforts of the Pacific-region AFN affiliates, outlets
and network commands, the only areas totally without TV service are off-base
in Tokyo and Sasebo. The only areas totally without AFN TV service are
off-base in Tokyo and Sasebo. Other areas are being provided over-the-air
TV for off-base personnel. Everyone on-base should have three TV channels
now (AFN Prime, AFN News, and AFN Sports).

The estimated restoration of all AFRTS/AFN satellite services for on-base
personnel is 48 to 72 hours; total restoration of our direct-to-home (DTH)

service is at least one week away.

Pacific DTS television schedules are available in excel spreadsheet format at
http://myafn.dodmedia.osd.mil/tv/assets/Dts15Jan.xls

What happened to my AFN service in Japan/Korea?

AFN/AFRTS primary service has been knocked-out by the loss of a major international communications satellite (INTELSAT 804) that serves our Japan/Korea/China audience. This is the first time in the 40-year history of our satellite-service provider that they have totally lost a satellite!

We're awaiting a solution from the satellite operator/owner that will restore all AFRTS/AFN services to our customers in Japan, South Korea, and Eastern China. We'll post any information we get on the bulletin board at myafn.net.

If you need to speak with AFN technologists, you can call them at 951.413.2339. However, please understand they'll be quite busy dealing with other customers who haven't found our website.

televisual fairyland: The US media is disciplined by corporate America into promoting the Republican (Neo-Con) cause

London Guardian | Jan 18 2005

On Thursday, the fairy king of fairyland will be recrowned. He was elected on a platform suspended in midair by the power of imagination. He is the leader of a band of men who walk through ghostly realms unvisited by reality. And he remains the most powerful person on earth.
How did this happen? How did a fantasy president from a world of make believe come to govern a country whose power was built on hard-headed materialism? To find out, take a look at two squalid little stories which have been concluded over the past 10 days.

The first involves the broadcaster CBS. In September, its 60 Minutes programme ran an investigation into how George Bush avoided the Vietnam draft. It produced memos which appeared to show that his squadron commander in the Texas National Guard had been persuaded to "sugarcoat" his service record. The programme's allegations were immediately and convincingly refuted: Republicans were able to point to evidence suggesting the memos had been faked. Last week, following an inquiry into the programme, the producer was sacked, and three CBS executives were forced to resign.

The incident couldn't have been more helpful to Bush. Though there is no question that he managed to avoid serving in Vietnam, the collapse of CBS's story suggested that all the allegations made about his war record were false, and the issue dropped out of the news. CBS was furiously denounced by the rightwing pundits, with the result that between then and the election, hardly any broadcaster dared to criticise George Bush. Mary Mapes, the producer whom CBS fired, was the network's most effective investigative journalist: she was the person who helped bring the Abu Ghraib photos to public attention. If the memos were faked, the forger was either a moron or a very smart operator.

It's true, of course, that CBS should have taken more care. But I think it is safe to assume that if the network had instead broadcast unsustainable allegations about John Kerry, none of its executives would now be looking for work. How many people have lost their jobs, at CBS or anywhere else, for repeating bogus stories released by the Swift Boat Veterans for Truth about Kerry's record in Vietnam? How many were sacked for misreporting the Jessica Lynch affair? Or for claiming that Saddam Hussein had an active nuclear weapons programme in 2003? Or that he was buying uranium from

Niger, or using mobile biological weapons labs, or had a hand in 9/11? How many people were sacked, during Clinton's presidency, for broadcasting outright lies about the Whitewater affair? The answer, in all cases, is none.
You can say what you like in the US media, as long as it helps a Republican president. But slip up once while questioning him, and you will be torn to shreds. Even the most grovelling affirmations of loyalty won't help. The presenter of 60 Minutes, Dan Rather, is the man who once told his audience" "George Bush is the president, he makes the decisions and, you know, as just one American, he wants me to line up, just tell me where." CBS is owned by the conglomerate Viacom, whose chairman told reporters: "We believe the election of a Republican administration is better for our company." But for Fox News and the shockjocks syndicated by Clear Channel, Rather's faltering attempt at investigative journalism is further evidence of "a liberal media conspiracy".

This is not the first time something like this has happened. In 1998, CNN made a programme which claimed that, during the Vietnam war, US special forces dropped sarin gas on defectors who had fled to Laos. In this case, there was plenty of evidence to support the story. But after four weeks of furious denunciations, the network's owner, Ted Turner, publicly apologised in terms you would expect to hear during a show trial in North Korea: "I'll take my shirt off and beat myself bloody on the back." CNN had erred, he said, by broadcasting the allegations when "we didn't have evidence beyond a reasonable doubt". As the website wsws.org has pointed out, it's hard to think of a single investigative story - Watergate, the My Lai massacre, Britain's arms to Iraq scandal - which could have been proved at the time by journalists "beyond a reasonable doubt". But Turner did what was demanded of him, with the result that, in media fairyland, the atrocity is now deemed not to have happened.

The other squalid little story broke three days before the CBS people were sacked. A US newspaper discovered that Armstrong Williams, a television presenter who (among other jobs) had a weekly slot on a syndicated TV show called America's Black Forum, had secretly signed a $240,000 contract with the US Department of Education. The contract required him "to regularly comment" on George Bush's education bill "during the course of his broadcasts" and to ensure that "Secretary Paige [the education secretary] and other department officials shall have the option of appearing from time to time as studio guests".

It's hard to see why the administration bothered to pay him. Williams has described as his "mentors" Lee Atwater - the man who, under Reagan's presidency, brought a new viciousness to Republican campaigning - and the segregationist senator Strom Thurmond. His broadcasting career has been dedicated to promoting extreme Republican causes and attacking civil rights campaigns.

What makes this story interesting is that the show he worked on was founded, in 1977, by the radical black activists Glen Ford and Peter Gamble, to "allow black reporters to hold politicians and activists of all

persuasions accountable to black people". They sold their shares in 1980, and the programme was later bought by the Uniworld Group. With Williams's help, the new owners have reversed its politics, and turned it into a recruitment vehicle for the Republican party. Williams appears to have been taking money for doing what he was doing anyway.

These stories, in other words, are illustrations of the ways in which the US media is disciplined by corporate America. In the first case the other corporate broadcasters joined forces to punish a dissenter in their ranks. In the second case a corporation captured what was once a dissenting programme and turned it into another means of engineering conformity.

The role of the media corporations in the US is similar to that of repressive state regimes elsewhere: they decide what the public will and won't be allowed to hear, and either punish or recruit the social deviants who insist on telling a different story. The journalists they employ do what almost all journalists working under repressive regimes do: they internalise the demands of the censor, and understand, before anyone has told them, what is permissible and what is not.

So, when they are faced with a choice between a fable which helps the Republicans, and a reality which hurts them, they choose the fable. As their fantasies accumulate, the story they tell about the world veers further and further from reality. Anyone who tries to bring the people back down to earth is denounced as a traitor and a fantasist. And anyone who seeks to become president must first learn to live in fairyland.

How could it be otherwise? The TV networks are owned and operated by
Republicans. You might have some Democratic reporters, but they know
they can't tell the truth without getting fired.

"Freedom of the press belongs to the man who owns one."
~ A.J. Liebling

Ironically, public broadcasting is the freest media, even if in theory
you would think they would do exactly as their government masters
demanded or else face funding cuts.

Coming along is indy media. Technology will make it possible for
anyone to put out a 1 hour TV show each week with only $1K in
equipment costs and perhaps $25 a month in Internet access. The TV
will be HDTV quality video and sound. See
http://mindprod.com/jgloss/bittorrent.html

On demand viewing with hundreds of thousands of shows to choose from
all over the globe will shake things up.

"Never in human history have such genocide and cruelty been witnessed.
Such a genocide was never seen in the time of the pharaohs nor of Hitler
nor of Mussolini."
~ Mehmet Elkatmi, head of Turkish parliament's human rights commission
on Bush's atrocities in the Iraq war.

I've lost track of posted what, but CPB is a real threat to our freedom!
Paranoid? Perhaps, but CPB controls NPR, and NPR has de-facto control of many
stations across the country. The recent edict that NPR stations should drop (or
greatly reduce) music programming is but the first step.
CPB also controls most NTIA grants for new and upgraded facilities, and CPB
"consults" the FCC on policy.
I worked (as a paid staffer) at a Pacifica station many years ago. We were
afraid of NPR, but they NEEDED to silence us; money was the stick. We were
always underfunded (and we were unpaid or late-paid 20% of the time), but
resisted the federal $.
I'm sad to say that Pacifica stations nowadays are NPR semi-affiliates.
The LPFM program was the most exciting thing to happen to radio in a long time,
but to satisfy NPR/CPB and the commercial broadcasters the FCC invoked
"special" rules that made it more difficult to apply for a local station, and
if you did apply, the standards were far higher than any other applicants had
to overcome. I helped a local group file for an LPFM, but because of a typo on
a POBox which was different in two different places on the application, the

commission threw us out. On a technicality. Of course the nearby NPR was able to file for a higher power translator on "OUR" frequency several months later. Let's face it, the sytem sucks, and our only hope is the Internet, but it is dependent on widespread use. I fear the commercial broadcasters and NPR will overload it with their shit.

> enemy.....................

Crap. There never really was international support for the U.S. "effort",
unless you count all the little token forces from little countries who just
wanted to suck up to big brother. The insurgents don't need the media, they
need the hearts and minds of the people. And they have a fairly big
following.

The world view was formed by an adventurous US deciding it doesn't give good
god damn about world opinion and going unilateral. Has nothing to do with
the media. Nothing. Has nothing to do with the terror attacks of 11 Sept.
Nothing. But there's no room for debate with the "I support the troops","I
support the president" crowd in your country, who suggest that anything
contrary to the party line is treasonous. On an individual or small group
basis, the world really likes Americans. As a country, you scare the living
bejesus out of the rest of the world.

As for the positive news from Iraq, I'd sure like to hear some. But there
ain't any. Unless you count the completed oil pipeline from the north, the
Halliburton contract and other economic 'good news'. Let's see how the
fako election goes. The US will eventually pull out, then the civil war
will get going.

Jebus H. Christ, this is supposed to be a respected newspaper? I am no fan of Dubya -- quite the opposite, in fact -- but this kind of shit is pure yellow journalism, and is only worthy of lining bird cages.

(It's bad enough we have 4 more years of this pres., but we have to now put up with 4 more years of utter slanted gibberish, too... christ.)

You would rather have the 100 then the R-75?? Why? I think the R75 is a superb radio for the money. How could the 100 edge it out?

Lucky

That's a very good attitude. I wish more people had it. The fun factor is there, no matter what you use. It's getting the most out of what you use that really counts. Messing around with antennas and things is half the fun.

I'm listening in southwestern Missouri. I remember hearing this on a
portable several years ago- is it very common? I don't usually scan through
8mHz much. The numbers are loud and clear on R75 with 80ft. random wire and
balun.

Well, those guys went on to bad mouth every country South and West of Belize. Then the geniuses discussed how to dump used oil in garbage containers without getting caught. That's pretty idiotic.

The blue eye colour comment came into the picture because the person talking said he was at extra risk of death because of having them.

This group probably planned the Iraq invasion. They certainly have the brain power.

.
.
CHAS,
.
1. Use a YARD ARM (Two Feet to a Yard Long) at the point on
the Tower that your Dipole is going to be suspended.
1.1 - Use an Anchor Stack at the point on the ground that is
directly under the Tip of the Yard Arm to Secure the Coax Cable
and maintain a uniform Clearance (Space) away from the Tower.
.
2. Instead of single Rope going through the Pully to the Head Unit
(Center Piece) of the Dipole: Use a "Loop" (Two) of Rope so that
when you lower the Dipoles Head Unit; you can lower the Head Unit
at an Angle away from the Tower and 'clear' of the Guide Wires.
.
NOTE - Loosen and Lower the Ends of the Dipole before you lower
the Head Unit (Center Piece) of the Dipole.
.
.
yes it is as simple as that - iane ~ RHF
.
.

Source record: 5429

Group,

I have a LineX FM transmitter that runs via computer USB port. I use it to retransmit programming from the computer, works well but the signal was low.

I busted into the thing and found that the "antenna" was a coil of insulated wire. I cut this out and installed a F connector, and now run a dipole connected via short coax. The signal improvement in the shack (as measured by Icom R-7000 RX) is about 35 dB! Plenty of signal to reach across the yard now. Range is about one block. It would be better on a clear channel, but the channel choices are the few at the top of the band which is pretty busy in my neighborhood.

1532. Re: Halliburton wins gas contract in Iran

Newsgroup: rec.radio.shortwave
Date: 2005-01-19 13:20:30 UTC
From: tianli <look@china.org>
Message-ID: <10usnpe5jqk7s62@corp.supernews.com>
Source record: 5432

Iran has an estimated 26.6 trillion-cubic-meter gas reservoir, the second largest in the world.

One of China's four major state oil companies - the Sinopec Group, is being invited to prepare a master plan for the development of the giant Yadavaran gas field. This means a comprehensive development, including exploration and drilling, petrochemical and gas industries, pipelines and other services.

In return, Sinopec Group will buy 250 million tonnes of Iranian liquefied natural gas (LNG) over 25 years. The deal, outlined in an Oct. 28 memorandum of understanding between the two sides, is the largest Iran has signed since 1996.

The Yadavaran deal could well be worth between 70 to 100 billion U.S. dollars and could help propel Sinopec into the ranks of the major oil players.

Believe it or not, there are still mainland Chinese who have no knowledge of the Tiananmen massacre and do not believe it had occurred. So deep does the Party propaganda machine drill. I have had to show recent arrivals this video in order to convince them of the truth. It is truly a remarkable and very graphic piece of work.

dxAce, you should have it converted and posted on the internet so all can listen to a very important piece of history.

Tiananmen = [translated] Gate of Heavenly Peace

Ironic!

I've only heard a few minutes of "Dr. Laura" but from what I can gather she runs a call in show where people explain their troubles and ask for advice.

A quick check on her web page indicates she does have a doctorate degree in physiology, and a certificate in marriage and family counseling. But she's not a psychiatrist or a psychologist. She's not qualified to make

a medical diagnosis, and in the limited time I've heard her program, she didn't give one.

But at least she talks with the people she's giving advice to.

Not sure I understand your snide comment. Both mint and collector quality are vague descriptions and it's up to buyer and seller to reach an understanding about the specific condition of the radio. It looks pretty good to me.

I think that it is unrealistic to expect any 30 year old shortwave radio will be perfect.

The key with this sale as others is the reputation of the seller. While I don't know Mr. Atkins personally, I do know of him by reputation within the hobby. My knowlege of him goes back to when Fine Tuning released it's Proceedings.

Sorry the comment came across as "snide". Not my intention at all.
My message was meant to inform. The term "collector quality" does
not mean mint or new. Sounds like it - but it doesn't. Just wanted
people to be aware of that. Also, your statement: "I think that it
is unrealistic to expect and 30 year old shortwave radio will be
perfect" is ridiculous. There are plenty of "old", perfect radios
and they demand a lot of cash as they should. Also, the term mint or
like new should be the same for a 30yr old radio as it is for a 1 year
old radio. I can tell by your message that you'd advertise an older
radio as like new and then when your buyer received it you'd say:
"Well it's like new for a 30 year old radio". Whoa, that's where the
argument starts. And you'd be wrong.

Well I do appreciate your concern. :) And at some point I will roll
up into a more expensive radio. But for now I really am happy with the
radios I'm playing with. (the onld saying, you don't know what your
missing) hehehe. I play around alot with making antennas, and such.
Built myself a broomstick antenna just for fun a while back. It was
fun. Also I modded my DX-394, and made it much more selective. And
improved the audio. Based off some comments I got of the NET. It
sounds alot better now and I really like it. Someday I would love to
own a DRAKE SUCH & SUCH. But for now I'm happy with what I have.

But thanks.

That's how I feel. This is the kind of hobby you can have fun with, even with very humble equipment. Lets be honest, most of you guys. Who are quite a bit older than me (28 years old) started with very humble LOW TECH radios. Radios that would make some of the Chinese made portables looks like a drake by comparison. hehehehe. I mean compared to some of the old radios like the DX-150's and such are so low tech it hurts. In fact I have one.....and it is fun, but most modern portables would smoke it. So really even on my humble budget, I'm light years ahead of the same radio listener with the same budget....30-40 years ago. To me I really have a lot of fun with my radios. And make antenna, I have started getting stuff mailed to me from the various stations I listen to. Which is really cool. I even got one of my reviews picked up by Radio Intel.com, which was kind of kewl. People like to dog my equipment, but I don't care, I'm enjoying the hobby....and to me that's what its all about. Someone might have bigger, better toys - but are they having as much fun. That's what they need to ask themselves.

Yes, I agree there should not be a new and old standard for the term mint. Actually, I have seen very few 30 year old radios that meet the dictionary definition "as if new". Mint should mean new, as it was minted or produced at the factory. For a 30 year old radio to be in that cosmetic condition it would have been boxed up and not used. Very few popularly priced radios were accorded that treatment. They were used, and rightfully so. Time does take a toll on electronic and mechanical components even when not used, so a perfect looking radio may have difficulties when plugged in. There are however lots of used radios for sale that are in good to very nice condition.

Most mint-in-the-box radios I have seen for sale are in fact nice looking packages the seller has put together. A very nice radio, the box and the instructions were all acquired separately and married.

Descriptives like Mint, Collector Condition, New Old Stock, Pristine are all imprecise and open to interpretation by buyer and seller. That's why it's important to ask lots of specific questions before buying and walk away from deals when the right answers are not forthcoming.

I agree - I had the FRG-100, and the R75 runs circles around it, even unmodded. The FRG-100 had very muffled, deep audio (for which there are mods available if you can solder), difficult to understand except on very strong signals, and few of the helpful gizmoes for reception that the R75 has. I can hear more, and more easily, on the R75.

JP,

When All Is Said and Done {Written}.
.
For the casual Shortwave Radio Listener; the Inverted "L" Antenna
is easy to visualize and conceive of building.
.
READ - The 'simple' Answer (in most cases) is the
Low Noise Inverted "L" Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1785
.
When properly laid-out, arranged and constructed;
the Inverted "L" Antenna provides a relatively 'low noise'
"Omni-Directional" Shortwave Listener's (SWL) Antenna.
.
READ - The Inverted "L" Antenna - It's 'basic' Lay-Out
and Structure {Why It Works}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1969
.
For the 'non-technical' Shortwave Listener the Inverted
"L" Antenna meets the "KISAP" Test and that is good.
KISAP = Keep-It-Simple And Practical [.]

TIP - For those who do not wish to go through the process
of building their own Inverted "L" Antenna; they can buy a
pre-build Random {LongWire} Wire Antenna and configure it
as an Inverted "L" Antenna - Two come to mind:

READ - Par EF-SWL End-Fed Shortwave Antenna configured
as an Inverted "L" Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1562
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1711
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1717

READ - High-Z Shortwave Longwire Antenna with Matching Transformer
(MLB) and SO-239 Connector
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1659
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1709

.
I applaud your level of technical expertise and the mastery
of the subject of Antennas. But for many casual Shortwave
Listeners; it is a burden of knowledge that they do not wish to
acquire; just to simply Listen and Enjoy their Radios a little
better.

READ - Inverted "L' Antenna Reading List

DX-394 & QF-1A Package

Radio Shack DX-394 Receiver

Copy of manual downloaded from support.radioshack.com, normal wear & tear,
few scratches.

All controls operate, no modifications, no antenna

Autek Research QF-1A SSB/CW/AM Filter

Excellent condition.

Copy of instructions & schematic (4 pages)

Photos at:

http://home.nc.rr.com/gpbrown/radios/Page1.html

$190 for the package, delivered in the 48 states

Bank draft or postal MO, only

You are wrong David. I'm in complete charge and control of what I read in the news group and if you decide to make it a religious forum I'm putting you in the kill file along with the other people that argue with you. After today if you don't stop you are gone as far as I'm concerned along with others posting the same stuff.

That's it. Make your choice.

I agree with all that you wrote except for that last sentence.

Every location is a different situation and so generalizations can be
made about antenna type, radials or ground performance but there are no
absolutes here. What is better in one place will not necessarily be
better in another. Likely yes, but not necessarily.

Some locations may be far better off with a counterpoise of some type rather than depending on RF ground return through the radio and mains supply, which is all that is left if that one ground rod the BALUN is connected to is not up to the job.

As one example if you have good ground conductivity then that one rod might be all you need but if ground conductivity is poor then a radial or radials will make an improvement. You can always lay wires on the ground and see if they help. If they do then you can go through the trouble to make them perminent.

Any type of single element antenna (unbalanced) requires a good RF ground to be effective. The RF ground is the other half of the antenna.

170 British pounds = $318 US dollars.

The power supply needs to be RF quiet along with providing the required power to the loop.

If the unit uses a interconnect box so that the coax carries both RF and DC to power the loop make sure you get those connections right or you will sent that DC into the radio input instead.

Looking forward to the review. Hope it meets your expectations.

Source record: 5565

I have 2 R2000s and a DX398. Radios not known for their wide
danamic range. I use a ~70' wire antenna, with a 9:1 tranformer,
(with another 1:1 for ground noise isolation) and I have very little
problem with overload. A ham who operates at(or beyond) legal
power lives about 2 miles form me and when he fires up, I do
have to leave the band he is operating on. But I used to own a
R390/URR and a R392/URR and both suffered the same problem.
I borrowed a R5000, and a PCR1000 and the R5000 was
slightly better. The PCR1000 was a POS joke. The DSP was nice,
but I guess I'm a "horse drawn man", and a radio must have knobs.
My Heath GR64 doesn't have any overload issuses, but given it
is a deaf as a post, I am not shocked.

I supect that with a decent antenna, a good matching overload
maybe on over blown issue.

I agree with that. While only some "incomplete" (unbalanced wire) antennas
can radiate without a good RF ground, all antennas can receive with no RF
ground at all. But some receivers can benefit from better ground than the
AC-grounded case of the radio provides. Noise limiting is one reason we do
try to improve both the DC and RF ground capabilities of the coax-shield to
improve this possibility, agreed.

I am as uncouth as the next guy, but I figure
there may be nice and decent people here.
My wife say's there are times I am worse
then a salior. Mainly when I have to work
on any plumbing problem. God Ihate
plumbing.
The new station is running one of my favorites,
"Almost Cut My Hhair".
Almost as much fun as when I got my first R2000 and
my wife and I went to the Red River Gorge (about 100
miles southeast of here. And the very first thing I received
was Niel Yong's Cover of Ian Tyson's "Four Strong Winds".
It was on CFRB.
Iran Man Radio just SO at 17:38.
Too damn bad I didn't get my newly rewired system
to record it! I missed the address!
I am using ne R2000 for WWV,,,, which will go to the left
and the other R2000 to hunt. This way I can assign accurate
times later!
I am still rewiring the desk to include the new R2000.
Some bugs and operator head clogs to deal with.
Someone esle is tuning up. 17:40
Terry.

1568. SSB in DX-398

Newsgroup: rec.radio.shortwave
Date: 2005-01-22 22:46:55 UTC
From: "Scott A." <scotta316.nospam@verizon.net>
Message-ID: <Xns95E6B4E209C60mamacasscom@199.45.49.11>
Source record: 5568

I have a Radio Shack DX-398 that I bought in '97 or '98. Whenever I try to listen to anything in either usb or lsb, it sounds sort of like the chipmunks. The pitch just sounds wrong and unintelligable.

I don't have a lot of experience with swl, so I don't know if this is normal or not. I would expect normal AM broadcasts to be distorted, but signals that I'm sure are ssb also sound bad.

(This problem comes to mind now because I was attempting to pick up the pirate broadcast on 6925 mentioned on this newsgroup just a few minutes ago, which I'm pretty sure is usb. I can pick it up. I even recognized the old David Crosby song they were playing. But it's still un-intelligable.)

1569. Re: SSB in DX-398
